PRESELY OFF FOR GERMANY — Rock and roll singer Elvis Presley boards a train at Fort Hood, Tex., for New York where he will board ship for Germany. He has completed 14 weeks advanced training in an armored tank company.

SMOG IN LOS ANGELES — Heavy eye-smarting smog covered the Los Angeles area for two consecutive days. One pedestrian resorted to a mask for comfort.

DIES — Phil Cook, radio star, died at the age of 65 in Morris-town, N. J., after a long illness. He went on the air in 1925 as "The Radio Chef." His latest show "Cook's Kitchen" was discontinued in 1952.

SUSPENDED — New York broker George Garvin, senior partner of Garvin, Bantel & Co., was suspended for three months by the New York Stock Exchange charged with improper activities in U.S. government bonds.

POWER PUNCH — After a friendly brotherly scuffle, Jimmy Greensmith, 6, (left) of San Diego, Calif., checks the right arm of his brother, Tommy, 4, and smiles through a space vacated by two front teeth when Tommy swung with a right uppercut. The dispute involved a trip by Jimmy to the dentist; trip no longer needed.

GM Makes New Contract Offer

Probers Skip Torch Death

No Date Listed for Witnesses in Arson Case

Further Teamster Quiz Is Called Indefinite by Washington Group

Another avenue of investigation in the fire death of Teamster official Frank Kierdorf appears closed after the Senate Rackets Committee yesterday postponed indefinitely its proposed inquiry.

Paul Tierney, assistant committee counsel, said no hearings on the Kierdorf case are planned in the immediate future.

Earlier this month, Oakland County's circuit bench refused to order a one-man grand jury to probe circumstances surrounding the torch death of Kierdorf despite appeals by Attorney-General Paul L. Adams and Oakland Prosecutor Frederick C. Ziem.

The racket committee yesterday ended seven weeks of hearings into other Teamster affairs, but did not call the witnesses still under subpoena in the death of Kierdorf.

The union business agent from Flint appeared at St. Joseph Mercy Hospital the night of Aug. 3, his body covered with burns which police believe he received in an arson of a Flint dry cleaners.

He died four days later without explaining his injuries to police satisfaction.

Oakland County ties to the burning crystallized a month later when Mrs. Iris Harrelson, former wife of Teamster Local 614 President Leann Harrelson, told police her husband and Herman Kierdorf, uncle of Frank, were concealing knowledge of the arson and Frank's actions following his being burned. Both denied the accusations.

Earlier a 13-day search for Herman, who was wanted for questioning about his nephew and for possession of a pistol silencer, made headlines across the nation. Herman eventually gave himself up and awaits trial on the silencer charge.

Both Harrelson and Herman Kierdorf were subpoenaed by the grand jury petition was denied here on the grounds it would be "expensive and time-consuming out of all proportions to benefits derived."

The Kierdorf probe now rests with the state police who are still investigating all leads, in cooperation with the Oakland County Prosecutor's Office.

Education Takes to Air in Little Rock

To Air Problem of Mental Aid

Judge Moore to Report in Lansing on Efforts to Place 500 Patients

Proposals on how to solve the problem of a gross shortage of hospital beds for Michigan's mental patients will be presented Friday in Lansing to the State Department of Mental Health Commission by Oakland County Probate Judge Arthur E. Moore.

As chairman of a committee composed of Michigan Probate judges chosen to delve into the crucial situation, Judge Moore reported that to date some 30 of 500 mental patients on hospital waiting lists have been placed where they can receive proper attention. The problem is still considered critical in the state.

Friday's gathering in the capital of the 17-member panel of judges with the commission will be aimed at "putting the heat on the commission to speed up these admissions," Judge Moore commented.

Returning aged patients in state hospitals to the counties, and leasing vacant beds in general hospitals for the waiting patients, are the major points the committee will push for, he pointed out.

Dr. Harry E. August, chairman of the commission, outlined to Judge Moore in a letter the drawbacks of carrying out his suggested plan. The state's "greatest bottleneck," Dr. August said, was the lack of professionally trained personnel, besides shortage of money.

SET STAGE FOR TV CLASSES — High school students in Little Rock, Ark., where schools are closed on order of Gov. Orval E. Faubus, may keep up their study schedule by telecast classes. Picture shows preparation for first classroom program. Announcer Bill Leer holds microphone for Mrs. Margaret Metcalf, literature teacher at Hall High. At right Mrs. Elizabeth Huckaby, vice principal at Central High waits her turn at microphone. Some classes are on the air today; full six-hour schedule is planned to start Monday.

Little Rock Students Begin TV Lessons

FROM OUR NEWS WIRES
LITTLE ROCK, Ark. — A television station scheduled an educational broadcast today for students enrolled at Little Rock's closed-down high schools. But some white pupils were calling for regular classes, even on an integrated basis.

Tension was high over the school closing, ordered by Gov. Orval E. Faubus to prevent the attendance of seven Negroes at Central High School.

More than 200 students have transferred out of Central, Hall High and Tech High. Only Horace Mann High School for Negroes has had no withdrawals.

At all-white Hall, 130 students—more than one-sixth of the 731-member student body—had pulled out as of yesterday. Central had 80 transfers this week and Tech had one.

Television lessons, which began today, are on film and are a pilot program for six hours a day of lessons that begin on Monday over three Little Rock commercial stations.

The lessons today include: "Introduction to Biology;" "The Pilgrims;" "Better Reading;" and "A Trip to the Moon."

They were scheduled for showing from 1 to 2 p.m. (CST) over a single station (KATV). Regular television instruction will be both live, with regular high school teachers, and film.

Sixty-five Hall High students met at a church yesterday and adopted a resolution pleading for the immediate reopening of their school as a public school.

The resolution said they feared education would suffer if Hall re-opened on Tuesday.

Will Forward Proposals to State Legislature

Supervisors Seek Law Changes

When next year's State Legislature considers proposals for new and amended laws, it will find some measures recommended by Oakland County officials.

Norman R. Barnard, committee clerk for the Board of Supervisors, yesterday released 12 suggested law changes submitted by supervisors and county officials.

Among these are five laws on the books which must be changed if supervisors decide to consolidate the office of drain commissioner and the year-old Department of Public Works. Several committees of supervisors approved this move Thursday.

To help draft a strong plan of new legislation the county would like adopted in 1959, the

Union Board Slates Sept. 30 Strike Date

Report Corporation's Bid Similar to Pact Reached Between Ford-UAW

FROM OUR NEWS WIRES
DETROIT—General Motors, under a September 30 strike deadline, today offered the United Auto Workers Union a new proposal for a three-year agreement.

The basic terms of the proposed agreement were similar to those of a settlement reached between the UAW and Ford last Wednesday.

The proposal, which GM said would mean substantial

Discover Girl, 9, Burned, Beaten

Police Report Boy, 14, Admits Hitting Victim With Rock

NEWARK, N. J. — A 9-year-old girl was found lying in the street last night, burned, beaten, teeth knocked out and her hair cut.

Police said a 14-year-old boy today confessed beating the girl with a rock but denied burning her. His name was not announced since he is a juvenile.

The girl, Theresa McHugh, was in serious condition at Marlboro Medical Center. A physician there said she either had been set afire or held over a roaring blaze.

