

Mountains of Learning Ahead

"BROTHER, PREPARE" — Josiah Spires, 5, of 47 E. Blvd. S., who will attend his very first day of school Monday at the Longfellow Elementary School kindergarten, looks a little concerned and somewhat serious. He is standing between two stacks of books totalling more than 70 which he will be required to read in the next 13 years of public school. His oldest brother, Jason, 17, who began his last year at Pontiac Central High School today, shows Josiah some of the lessons which are in store for him. They are sons of Mr. and Mrs. Joseph Spires.

School Doors Yawn— and So Do Students

By SYLVIA de STEIGER

This morning was one of polishing shoes, combing hair especially neat, and sharpening pencils for the 16,250 public school children in Pontiac, who began their first day of the 1958-59 school year today.

St. Frederick's, St. Michael's and Emmanuel Christian schools, which enroll 1,760 students, also opened this morning.

Another 2,300 public school kindergartners will attend their first day of formal education Monday.

By Tuesday, the day that approximately 1,050 teenagers begin sessions at the new \$3,500,000 Pontiac Northern High School, all of the Pontiac schools will be in full swing with a total anticipated enrollment of 19,500.

The opening of Northern has been postponed until Tuesday because of a delay in receiving electrical fixtures and in completion of work by the electrical contractor, according to Dr. Dana P. Whitmer.

Besides the increased student enrollment of 400 over last year, 40 more teachers have been hired to staff the new high school, and a new grade school.

This brings the total teaching staff to 780 of whom 130 are new teachers.

The new \$450,000 elementary school on Franklin road and Fern street will provide educational facilities for 360 students.

Five classrooms and one kindergarten, a \$160,000 project, have been added to the Owen Elementary School on East Columbia and Baldwin avenues which allows an increase from 450 to 660 students this fall.

Beginning this fall, high school students will be enrolled in six regular class periods of work for (Continued on Page 2, Col. 2)

For Incomes Up to \$10,000 Per New Tax Form Out

WASHINGTON (UPI)—The government had good news today for 31 million taxpayers who make up to \$10,000 a year.

They can pay their federal income taxes simply by filling out a small card instead of laboring through a long four-page form.

This new labor-saving system of filing federal tax returns was not without certain disadvantages for some taxpayers, however.

The Internal Revenue Service (IRS) said that if taxpayers wanted to take deductions for business expenses, dividend credits, sick pay and credit on estimated tax payments, that the long form would be required.

Until today's ruling, applicable to 1958 incomes, only taxpayers with incomes under \$5,000 could use the simple card form, a punch card about the size of a bank check with 15 questions to be answered by the individual.

The new card form, according to revenue commissioner Russell C. Harrington, may be used by any individual who has:

—A total income of less than \$10,000 consisting of wages as reported on form W-2 from the person's employer.

—Received no more than \$200 in dividends, interest and wages not subject to withholding during the year.

Husband and wife also can make joint returns in this simple manner, provided their joint income is under the limit.

The new form is called 1040A. By using it, the taxpayer claims an automatic 10 per cent deduction allowed by law for personal expenses such as contributions, medical expenses and interest payments.

If allowable deductions over 10 per cent are claimed, the individual must use the regular long form.

The government apparently figures that a man who earns up to \$10,000 has a better talent for mathematics than the taxpayer in the under \$5,000 class.

The new regulations provide that taxpayers under \$5,000 can figure their own tax or have Internal Revenue do it for them. Taxpayers with incomes above \$5,000 must figure their own tax.

Formosa War Looms

Ike, Dulles Eye Strategy

Reds Warn U.S. to Keep Out of Formosa Area

Peiping Sets 12-Mile
Offshore Limits, Beams
Danger Alert

TAIPEI, Formosa (AP)—Communist China posted a new keepout warning today to any American ships and planes that might be sent to help Nationalist Chinese in Formosa and garrisons on Quemoy and other offshore islands.

The Peiping regime extended its territorial waters to 12 miles offshore, taking in Quemoy and Matsui which nestle against the Chinese mainland.

The official New China News Agency said in a broadcast that all foreign ships and aircraft must have permission to travel in the new zone.

The new area also included Formosa, about 100 miles from the mainland; and the Nationalist Pescadore Islands, supply point about 30 miles from Formosa. Both have always been claimed by the Reds as part of China.

The news agency defined the starting-point of the new 12-mile line as the line connecting the mainland coast with its offshore islands. That would take in Quemoy.

Matsu, which is about 18 miles from the nearest point on the coast, was within what the Peiping announcement called the Chinese inland sea.

The new sea limits give Peiping the pretext to regard any blockade-busting mission to relieve Quemoy as an act of invasion.

The Red Chinese move likely will be called illegal by most of the Western allies. But the allies lodged similar protests recently when the Soviet Union extended sea limits, and got nowhere.

The United States continued to beat up its forces on Formosa. U.S. authorities announced the arrival of more American Sabre Jets but did not say how many.

The new jet force is commanded by Maj. M. H. Frisbie of Powell, Wyo. His rank suggested that the force is of wing size, which usually numbers about 75 planes.

Gen. Curtis LeMay, U.S. Air Force deputy chief of staff and the top American exponent of long-range bombing, is due in Formosa Sunday for a look at the situation.

The Communists continued easing off their shelling of Quemoy today.

City Man Dies in Home Fight

Shoots Wife and Self
After Argument Over
Boy's Haircut

An argument over a haircut led to a double shooting this morning in which a woman was seriously injured and her husband killed.

Dead is Samuel Koonce, 33, of 23 Warner St., while his wife Wilma, 35, is in fair condition at Pontiac General Hospital with bullet wounds of the upper arms and chest.

