## QUALITY ENGINEER

Rapidly growing Midwest based company seeks a Quality Engineer for addition to its operations in Wixom, Michigan, just outside of Detroit.

Job duties will involved a broad range of quality engineering activities oriented towards developing robust machine, process & product quality control programs, and problem solving activities focused on improving the quality of rapidly expanding new product lines.

The position requires the ability to work closely with manufacturing, quality & technical personnel on a variety of strategic issues involving customer contact & development of new business. The ideal candidate would be well versed in the complete range of quality disciplines (PPAP, FMEA, CP, procedure writing) and possess strong computer & computer based control systems skills. Degree is not mandatory, but documented experience with the design & management of control systems for automated vision systems would be a plus.

We offer excellent working conditions, a supportive, team-oriented environment, excellent benefits, and the chance to become a key contributor in a rapidly expanding business environment.

**Interested candidates should fax resume along with current salary status to the attention of Carly at (248) 668-6848**

Submissions without current salary status will not be considered.