Theresa was rushed to the hospital suffering burns of the back, chest, arms and head. She also had a deep gash over the left eye and bruises on her face. Several teeth had been knocked out and most of the others loosened.

Police said the 14-year-old boy, a resident of the same apartment development, broke down after three hours of questioning, admitted hitting her with a rock, but sobbed repeatedly: "I don't know why, I don't know why."

He told police he met the girl outside the apartment building, accompanied her into the park, watched her light a cigarette and then attacked her, leaving her on the ground.

One of the girl's shoes was found beside a pool of blood in the park. A piece of burnt clothing, believed to be her blouse, was 100 feet further on.

The boy was among 10 juveniles rounded up in the area after a superintendent told police the apartments had been the scene of several fights and vandalism recently.

Possible Showers, Cloudy Tonight

Partly cloudy and possible rain tonight is the forecast for the Pontiac area. Tonight's low will be about 55-60.

Scattered showers, windy and turning cooler is the outlook for Sunday. Monday will be fair and cool.

Today's southerly winds at 10 to 15 miles an hour will increase to 15-20 miles late tonight and tomorrow, shifting to northwesterly at 20 to 25 miles late tomorrow.

Fifty-nine was the lowest recorded temperature preceding 8 a.m. The reading at 1 p.m. was 68.

economic progress and security to more than 250,000 employees, contained 19 specific improvements in pay and benefit plans for GM employees represented by the union.

It would become effective as of Sept. 1 if agreement is reached on all national and local issues by October 1, a GM spokesman said.

The principal feature of the new proposal is renewal of the wage formula under which employees would receive three annual pay increases totaling at least 21 cents per hour during the life of the agreement. The first increase would be retroactive to July 1.

The employees would receive an increase of 3 cents per hour in their cost-of-living allowances to compensate for increases in cost-of-living which have taken place in the last four months since the old contract expired during the Memorial Day weekend.

Other features which paralleled the Ford agreement were an offer to an additional 8-cents-an-hour increase for skilled trade employees, severance benefits and improvements in the Supplemental Unemployment Benefit plan, pension plan and insurance program.

"Our earlier proposal for a two-year extension of the expired agreement was a sound and liberal offer," GM Board Chairman Frederick G. Donner, said. "But we are willing to make this new and improved proposal for a three-year agreement in the interest of a long period of labor peace and stability."

UAW reaction to the new GM offer was not immediately available, but union sources had indicated they would not be satisfied with just a "carbon copy" of the Ford contract at either GM or Chrysler.

The UAW Executive Board authorized strikes at both General Motors and Chrysler during a five-hour meeting last night in an effort to speed up contract talks which had made little progress since they were started 5½ months ago.

UAW President Walter P. Reuther assumed personal command of the UAW's negotiations with Chrysler today and told newsmen that "if Chrysler would get down to serious collective bargaining, we could have an agreement by Monday."

Chrysler declined comment on Reuther's announcement that the (Continued on Page 2, Col. 3)

Gillis Asks for Hearing

DETROIT (UPI) — Recorder's Judge Joseph A. Gillis has offered to resign from the bench if an impartial hearing fails to clear him in connection with his alleged association with the Teamsters Union.

MAKE OVER PANTS

like of Sea to Watch Cup Race

ABOARD DESTROYER MITSCHER WITH EISENHOWER. — President and Mrs. Eisenhower, on a gala holiday, headed into the Atlantic aboard this super-destroyer today to watch the start of the America's Cup races.

Accompanied by a party of friends, the vacationing President and First Lady left the U. S. Naval Base at 9:15 a.m. on the 14-mile run south in Narragansett Bay to the ocean and a box-seat vantage point.

A light variable breeze of between four and six miles an hour was blowing when British challenger Sceptre and U. S. defender Columbia were towed to the starting line for the first of the America's Cup races today.

The start was at a point of open sea off Brenton's Reef lightship eight miles from shore.

The Weather Bureau predicted clear skies and increasing southerly winds starting about an hour after the start.

The British secretary of state for foreign affairs, Sir Selwyn Lloyd, and the U. S. and British ambassadors to the United Nations Henry Cabot Lodge and Sir Pierson Dixon, boarded a Coast Guard cutter to witness the race from a close vantage point.

2 Bandit Take \$1,000 in Cash

Pair Wearing Stocking Masks Hold Up Market Manager

Two bandits, hidden behind "Halloween-type stocking masks," held up the manager of Tom's Market, 888 Orchard Lake Ave., last night and made off with about \$1,000 in cash.

Benny Schraffenberger, the manager, told police he and another employee, Sam Morey, were leaving the store at 9:30 p.m. by a side door when the men, carrying a shotgun and a 22-caliber rifle, forced them back inside and into a stock room at the rear.

The bandits tied up Morey and while one guarded him, his partner forced Schraffenberger to the front of the store where the safe was located.

Schraffenberger told police he was forced to open the safe and was then tied up in the stock room with Morey. The two men untied themselves about 11 p.m. and called police.

The money stolen was all in single dollar bills, five's and ten's, he said.

The largest traveling crane in the world is in the Chastang hydro-power station south of Paris. It is 66 feet wide and weighs 446 tons.

Texas Soaks in 12-Inch Downpour Summer Bows Out Wetly

By The Associated Press. Rain, occasional showers and cloudiness were the damp outlook for much of the country today as summer entered its last weekend.

Temperatures were not especially chilly anywhere, and only in the extreme Northeast and the Southwest was there much evidence of clear skies.

REVIEWING MSUO PROGRESS — At the monthly meeting yesterday of persons closely concerned with the erection of the Michigan State University Oakland building, Floyd Heineman, field supervisor for Swanson Associates, architects, points out progress on brickwork. Studying the building are, from left, Clarence Kremer, job superintendent for J. A. Fredman Construction Co., the general contractor; Theodore Simon, superintendent of buildings and grounds for MSU; Ray Westrick, secretary-treasurer of J. A. Fredman Co.; Donald O. Ross, supervising architect for Swanson Associates; and George Karas, supervising engineer for MSUO.

On Expulsion From Formosa

Ike to Reject Soviet Threat

By JOHN M. HIGHTOWER. WASHINGTON (AP)—President Eisenhower is expected to reject promptly and firmly Premier Khrushchev's tough warning that the United States abandon Formosa or face "expulsion" by Communist China.

In a new letter to Eisenhower yesterday, the Soviet Premier spurned a presidential bid to use his influence with the Chinese Communists to end the present Far Eastern crisis.

Khrushchev said Formosa belongs to Red China. If the United States does not abandon Nationalist China and pull out American forces, he said, "no other way will be left to people's (Red) China except expulsion of armed forces hostile to it from its own territory."

The Khrushchev letter, handed to Richard Davis, ranking U. S. diplomat now in Moscow, replied to a letter from Eisenhower Sept. 12.

In that letter Eisenhower told Khrushchev that if he was really interested in working for peace he would use his influence to get the Chinese Reds to stop aggressive acts in the Formosa area.

The Reds have been bombarding the Nationalist-held offshore island of Quemoy since Aug. 23. They also have been threatening broader military action aimed at eventual capture of Formosa, the Nationalist stronghold about 100 miles from the China mainland.

