

Blaze Breaks Out on Carrier

AP Wirephoto

FIGHT WASP FIRE—Crew members aboard the USS Wasp, on maneuvers 250 miles off the Virginia coast prepare to push overboard part of a helicopter that started a fire Tuesday. A tape recorder, rigged as a joke to listen to officers playing cribbage, recorded the blast and

the reaction of the men on the scene. It is being studied by a Navy investigation board now. Damage from the fire might run as high as \$5 million, say sources at the naval base. Two crewmen killed and 28 injured.

All in Nation to Back Strike?

Union Eyes Steel 'War'

Elephant Stampede Kills, Maims

KANDY, Ceylon (AP)—A madened temple elephant charged a crowd of 200,000 at a religious festival Wednesday night. Twenty persons were reported killed in the crush and thousands injured. Several persons were reported missing. It was feared some had fallen or jumped into Kandy Lake nearby.

The elephant was one of more than 100 participating with dancers and drummers in an annual Buddhist pageant called Perahera.

The animal became infuriated when it stepped on burning coals which had dropped from a flaming torch. It wheeled about and charged, and the crowd ran screaming in panic, seeking shelter in nearby buildings, atop walls and in trees.

Police finally shot and killed the animal on the street.

The Perahera pageant centered on the Temple of the Holy Tooth, one of Buddhism's most sacred spots. The temple houses a tooth supposed to have come from the jaw of Buddha, who founded the religion 25 centuries ago.

The temple is in one of Kandy's business sectors, surrounded by shops and near the popular Queen's Hotel.

A similar incident occurred during a Buddhist procession five days ago near Colombo and 100 persons were injured.

'60 Pontiac Daring, Bold, Restyled for New Challenge

Pontiac Motor Division—not willing to rest on its laurels after one of its best years in history—today let newsmen take a peek at its completely restyled "fresh point of view" 1960 automobile.

Announcing the bold, new automobile at a preview in Detroit, Semon E. Knudsen, division general manager and General Motors Corp. vice president, said, "It took courage to implement a belief that Americans are insatiable for newness and change."

The 1960 Pontiac car was unveiled at an afternoon showing at the Masonic Temple as the division was closing out a year which has seen it capture first place in the medium price field and second place in General Motors.

Believing that 1960 will be even better, and will cap off a steady climb in engineering genius "build-up" which began in 1957, Knudsen said when the motoring public sees the 1960 models — "their feeling about Pontiac's competitive superiority will become conviction."

Details of the new car won't be released to the public until showrooms have it in a month or so. Text of Knudsen's address follows:

From the conversations I've had with many of you—there are two stories I know you want. First—the story of the '60—and second—an explanation for our sales increase of 1959.

The best way to give you both is to link them—sketch them in perspective — and describe the whole in terms of its parts.

As you know—we have finished our 1959 model production run. You can begin to chart the kind of year 1959 is turning out to be. We've produced 383,320 automobiles to occupy 1st place in the medium price field and 2nd place in General Motors.

Pontiac dealers in July sold 35,518 automobiles—a 10 per cent increase over the July figure of a year ago. Our own 10-month model year sales figures show 316,320 cars sold up to Aug. 1st—a gain of 70 per cent over a similar period for '58.

80 MILLION EXPERTS
Since there are 80 million drivers in the United States—there are 80 million experts on cars and just about the same number of authorities on the industry who can tell you why Pontiac sold

Worst Heat Is Yet to Come, No Relief Seen

5 a.m. .69 10 a.m. .82
7 a.m. .69 Noon .87
9 a.m. .78 1 p.m. .89

So you think it's been hot? You haven't seen anything yet.

The heat is just on-the-way, with the worst yet to come.

Right now, the mercury is soaring higher and higher. Sometime this afternoon, the thermometer will show a blistering 90 degrees. And the weatherman offers no relief.

It will climb to 93 tomorrow. Tonight when you try to sleep, the weather will be warm and humid. A low of 72 is what you can look for after the sun goes down.

Here's more sad news: Winds at 8-15 m.p.h. will diminish to night. There'll be no pleasant breezes swaying you to sleep.

Fair to partly cloudy and continued warm and humid is the forecast for Saturday. There will be thundershowers, but they won't cool off the area.

Sixty-nine was the lowest temperature in downtown Pontiac preceding 8 a.m.

AFL-CIO Gears for \$\$ Collection Across Country

Unprecedented Support Would Back Charge Industry Perils Labor

UNITY HOUSE, Pa. — (UPI) — The AFL-CIO Executive Council today considered a plan to seek cash contributions from nearly every member in the United States to aid 500,000 striking steelworkers.

The 29-man council was expected to approve unprecedented support for the five-week-old walkout to dramatize labor's charges that all unions are endangered if the steel industry successfully resists wage demands.

Under one proposal being studied at the big council's summer session, each of the 12,500,000 workers in federation affiliates would be asked to give a penny a day to back the strike.

If they all contributed, it would amount to almost four million dollars a month.

The International Union of Electrical Workers (IUE) yesterday donated \$100,000 to support the steel walkout. In doing so, IUE President James B. Carey said it was a strike "against all union-busting employers in all industry who are seeking to wreck the hard-won gains of the workers. We feel the entire labor movement is under attack."

Meantime, a Sept. 1 strike was threatened in the meatpacking plants across the nation.

EXPECT APPEAL TO IKE
Union officials accused management of following the pattern set up by major steel producers in proposing a wage freeze for 200,000 workers represented by two AFL-CIO unions.

The AFL-CIO high command was expected to ask President Eisenhower to call industry leaders and heads of the United Steelworkers Union to the White House in an effort to settle the seventh postwar steel strike. He has rejected similar demands in the past.

Labor leaders here believe the steelworkers are victims of a planned shutdown by steelmakers over what they call a "phony" (Continued on Page 2, Col. 4)

Death Turns Off Boys' Laughter

Walk Across Auburn Kills Avon Lad and Critically Hurts Brother

A Rochester area boy was killed and his little brother critically injured when struck by a car yesterday evening in Auburn Heights.

Larry D. Howard, 10, died of head injuries and a broken neck while being rushed by ambulance to Pontiac General Hospital.

Also suffering head injuries, his brother Allen, 7, was unconscious most of the night but showed signs of response this morning. The hospital reported his condition as serious.

