

CONTRIBUTORS

Gordon Shepherd is a Professor of Sociology at the University of Central Arkansas. **Gary Shepherd**, Gordon's twin brother, is currently chair of the Department of Sociology and Anthropology. Both brothers have shared a research interest in the sociology of religion and have collaborated on a number of projects in this area. Most recently, they have co-authored a book, *Mormon Passage*, published by the University of Illinois Press.

Karen A. Morgante is a 1999 graduate of Oakland University with a major in Art History and received the 1999 Undergraduate Distinguished Achievement Award. She previously obtained a degree from Oakland in Secondary Education as well.

Tadeusz Malinski is Professor of Chemistry, and was nominated for the 1998 Nobel Prize for his work on nitric oxide. In addition, he is an expert in art restoration, and an avid collector of 17th century Dutch and Flemish paintings.

Jane Donahue Eberwein, Professor of English, has taught American literature at Oakland University since 1969. Author of *DICKINSON: STRATEGIES OF LIMITATION* and editor of *AN EMILY DICKINSON ENCYCLOPEDIA*, she has written numerous articles on New England writers from Anne Bradstreet through Robert Frost.

Frances C. Jackson is an Associate Professor in the School of Nursing. She is past president of the Michigan Hospice Nursing Association and currently serves as its Director of Nursing Research. She is also on the Clinical Advisory Board of the William Beaumont Hospice Program. She has meshed nursing and counseling skills to provide care to the terminally ill and their families.

Stephanie Schim, Ph.D., RN, is a Nurse Scholar at Henry Ford Health Systems.

Sonia Duffy, Ph.D., RN, is a researcher for Veterans Administration Hospital of Ann Arbor and works in the Research and Development office. She has been active in hospice research for many years.

Alice Tombouliau is a charter faculty wife, and has enjoyed a career in public service and environmental consulting. Currently she is an

elected member of the Oakland Township Park Commission and a board member of the Oakland Land Conservancy. **Paul Tomboulian** is a charter faculty member of the Oakland University (MSUO) chemistry department. He served as department chair for 37 years, and is currently director of the Environmental Health Programs.

Dick Goody studied art in England at the Bath Academy of Art and the Slade School of Fine Art. He has taught painting at Wayne State University, and now teaches drawing, painting, and historic painting techniques at Oakland. His paintings have been widely exhibited in the Detroit area. Most recently his exhibition, *Biography & Fragmentation*, was held in the Meadowbrook Art Gallery.

Richard B. Stamps is Associate Professor of Anthropology. He was trained as an anthropologist/archaeologist and approaches whatever subjects he studies in a holistic, cross-cultural, participant-observer, and interdisciplinary manner. He teaches courses in anthropology, archaeology and Chinese Area Studies. He is very concerned about preserving the past for future generations.

David R. Maines is a Professor in the Department of Sociology and Anthropology where he teaches in the areas of urban sociology and stratification. His work has focused on developing a narrative sociology, and in recent years he has been studying the Archdiocese of Detroit. When not writing or teaching, he plays pool with Mike and putters around the house with Linda.

Abraham R. Liboff, Professor of Physics, former chair of the Department, and frustrated English major, writes essays and plays as a hobby. His research interest centers on the effects of low frequency magnetic fields on living systems, notably the central nervous system. His most recent professional contribution, soon to be published, is a new model that attempts to explain the magnetic compass in birds.

Sherman T. Folland is Associate Professor of Economics and a member of the faculty since 1986. He focuses his research on the subfield of health economics, in which he is the co-author of one of the leading textbooks, and is a contributor to the central journals. His side interest has been to determine whether people experience a “neighborhood effect” when living in the vicinity of a nuclear power reactor.

Kenneth R. Hightower is Professor of Biomedical Sciences at the Eye Research Institute. He came to Oakland in 1974 as a postdoc-

toral student for V.E. Kinsey. His research has centered on pathology of cellular aging and its role in maturity onset cataract, a disease of vision worldwide. The role of calcium and oxidation has been the primary focus for the last ten years.

Jeff C. Vande Zande is the Tutor Coordinator in the Academic Skills Center. His poems have appeared in *College English*, *The Bridge*, *Passages North*, and the *Green Hills Literary Lantern*, among others.

Chris Brockman is a 1971 graduate of Oakland University with a BA in philosophy. He also has an MA in English from Eastern Michigan University. He is currently an instructor for the Job Corps and for Vance-Granville (NC) Community College.