According to Det. Sgt. Allen Noble and John Williams, Koonce shot his wife and himself after a family argument at 7:15 a.m.

Koonce's stepsons, Curtis Lee, 15 and Wayne Lee, 13, told officers the fight started over a haircut which Curtis was giving Wayne.

When Koonce objected to the way the haircut was done, Mrs. Koonce interceded for Curtis, the boys told police, and after a heated argument her husband knocked her down.

The argument resumed outdoors a few minutes later and Koonce opened fire on his wife with a .380 automatic pistol.

Wayne said he ran from the house in time to see his stepfather fire a last shot at his mother and then shoot himself in the chest twice, police said.

Candid Hoffa Study

FOUR FACES OF JIMMY — Teamster president James R. Hoffa presented these candid studies yesterday as he sat in the hearing room during the Senate Rackets Committee's investigation of affairs of his union.

Hoffa, Top Teamsters Plan 'New Convention' Strategy

WASHINGTON (AP)—Teamster President James R. Hoffa huddles today with his executive board on his proposal to hold a new convention soon to elect officials of the giant transportation union.

The convention move, announced by Hoffa last night, was viewed as an attempt to end the court-ordered mentorship of the 1,400,000-member union.

The three-member "watchdog" committee was set up last February by Federal Judge F. Dickinson Letts to make recommendations for safeguarding union funds and restoring self-government to Teamster locals.

Probe Teamster Land Investment

Investigators Eye Deal
for Million Dollars on
Real Estate Project

WASHINGTON (AP)—Senate investigators set out today to find out about a million-dollar Teamsters Union investment in a real estate development southwest of Flint, Mich.

The committee is conducting hearings on charges that Teamster President James R. Hoffa has misused union funds and conspired with gangsters in labor racketeering.

The AFL-CIO has expelled the Teamsters as a corruptly led union.

In testimony yesterday, Harold J. Gibbons, the Teamsters Union's top vice president and boss of its operations in the St. Louis area, acknowledged he may have violated the union's constitution when he won election last January as president of the St. Louis Teamsters council comprising some 20 locals.

Gibbons vigorously defended the presence on his staff of a long list of men the committee labeled as gangsters, criminals and strong arm men. He said he had neither facilities nor desire to investigate them and believed them innocent of wrongdoing as unionists.

He pleaded a lack of recollection to many incidents of violence for which the committee attempted to blame him.

Clearing and Cooler Is Weather Picture

Clearing and cooler with showers ending is the prediction for the Pontiac area tonight. The low will be near 57 degrees.

The weatherman says tomorrow will be partly cloudy and cooler with the high reaching around 72.

The outlook for tomorrow night is mostly fair and little temperature change with a low of 55.

Seventy-one was the lowest recorded temperature in downtown Pontiac preceding 8 a.m. The mercury rose to 87 at 1 p.m.

State Traffic Over Holiday Sets Record

LANSING (AP)—Traffic volume on Michigan highways during the four-day Labor Day weekend set a record, the State Highway Department reports.

Traffic recorders set up at key points showed vehicles traveled an estimated 658 million miles from Friday through Monday, the department said. That topped the previous record set on the Fourth of July weekend by 21 million miles.

Throughout the state, traffic volume showed an 8.2 per cent increase over the four-day Labor Day weekend last year. Biggest increase was recorded on U.S. 2 west of St. Ignace, where tourists heading to and from the Mackinac Bridge largely accounted for a 27 per cent increase over last Labor Day.

Chrysler Banks on Car Rebound

Colbert Estimates Gain
of 30 Per Cent on Full
Automotive Market

By ROBERT B. TARR
Managing Editor, Pontiac Press

MIAMI BEACH—Chrysler Corp. is banking on a five and a half to six million passenger car market in its bid for a substantial recovery in 1959, L. L. Colbert, Chrysler president said this morning.

He addressed an audience of some 400 newsmen and trade paper writers here for a press showing of '59 models of the Chrysler Corp. line.

His estimate is a gain of about 30 per cent over 1958 retail sales. Of this 1959 passenger-car market, Chrysler's president estimated that about 400,000 will be sales of imported cars.

Colbert said Chrysler has spent about \$150 million in bringing out its 1959 lines, which will be shown to newsmen this afternoon.

The Chrysler president revealed that considerable work has been done by the corporation in designing a small car which would meet needs and desires of the American motorists, but added:

"It is by no means clear as yet that the American demand for small cars is going to be big enough to justify one or all of the major automobile companies moving into this market with American-built small cars."

Chrysler will display the French-built Simca here along with its domestic cars. Colbert told newsmen that "Chrysler's decision to invest in Simca could turn out to be a big gamble."

(Continued on Page 2, Col. 5)

Seek to Delay Red Invasion of Offshore Islands

Commitment to Defend
Other Nationalist Posts
Still Unclear

NEWPORT, R. I. (AP)—President Eisenhower and Secretary of State Dulles today discussed strategy aimed at preventing any full-scale war in the Communist-threatened Formosa Strait.

Dulles arrived at the summer White House by plane and helicopter from Washington and went immediately to Eisenhower's temporary offices.

There the President and Dulles quickly got down to the business of studying how to forestall an invasion by Red China of the offshore islands held by the Chinese Nationalists.

In advance of the meeting there was speculation it might produce a public statement by Eisenhower or Dulles.

Dulles will lay before Eisenhower an appeal by Asiatic allies that the United States pledge itself to fight any Chinese Communist invasion of Formosa.

Diplomats representing seven Manila Pact countries are understood to have urged this action. Those nations are Britain, France, Australia, New Zealand, the Philippines, Pakistan and Thailand.