The 13-page Khrushchev letter was translated at the U. S. Embassy in Moscow before being transmitted here. A summary was broadcast by radio Moscow even before the State Department had time to notify Eisenhower, vacat-

tioning at Newport, R. I., that a new message was on the way. At Newport, there was no immediate comment from Eisenhower on the Khrushchev note. James C. Hagerty, White House press secretary, said today at Eisenhower's vacation headquarters that the President had received a short summary of the 13-page note.

"It now is in the process of interpretation and study," Hagerty said.

There was a possibility of some official reaction—short of an im-

mediate formal reply—later in the day.

Pending study of the full text today, the State Department withheld comment.

Secretary of State Dulles, returning here from the United Nations General Assembly meeting in New York, had nothing to say on the letter last night.

But officials noted privately that the United States has long been committed to the defense of Formosa against Communist attack and is supporting the Chinese Na-

tionals to some degree in their present efforts to stand firm on Quemoy. The United States has no intention of abandoning Formosa under threat from Moscow, these officials said.

Western diplomats in the Soviet capital said they did not consider Khrushchev's letter an ultimatum, but rather a strongly worded reply to match the tone of Eisenhower's note of Sept. 12. In that note, Eisenhower put full blame for the current crisis on the Chinese Reds.

Phillip G. Asbell, 20, of 102 S. Saginaw St., and Edward E. Burgett, 19, of 3427 Bandalow St., Rochester, required hospital treatment.

Asbell suffered a shotgun wound of the right foot and Burgett a head cut. The third man was identified by deputies as George W. Smith, 21, of 75 Wall St.

Deputies said that the three, along with several other people, got into an argument shortly after midnight at Minchella's Pizzeria, 1719 E. Auburn Rd., Avon Township.

During the fight that followed, witnesses told deputies, Smith hit Burgett over the head with a sugar dispenser. Burgett then went home and returned with a shotgun. During a scuffle Asbell was shot in the foot.

Asbell and Smith were held for investigation of felonious assault. Burgett is being held for investigation of assault with a deadly weapon.

Milkman Is Injured When Truck Overturns. Theodore Hubert, 28, of 1298 Bielby St., Waterford Township, was injured when his milk truck overturned while he was making deliveries shortly after 6 a.m. today said State Troopers.

Troopers reported that Hubert was going west on Pontiac Lake Rd. when he missed a curve at Watkins Lake Rd., Waterford Township. He suffered a possible concussion and fractured nose, according to report at St. Joseph Mercy Hospital.

Featured in the new setup are electrically-heated kitchen cabinets which pre-heat dishes before hot food is placed on them, Whitlow said.

"We believe the new arrangement will result in better food, delivered faster and hotter to our patients," Whitlow said.

GM Executive Elected Trustee at Cranbrook. Lawrence R. Hafstad, physicist and director of research for General Motors Corp., has been elected to the Board of Trustees of Cranbrook Institute of Science.

Hafstad, who lives at 5361 Lauren Ct., Bloomfield Township, was first director of the Reactor Development Division, Atomic Energy Commission, from 1949 to 1955. He received the Medal of Merit from the Navy and the AAAS award for development of the 1,000,000 volt vacuum tube.

Hafstad received his B.S. degree from the University of Minnesota and his Ph.D. from Johns Hopkins University, where he later was director of research.

Elected chairman of the Cranbrook board was Robert C. McMath, who succeeds the late L. James Bulkeley. New vice chairman is James A. Beretford.

The Board of Trustees also announced acceptance of \$4,000 in gifts and grants for the institute's research program.

Little Rock Students Begin TV Lessons

(Continued From Page One)

mained closed and urged that classes resume "even if, upon reopening, qualified Negro students of the Hall High district may be assigned to classes in our school."

Leaders of the group said copies of the resolution would be mailed to Faubus and to federal officials.

David Johnson, a student Council leader who helped arrange the meeting, said he thought the resolution conveyed the feeling of most Hall High students.

"Nobody has asked the students how they feel so we're telling them," he said.

Chris Barrier, another Student Council member, said he was sure most of the students who attended the meeting did not favor integration, "but we have been advised that this is the only way the school can be opened legally."

Faubus commented on the students' resolution last night while en route to Lexington, Ky., to attend a four-day meeting of the Southern Governors Conference.

At Danville, Ky., the governor said "65 out of 4,000 students doesn't seem like very many to me."

Faubus wouldn't comment on reports that the Little Rock school board feared to reopen the schools as private and segregated institutions. Nor would he talk about a report that he was considering letting Horace Mann High open as an integrated school to relieve pressure on students anxious to get back to their studies.

The governor has asked the school board to voluntarily hand over all four schools to a private corporation formed this week but the board has not answered his request.

A source close to the school board said last night board members felt they might be risking charges of contempt of federal court if they handed over the schools to private operators.

New Contract Bid Offered by GM. (Continued From Page One)

union's 25-man international executive board had sanctioned strikes against GM and Chrysler.

The Chrysler strike time was left to the discretion of Reuther and other top UAW officials in light of what progress—if any—is made in efforts to reach contract agreement.

In the case of GM, the union was much firmer. It set a Tuesday, Sept. 30, deadline for the walkout. Reuther said the GM problem is much tougher since it has four times as many auto plants as Chrysler and hundreds of unsolved grievances in local GM plants.

Reuther said that if the union should get gains at Chrysler or GM over and above those obtained from Ford, it would not go back to Ford and ask for further concessions. "We made a contract with Ford and we'll stick by its terms," he said.

Shotgun and Sugar Bowl Melee Lands 3 in Jail

Three men, one with a gunshot wound in his foot, are being held at the Oakland County Jail today after engaging in a fight at a restaurant early this morning, according to Oakland County Sheriff's Deputies.

Phillip G. Asbell, 20, of 102 S. Saginaw St., and Edward E. Burgett, 19, of 3427 Bandalow St., Rochester, required hospital treatment.

Asbell suffered a shotgun wound of the right foot and Burgett a head cut. The third man was identified by deputies as George W. Smith, 21, of 75 Wall St.

Deputies said that the three, along with several other people, got into an argument shortly after midnight at Minchella's Pizzeria, 1719 E. Auburn Rd., Avon Township.

During the fight that followed, witnesses told deputies, Smith hit Burgett over the head with a sugar dispenser. Burgett then went home and returned with a shotgun. During a scuffle Asbell was shot in the foot.

Asbell and Smith were held for investigation of felonious assault. Burgett is being held for investigation of assault with a deadly weapon.

Milkman Is Injured When Truck Overturns. Theodore Hubert, 28, of 1298 Bielby St., Waterford Township, was injured when his milk truck overturned while he was making deliveries shortly after 6 a.m. today said State Troopers.

The Board of Trustees also announced acceptance of \$4,000 in gifts and grants for the institute's research program.

From Our News Wires. BEIRUT, Lebanon — Lebanese Premier Sami Es-Solh, target of five recent plots against his life, was whisked out of Beirut secretly today and flown to Turkey in the private plane of U.S. Adm. James Holloway.

The arrangements for Solh's departure were carried out under cover of pre-dawn darkness, apparently to forestall any further attempts to assassinate the 70-year-old premier.