Their parents, Mr. and Mrs. Luther B. Howard, live at 2490 Eastern Rd., Avon Township, just east of Rochester.

The boys dashed into busy Auburn road at 6 p.m. and were knocked to the pavement by the side of a slow-moving car, sheriff's deputies said.

The driver, Floyd E. Harvey, 23, of 3965 Auburn Rd., Auburn Heights, probably will be asked to make a statement, Prosecutor Frederick C. Ziem said. Harvey was not held.

VISITING GRANDPARENTS
Larry and Allen were in Auburn Heights yesterday visiting grandparents, their parents said. Late in the afternoon they were given (Continued on Page 2, Col. 3)

Airport Terminal AF Plans Big Play. Plans Approved to Retrieve Capsule

Pontiac's Construction May Start Next Month After Federal OK

Final plans for the proposed \$300,000 terminal building project at Pontiac Municipal Airport have been approved by the federal government.

Construction may get under way as early as next month and be completed by late summer next year, said Homer D. Hoskins, airport manager.

The Federal Aviation Administration yesterday gave the go-ahead signal to the Michigan Department of Aeronautics to seek construction bids for opening in Lansing Sept. 10.

Before the federally aided project can get under way, the federal agency and City Commission must approve contracts.

The project is to be financed one-half by the federal government, one-quarter by the state and one-quarter by the city.

2 YEARS' PREPARATION

The final drawings were prepared by William C. Zimmerman Associates of Pontiac. Their approval culminates almost two years of preparation for a terminal building and tower that will make it feasible for regularly scheduled commercial airlines to use the airport.

Costs break down into an estimated \$300,000 for the building and \$90,000 for outside improvements, such as an entrance road from Highland road (M59); a service drive between the terminal and commercial hangars and a 150-car parking lot.

The federal government also plans to spend \$110,000 for equipment in the three-story tower, which the Federal Aviation Agency will operate.

Site for the terminal will be just south of the main, east-west runway, about half way between Airport and Williams Lake roads and 900 feet north of Highland road.

Glass, brick and aluminum will be the main materials on the outside of the building, said William (Continued on Page 2, Col. 3)

VANDENBERG AIR FORCE BASE, Calif. (P)—From out of the vast Pacific heavens, a small capsule dangling from a parachute was expected to drop slowly toward the ocean today.

And waiting in Hawaii was a team of fliers with a seemingly impossible assignment—to go out and try to catch it before it hit the water.

The capsule went aloft Wednesday, fixed in the nose of the Discoverer VI satellite, which is flashing around the earth once every 95 minutes in an egg-shaped, north-south orbit.

This afternoon, 26 hours after the launching, the capsule was to be kicked loose from the 19-foot satellite.

And, for the second time in less than a week, a squadron of Air Force C119 Flying Boxcars was set to take off from Hawaii and try to execute an almost incredible catch. Each plane was equipped with a recovery net—a trapeze-like affair.

The project is aimed at solving the re-entry problem—how to get a man in space and, once he's there, get him back.

Although the odds against success seem overwhelming, the Air Force hoped to have more than the highly remote chance of sighting the capsule during its descent. The capsule was equipped with a radio which was supposed to send signals, to give the recovery team an idea of its whereabouts.

Such a recovery was planned following the successful launching (Continued on Page 2, Col. 2)

Haitian Troops Slay 12 of Invasion Band

PORT AU PRINCE, Haiti (AP)—Haitian troops have slain 12 of the bearded revolutionaries who invaded Haiti a week ago, an informed source said today.

The informant said the 12—part of an armed band of 30 hunted since the invasion—were trapped and wiped out on a mountain pass near Port Tiburon on the southwest tip of Haiti.

Army headquarters said it could not confirm the report.

Haiti has complained that he band came from Cuba.

Kalamazoo Leads Nation

Downtown Mall Opens

KALAMAZOO — Known internationally as a typical U.S. town, Kalamazoo is leading a return of the village green to the American scene.

This city of about 80,000 was the subject of U.S. Information Agency and State Department dis-

plays in Great Britain two years ago and in Berlin last fall.

Today, it is drawing national attention with the first permanent shoppers mall ever to spring up in an established downtown district.

Except for traffic on Michigan Avenue (U.S. 12) and an east-west thoroughfare dividing the mall, cars are routed around the mall area by one-way streets.

NEW SUBURBAN SHOPS AND A 1955 decrease of more than one million dollars in reassessed valuation in the central business district jolted Kalamazoo leaders into action.

The nonprofit Downtown Planning Committee, Inc., was formed in 1956. It retained a Fort Worth, Tex., firm to draw up a long-range plan which was finished in March 1958.

Mayor Glenn Allen says building permits for store remodeling and for a new \$600,000 store one block south of the mall have returned the city's \$30,000 share.

MAY BE EXTENDED
The mall may be extended another block south to include the new store frontage.

Three fashion shows dominated the second day of a four-day mall celebration. The Women's Day program includes a noon luncheon for Kalamazoo's honorary women officials.

Mrs. Frank Harding, 21, a Kalamazoo housewife and the mother of two children, last night was (Continued on Page 2, Col. 4)

Both Sides Hail Steel Report

Labor Secretary Urges Industry, USW Step Up Talks to Settle Strike

WASHINGTON (AP) — Striking steelworkers and the steel industry both claimed today that a new government report bolsters their positions.

Maintaining its hands off policy in the 37-day-old steel strike, the government Wednesday released figures showing that steel profits, prices and wages have been going up for years.

Secretary of Labor James P. Mitchell made public the 1,000-word background report on the steel dispute. He said neither side has been doing any intensive bargaining and urged greater efforts until a settlement is reached.

But Mitchell declined to make any recommendations on where there should be some backing down in the deadlocked negotiations—and which side should do the retreating.

"There are no conclusions drawn (from the report)," he said. "The responsibility for a settlement of the strike rests upon management and labor."

However, he made it clear that the public has an interest in the dispute which, each week is costing 300 million dollars worth of production and 70 million dollars in wages.

Mitchell told several hundred newsmen at a news conference that the effect of the strike so far has not been serious from a national standpoint.

But a national emergency might result if the strike is not settled by the latter part of September or early October, he said in reply to a question.

