Subject: In Case You Missed It: My Plan to Lower Gas Prices

Last week, Congressman Mike Rogers introduced a plan to declare July 4, 2015 America's Energy Independence Day. Click below to view an animation of the plan.

What they are saying about my plan:

"For starters, the nation belatedly has to adopt a coherent energy strategy that addresses the economy, the environment and national security. Mike Rogers, the Republican congressman from Brighton has unveiled such a plan. It deserves serious consideration." - *Livingston Daily Press & Argus, 6/1/08*

"Rogers' proposal includes \$20 billion in loan guarantees, as well as \$2 billion for research and development of all kinds to help expedite the development of new types of vehicles." - *The Oakland Press, 5/29/08*

"Imagine a car that emits water from the tail pipe instead of smoky fumes. Imagine if the U.S. created energy here instead of importing millions of barrels of oil a day. Representative Mike Rogers says it's all within our reach." - *WLNS 6*

Lansing, 5/27/08

"The Brighton Republican said his multifaceted plan will create tens of thousands of jobs, help the environment and stop funding countries linked to terrorism." - *Lansing State Journal, 5/28/08*

Examples of what your neighbors and friends are saying:

"Finally a voice of reason!! America needs to stop being dependent on foreign oil."

"All the power to you, I will get your message out to people and ask they proliferate through their email chains."

"Thank you! It is nice to hear leadership finally on this issue. Please keep saying it loudly, clearly, and often."

"This is a vital issue, and we must assign this goal a very high priority. Our welfare as a country depends upon success."

Will you take a stand and declare your energy independence today?

Sincerely,

Mike Rogers
Member of Congress