Unrest seethed throughout Beirut today, only three days before a new Lebanese regime assumes power.

As time for the government changeover Tuesday approached, the rebels were increasing tension, apparently purposely, with kidnappings and other lawlessness.

This has forced the authorities to clamp a curfew on Beirut and its suburbs beginning at 8 p.m. Monday "until further notice." It probably will last 24 hours, perhaps even longer.

Solh, a staunch supporter of Lebanon's pro-Western policy, was driven to the home of a friend

2 Ex-Colonies Defy De Gaulle

Morocco, Tunisia Back New Algerian Rebel Government

PARIS (AP) — The former French colonies of Morocco and Tunisia put Premier De Gaulle's government into a diplomatic quandary today by backing the new Algerian rebel government in its war against France.

The two newly independent nations flanking France's big North African territory defied the French warning that any country recognizing the Exile Republic of Algeria would be committing an unfriendly act.

If De Gaulle follows up the warning by breaking diplomatic relations with Tunisia and Morocco, he will eliminate them as possible intermediaries in any future peace talks to end the 4-year-old Algerian fight for independence.

France has refused up to now to negotiate with rebel leaders, although President Habib Bourguiba of Tunisia has always hoped to bring the two sides together for a peaceful settlement. Bourguiba reportedly opposed the establishment of a rebel government because it would lessen the chance of talks, but he had to go along with recognition to avoid dangerous criticism.

A break with France also could force Tunisia and Morocco to seek support and financial aid elsewhere — possibly President Nasser's United Arab Republic or even the Soviet bloc. France still has some troops in Tunisia and Morocco and contributes to their economies.

Nasser was the first to recognize the Algerian government after it was proclaimed yesterday in Cairo. The new Republic of Iraq, the kingdom of Libya and Yemen followed within hours.

PLAINWELL — Searchers today found a 2-year-old boy who had been missing all night from his rural Plainwell home. The boy, Ronald Carpenter, was brought to Crispe Hospital here where he was suffering from exposure but reported in good condition.

Ronald disappeared from the backyard of his home around 6 o'clock last night. State Police and sheriff's deputies searched the area around the home all night without turning up a clue to his whereabouts.

Early today a Civil Air Patrol pilot spotted the boy near an abandoned railroad about two miles from his home. The pilot directed ground searchers to the area.

Police said the boy was scratched, bruised and hungry.

Slate Blood Bank at Elks Temple Here Monday

The Pontiac Community Blood Bank for September will be held Monday from 2 to 5 p.m. and 6 to 8 p.m. at the Elks Temple, 114 Orchard Lake Ave., according to Mrs. A. H. Magnus, bank chairman.

The local chapter of the American Red Cross is making an urgent plea for donors, especially this month which follows a summer lull of blood donating.

No appointment is necessary but to insure prompt service, donors are advised to call MI 6-1313 or FE 8-3337 for an appointment.

Whisk Lebanese Premier to Turkey in U.S. Plane

From Our News Wires. BEIRUT, Lebanon — Lebanese Premier Sami Es-Solh, target of five recent plots against his life, was whisked out of Beirut secretly today and flown to Turkey in the private plane of U.S. Adm. James Holloway.

The arrangements for Solh's departure were carried out under cover of pre-dawn darkness, apparently to forestall any further attempts to assassinate the 70-year-old premier.

Unrest seethed throughout Beirut today, only three days before a new Lebanese regime assumes power.

As time for the government changeover Tuesday approached, the rebels were increasing tension, apparently purposely, with kidnappings and other lawlessness.

This has forced the authorities to clamp a curfew on Beirut and its suburbs beginning at 8 p.m. Monday "until further notice." It probably will last 24 hours, perhaps even longer.

The Day in Birmingham

Hopefully Drill 4th Well for New School in Hills

BIRMINGHAM—Bloomfield Hills school board members crossed their fingers this week in hopes of finding sufficient water as drilling for the fourth well at the new junior high school on Quanton road began. The previous three have been unsuccessful.

Contractors for this well are the L and L Company of Royal Oak. The cost will be \$1,300 for one 50-foot well with additional drilling at eight dollars per foot, according to Superintendent Eugene Johnson.

The district has already spent \$10,000 in its search for water. Two of the wells drilled to 320 feet deep, were dry. The third well is already clogging with sand and it is expected to soon become useless.

Johnson said this is the district's first bad break on the water problem. Satisfactory wells ranging from 65 to 110 feet deep have been drilled at Eastover, Hickory Grove, Pine Lake and Walnut Lake schools.

The high school well is 320 feet deep.

Two driverless autos collided on Cole street yesterday. Damage to one, a Birmingham police car, was about \$175.

Detective Richard Chambers said he had parked a squad car in front of his home at 1882 Cole street and had gone in for dinner. Mrs. Chambers suddenly called "Look" and pointed to the street. The detective saw a neighbor's car roll down the drive, cross the street and "cllobber" the police vehicle.

Chambers said apparently a faulty transmission had let the other car roll back although it had been properly parked.

W. K. Von Wiler, district governor of Rotary International, will make his official visit to the Birmingham Club Monday at the luncheon meeting at the Community House.

Edwin F. Kirbert, president, and Forbes Haskill, secretary will meet with Von Wiler to discuss club affairs following the luncheon.

St. Dunstan's Guild had sched-

uled "The Matchmaker" for its first production of the coming season.

Robert Garrison and Mrs. Glenn Miller are conducting tryouts now for the Oct. 10 and 11, 17 and 28 presentation of the three act comedy.

Dr. Maurice Garabrant, musical director at Christ Church Cranbrook will open the carillon concert at 4 p.m. tomorrow.

Open to the public, the concerts will continue every Sunday until November.

To Fete Teachers in Oxford Area

OXFORD — The Oxford Rotary Club will entertain approximately 100 Oxford School District teachers and their wives and husbands Tuesday for dinner.

Dr. D. B. Varner, Michigan State University vice president, will be the guest speaker for the affair held at the Daniel Axford Elementary School gym at 6:30 p.m.

Roger Oberg, assistant superintendent, is general chairman of the program and the Oxford High School Ushers Club will serve the dinner.

Accidentally Shoots Self on Avon Target Range

A Birmingham man, Garnet B. Sparks, 21, accidentally shot himself in the leg Friday evening according to Oakland County Sheriff's Deputies.

Sparks, of 1316 Puritan St., was treated for a minor calf wound at St. Joseph Mercy Hospital and released.

He was shooting at a target range located at Avon and Dequindre roads, in Avon Township. When he attempted to put a .22 caliber pistol in a holster gun accidentally went off, it was reported.

India has the world's fourth largest railway system.

ADVERTISEMENT for BIDS

SITE CLEARANCE FOR PRIMARY SCHOOL

PONTIAC PUBLIC SCHOOLS Pontiac, Michigan

PROJECT: Site clearance—removal of trees, brush, etc.—for new Primary School.

LOCATION: Square Lake Boulevard and Maplewood Avenue—Bloomfield Township, Michigan.

OWNER: Board of Education, Pontiac Public Schools, Pontiac, Michigan.

ARCHITECT: H. E. Boyster & Associates, Inc. 700 Griswold Building Detroit 26, Michigan

SCOPE OF PROPOSALS: Sealed proposals, in duplicate, are invited for this work.

