Sevilla named to presidency of society

Oakland University Professor of Chemistry Michael Sevilla recently was elected to the Radiation Research Society as its future president. Sevilla will serve as vice president-elect for 2003, vice president in 2004 and president in 2005.

"I am pleased that the Radiation Research Society has recognized Dr. Sevilla's insight and wisdom of research in this area," said Virinder Moudgil, vice president for Academic Affairs and provost. "This is a very distinguished honor for Mike and for Oakland University."

The Radiation Research Society's objectives are to encourage in the broadest manner in the advancement of radiation research in all areas of the natural sciences; to facilitate cooperative research between the disciplines of physics, chemistry, biology and medicine in the study of the properties and effects of radiation; and to promote dissemination of knowledge in these and related fields through publications, meetings and educational symposia.

SUMMARY

Oakland University Professor of Chemistry Michael Sevilla recently was elected to the Radiation Research Society as its future president. Sevilla will serve as vice president-elect for 2003, vice president in 2004 and president in 2005.
