## Balaji Rajagopalan

Balaji Rajagopalan, as a young scholar, has already published ten articles, made 23 conference presentations, and has been guest editor for a special edition of a scholarly journal.

Rajagopalan, assistant professor of management information systems, has shown a capacity for productive collaborative work with colleagues in the field of information sciences. His research interests in the broader and more effective use of data mining, modeling user resistance to the implementation of information systems, information technology investment behavior, and training for implementing large integrated systems have important implications in our complex world.

### SUMMARY

Balaji Rajagopalan, as a young scholar, has already published ten articles, made 23 conference presentations, and has been guest editor for a special edition of a scholarly journal.