DUE DATE AND PLACE: Sealed proposals will be received by the Board of Education, Pontiac Public Schools, at their offices located at 40 Patterson Street, Pontiac, Michigan, until 2:00 P.M., E.S.T. on Wednesday, September 24, 1958, at which time and place the bids will be publicly opened and read aloud before the Board of Education.

ACCESS TO PLANS: Plans and Specifications will be on file for reference at the following locations:

1. Office of the Board of Education, Pontiac Public Schools, 40 Patterson Street, Pontiac, Michigan.
2. Office of H. E. Boyster & Associates, Inc. Architects and Engineers 700 Griswold Building 1214 Griswold Detroit 26, Michigan
3. Builders & Traders' Exchange, Detroit, Michigan.
4. F. W. Dodge Corporation, Detroit, Michigan.

DEPOSIT ON PLANS: Plans and Specifications may be secured from the Architect on or after September 12, 1958, with a deposit charge of \$10.00 per set.

PROPOSAL GUARANTY: A certified check or bidder's bond, payable to the Treasurer of the Board of Education, Pontiac Public Schools, for the sum of not less than 5% of the amount of the proposal, will be required with each proposal condition to secure the Board of Education from loss or damage by reason of withdrawal of the bid or the failure of the bidder to enter into the contract of performance, if the bid be accepted by the Board of Education.

RIGHTS RESERVED BY OWNER: The Board of Education of the Pontiac Public Schools, Pontiac, Michigan, reserves the right to reject any or all bids, or to waive any informalities therein.

CONTRACT SECURITY: The successful bidder will be required to furnish Performance, Labor and Material Bonds. No bid may be withdrawn for at least thirty days from the time of its presentation and opening.

THE BOARD OF EDUCATION PONTIAC PUBLIC SCHOOLS Dr. Walter L. Godsell, Secretary

Appoint Chairmen of Planning Council

Two Pontiac women will help guide activities of the Greater Pontiac Community Council during the coming year.

At the first meeting yesterday of the 1958-59 executive committee, council president Clark J. Adams appointed Mrs. S. V. Sekles chairman of the new social service planning division and Mrs. Floyd Smith chairman of the civic planning division.

The two divisions were created earlier this year to strengthen the council's organization.

Adams also appointed chairmen and members of three standing committees: finance — Carol Osun, chairman, Mrs. Barney Habel and David C. Utley, members; program — Mrs. William Wright, chairman, Mrs. Sadie Williams and the Rev. Carl Nelson; and public relations — John A. Riley and Larry Payne, co-chairmen, Jack Murray, Leslie Dean Sr., and Mrs. William Dean, members.

Actress Terry Moore, Mother Sue for Damages

LOS ANGELES (AP) — Actress Terry Moore and her mother are suing for \$151,530 damages over injuries suffered in an auto accident last Dec. 16.

Their complaint, filed in Superior Court yesterday, was directed against Mrs. Joseph Cedar of North Hollywood, identified as driver of a car which struck one driven by Miss Moore.

The actress and her mother, Mrs. Louella Koford, said they sustained neck and back injuries.

Use More Tons of Paper

NEW YORK (UPI) — More than half a million tons of newsprint were used in the United States last month, thus marking the first increase in consumption in 14 months, the American Newspaper Publishers Assn. said yesterday.

Student Wants 'Time to Think'

Walking From Texas to Peru's Capital

MEXICO CITY (AP) — Edwin J. Cashman is walking from Laredo, Tex., to Lima, Peru.

Cashman, 23, hails from New Richmond, Wis., where his father is a manufacturer. He spent two years in the University of Rochester, N.Y., then early this year decided he wanted to continue his studies in the University of San Marcos at Lima.

He decided the best way to get there was a foot-to learn more about the various countries and have "time to think."

"I take shortcuts, to save time and see

more of the country," he said. "Sometimes it's dangerous, but I've managed all right so far."

He can make about 25 miles a day with his light gear, and hopes to arrive in Lima next spring or summer.

"I sleep on farms and ranches, on floors of adobe huts, and eat native dishes," he said. "I'm growing a big beard, so people will think I'm crazy. They're more sympathetic that way."

He said he had lost 20 pounds—down to a trim 158 on his near six-foot frame—during the first 650 miles of his hike.

He's on his way to Guatemala now.

U. N. Group Plans Mission in Jordan

UNITED NATIONS, N. Y. (AP) — A special U. N. committee will go to Jordan next week and try to make arrangements insuring that nation's independence so British troops can withdraw.

A brief announcement yesterday did not disclose how the committee of U. N. Secretariat members will operate.

The committee will be headed by Pier Pasquale Spinelli, an Italian who is under secretary in charge of the Geneva U. N. office. He will be assisted by John Reedman of South Africa and R. B. Stedman, a U. S. citizen who has been with the U. N. Emergency Force in the Middle East.

Staging Mock Attacks

ST. HUBERT, Que. (AP) — U. S. Strategic Air Command bombers began mock attacks on the United States and Canada without warning today in the first large-scale exercise for the new North American Air Defense System.

Reds Deny Knownig Fate of Lost Crew

MOSCOW (AP) — The Soviet government has denied any knowledge of what happened to 11 crewmen missing from a U. S. Air Force plane that crashed in Soviet Armenia.

A Soviet note made public here today said a U. S. statement that Russian fighters intercepted the plane was "provocative in nature." The Kremlin accused Washington of trying to justify an "intentional violation" of the Soviet border.

The unarmed C130 Hercules transport plane crashed Sept. 2 after disappearing on a flight inside Turkey adjacent to Armenia. The Soviet government said earlier six bodies were found in the wreckage.

The note was handed to U. S. Charge d'Affaires Richard H. Davis yesterday by Deputy Foreign Minister V. V. Kuznetsov.

The State Department in Washington said the note contained a promise to return the six bodies but failed to give any information about the missing 11.

The U. S. government charged last Saturday that Soviet fighter planes were seen intercepting the plane in the area of the Turkish border and subsequently an explosion was heard and smoke rose from the other side of the hills in Soviet territory.

In promising to transfer the remains of the six crewmen to U. S. authorities, the note gave no indication where or when. It ignored U. S. requests to allow Embassy officials to inspect the wreckage.

Limits Radio Time

WASHINGTON (UPI) — The Federal Communications Commission yesterday rejected a request to extend the operating time of daytime-only radio stations beyond the present sunrise to sunset hours.

NEW YORK (AP) — A pigeon wandered into Grand Central Terminal yesterday, perched on the minute hand of the big clock above the bulletin board and knocked it out of commission. When the bird landed it was 5:15 p.m. The hand sagged under its weight and the pigeon started to thrash about his feet, seeking a firmer foothold. That did the trick; the clock stopped.

Pat Carroll, 58, train announcer, had to announce the correct time at intervals until mechanics fixed the clock.

Commented Carroll: "As if the railroads don't have enough trouble."

Mackie Blasts Cement Industry

Charges Greed Reason for Smear Campaign Against Highway Dept.

LANSING (AP) — A blast against the cement industry, almost hot enough to melt cement, has been unleashed by John C. Mackie, state highway commissioner.