BOUND BY TREATY
The United States already is bound by treaty to help defend the main Chiang Kai-shek bastions—Formosa and the nearby Pescadores.

But Congress has given Eisenhower discretion whether such defense calls for fighting too far from Quemoy, Matsu and other smaller islands held by the Nationalists.

U.S. policy for months has been to keep the Reds guessing. Eisenhower is reported considering an indirect appeal to the Peiping government to renounce use of force in the Far East crisis except in self-defense.

Most U.S. officials cling to their belief the Red Chinese were bluffing in threats to invade Quemoy. But they seemed less certain than they were two weeks ago.

At the vacation White House, Hagerty refused to confirm or deny that more U.S. help is on the way to deal with the Communist siege of those islands.

Wins Residential Lot in Alaska

RECEIVES HER "CLAIM" — Mrs. Roy La Lone of 200 Baldwin Ave., receives her "claim" to a residential lot near Juneau, Alaska from Marshall Jordan, Pontiac Press retail advertising manager. Mrs. La Lone won the lot in the Gold Rush Days celebration contest sponsored by The Press in which more than 30,000 entered. She decided to accept the cash value of the land in lieu of the lot. Lillian Peters of 9361 Pontiac Lake Rd., White Lake Township, received the second prize, a solid gold nugget set with a one half karat diamond from Connolly's Jewelers in celebration of the proposed Alaska statehood.

Press Pontiac Airport Building

Lansing Meeting Drafts Plans for New Terminal and Tower on M59

Aeronautics officials met in Lansing today to speed plans for the new terminal at Pontiac Municipal Airport.

At the conclave were Homer Hoskins, airport manager; Lindell D. Hale, district airport engineer for the Civil Aeronautics Administration; William Hamlin, aeronautics department planning engineer, and Robert Peckham, consulting engineer for the state on the project.

City Manager Walter K. Willman said the group was trying to iron out problems in the final layout for a two-story terminal building and tower.

He hoped the plans would be ready for approval by the City Commission in time to be placed on the 1959 building program.

No final price tag has been placed on the building as yet, although the federal government has allocated \$110,000 for the tower and \$140,000 for the building. The state and city are to match the latter figure with approximately \$70,000 each.

Because the bulk of the money is coming from state and federal governments, the Civil Aeronautics Administration and the Michigan Aeronautics Commission have the largest voice in drawing up the plans, Willman said.

"The city commission will pass on the final plans, however," Willman added.

The new terminal is to be erected on a 20-acre site on M59 west of the present administration building.

City officials expect that the CAA will approve commercial airlines service for Pontiac once the terminal is completed.

Rails Would Hike Fares

PHILADELPHIA (AP)—The nation's two largest railroads, the Pennsylvania and the New York Central, said today they will seek passenger fare increases of up to 15 per cent.

Ella Creeps Up Toward Florida, Texas Coasts

NEW ORLEANS, La. (AP)—Tropical storm Ella, likely to regain hurricane force today, moved slowly across the Gulf of Mexico.

The center was a little more than 500 miles south southeast of New Orleans.

Scattered squalls with rough seas and tides of about two feet are expected between Port O'Connor, Tex., and Pensacola, Fla. Small craft were warned to remain in port.

Seas and tides are expected to increase along the lower Texas coast tonight and tomorrow.

Heavy rains drenched sections of the Midwest and showers fell in a few other areas but generally dry weather prevailed in most other parts of the country today. Skies were cloudy in many regions.

It was warm and humid across wide areas east of the Rockies to New England, excluding the Dakotas, Nebraska and Minnesota, which were cooled by Canadian air.

Thunderstorms, with locally heavy rains, hit areas from the central plains northeastward to the Great Lakes region. Heaviest rainfall was in southeastern Nebraska and northeastern Kansas, with nearly 6 inches at Pawnee, Neb. The Weather Bureau issued warnings of flash floods in parts of southwest Nebraska.

The Weather

WHERE PLANE HIT HOMES — Firemen dig through still smoldering rubble after a cargo plane crashed into homes in a London suburb. Seven persons, including the three crew members of the plane, died in the crash. Four homes were damaged or destroyed, as the plane hit in a fog shortly after takeoff.

School Doors Yawn, So Do Students

(Continued From Page One)

all three years. Last year, due to crowded conditions at the one high school, students attended in three shifts, and had four class periods plus a study period.

The new high school will include three music classrooms, a dining room with a seating capacity for 300, seven vocational shop classrooms including arts, driver training, wood and plastics, general metal, metal processing, drafting and homemaking.

The single story building also contains 23 classrooms in the central academic section, a library seating 180 students, a reading improvement center consisting of 15 private sections, a journalism classroom and administrative offices: general, principal, two assistant principal, eight counselor a clinic, bookstore vault and storage room.

A paved driver education area 250 by 260 feet is another feature of the new school.

The 116 acre site development of Northern High and Madison Junior High School, said to be the largest site in Michigan for secondary schools, includes a football field with an enclosing track, a baseball diamond, a softball diamond, three tennis courts and several levels of grass areas for physical education classes.

Parking facilities adjacent to the gymnasium will accommodate 250 cars.

The double gymnasium, lockers and swimming pools of the new school are expected to be ready four to six weeks after the opening of school.

Supt. of Schools Dana Whitmer pointed out that many cost-saving features are located in the new high school. These include nine foot ceilings compared to the 11 and 12 foot ones built 30 years ago; cinder block walls instead of plaster; plywood corridor walls behind the lockers and the same boiler room for the Madison and Northern schools.

The additions and new buildings are "a part of the long term effort on the part of the board of education to honor the request of the citizens to provide adequate school facilities when they voted in 1954 to provide a long term millage," Whitmer added.