Management and union spokesmen lost no time in commenting on Mitchell's report.

R. Conrad Cooper, chief negotiator for the steel industry, said the report shows steel wages have put steelworkers "at the top of the list." Increases in employment costs have exceeded increases in output per man hour, Cooper (Continued on Page 2, Col. 2)

Students Visit MSUO Campus for First Time

Students were on the Michigan State University Oakland campus yesterday for the first time.

Welcomed by Chancellor D. B. Varner, 229 members of the charter class of America's newest university attended an all-day orientation program.

The Graduating Class of 1963 learned about registration procedures and were told they would have a free hand in their student activities program.

What's more, a dean told them the university would strive to make "eggheads" out of them.

For a full report of orientation day at MSUO, see page 15.

State Solons Go Home Again

Will Return Next Friday

Stalemate Over Taxes Looks Likely to Go On Into September

LANSING (AP)—Michigan's weary tax fight seemed likely today to drag on into September as Democrats bent to mounting Republican pressure but refused to crack.

The legislative halls once again were empty, this time until Friday, Aug. 28 except for businessmen who answer a GOP call to the capitol next Monday and Tuesday.

Business leaders were invited to air their views then in a new strategy tack announced by Sen. Clyde H. Geerlings (R-Holland).

Geerlings moved late yesterday after Republican Senate tax bargainers beat Democrats into a seven million dollar retreat in their demand for added taxes on business.

The Democratic back-up represented a yielding to the Republican argument, drummed home in late weeks, that a booming economy would send receipts from existing taxes soaring, thus cutting new revenue needs.

The Democratic "compromise" offer of an 11 million dollar settlement was rejected on "principle" grounds by Geerlings and Sen. Carlton H. Morris (R-Kalamazoo).

House-Senate conferees vainly have sought agreement on a business tax component to go with the 120 million dollar use (sales) tax increase Democrats conditionally accepted in a previous retreat July 24.

The price set by Rep. T. John Lesinski (D-Detroit), chief House bargainer, was 18 million dollars until yesterday when he came in with a delayed proposal, backed by the Democratic caucus.

Following the GOP turnaround, Lesinski said "we're one and one half million dollars apart in dollars but miles apart in principle."

Geerlings said Lesinski's business Activities Tax (BAT) revision plan smacked to much of a profits tax with its liberal tax credit provisions for money-losing concerns.

To make up for nine million dollars he proposed in tax relief and leave an 11 million dollar net gain, Lesinski called basically for jumping the existing BAT rate from 6 1/2 to 8 1/2 mills for agross new revenue yield of \$22,500,000.

In essence, Geerlings and Morris clung to a stand for a maximum one mill (\$10,000,000) gross revenue gain from the BAT—with few and minor side adjustments and preferably none. However, Geerlings said in one combination he might go 1 1/2 mills.

Of next week's hearings, Geerlings said:

"I believe that if business has to pay any additional tax, they should give us information as to the best way to levy it and what type business tax will be most equitable."

Sen. Harold M. Ryan (D-Detroit), another tax negotiator, scoffed.

Eastern U.S. Still Swelters, West Gets Break

By The Associated Press

The nation's weather appeared stuck in its familiar pattern of the past couple of weeks today. It was fairly pleasant in western sections, hot and humid in most of the eastern half of the country.

Cool air spread from the far northwest across northern states into parts of the Dakotas. It was expected to move across the Dakotas and into western parts of Nebraska, bringing welcome relief to areas hit by temperatures of above 100 degrees the past two days. Readings in the cool belt were a mixture of 50s and 60s.

But east of the cool air, it was warm and humid in most sections.

AT NEW COUNTY SWITCHBOARD — Oakland County's new and larger switchboard, located on the top floor of the County Office Building, was put into operation yesterday. It was installed to facilitate an influx of more calls to the county each day, which couldn't be handled by the old two boards. Operators are (from left) Mrs. Emma Rathbun, Mrs. Nettie Harrington, and Mrs. Genevieve Bale.

Former Pilot Has Answer

Saucers? No, Vapor Trails

A technical writer for General Motors Truck and Coach Division says he has the solution to the mystery of two unidentified "flying saucer" objects sighted by many Pontiac area residents Tuesday night.

"For those people who saw it, it was both a beautiful and weird spectacle," reports Frank Jozwik, 6151 Adamson Rd., Drayton Plains. "But there really is no mystery."

"The phenomenon was an illusion caused by the vapor trail of two jet planes."

A former licensed pilot, Jozwik offers this explanation: "After viewing the two supposedly stationary objects through eight-power binoculars, I could clearly see two following vapor trails that appeared to the naked eye as two round discs, golden in color."

"The reason that they appeared round in shape and motionless, of which they actually were not, was that the jets were traveling from west to east, directly toward the

Fliers to Attempt to Retrieve Capsule

(Continued From Page One)

of Discoverer V last week. But the radio in the falling capsule evidently broke down. Nobody got a signal from it. The capsule, presumably tumbled into the sea.

Discoverer VI is expected to remain in orbit at least a month. It comes within 138 miles of earth at its closest approach and goes as far out as 337 miles.

Discoverer VI—78 feet long including its first stage—shot skyward from this West Coast missile base shortly after noon Wednesday. The first stage, which fell away after a few minutes, was a Thor medium-range missile using a potent new kerosene fuel. The second stage was a 1,700-pound vehicle produced by Lockheed Aircraft Corp.

Lockheed and an Air Force official said after the launching.

"The successful orbiting of two Discoverer satellites in less than a week marks a tremendous forward step in the scientific study of space vehicles and their applications."

The Discoverer had no animals in its capsule. But the capsule is the type expected to carry monkeys aloft later in the tests.

Both USW, Industry Hail Report on Steel

(Continued From Page One)

said, thereby forcing up steel prices. He said the increase of output per man hour in steel was lower than in the national economy as a whole.

Cooper said the report "shows also that steel profits as a return on investment have consistently lagged behind those in other industries—even before taking account of the necessity for making up large deficiencies in depreciation allowances."

David J. McDonald, United Steelworkers' president, said Mitchell's report "presents a positive contribution to acquaint the American people with the facts of the tremendous productivity record achieved in the steel industry and the overwhelming ability of the steel industry to share a portion of such gains with the public, industry workers and stockholders of the industry."