Mackie was angered because, he said, the Portland Cement interests have been hitting at his department in an effort to promote their product over asphalt concrete.

"Unmitigated gall," said Mackie, "they have been caught bare faced with their greed showing."

"A long standing monopoly by the cement industry on arterial pavement in Michigan has ended," Mackie said, "and, in a fit of anger, a certain few cement barons have embarked on a big spite advertising campaign that is as transparent as it is stupid."

Mackie announced on Sept. 5 that in his five year arterial highway construction program, 192 miles be built with asphalt concrete and 786 miles with Portland Cement.

Department spokesmen said the Portland Cement industry has been running full page newspaper advertisements in cities near its plants urging citizens to write the Governor protesting the use of asphalt. Such use will mean a loss of jobs, local citizens are told in the advertisements.

The Governor's office said about 40 letters have been received to date, all from the Alpena area where one of the ads appeared Sept. 12. Huron Portland Cement Co. has a plant there employing 1,000 persons.

The highway department spokesman said the Portland Cement industry also is scheduling a television campaign.

"Although the cement interests are getting almost 80 per cent of the program," Mackie said, "they have the unmitigated gall to try Madison Ave. slick sales methods to attack the integrity of the department's engineering staff and hoodwink Michigan citizens into thinking they should have 100 per cent of the business."

Gypsy Sees Attorneys, Judge Peel

LOS ANGELES (UPI) — Gypsy Rose Lee, one of the country's most famous strip tease dancers, went to court yesterday and saw a judge and some lawyers do a bit of stripping.

Superior Judge Red Hardy, taking note of the smog-clogged courtroom and near 90-degree weather, took off his judicial robe and invited lawyers and others in the room to shed their coats.

"I don't blame anybody for wanting to peel on a day like this," said the fully clad dancer who nevertheless declined to follow the judge's example.

She appeared in court with her sister, actress June Havoc, who has filed suit for \$62,914 damages against J. M. Friedman and his wife, Edith, as the result of a business deal in which Miss Havoc claimed she lost nearly \$60,000.

AEC Delays Firing of Atomic Device

ATOMIC TEST SITE, Nev. (AP) — Firing of an atomic device in a 500-foot vertical shaft, scheduled for today, has been postponed, according to the postponement last night, said the device may be set off Sunday.

The explosion is a safety experiment involving the storage and handling of atomic weapons. Similar safety tests have accompanied all full-scale weapons tests but this will be the first open to observation by newsmen.

The next full-scale test, a balloon shot like yesterday's, is scheduled for next Thursday.

Divorce Decrees

Marriages from Riley T. Clark, Lorene from G. Patrick Bingham, Bonnie R. from Helen L. Scott, Caroline from Jesse Acosta, Rex D. from Albert F. King, George Connor, Betty Lou from Leon Spiegel, Virginia J. from Michael J. Hart, Martin R. from Eunice M. Bishop, Anne J. from Richard B. Thompson, Loreta from Mickey A. Conway, Joan from Richard Figley, Rita from Albert Rigby, Florida from Edward D. Lamb, Constance J. from E. Robert Tucker, Lewis M. from Peggy E. Johnson, Myrtle E. from Charles F. Holloway.

Sentences Race Rioters for London Disturbances

LONDON (UPI) — Five men who took part in London's violent race rioting of three weeks ago have received sentences of 18 months each.

to two years. The judge, in passing sentence yesterday, said he had been forced to "revive" a law almost 300 years old in order to deal with "this growing menace of street war."

Reflections

BETWEEN TERMINALS:

On the lawn was a baby carriage. On the porch was a big soft, easy chair; between these objects is the Highway of Life.

It isn't where we began life that is so important but it is significant what we do along this Highway. We have little regard for the "Clutter-upper," dislike the person who uses our friendship as a ladder, rushes madly past all the beauty spots, withholds kindness when it is more valuable than gold. No one has a second chance to travel this Highway; we must either help those we meet or forever wish we did. A smile is sunshine, a kind word a leavening, to reach down help someone up is a gateway to heaven, mile posts on the Highway of Life. When we use that soft, easy chair these are the incidents to enjoy the most. Each one is illuminated with soft shafts of multi-colored light. They are ours to treasure.

When you're traveling, remember the mileposts.

RIBBON DIVIDER — The room divider has come into its own as an element of utility and beauty. And in the convenience of your own home you can make your own from one of the simplest and decorative of materials — woven edge ribbon. For a one-room apartment, or to break up large rooms into comfortable conversation pieces, the ribbon room divider adds a charming and unique touch to today's design for living.

Closing Summer Cottage Is Painstaking Job

One of the saddest days of the year is the one when you close the summer cottage for the last time until next spring. However, you can ease the pain some by making sure that everything possible is done to leave the place in good shape for the next season.

Here are some helpful hints for buttoning up for the long winter:

1. Air bedding in the sunshine before storing. This will keep it fresh longer and minimize dampness. Store bedding in closets or tightly fitting trunks. Spray with a moth proof.
2. Clean and wax refrigerators and stoves. Leave door of refrigerator slightly open. The air will keep it fresh.
3. Dispose of all foods, particularly liquids. If the liquids are in cans they will freeze during the winter and be inedible; if in glasses they will burst.
4. Cut off all water and drain water out of pipes.
5. Remove screens, wax the edges of the frames and store. Shutter and board all windows and doors.
6. Cover chimneys to keep out squirrels and birds and close all dampers in stoves and fireplaces.
7. Before you store garden tools and outdoor furniture, give them a coat of paste wax. Wax painted or enameled furniture. This fills up the pores and unevenness in the film of paint, providing a smooth

Watch Those Shadows

Colors of walls are effected by lights and shadows. Since the wall area surrounding windows is in shadow, it appears darker than the walls on which the light from the windows falls. Decorators often have window walls painted in a lighter tint to compensate for this condition.

Over five billion square feet of shingles and other asphalt roofing were used in home construction during 1957 to protect home against weather and fire.

Drill Kit Designed for Home Mechanic

The new Home Mechanics Kit, a complete, singly-boxed, handy-man's workshop containing a 1/4" drill and more than 50 accessories is being introduced by the Cummins Power Tool Co.

Included in the boxed "workshop" are a 20-piece drill kit for drilling, sanding, polishing, buffing, grinding and a special 21-piece socket wrench set, custom designed for the use of home mechanics who work seriously at their own car repairs.

All the power accessories are driven by a 1/4" Drill with geared chuck and may be used for assembly work, appliances and garden equipment repairs and many other jobs around the house, shop or garage.

The complete new Home Mechanics Kit includes: Perm-Align 1/4" capacity drill, 115 volts A.C. to 60 cycles, 1800 r.p.m. geared chuck and key; sturdy metal carrying case; bits for wood or metal; coarse sanding discs and fine sanding discs; lamb's wool bonnet; grinding wheel; buffing wheel;

horizontal bench stand; set for attaching accessories; set of sockets; hex drive ratchet; ratchet adapter; 2 hex ell handles; socket handle with plastic grip and plastic pouch for socket set.

Paint Will Camouflage

It is still decorating practice to paint walls and woodwork all one color. Furthermore, using the same color on walls and woodwork of a small room makes the room look larger. It's advisable also in rooms where the woodwork is not well placed. By making the woodwork blend with the surrounding wall, its deficiencies are less noticeable.