Some remodeling has been done this summer at Central. A new homemaking multi-purpose educational unit on the first floor has been built to accommodate cooking, sewing, child care, child growth and development, home planning and budgeting classes.

Remodeling has also been done at Eastern, Jefferson and Lincoln Junior High schools this summer.

Three counseling offices have been constructed in a former classroom at Eastern; three counseling offices have been made from two at Lincoln and at Jefferson, the library has been enlarged to accommodate 75 per cent more books and double the student capacity, he added.

Population Soars to 32

FREEDPORT, Kan. (UPI) — This city is growing faster than any other in Kansas, the Department of Agriculture reported yesterday. The population of Freedport, the smallest community in the state, jumped 40 per cent last year—from 19 persons to 32.

ST. PETER, Ill. (UPI)—Glen F. Gesell crawled from his wrecked car on U.S. 40 near here yesterday and looked at the sign he had struck. It said: "Stop."

JAMES J. NANCE

Nance Resigns Ford Position

No Reason Announced for Move of Former Head of Packard

Ford Motor Co.'s vice president and general manager of Mercury-Edsel-Lincoln Division James J. Nance resigned today.

No reason was announced for the resignation.

Nance, a native of Ironton, Ohio, was an electrical appliance executive before entering the auto field in 1952.

He joined the Frigidaire division of General Motors Corp. in 1927 and subsequently became president of Hot Point, Inc.

Nance was president and general manager of Packard from 1952 to 1954 when that company merged with Studebaker. He was named president of the merged company.

He joined Ford as vice president in charge of marketing in November, 1956, and was named general manager of the Lincoln and Mercury division in August, 1957.

Aircraft Sales Climb Two Billion in a Year

WASHINGTON—The nation's aircraft manufacturing industry reports sales of 11½ billion dollars during 1957 compared with 9½ billion the year before. Despite the record sales, production of military aircraft declined from 6,800 units in 1956 to slightly more than 5,000 units in 1957. For the first time, commercial sales exceeded two billion dollars, an increase of more than \$500,000,000 over 1956.

Remodeling has also been done at Eastern, Jefferson and Lincoln Junior High schools this summer.

Three counseling offices have been constructed in a former classroom at Eastern; three counseling offices have been made from two at Lincoln and at Jefferson, the library has been enlarged to accommodate 75 per cent more books and double the student capacity, he added.

Population Soars to 32

FREEDPORT, Kan. (UPI) — This city is growing faster than any other in Kansas, the Department of Agriculture reported yesterday. The population of Freedport, the smallest community in the state, jumped 40 per cent last year—from 19 persons to 32.

By The Associated Press

The federal government has enlisted civilians to serve as deputy marshals if needed at Little Rock. Several Southern schools integrated peacefully. Trouble, however, was reported at two points.

At Greensboro, N.C., a small group displaying a Ku Klux Klan banner and a Confederate flag met at a school. Even so, five Negro children, three of whom entered the school last year, attended the opening session without trouble.

Application blanks for deputy U.S. marshals did not mention the racial situation at Little Rock's Central High School, but one applicant said there was no doubt he was signing for duty at Central if it reopened as an integrated school.

The U.S. Supreme Court meets Sept. 11, four days before the

Vote to Petition Straley Ouster

Police Officers Assn. Scores Chief on Basis of Parole Intercession

The Pontiac Police Officers Assn. last night voted to circulate a petition among police officers calling for the resignation or suspension of Police Chief Herbert W. Straley.

The association, which long has been at odds with the chief, said in the petition that Straley's 1952 intercession with the State Parole Board on behalf of convicted gambler Basil Burke was cause for suspension.

Burke was arrested last Friday in the raid by state and local police on an alleged bookie ring.

The petition, addressed to City Manager Walter K. Willman, urges him to seek Straley's resignation and to suspend him if he refuses to resign.

It says that the association will file charges against the chief before the Civil Service Commission if the city manager fails to act.

Iceland Leaders to Hold Meeting

Hope to Plan Peaceful Protest to Britain Over Fishing Trouble

REYKJAVIK, Iceland (AP) — The government began a quiet campaign today to take some of the heat out of Iceland's fishing war with Britain. "We have had enough violence," said one official.

He disclosed that speakers from the four major political parties are being urged to use moderation tonight at a mass meeting.

The demonstration is aimed at protesting against British gunboats and trawlers defying Iceland's new 12-mile fishing ban. Iceland extended its territorial waters to 12 miles Monday, claiming the extension was needed to protect the area from overfishing. The Icelanders show no signs of backing down.

The trawlersmen, escorted by British frigates, challenged the extension from four miles which kept them out of their traditional fishing grounds. Britain also sent a note to Iceland warning that it reserves the right to claim compensation for harm to British fishing interests as a result of the ban. The note insisted the prohibited area was part of the high seas and open to all.

So far no shots have been exchanged but several fistfights have been reported by Icelandic coast guard gunboat Albert and the trawler Burtell collided at sea, but only harsh words were exchanged.

No new clashes at sea were reported. Yesterday the Icelandic coast guard gunboat Albert and the trawler Burtell collided at sea, but only harsh words were exchanged.

It was learned that Monitor Chairman Martin F. O'Donoghue advised Hoffa not to issue any convention call.

O'Donoghue was reported intent on finding out from U. S. Dist. Judge F. Dickinson Letts whether the monitors can forbid such a convention and get court backing for cleanup directives to Hoffa which the Teamsters boss has ignored in some cases.

Chrysler Corp. Sees Bigger Car Market

(Continued From Page One)

be one of the most important moves by this company since the Dodge purchase in 1928.