"It documents the soundness and equity of the position of the steelworkers union in the controversy with the steel industry."

Negotiations still are under way in New York, but there have been no indications of progress.

National Steel 'War' by Union Possible

(Continued From Page One)

inflation issue. Other employers fear:

The companies have refused union demands for a substantial wage increase and have demanded changes in work rules. Negotiations now being conducted in New York by second-string bargaining teams have bogged down. No settlement is in sight.

Federal Mediator Joseph F. Finnegan met privately today in New York with the two top negotiators in the steel strike in another effort to bring about an early settlement of the 37-day-old walkout.

He conferred with David J. McDonald, president of the United Steelworkers Union, and R. Conrad Cooper, representing the steel industry, in his suite at the Commodore Hotel.

Boys' Laughter Ends in Death and Injury

(Continued From Page One)

money and allowed to walk to a nearby dairy bar on the north side of Auburn for ice cream cones.

A witness to the accident, Mrs. Clifford Russ, 3405 Squirrel Rd., Auburn Heights, said the boys apparently thought traffic was halted when they ran into the street.

Driving to work in Pontiac, Mrs. Russ was stopped in a line of westbound traffic backed up about a block from the traffic light at Squirrel road.

"The boys were laughing and had ice cream cones in their hands as they came out of the dairy bar," she said.

"The older one ran out between my car and the one ahead of me and the younger one followed."

"I could see a car coming from the other direction and I screamed at the boys to stop, but it was too late."

SOMETHING HIT ELBOW

Harvey told deputies that he didn't even see the boys. "The only thing I noticed was something hitting my left elbow on the window sill and then an ice cream cone struck my windshield."

The boys were hurled to the pavement next to Mrs. Russ' car, the older one face down, unmoving, the younger one crying and moaning.

Harvey said he had just turned eastward on Auburn from Squirrel and was traveling only 15 miles an hour.

OKs Terminal Plans for Pontiac Airport

(Continued From Page One)

G. Frankenfield, head of the Zimmerman firm.

According to the final plans, the tower will sit atop a one-story main floor, containing facilities for the public and the airport management.

With 7,355 square feet of space, the main floor is to have a lobby, ticket counter, baggage room, offices and a small restaurant, which will be leased by the city on a concession basis.

Hoskins explained that the federal government, which has overseen the building project, has allowed for only minimum facilities, which could be expanded easily later on, however, through local, state or federal funds.

The tower will contain 3,165 square feet of floor space, with the fourth, or top, floor functioning as the center for air traffic control.

The Day in Birmingham

Shoplifter Finds Watches Are Cheaper by the Dozen

BIRMINGHAM — Cheaper by the dozen was the theme of a shoplifter who struck two Birmingham drugstores yesterday.

The shoplifter took a display case containing a dozen watches from the Wilson Drug Co. store at 101 N. Woodward Ave., then took identical display case from Shain's Rexall drugstore at 105 W. Maple St.

In each instance the watches stolen were valued at a total of \$120, according to Birmingham Police Det. Lt. Merlin Holmquist.

A cave-in of a drain excavation yesterday seriously injured a Detroit laborer at 1205 Lakeside St. near Quorton Lake.

Chester Diccio, 50, was taken to William Beaumont Hospital with a fractured pelvic bone. He also suffered injuries to his left shoulder, hip and back.

A huge chunk of clay weighing over 500 pounds struck Diccio when it fell from the side of the 25-foot deep ditch in which he was working.

Partially buried, he was extricated by fellow workers and rushed to the hospital where his condition was listed as serious.

During a lull in regularly scheduled activities, the Birmingham Senior Men's Club will meet at the Community House at 10 a.m. Aug. 28.

They will then be guests at the home of Mrs. Fred C. Gould, 5760 Monterey Ct., Bloomfield Township. Cars will be available for those without transportation.

The next regular meeting of the club, which will usher in the fall season, is set for 10 a.m. Sept. 4 at the Community House, according to T. A. Henshaw, club secretary. Meanwhile shuffleboard play continues daily at 2 p.m. on the Community House courts.

Mrs. Herbert W. Masters of 888 Ann St., Birmingham, has been re-elected president of the Franklin Cemetery Auxiliary.

Other 1959-60 officers are Mrs. Harold Grogg of 2291 Rosewood Dr., Pontiac, vice president; Mrs. Kenneth S. Green of 984 Pierce St., Birmingham, secretary; and Mrs. Russell Pickering of 714 Franklin Rd., Bloomfield Township, re-elected treasurer.

J. Benjamin Bennett of 2078 Manchester St., Birmingham, has been appointed public relations director for LaRue, Cleveland, Inc. of Detroit.

According to company president R. F. LaRue, Bennett will be in charge of the firm's PR activities for General Electric's metallurgical products department, Farm Crest Bakeries, Inc., and Detroit Mold Engineering.

Bennett has been with Grant Advertising Agency of Detroit as assistant director of the Dodge News Bureau and public relations account executive for Cushman Motors, Lincoln, Neb., and Airtemp.

Kalamazoo Mall Instant Success

(Continued From Page One)

named Miss DKA to preside over the celebration.

A sample of reaction from mall retailers yesterday glowed with enthusiasm.

William Hegerfeld, manager of a Montgomery-Ward store, said, "Shopper traffic compared with that just prior to Christmas. It should be fantastic for the fall six months with promotions we are lining up. I am very optimistic over the mall's future."

Jeweler Carl Rech reported "an unusual amount of shopper traffic... some people from as far as 50 miles away." He said he was "a little against the idea at first because of the parking problem, but that's taken care of now."

600 OFF-STREET SPACES

The city has 600 off-street parking spaces and the Michigan Municipal Finance Commission has approved a \$650,000 revenue bond issue to provide 250 more spaces.

Dean Meyers, manager of Gilmore's Toy Store, found it "the busiest day, other than the traditionally busy day before Thanksgiving, in my 27 years at the store."

"I don't know what it would have been without the sale," he added. "But I'm sure we would have been extremely busy."

DKA President Raymond Dykema said, "The turnout exceeded our expectations, especially for a working day." Mayor Allen called it the best downtown weekday crowd in 45 years.

Highway Department Engineer to Retire

LANSING (AP)—Carlos A. Weber, 58, chief engineer of the Michigan State Highway Department will retire Jan. 1.

