A scenic view of an Oakland University campus. In the foreground, there are branches with pink cherry blossoms and green leaves. In the background, a large brick university building with multiple stories and many windows is visible. A pond with a small fountain is in the middle ground, reflecting the sky and the building. The sky is clear and blue.

50 BEST VALUE ENGINEERING SCHOOLS

By Iris Stone

When you graduate from college, where do you see yourself? More importantly, where do you *want* to see yourself? Moving back in with your parents and struggling to get interviews, or signing a lease on your new apartment after landing a high-paying job? If you want to secure the latter (and we assume you do) then you need to major in engineering. Really, it is nearly that simple.