The investment, he said, gives the corporation a strong position in the expanding world automotive market, which may reach six to seven million small cars, sold mostly in countries other than the United States and Canada by 1965.

Touching briefly on the labor situation, Colbert warned that "all bets on the year ahead are off if the UAW decides to act in such a way as to neutralize the stimulus of the industry's new models."

Kids Sure Not Fussy About What They Eat

MILWAUKEE (AP)—Records of the Milwaukee poison control program show that in 1957 children in this city swallowed, among other things:

Aspirin, liniment, soldering flux, reducing pills, furniture polish, battery acid, lighter fluid, airplane glue, fertilizer, gun bore cleaner, barbiturates, narcotics, tranquilizers, antihistamines, hormones, rubbing alcohol, camphorated oil, after shave lotion, iodine, toilet cleaners, laundry bleach, detergents, chromium polish, gasoline, kerosene, motor oil, benzine, wood alcohol, paint, linseed oil, varnish, paint thinner, pesticides, cologne and toilet water.

At Fort Smith, just across the Arkansas River from Van Buren, two elementary schools admitted Negroes. One of the youngsters at the school with white children last semester in Fort Smith, where integration is voluntary. The Arkansas cities of Hoxie, Fayetteville and Charleston also went ahead peacefully with integration.

Four Kentucky high schools desegregated for the first time. There were no incidents as two Negroes attended white schools in Charlotte, one of the cities in which North Carolina's first school integration took place last year.

Four Negroes plan to enter white schools opening today at Winston-Salem, N.C.

The Day in Birmingham

Noted Woman Art Critic to Open 'Friends' Series

BIRMINGHAM — A Bloomfield Hills woman, who is a noted art critic for the New York Times, will open the 1958-59 series of programs sponsored by the Friends of the Baldwin Library Oct. 20.

Mrs. Eero Saarinen, wife of the Bloomfield Hills architect, will speak on her experiences and the part libraries have played in gathering material for her book, "The Proud Possessors," which will be published in November.

Working on a Guggenheim Fellowship, Mrs. Saarinen traveled in Europe and the United States while compiling the biographical material on art collectors.

She has been with the Times as associate art editor and critic, and currently is ending a year's leave of absence.

Friends of the Library, formed in 1950, have brought many outstanding speakers to the Birmingham area, and according to Mrs. George W. Davis, publicity chairman, an exceptionally good program is lined up for this year.

James Taylor, 21, of 371 E. Wilson St., Pontiac, pleaded not guilty yesterday in Bloomfield Hills justice court to charges of assault and robbery of a Kingsley Inn waitress Aug. 26.

He is accused of hitting Miss June Smith, 37, of 708 Webster St., Royal Oak, over the head with a bottle and driving off with her purse and car.

Taylor was arrested in Pontiac last week on the description given by the woman.

She told Bloomfield Hills Police she was assaulted and robbed when she returned to her car about 2:30 a.m. in the parking lot behind the Inn. Her assailant had been hiding in the back seat of her auto, she said.

Municipal Judge Alva J. Richardson set the hearing for Tuesday. Taylor has been released on \$500 bond.

Fire losses in Birmingham during August were \$150, according to the monthly report of Fire Chief Park H. Smith. The department answered 30 alarms in August, including three first aid calls.

Registration for the fall session of Saturday swimming at the school pools has been set for Sept. 15-19, Robert Girardin, Birmingham recreation director announced today.

Registration may be made at the Municipal Building or by mail.

The program is limited to children in the Birmingham School District. A fee of \$2.50 for 10 lessons will be charged, Girardin said.

Richard T. Chissus, Service for Richard T. Chissus, 73, a former Birmingham resident who died yesterday in Bloomington, Ill., where he had been visiting, will be held at 11 a.m. Saturday at Manley Bailey Funeral Home. Burial will be in the Southfield Cemetery under auspices of Birmingham Lodge 44, F.&A.M.

Mr. Chissus, a retired building contractor, had made his home in St. Petersburg, Fla., for the past seven years. He had been a partner in the Chissus Brothers Construction Co. of Birmingham.

Mr. Chissus had been a member of the Birmingham First Presbyterian Church and a life member of the Birmingham Masonic lodge.

Surviving are his wife, Mary; three daughters, Mrs. Verna La Barre of Royal Oak, Mrs. J. Clifford Bingham and Mrs. Michael Doback, both of Birmingham; a son, Russell L. of Sylvan Lake; a sister, Mrs. John E. Ferguson of Southfield; a brother, Robert W. of Bloomfield Hills; and five grandchildren.

Hal Boyle Says:

Robot Wife Offers Fascinating Possibilities

NEW YORK (AP) — If science can build a perfect dummy mother, why can't it build a perfect dummy wife?

That logically is the next step—and, some feel, a step already long overdue.

The dummy mother—a cloth-covered wood and sponge figure heated by a light bulb—was made by Harry Harlow, a University of Wisconsin psychologist.

He found that bottle-fed monkeys were completely content with this laboratory mother. In fact, there was some evidence she was more satisfying than a real mother. For, in addition to being warm and soft, she never left her babies—and she never scolded them.

What works with monkeys, however, may not work with children. One can hardly foresee much of a future for artificial human mothers—at least in this country. Americans have a firm faith that a good mother can't be bought, built or borrowed—she's usually inherited, just as are the color of one's eyes.

But this isn't true at all of wives. Wives are almost never inherited. They are acquired—just

like a broken arm, a job, or false teeth.

The possibilities of creating dummy wives—perhaps artificial is a better word—are positively breath-taking. They offer a real challenge to any scientist worth his test tubes.

A substitute human wife would have to be more than warm, soft and silent.