Weber, a graduate of Brighton High and Michigan State University, has been with the department since he started as a roadman in 1920. He currently heads the design-traffic and contracts divisions.

Set Launching of 2nd Atomic Polaris Sub

GROTON, Conn. (UPI)—The second American nuclear submarine equipped to fire Polaris ballistic missiles will be launched Sept. 22, it was announced today.

The 5,400-ton Patrick Henry is due to become operational next year, the electric boat division of General Dynamics Corp. said. The nation's first atomic Polaris sub, the George Washington, also is scheduled for completion in 1960. It was launched June 9 and is now being fitted out for sea trials.

The most publicized diseases in the United States are tuberculosis, polio, cancer and heart trouble.

'60 Pontiac Is Bold, New

(Continued From Page One)

had taken place. The magic triad of our marketing concept became—performance—image—and style. This revolution—still in its early stages—was designed to bring vast changes in the way families spend their automotive dollars to upgrade themselves.

In 1960—indications are that the public again will buy our modern look—our look of something different. As it examines our '60—the public's feeling about Pontiac's competitive superiority will become conviction.

The public—that wonderful mass of sometimes whimsical purchasing power—will see a car in 1960 that has striking eye appeal—with a "V" designed front end that hints of a classic design. We will again have that big bonus of distinction and maximum identification on the road.

The car's styling theme is simplicity—with side treatment—trim as well as rear design worked out within its boundaries. Chrome is sparingly used.

Here's what we think happened: The buildup began in 1957—when we improved performance drastically to attract younger buyers.

Our team built a car whose performance was clearly superior to its predecessors—an automobile designed to appeal to the youth in all of us. A massive dose of engineering vitality had been injected into the car.

In 1958 a redesigned automobile was built around performance that again was strengthened and improved. Style—that elusive intangible—was added and began to catch public fancy.

The look of luxury—an overwhelming need in our price class—became an attainable goal.

CAUTIOUS MARKET
The car was introduced into a cautious and recession-minded market—and as the year wore on—dealers began to feel its potential. Buyers appreciated its style-quality and performance.

Pride of ownership began to assert itself—began to confirm Pontiac's growing popularity. The image was beginning to solidify.

The '59 went into a market that was by now more favorably disposed toward the image of performance—style—and youthfulness Pontiac had been creating.

The recession was beginning to fade. Business began its improvement. People allowed themselves to be coaxed into showrooms.

The image we were building with our car—its advertising and promotion—was hardening—meeting the public face to face in the showroom. Pontiac was being re-established as a symbol of status.

Had the 1959 Pontiac been introduced in 1957 or 1958 it probably would have done no better than either of the cars introduced these two years.

Early in 1957 we faced the fact that to succeed we had to sell a personal symbol—as well as a piece of practical merchandise.

Our car would become more than ever—a symbol of personal attributes—goals—social patterns—and strivings.

The car will come to the market with a very strong and important feature from the '59—"Wide Track Wheels." This feature will give our line the continuity it needs to inherit the aura of success surrounding the '59.

The Wide-Track story will be as potent in 1960 as it was in 1959. It again will be the Pontiac plus—which even though other cars may

offer—will have been offered by Pontiac first.

Under the hood our economy engine will be continued. The public—which equipped 26 per cent of its purchases from us with it last year—likes the engine and it will again be a no-cost option. Substantial improvement in the engine-axle combination will result in a still further increase in economy.

Many freshly engineered accessories and optional items will add comfort and pleasure to the car. Among them are improved heating and air-conditioning systems.

An improved rear suspension system—using larger rubber bushings and redesigned shock absorbers—result in a softer ride without affecting handling.

Engine improvements include improvements in carburetion for smoother operation as well as increased fuel economy on the standard engine.

Considerable improvement in insulation across the entire line—with additional emphasis on the Bonneville models for quieter operation.

LOWERED ENGINE
We've lowered the engine in the chassis—which when combined with a new smaller hydraulic transmission—results in reducing the tunnel in the front compartment by two inches in width and one inch in height. By reducing the size of the steering wheel and relocating the steering column—additional room has been gained between the seat and wheel—providing added comfort for the driver.

Gentlemen—I've saved my biggest news 'til last because it marks another significant shift in Pontiac's marketing tactics. Our car has been completely restyled. It is an all-new automobile on the outside. As you know—this is heresy to the disciples of the traditional and comforting stick-with-a-winner faith.

Our 1959 was an outstanding car and it took courage to implement a belief that Americans are insatiable for newness and change. To you I might add that this courage was bolstered by the knowledge that this year—competing makes would be in better shape than they were in '59—and would have been a threat had we complacently gone to the showroom with a face-lift. Prosperity and a surprisingly vital car—buying public might have proved a strain to a tired car with declining influence.

Instead—with our 1960—our dealers are face to face with a vigorous and improved new model which promises a superior strength and ability to carry the fight to the wire next summer.

Our car then—this year—is new and different—sleek and trim. Its freshness—developed within the framework of evolution—hints at a classic ancestor. Its stylishness—both inside and out—sharpens the image of Pontiac as a car for young and modern people.

Another piece of news is the

Kill 51 in Algeria

ALGIERS (AP)—Fifty-one rebel troops have been killed or captured in the past few days in military operations in Algeria, French headquarters said today. Three French civilians were killed in a rebel ambush at a small town east of Algiers, authorities said.

Reds to Aid Iraq A-Work

MOSCOW (AP)—The Soviet Union is going to help Iraq launch a program of atomic research for peaceful purposes, according to a communique published by Tass, the Soviet news agency.

33 Are Dead in Crash of Chartered Airliner

will be on the upswing and employment stands at a high level. The auto boom that got under way less than a year ago—according to our economists—may make total sales for 1960 hit 6,900,000 cars. This expectation is based on customer demand that—right now—shows no sign of weakening.

To progress we must grow! To grow we must have volume!

We believe that with our new car and our new line—and regardless of our competition's combined weight—Pontiac will continue to grow by expanding sales volume in 1960.

BARCELONA, Spain (AP)—A holiday in Spain ended in death for 21 British students Wednesday when their chartered airliner shattered on a fog-wrapped mountain peak. The British crew of three and the eight other passengers also were killed. The students were returning to London. The twin-engine plane

plowed into a 2,400-foot peak 25 miles northeast of here.