Blue Green Pleases All

In an office where all workers face the same way, it is considerate to paint the wall they face in a soft, restful, inconspicuous color. A blue-green is suggested, and a pale shade advised. The other three walls and the ceiling should be coated in a color with high light reflectance.

The average cost of a new one-family home has risen from \$7500 in 1948 to over \$12,500 this year.

CUSTOM-BUILT 3-BEDROOM BRICK

- Full Basement
- 2 Car Garage
- Dwelling and Garage Plastered

New Products Make News in Home Field

In Cranston, R. I., Kay Enterprises has come up with a device aimed at eliminating much of the messiness from a job of painting. It's a plastic rim for the top of a paint can. The rim has a magnetized brush holder, a brush drip ridge which keeps the can clean from dripping paint and also a pouring spout.

Silvray Lighting Inc., Bound Brook, N. J., has come up with a fluorescent lighting system called Colorcil which provides luminous,

pastel-colored ceilings designed to provide up to 2 1/2 times the illumination level usually found in well-lighted areas.

While the system provides ultra-bright illumination there is no harsh glare. Interesting design effects are possible in two or more colors through use of plastic eggcrate panels. Fatigue through eye-strain is minimized and working efficiency increased, it is claimed.

An insulated aluminium window, internally weather sealed by means of a two-piece frame and furnished with double-glazing which is made to equal or better the insulating qualities of special storm sash has been introduced by Textron Metals Co., Girard, Ohio.

Water Based Contact Cement Non Flammable

A new water-based, non-flammable contact cement has been announced by the Borden Chemical Company.

The product provides exceptionally strong bond, yet can be washed off hands and equipment easily with warm, soapy water. Compared with solvent-based contact cements, the economical new cement gives twice as much coverage when applied by brush, roller or spray. In addition, it may be used as it comes from the can; no thinning is necessary.

The new contact cement, being non-toxic, does not harm skin. Neither does it produce dangerous fumes.

Designed for bonding plastic laminates and installing plywood wall panels, the cement also bonds dissimilar materials. Because it bonds instantly on contact, no clamping is required.

The new product was developed by Borden's to replace its solvent-based non-flammable contact cement. The company also manufactures a broad line of other adhesives for the home handyman.

START IT NOW — The little giraffe clothes tree pictured here with NBC's child actress Claudia Dehning is a simple invention. It gives absolute security against clothes being scattered all over the room. Makes a wonderful Christmas present too. Of course, there's no reason for a child to be without a giraffe clothes tree. You can build it yourself for practically no cost at all from a few scraps of wood. Any inexperienced amateur can do it when he (or she) uses the full size pattern. The pattern lists the needed materials and gives easy-to-read step-by-step directions which anyone can understand. You will notice that the little pegs on the neck are just the right height for hanging up clothes. The whisk broom tail is handy at all times. To obtain the full size giraffe clothes tree pattern No. 113 send 50 cents in coin to Steve Ellingson, The Pontiac Press, Van Nuys, Calif.

'Dry' Lumber Best to Use

Several years ago, technicians of the U. S. Forest Products Laboratory, Madison, Wisconsin, performed what then seemed to be a routine experiment.

However, the simple procedure produced some astonishing results. In fact, they provided a broad new base for all of the great advances in wood technology during recent years.

Before their experiment, the U. S. technicians knew that the process of seasoning (air or kiln drying) had a salubrious effect on the performance of lumber. By further testing, they hoped to determine the specific impact of low moisture content on wood strength and durability.

When the tests were completed and the results tabulated, an amazing story began to unfold. Their "guinea pig" had been Southern Pine, the strongest of structural woods in its rough unseasoned state. After thorough drying, the following increases were noted in the potent natural strength properties of this species:

Bending strength, 75 per cent; vertical strength, 106 per cent; stiffness, 27 per cent; and hardness, 57 per cent.

In a separate report, the federal agency said a state of dryness was also the best assurance of permanence in wood.

These twin advantages of "dry" lumber: (1) uniformly higher strength and (2) permanent improved and expanded lumber usage of today.

Knowledge of the virtues of "dry" lumber has contributed to the comfort and security of millions of U. S. home owners. Lumber builds the most important part of the house, its structure, and well-seasoned wood gives it added strength and weather-tightness. Good construction practices assure a constant state of dryness after the lumber is installed. This, in turn, provides a permanent building whose future maintenance will be low.

So important is the process of seasoning that the standard grading rules for Southern Pine Lumber provide specific moisture content restrictions on lumber of the type used for house framing. When this species is grade-marked, and thus certified as to grade, the user is assured the lumber is properly seasoned.

Lower Prices, Easy Money Help Home Buyers Now

WASHINGTON (UPI)—Buy now, the experts say, if you're thinking about getting a house. To a man, banking and housing authorities here agree that interest rates and new home prices have touched bottom for the foreseeable future.

Mortgage money, meanwhile, continues in abundant supply.

How long before borrowing costs start turning up is one on which the experts hesitate to speculate. They agree, however, that with mortgage interest rates traditionally more sluggish than others, no noticeable upturn is likely before autumn.

But they also agree that the recent easing of rates and the availability of loan money has ended.

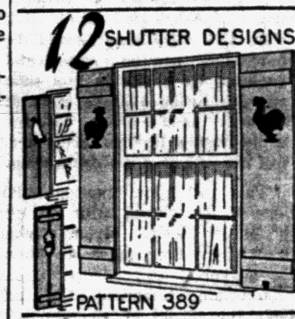

"Families today are getting a better buy in the housing market than they were just a year ago," W. Franklin Morrison, president of the National League of Insured Savings Associations, told United Press International. "But how long this will continue is a matter of serious question."

Morrison noted that half of this year's output of new houses is selling for \$14,300, compared to a median price of \$15,000 in 1957.

"The builders have been hungry. They've been going all out" was the way one authoritative building industry source explained it. "But with materials prices and wages rising they're going to change their tune."

The experts agree that mortgage money is still plentiful for qualified borrowers. The National Association of Real Estate Boards found an "ample" supply of funds for conventional financing in 80 per cent of the nation.

Mason, Morrison and others also reported that mortgage money is easily available. They contrast this situation with a year ago when lenders were turning away many qualified borrowers who were ready to pay the going interest rate.

SHUTTERS LEND STYLE and are useful when it is time to close a house or summer cottage. Pattern 389, which shows how to make a number of different kinds and gives actual-size guides for a variety of applied and open-work decorations, is 25 cents. This pattern also is one of 5 in the Homestead Improvement Packet No. 30 — all for \$1. Orders under \$1 add 10 cents service charge. The Pontiac Press Pattern Dept., Bedford Hills, New York

Fill in Cracks First

Remember to use crack filler when preparing a surface for refinishing. All gouged places in floors, furniture or woodwork must be filled and leveled off. Cracks in plaster should be filled with spackling compound or patching plaster.

Paint Window Shades

A home artist can work more effectively if he knows the base of paint used. A plastic-based paint is good for applying decorative touches to bathroom, kitchen or nursery window shades. Besides being washable, the paint resists cracking as the shade is pulled up and down.