She'd be kind of a combination of an electronic brain and a department store dummy—full of all kinds of wonderful machinery unknown to ordinary wives.

Instead of talking, she'd merely hum recorded Strauss waltzes while you read your morning paper. If you got lonesome for conversation, you could put two broken records in her in English, French, German, Spanish or Italian. This is one more broken record than the normal wife today can play in any language.

If anything went wrong with her, you'd save doctor bills. You could fix her with a wrench—or by kicking her in the control panel.

On a vacation trip you could ship her ahead by express, and

join her yourself later by air, first class.

She'd never complain about not having anything to wear. All a mechanical wife could wear is out—in which case you'd just trade her in for a newer model, or sell her to the junkman and become a bachelor again.

If she ever talked back to you, you wouldn't just suspect she had a screw loose somewhere. You'd know it.

Her food bill would come from

the power and light company. And everybody knows electricity is cheaper than groceries.

If she ever seemed cold or distant to you, you could always make her more warm and affectionate by installing another 200-watt light bulb in her. You could even change the color of her eyes by switching the color of her light bulbs.

She could be much more entertaining than the usual flesh-and-blood and yakkety-yak wife. You

could put a steel handle on her side, a glass panel in her bosom, equip her with slot machine innards—and do all your gambling at home.

All in all, it's a wonder science hasn't come up with the mechanical dummy wife already.

What would be her disadvantages? None.

How could there be? She is perfect from the standpoints of sociability, durability and low cost of upkeep.

But already I can hear some long-time old married codger protesting: "Why bother to build new artificial wives? Aren't the ones we got artificial enough already?"

Ike Signs Tax Bill Aiding Theaters, Schools, Clubs

NEWPORT, R.I. (UPI) — President Eisenhower has signed a bill to give some tax relief to theaters, sports fans and dues-paying members of community swimming pools.

Parochial schools also get a tax break under the new law. The 400-page statute provides a comprehensive overhaul of federal excise (or sales) taxes. New levies would be imposed on some items, including record players.

The net effect would be to trim about 10 billion dollars from the nearly 10 billion which the government collects annually from taxes on the manufacture and sale of goods and services.

Among its many provisions, the new tax law will:

- Cut 10 cents off the tax on admissions to theaters, movies, baseball and football games and other sporting events and entertainment costing \$1 or more. The 10 per cent on the first \$1 in admissions would be repealed, with the resultant revenue loss of 21 million dollars a year. Present law exempts from tax tickets costing 90 cents or less, but levies the full tax on all admissions costing more than that.

—Permit whisky makers to keep liquor under bond for as long as 20 years without paying a \$10.50-per-gallon tax that now must be paid whenever the whisky becomes eight years old. The tax would still have to be paid, however, any time the whisky is withdrawn from bonded warehouses.

The change was sought by Schenley Distilleries, which has vast amounts of whisky in storage to be eight years old and on which the tax was about to come due under the old law. Other distillers opposed the change.

—Exempt parochial and other non-profit schools or colleges from payment of excise taxes on goods they buy or on their telephone or transportation services. The tax savings, amounting to 3

million dollars a year, would take effect next July 1.

—Impose a new 10 per cent tax on record players and a new five per cent tax on oil and gas operated incinerators.

—Repeal the 20 per cent tax on club dues and initiation fees of members of community swimming pools and ice and roller skating rinks, retroactive to last Jan. 1.

In general the excise tax changes take effect Jan. 1. Among the exceptions is the new rule on whisky which takes effect next July 1.

Removing Red Tape From Motor Bureau

LANSING (AP)—Six forms heretofore used for various transactions involving motor vehicles have been telescoped into one simplified new form, Secy. of State James M. Hare states.

The new system will be placed in operation Sept. 13 at Lansing and in more than 220 Department of State branch offices throughout the state.

Hare said the move will save the state thousands of dollars in material and personnel costs.

The new form supercedes one previously used for application for certificates of titles, duplicate titles, title transfers, lien placements and discharges, trailer titles and trailer transfers and duplicate applications.

His Need Not an Excuse

DETROIT (AP) — Hardy L. Trice, 54, told Recorder's Court Judge Paul E. Krause he needed a night latch to keep burglars out of his home. Krause then sentenced Trice to 90 days in jail for stealing a night latch valued at \$1.49 from a downtown Detroit store.

WE HAVE WHAT YOU NEED!

Yes, we have a large selection of all types of top-grade lumber and building materials . . . and at reasonable prices. You'll find what you want at Benson's, or we will help you find it! We invite you to just come in and browse around our yard and office if you like. We have many interesting new materials . . . and you can buy what you need on easy credit terms. Do it today.

Making a Fortune in Greeting Cards

CHICAGO (UPI) — When Bill Harris couldn't find any greeting cards to suit his taste 16 years ago, he began making them himself.

This year, his greeting card firm anticipates a profit of \$150,000 on sales of one million dollars.

from everywhere—and everyone. Arriving home one night, he was greeted by his son with, "I love you, Daddy."

"How much?" Harris asked. "So much, Daddy," the boy answered, spreading his arms wide as they would go.

Harris made a card of it. "Then there was the time Harris cut his finger and became angry when he couldn't find a bandage right away."

He made a card of it. The card comes complete with a small bandage.

Receives Costly Advice on How to Snare Coed

OKLAHOMA CITY (AP) — Traffic Judge James Demopolos offered advice to a young college student who was charged with making a U-turn on a bridge so he could pick up a pretty girl.

"The trick is not to make a U-turn on the bridge," Demopolos said. "Just drive to the end of the bridge and wait for her. There are only two ways a pretty girl can get off the bridge."

The lesson cost the student \$7.