Other passengers were a German, two Iranians, an Irishman, three Spaniards, and a Malayan.

Dog Eats Greenbacks

MEMPHIS, Tenn. (UPI)—Joe Giles, suspecting that his dog had made off with a missing \$5 bill, had his suspicions confirmed when he offered the dog a \$1 bill which the pooch promptly tried to chew up.

The altitude record for a manned balloon was set on Nov. 8, 1956, rode to 76,000 feet in a pressurized by Navy Lt. Cmdr. Macolm D. aluminum gondola.

Hope You'll Be Eggheads, MSUO Tells Freshmen

By MAX E. SIMON

Members of the charter class had their first contact yesterday with the nation's newest university, Michigan State University Oakland.

And the 229 students who will become freshmen when school opens Sept. 21 were told the university would strive to make "eggheads" of them.

The students spent the day on which will be observed for centuries far into the future.

tion day program. The rest of the class will participate in a similar program Monday.

Five-hundred students are expected in the first class which registers for classes, Sept. 18.

In a welcoming address, Chancellor D. B. Varner told the students that they and the faculty will be establishing bench marks which will be observed for centuries far into the future.

Varner called MSUO "a significant force."

"It has," the chancellor declared, "a chance to build a university structure from the ground up, free of the restrictions that confine existing ones."

"And few institutions," he added, "are quite as enduring as universities. Political systems and governments may come and go, but universities go on for ages."

Varner called the student assembly "the first tangible evidence of three years of planning and work on an ideal."

He explained: "Some of America's top scholars, the presidents of some of its greatest universities and some of its most distinguished citizens worked together on this ideal."

"The question given them was: 'Given a clean slate, how would

you build the best possible university?'

Their answer, Varner said, was a university of the very highest quality, dedicated to the liberal arts ideal.

NOT MERE JOB TRAINING

"This institution will start young men and women on a lifelong road of enlarging their mental and moral capacities, rather than training them for jobs," the chancellor said.

★ ★ ★

He said MSUO would be an independent institution, "free to go its own way in search of a better way to do higher education's job."

Calling the faculty the "heart and soul of the university," the chancellor said MSUO set about to acquire a young faculty of the highest ability, vigor and enthusiasm.

"For them," he said, "the traditions of the past have no pertinence unless they can contribute to our ideal. This will be the youngest faculty in the country, perhaps in the world."

"It will be the faculty with the highest percentage of earned doctoral degrees of any university in America, and it will be the faculty with the greatest amount of enthusiasm of any in the land."

The student body, Varner said, was "a hand-picked one." Every one, he declared, was selected on the basis of his ability to do college work. "Not a single one was picked for family influence, for political pull or financial advantage."

EXPECT A LOT

"We welcome you, as this kind of charter class, aboard for the launching of a new kind of ship in the field of higher education. And in welcoming you, we alert you to the fact that we are going to expect a lot of you."

The new institution, Varner said, "will be a place to work and study, and today we begin a partnership which we know will be fruitful."

Dr. Robert G. Hoopes, dean of the faculty, told the students it was the passionate desire of the university to make "eggheads of each and every one of you."

Hoopes said an "egghead" was "an intellectual in the good old sense of the word."

"Eggheads," said Hoopes, "inquire into fundamentals. They ask questions that need asking."

The dean said that graduates of MSUO should be critics of society, not merely adjusting to it.

'CHALLENGE YOUR CULTURE'

"Challenge the legitimacy of the culture in which you have been brought up," Hoopes told the students. "Not until you have done so will you be fit for leadership in our society."

The university, Hoopes said, should be "a place of controversy."

Hoopes told the students that "this may be a new institution, with new concepts of education, but all are vehicles of things old and honored."

He recommended the study of philosophy.

"MSUO will not try to sell you fiction," the dean explained. "But such study readmits you to bygone learn what stur ancestors felt like and see the world through their eyes."

Neither tradition nor modernity would be slighted, he said.

Hoopes told the students they were entering "a fraternity of learning, a community of scholars devoted to the discovery of truth," and that this involved critical examination, and discarding of many of the notions and prejudices acquired from their parents and environment.

College, he declared, is only

FIRST TO ENROLL — Herbert Stoutenberg, MSUO registrar, chats with Students No. 1 and 2 to apply for admission to the university. The first to seek admission was Lynne Anderson, 25 Oneida Rd., the second, Jim Sutherland of Romeo.

ARRIVING AT MSUO — Members of the Michigan State University Oakland charter class arrive on the campus for an all-day orientation program. Before activities began, students checked in

at a registration desk and received name cards. This was the first time that the students saw the nation's newest university.

TOUR OF THE CAMPUS — Roy Alexander, director of student affairs, points out the spot where MSUO eventually hopes to build its library building. The impressed students are (from left)

Fred Vest, 70 S. Genesee Ave., and Tom Nichols, 180 State St. In the background is the Student Center.

Fraternities Out at MSUO

Students will have a free hand in running student activities at Michigan State University Oakland, but national social fraternities have been ruled out.

The disclosure that social Greek letter societies will not be permitted at the new university was made by Dr. Robert G. Hoopes, dean of the faculty.

"The idea of 'fraternity' implies inclusion and equality," Hoopes told members of the charter freshman class yesterday at an orientation day assembly.

"Yet, it seems, fraternities in America are based on the idea of exclusion. National charters of most of these groups contain racial and religious discriminatory clauses."

The decision to outlaw fraternities was made long ago in a "tacit agreement" among MSUO administrators, said D. B. Varner, chancellor of the university.

"Fraternities, like high-pressure football, have outlived their usefulness," Varner declared.

Roy J. Alexander, director of student affairs, promised students that democracy would be practiced in the student activities program.

"You will have every opportunity to make decisions on programs affecting you," he said.

"The responsibility for the consequences of these decisions will also be yours," he added.

Alexander urged the students to start thinking about what clubs they wanted, student publications,

student government, and the selection of school colors.

"These are decisions that you must make soon," he said.

THE CHANCELLOR SPEAKS — D. B. Varner, chancellor of MSUO, addresses a student assembly for the first time. Varner told the students they "will be establishing bench marks which will be observed for centuries far into the future."

the start of a lifelong process through which individuals fit themselves to play their most effective roles in the society of mankind. A college education, he said, is the start of the evolving of a philosophy of life, rather than preparation for earning a living.