Turkey produced 65,500,000 quarts of alcoholic beverages in 1957 compared with 63,400,000 in 1955, 46,500,000 in 1952, and 3,060,000 in 1950.

U. S. Report Hails Durability of Walnut

American walnut has many outstanding properties which account for its wide popularity for furniture, wall paneling and other uses,

according to the United States Department of Agriculture.

"Even under conditions favorable to decay," the department reports in a handbook, "walnut heartwood is one of our most durable woods. It holds its shape well after seasoning. Walnut works easily with handtools and has excellent machining properties."

"The wood finishes beautifully with a handsome grain pattern. It takes and holds paints and stains exceptionally well, can be readily polished and can be satisfactorily glued."

Walnut is hard, strong and stiff and has good shock resistance, the report points out. It can be easily bleached to attain many of the lighter than natural tones so popular today.

Use Old Nylon Stocking

The most thorough mixing of paints will sometimes leave a few lumps hard to get rid of by stirring. Take an old nylon stocking, stretch it over the top of an empty can and pour paint through it. You will find this an efficient way to have a smooth coating, and it hasn't cost you a penny.

Capital Investment Up

NEW YORK — During the past 10 years in the United States the average capital investment per production worker rose more than 80 per cent, to \$16,000. In 1948 the figure was \$9,000.

BIDS WANTED

The Board of Trustees of the Ortonville Methodist Church will receive bids for the construction of a frame addition to the church until 8:00 P. M. E. S. T. on October 14, 1958 at the Methodist Parsonage, Church Street, c/o Rev. I. R. McPhee, Ortonville, Mich.

Separate proposals are requested for General, Mechanical, and Electrical work.

Plans, specifications and other bidding documents may be obtained from Rev. I. R. McPhee, Methodist Parsonage, Church Street, Ortonville, Mich.

INSTALLING BATTS — Follow rule illustrated, above, when installing batts of insulation, if you'd have insulation work most efficiently.

Make Your Home Snug Against Cold Weather

Ideally, a home should be fully insulated when built or remodeled. But there may be parts of your home not insulated, or which need additional insulation.

Insulation is a barrier that slows down temperature changes. It slows down heat loss from the inside in winter, of heat from outdoors in summer.

That's all it is. Insulation of itself neither heats nor cools.

It has no magic properties. And if you install it where there is little likelihood of heat transference, you're wasting money.

Decide first where you need additional insulation; second, what sort of insulation would work best in each spot.

HEAT LOSS

Since warm air rises, most heat loss is through the attic. And in summer this is also the spot in which heat builds up quickly because of the sun's rays beating directly on the roof.

Walls vary in their need for insulation. Those most exposed to the weather need the most protection. Chances are, in winter the north wall is the coldest. In summer, the south wall most needs protection from the sun's rays.

Conditions may vary in different areas. The presence of other buildings and of trees should be considered.

Floors in basementless homes should be insulated. So should floors of rooms built out over the top of a porch or attached garage.

When you shop for insulation, you'll find these four basic types available:

FILL INSULATION is sold as bagful of loose material, and is the least expensive type. It is suitable for pouring between joists in an unfinished attic. Used in that fashion, it should be spread from two to four inches deep.

Loose insulation is used, too, to fill between walls of older homes. This requires installation by use of a blower, and professionals only should handle the job. It's no task for the handy man.

BAT OR BLANKET INSULATION is loose insulation packed between sheets of specially treated paper. Batts are short strips, blankets are the same material made in rolls up to 100 feet in length.

Thicknesses vary from one to four inches; width, from 16 to 24 inches.

Material is installed between studding or joists, and is nailed or stapled in place.

INSULATION BOARD is a thick wallboard which serves as both insulation and a wall-finishing material. It's often used in attics, sometimes in addition to batt-type insulation.

REFLECTIVE INSULATION is

New Roller Paints Pipes

Painting with a roller is the handyman's joy nowadays — but how about painting pipes? You can do that with a roller, too, now that EZ Painter Corp., Milwaukee, Wis., has come out with a sectional roller which revolves on a spring axle. The harder you press, the more the roller curves to fit around the pipe.

metal foil, usually aluminum, which insulates by reflecting summer heat. It's ideal for keeping out summer heat. It is often used in combination with other insulations to serve as a vapor barrier.

Most insulating materials contain rock wool, mineral wool, glass fibers, vegetable fibers or vermiculite.

Make certain that the insulation you purchase is both fire resistant and vermin proof.

Vegetable fibers do not have those qualities unless specially treated.

Wood Deck Popular for Outdoor Living

Families on the lookout for a patio design featuring charm, convenience, a minimum of upkeep, and simple construction will cast a favorable glance toward using a wood deck as the basis for their fresh air family room. Although decks are popular for use on level ground, they have always been a special favorite for sloping lots since they can be built out right over the slope and thus eliminate any need for leveling or filling.

One of the features of the wood deck which endears it to American do-it-yourselfers is its simplicity, for construction of a wood deck is so elementary that even a man endowed with five thumbs per hand can design and build one.

Decking boards of 2x6 Douglas fir, spaced a quarter inch apart to allow water to run through, are set on a heavy framework of 2x8s and supported by sturdy columns of fir set into concrete. There's no finish work involved, for folks these days have learned that time and tempest do a far better job of weathering natural woods than the paintbrush.

One of the newest ideas in deck design is the addition of a bench built along one edge. The bench affords convenient seating, and a flash of color can be introduced with a backrest of bright plastic panels set into a frame of fir. In addition to providing a lounging area, the bench and backrest form a sort of fence which screens the deck and lends privacy to this area for sunbathing.

Can Pull Headless Nails

Headless nails are always a problem to pull. Next time, try this trick. Grip the nail firmly between the jaws of side cutters after you position the claws of a hammer or wrecking bar at the base of the nail. Pry against the cutters, repositioning them for leverage as the nail slides out.

Don't store aerosol paint cans in temperatures of over 120 degrees; avoid exposure in sunny window areas and the back seats of autos, for instance.

Windows Vital to Home Decor Inside and Out

Good-looking windows and doors are vital to the appearance of a house because they are the only building materials that serve the dual role of decorating components both on the exterior and interior.

This is one reason windows and panel doors of ponderosa pine are favored by leading decorators. They know that:

1. Wood can be painted or stained to match or harmonize with color schemes inside and out.
2. Panels on panel doors of ponderosa pine provide interesting texture that adds to the appearance of both exterior and interior designs.
3. Wood windows and panel doors are manufactured in dozens of styles and sizes to fit practically any architectural plan and decorating scheme.

Insurance Interest Up

NEW YORK — The invested funds of the nation's life-insurance companies earned 3.75 per cent interest after investment expenses in 1957 compared with 3.63 per cent the year before.

Your Dream Home Deserves the Best Lot Available!

The site of a home is as important to its value, beauty and utility as the material, skill and architectural plans with which it's built. In fact, no matter how perfect the lot is today, ten years from now its value may have depreciated immensely. You can avoid such a situation when you buy in either two new developments in PLEASANT LAKE WOODS and RIVERDALE HILLS, with a total of 689 different building sites to choose from. Here you will find strict building codes with minimum of 1200 square feet of living space, large spacious lots and lake privileges. Also choose now from 140 different lake front lots on four different lakes in these two developments.