Classroom on Wheels

MOUNT STERLING, Ky. (AP) — One seventh grade class at Camargo High School held class in the school bus, officials explained, because the school was so overcrowded. An annex is being readied to take care of the extra students.

It's Ready for Use

PERRYVILLE, Ky. (AP) — Sign in a local church: "Our Auditorium is Prayer-Conditioned."

Don't Gamble With Food Poisoning

By JANET ODELL

Pontiac Press Home Editor
We should like to call your attention to a letter and an article we received the other day from Mrs. Josephine Lawyer, the County Consumer Marketing Information Agent. We think that all homemakers who do canning should read and heed.

"A telephone call jolted me into action today.

"A homemaker called and asked about canning sweet corn. She had heated it three minutes in a kettle, was packing it into quart jars, and wanted to know how long she should process it in the hot water bath.

"If you are not a home economist, perhaps this would not have frightened you as it did me. I had visions of this family eating the corn later and becoming deathly ill. It could happen. They could even die.

"Cream style corn which she

was canning should never be packed in quart jars and cannot be processed safely in a water bath."

Mrs. Lawyer went on to ask for our help in telling homemakers about safe ways of canning. She reminds us that only fruit, tomatoes and pickled vegetables are safe to can in boiling water.

USE PRESSURE COOKER

Everything else must be done in a pressure cooker. NOTHING is safe to process in the oven.

Yes, we know, Grandma did it the other way and look how long she lived. But Grandma also cooked her food half to pieces after she took it out of the cans. She killed all the vitamins and minerals by this method, but she also destroyed the botulism organisms that might have been present.

Make no mistake about it. Botulism poisoning can kill you. The

death rate is about 65 per cent. And there is no way of your determining whether these organisms are present or not. You can't see, smell or taste them.

If you are doing extensive canning this year—and signs point to a record amount of food being preserved—do it right.

Contact the Oakland County Extension Department, 1280 West Boulevard (phone FE 4-2564) for free copies of booklets printed by the U. S. Department of Agriculture on proper methods of canning.

Preserve your food, but save your life.

Wheat Germ for Flavor

If your reducing diet calls for servings of cottage cheese, sprinkle a teaspoonful or two of wheat germ over the cheese. It will add a pleasing nutty flavor and bolster the diet with protein, iron, phosphorus and the B vitamins.

Pineapple Sherbet Ready in an Hour

Any time you're looking for an impressive dessert that is not too rich and heavy, your best bet is Pineapple Sherbet. Here's an easy-do recipe:

Stir together ½ cup of sugar, 1 cup syrup drained from pineapple, 1 teaspoon grated lemon peel, 2 tablespoons lemon juice and dash of salt. Mix until sugar is completely dissolved. Combine gradually with 2 cups of cold milk.

Freeze in refrigerator tray at coldest temperature until firm, then turn out into a chilled bowl. Break up with fork and beat with rotary beater or electric mixer at low speed until fluffy.

Fold in 1½ cups (No. 2 can) of drained crushed pineapple. Return to tray and freeze until serving time. Makes on quart. (With a fast freezing refrigerator, you can have this sherbet ready in less than an hour.)

that's why we say . . .

COPENHAGEN — A complete passport union, comprising Denmark, Finland, Norway, and Sweden, became effective May 1. Now foreign visitors have to produce their passports only when entering and leaving the Scandinavian area. Citizens of the Scandinavian countries have been able to travel from country to country within the area without passports since 1952.

POLE CAT — "Sammy" the fireman's pet, slides down the brass pole at the first "Bang" of the alarm bell at Fire Station 6, Long Beach, Calif. A homeless stray, the cat was adopted by the station crew a year ago and has developed into a top-notch "fire cat."

Industry Divided on NLRB Plan

Labor Unions Solidly Favoring Expansion of Jurisdiction Standards

WASHINGTON (AP) — Industry is divided and labor unions are solidly in favor of the National Labor Relations Board's plan to expand its jurisdictional standards to cover more labor dispute cases. This is the result shown in industry-labor comments on proposed new NLRB jurisdictional standards. These are expected to increase the board's present caseload, already at record proportions, by about 20 per cent.

The board has authority to decide all cases affecting interstate commerce, but has voluntarily curbed cases it will consider by establishing standards of business volume.

Under a Supreme Court interpretation of the law, states are barred from taking over jurisdiction of cases the NLRB won't consider. This has created a no man's land for certain labor cases. In face of this, Congress recently provided the NLRB with an extra 1 1/2-million-dollar appropriation to expand its facilities.

The board then announced broader jurisdictional standards and invited industry-labor comment before a Sept. 1 deadline.

By far the most comment came from franchised automobile dealers. Individually and by state groups, they generally opposed one of the NLRB's new standards that would reduce from a million dollars to \$250,000 the amount of annual business such a firm must have to come under NLRB scope.

But there were exceptions. Some auto dealers, including the Washington and Utah state associations, said they favored this proposed rule change.

A large group of farm implement dealers solidly opposed coming under this broader rule. Some asked that rural business enterprises be exempted.

Construction industry comments were all in favor of the broader jurisdictional standards.

Being under NLRB jurisdiction cuts two ways: it enables unions to compel employer bargaining and enforces bargaining rights, but also empowers employers as well as unions to bring unfair labor charges.

The AFL-CIO wrote the NLRB saying it preferred eliminating all jurisdictional limits so the NLRB would exercise fullest jurisdiction possible. Individual unions generally supported this stand.

There was no comment presented one way or the other about the NLRB's proposed reduction of the present \$500,000 minimum for newspapers to \$250,000.