Dr. Hoopes also told them that trying to make a choice of a major field of study or specialty in the freshman and sophomore years was a "phony concern, and a thing of essential unimportance."

'MAKE CONTACT'

"Instead," he told them, "look around; breathe deeply, and make contact with the excitement of learning."

Most of the morning the students took placement tests, to help Dr. Robert Hopkins, university director of guidance and counseling, and other officials advise them.

In the afternoon, the students toured the campus and received an explanation of registration procedure from Herbert Stoutenberg, registrar and director of admissions.

Roy J. Alexander, director of student affairs, talked to the

students about extra-curricular activities and urged them to be thinking about starting a campus newspaper and other publications university's opening convocation, it was announced.

Laborers Union Members Picket Own Headquarters

DETROIT (AP)—Some 100 Laborers Union members say they will continue to picket their union headquarters until agreement is reached on new hiring practices they contend are encouraged by Local 334 President Andrew S. McFarlane.

McFarlane, former president of the Detroit and Wayne County Federation of Labor, set up a temporary office under a nearby tree, when the picketing began Wednesday. "I don't cross picket lines," he explained.

Adam White, 41, one of the picket leaders, said new members are being signed up by the union at a \$75 initiation fee while old Union members must pay \$5 monthly dues even though unemployed. Local 334 has about 3,500 members.

White and other picket leaders contend that McFarlane encouraged contractors to hire non-union men who will have to join over hiring practices they contend are encouraged by Local 334 President Andrew S. McFarlane.

McFarlane denied the accusation. He said contractors are free to hire anybody as long as the new workers join the union.

Time Goes Fast at 100

TROY, N.Y. (AP)—Mary A. McGraw celebrated her 98th birthday anniversary last year. This year she is 100. A family friend, the Rt. Rev. Joseph M. O'Connor, checked her birth certificate and found she was born Aug. 17, 1859, not in 1860, as she had believed.

TIME OUT FOR LUNCH — MSUO's freshmen paused in their orientation day activities long enough to eat a box lunch prepared at Michigan State University in East Lansing. The boxes were distributed to the students in the patio connecting the

two sections of the university's academic building. Eating are (from left) Ron Hockman, 1740 Hamilton Dr.; Lynne Anderson, 35 Oneida Rd.; Dan Penoyer, 224 Vernon Dr.; and Judy Thiese, 917 N. Perry St.

Hal Boyle Asks:

Which 'Wifely' Remarks Do You Hear?

NEW YORK (AP) — Wifely remarks that husbands get tired of hearing—and overhearing:

"Joe, I gave you the best years of my life, and I ask you—what did it get me?"

"Your pay envelope was 40 cents short. Are you keeping another woman?"

"When I think of all the men I could have married."

"If you expect me to go on spoiling you like your mother did, you've got another think coming."

"Yes, my lord and master, what is it you want now?"

"If your mother was such a good cook, tell me just one thing—why did they have to take your father's stomach out?"

"I don't care if she is your boss's wife. I don't have to bow and scrape before anybody."

"Why is it we practically never go out any more? Are you ashamed of me—or what?"

"It won't take me a minute."

"I'm all ready except for putting on a dab of lipstick."

"Well, if Joe's going to have one for the road, you might as well pour me too one—I mean, one, too."

"Oh, don't tell that old joke, dear. I've heard it a thousand times."

"Joe, you never heard a word I say."

"If there is such a thing as another life, I'm going to come back a man. Men think they're the kings of the earth."

"Joe used to go fishing with his pals, but now I go with him. I always say, a family that plays together stays together."

"It isn't that I really mind your playing poker, but don't you ever win?"

"Well, if you want my advice."

"You can't mean that's the one you were crazy about in college, Joe. She looks like the moths had been at her."

"Joe, are you listening to me?"

"You can play Boy Scout in the backyard if you want to, but the rest of us are going to eat in the house like civilized people."

"Every husband in the neighborhood carries more life insurance than you. Some men care about their family's welfare."

"Sure I used to be jealous over Joe—when he had hair."

"A man from the sheriff's office called. He said it was something about the furniture loan."

"Joe, we used to have so much to say to each other. Why is it we never talk anymore?"

Put Strips Under Cake

Know this trick? Put some strips of waxed paper under the bottom of that layer cake. Then fill and frost. It's easy to pull the paper strips out from under and have a clean plate!

Advice to College-Bound

Purchase Wardrobe After Arrival

By MARY PRIME

NEW YORK (UPI) — Memo to college-bound girls: Buy your school wardrobe as you do textbooks—after you find out what's required.

So say two coeds who won grand prizes in the 13th annual "make-it-yourself-with wool" contest, sponsored by the wool bureau and the women's auxiliary of the National Wool Growers Assn. The contest is held in 20 western states in the wool-growing area.

★ ★ ★
Millicent Robbins, 20, senior winner, of Walsh, Colo., and Amelia Beth "Amy" Loomis, 17, of Donnelly, Ida., the junior winner, advise building a wardrobe after reaching school.

Customs, fads, school rules, and climates vary from campus to campus, said Miss Robbins, who will be a home economics senior at Colorado State University, Fort Collins, Colo. Some schools are dressier, especially if coeducational, she explained. At one college she attended, for example, blue jeans were the rule, but on another campus, Bermuda shorts were "in" and jeans were "out."

UP, DOWN OR ROLLED?

Even socks vary, she added. At some schools, girls wear them turned up, and at others, socks are turned down—how much depends on the campus. At still other schools, socks are rolled. Length also varies, from full-length tights to knee-length socks and anklets.

The basic "brought-from-home" wardrobe should be leftovers from high school, because no one in college has seen them, the girls said in an interview. The

nucleus of this wardrobe should be skirts and sweaters.

★ ★ ★
Items to buy after arriving at school include cocktail and date dresses, sports clothes and formal gowns, they said.

Miss Loomis, who will be a freshman at Wheaton College, Wheaton, Ill., plans to take her high-school skirts and sweaters ("I'm not sure how many, but there are stacks"), a knife-pleated skirt with sweater and weskit, two date dresses, a tailored suit which she made for the contest, a weather-proof coat, and a man-made fur (I'm not sure they wear those there, but I'm going to take it anyway"). The rest she will buy or make later.

