### Grizz Facts: A look at graduation rates

For the second year in a row, more than half of an OU entering freshman class graduated within 6 years. The six-year graduation rate for the 2013 cohort is 57 percent, exceeding the record set by the 2012 cohort. The 2014 cohort set the record for highest five-year graduation rate, with 51 percent of the entering class graduating within five years. The four-year rate for students entering in 2015 matched the record rate set by the 2014 cohort last year.