Legion Electing U.S. Chief Today

Chicago Parley Hears Mme. Chiang Kai-shek on Quomoy Defense

CHICAGO (AP) — The American Legion national convention moves into its concluding session today with another full round of speeches and resolutions. But the high-point of the day will be election of a national commander.

While the votes are yet to be cast, Preston Grover, 38, Stillwater, Okla., was considered a shoo-in for the post.

Speakers today include Mme. Chiang Kai-shek, wife of the Chinese Nationalist president, and Luis Munoz Marin, governor of Puerto Rico.

Mme. Chiang, in a news conference shortly after her arrival, here, said her country does not need at this time American fighting men or money to defend the island fortress of Quomoy.

"The Chinese Reds want to see how far they can go in regard to Quomoy. They will go as far as the free world will let them," she said.

"We can defend Quomoy for ourselves for the time being. . . . When the Reds see they can't go any further, they'll stop."

The Legion's 3,000 delegates polished off one of the thornier issues of their 40th annual convention when they rejected by a 6-1 majority a proposal that the Legion back a \$100 monthly pension for all World War I veterans at the age of 60 regardless of health or need.

After long debate, the Legion approved its traditional stand for pensions based on need.

However, the successful resolution added these liberalizing amendments to the present pension stand: an increase in monthly disability pension rates, a provision veterans receive permanent and totally disabled pension payments at 65 regardless of health, and lifting of restrictive outside income limitations.

Business Notes

The Clark Oil & Refining Corp. has announced the opening of five new gasoline stations in this area and is observing a grand opening today, Friday and Saturday. The Clark stations carry but one grade of gasoline, their own, Clark Super 100.

The new stations are at Auburn and Parkhurst, 441 South Saginaw St., South Telegraph at Edna St., Orchard Lake Ave., at Green St., and Oakland Ave., at Ingleside.

Private Report Weakens Grains

CHICAGO (AP) — Sellers took charge in early dealings today on the board of trade and prices of several grain futures slipped well below their previous closes.

The weakness generally was attributed to a private crop report by C. M. Galvin, statistician for Francis I. Du Pont & Co., in which he boosts substantially his estimates of major crop yields over a month ago. The Galvin estimates also are substantially higher than the August figures by the Department of Agriculture.

The biggest boost was in soybeans which Galvin now estimates will be more than 554 million bushels, compared with his August estimate of 527 million and the government estimate of about 536 million.

Near the end of the first hour, wheat was 1/4 cent a bushel lower to 3/4 higher, September \$1.86 1/2; corn 1/4 to 1/2 lower, September \$1.25 1/2; oats 1/4 to 1/2 lower, September \$1.25; soybeans 1/4 to 1/2 lower, September \$2.23 1/2; and 1/4 to 1/2 lower, September \$2.23 1/2.

Grain Prices

CHICAGO, Sept. 4 (AP) — Opening grain prices:

Wheat	Oats	Soybeans
Sept. 1.86 1/2	Sept. 1.25 1/2	Sept. 2.23 1/2
Oct. 1.86 1/2	Oct. 1.25 1/2	Oct. 2.23 1/2
Nov. 1.86 1/2	Nov. 1.25 1/2	Nov. 2.23 1/2
Dec. 1.86 1/2	Dec. 1.25 1/2	Dec. 2.23 1/2
Jan. 1.86 1/2	Jan. 1.25 1/2	Jan. 2.23 1/2

Settle Chrysler Forge Strike

End Wildcat Walkout Which Idled 4,600 Production Workers

DETROIT (AP) — A nine-day strike by 600 United Auto Workers members at Chrysler Corp. Forge Plant here which had idled 4,600 workers was settled last night.

The strike was one of a series of wildcat walkouts which have continued to plague the auto makers at the start of the 1958 model run.

Chrysler said the 600 forge plant employees will return to work today and 4,600 workers at its four other affected plants here will be recalled as soon as materials from the forge plant become available.

The forge plant workers, members of UAW Local 47, walked off the job Aug. 27 in protest over washing time allotted two employees.

Strikes at other Chrysler plants in the Detroit area continue to idle about 2,700 workers.

At Kansas City, a strike affecting some 2,350 hourly rated workers halted production at General Motors Buick-Oldsmobile-Pontiac assembly plant. A union spokesman said the walkout stemmed from "unresolved and meritorious issues."

Meanwhile UAW President Walter Reuther says he intends to take his case in the deadlocked auto industry contract talks to special meetings of civic leaders next Tuesday.

Reuther said yesterday invitations have been sent mayors and community leaders in areas most sharply affected by the fortunes of the auto industry.

Squirrel Runs Up Leg of Squirreling Organist

INDIANAPOLIS (AP) — Members of the congregation at Calvary Lutheran Church were agast when they observed A. C. Schwark bouncing around on his bench while playing solemn hymns.

Later Schwark explained a squirrel had been hiding in the organ and started running up his pants leg when the music started.

Freedom Takes 25 Years

RIO DE JANEIRO — National independence came to most of Latin America during the first quarter of the 19th Century after 300 years of unified existence under the Spanish crown.

Busy Building — The new Kroger food distribution center at Schoolcraft and Middlebelt roads in Livonia contains 15 acres of automated and electronically-controlled food handling devices under one roof — largest facility of its kind in the world. Kroger expects by 1963 to have added 200,000 families to the 750,000 the company's 100 Detroit division supermarkets now supply. More than 13 million tons of grocery store products will flow through the structure each week.

MARKETS

The following are top prices covering sales of locally grown produce brought to the Farmer's Market by growers and sold by them in wholesale package lots. Quotations are furnished by the Detroit Bureau of Markets, as of Tuesday.

Produce

FRUITS

Apples, Duchess, fancy, bu.	\$2.50
Baccharies (crates) 10 qts.	6.25