DRESS FOR EASE

Her first rule is: "Dress not to impress yourself, but to be yourself and to be at ease wherever you are."

The girls, both pretty blondes, stopped in New York en route to Europe. They will visit London, Paris and Rome, flying by jet, as part of their winnings. They also received a trip to Los Angeles to appear on television.

★ ★ ★
Both girls have been sewing for 10 years, and both learned from their mothers and 4-H clubs. Miss Robbins lives on a wheat and cattle ranch. Miss Loomis also lives on a farm, although her father is a dealer who buys and sells oats.

The winners agreed that new styles take a long time to sift from cities to the country.

"Mother just had a fit when she saw my new dresses with short skirts," Miss Loomis laughed.

At College

Don't Neglect Complexion

By JOSEPHINE LOWMAN
Most members of the feminine sex become interested in their appearance at a very early age—be quite crucial in a young girl's life. At this stage she is very self-conscious about the slightest defect and longs to look like her favorite movie star.

★ ★ ★
So by the time she is ready to go to college we have no need to warn her to look her best. Yet in the rush and excitement, in the midst of the fun and work, she may become careless about her grooming and her fundamental beauty care.

It is unusually important for the freshman at college to look her very best. There is no need fooling ourselves—we are judged at first by our appearance. This is the window dressing. No matter how many wonderful qualities you may have, others must have a chance to know you in order to learn about them, and if the outside view of you is not pleasant, this may never happen.

★ ★ ★
You will have to find time or just take time this fall for the routines which keep your skin and hair lovely and give your nails that well cared for look. Many young women who were most faithful in skin care during the early teens, because they were battling blackheads, become careless when they go away to college.

DON'T BE MISLED
They may consider themselves past this skin threat. Do not be misled by wishful thinking. You are still in that age group which is somewhat more susceptible to blackheads and pimples than you will be a few years from now, so keep up those soap and water cleansings, several times a day.

★ ★ ★
Unless your skin is extremely oily, twice a day may be enough now. The normal or dry skin may require some lubrication in cold, windy weather as well as its regular cleansing.

And remember that you need a good hand lotion at any age!

Matching outfits are tops with teachers this year. Mrs. James Saunders of South Francis street models this dyed to match pleated skirt with twin sweaters. Featured at Eaton's, the ensembles by Ban-Lon comes in a variety of new autumn shades.

William Bowman and Mrs. William Gordon from Clawson and Mrs. Ted Cohassy of Rochester. Others were Mrs. Fred Steinbaugh, Mrs. Harry Killiam, Mrs. Clair Hincley, Mrs. Louis Snyder, Mrs. Harold Muldowney, Mrs. William Dawe, Mrs. Robert Tarr, Mrs. Harry Richards, Mrs. Jack Rammes, Mrs. Robert Boyce, Mrs. George Wasserberger, Mrs. Frank Fortino, Mrs. George Dittler, Mrs. Max Schroeder and Mrs. Charles Knowlton. Mrs. Leon Bell assisted the hostess.

Only about 10 per cent of the blind persons in the U.S. were born sightless.

JOYCE STRONG

Joyce A. Strong, daughter of Mr. and Mrs. James L. Strong of South Ardmore avenue, will be graduated from Hurley Hospital School of Nursing in Flint Aug. 30.

Gives Shower in Her Home for Bride-Elect

A bridal shower was given at her home on Dwight avenue Tuesday by Mrs. Lee Kremer in honor of Miss Sue Jennings, daughter of Mr. and Mrs. Howard Jennings of Lansing. She will be married August 29th to Robert Gordon, son of Dr. and Mrs. William Gordon of Dwight Ave.

Those attending from Lansing besides the honoree were her mother, her grandmother, Mrs. Jennie Jennings, and her sister, Mrs. La Mott Bates. Mrs. John C. Mills from Ann Arbor, Mrs. Ben Bowman from Ormond Beach, Fla., Mrs. Wil-

Grain Trade at Slow Pace

CHICAGO (U)—The grain futures market started off again today within a narrow price range as transactions continued at a slow pace and in small volume on the Board of Trade.

Most prices were slightly easier with commercial buying in scattered amounts. However, dealers said there appeared to be a rather steady volume of liquidation by long interests and that a gradual technical correction of market positions has been taking place.

For the past week or so the feeling has been that the market had been overbought on the possibility of strengthening prices which did not take place. Until there has been a little more evening up of commitments, prices are expected to hold almost stationary.

After about an hour wheat was 1/2 cent a bushel higher to 1/4 lower, September \$1.89 1/2; corn 1/4 higher to 1/4 lower, September \$1.19 1/4; oats 1/4 to 1/4 higher, September new type contract 67 1/2; rye 1/4 to 1/4 higher, September \$1.29; soybeans 1/4 to 1/4 higher, September \$2.09 1/4.

Shelby Firemen Are Reinstated

Civil Service Unit Rules 5 Laid Off Be Returned, 4 Pay Cuts Restored

SHELBY TOWNSHIP — The Shelby Township Civil Service Commission has ruled in favor of reinstating five firemen laid off by the Township Board and the other four who received cuts in salary. In the case of the five men who were laid off on May 1, the commission ordered that they be returned to duty at the same salary they were receiving when the suspension occurred.

The four men who received pay cuts will have their former wages restored and be reimbursed for lost salary dating back to the effective date of the reduction May 1, the commission ordered.

The firemen had presented their cases at a public hearing of the commission in July after making an appeal to that body two months before.

The Township Board has the final say on the matter. A spokesman for the group said in May that if the Board fails to follow the commission's recommendations, the nine firemen will take their cases to Circuit Court.

The suspensions and pay reductions were believed necessary by the Board because of present strained financial conditions. Members said it was impossible to maintain the department at full strength under its current year's budget of \$59,995.

Treat Lake Orion Man After Car Strikes Tree

Herman L. Holt, 17, of 825 Greenshield Rd., Lake Orion, was treated for minor face cuts at Pontiac General Hospital last night after his car struck a tree on Brewster road, a half mile north of Dutton road, in Oakland Township.

Holt told sheriff's deputies that the steering mechanism failed on his 1952 car.
