OU student presents research at international conference

Oakland University graduate student Narine Mirijanian will present her research on breast cancer as an invited presenter at the 2nd Young Medics' International Conference, "From Prevention to Intervention," Sept. 26-28 in Yerevan, Armenia.

Her presentation, "Hormonal Regulation of Oncoproteins in Breast Cancer Cells," details findings of her research.

"I am very pleased that Narine has been invited to share her work among her peers from around the globe," said Virinder K. Moudgil, vice president for Academic Affairs and Provost, and faculty research mentor to Mirijanian. "Narine is a dedicated student whose hard work is evident through the research she conducts."

The conference is designed to foster productive dialogue among Armenian and foreign doctors on the most important issues in medicine, modern diagnostic standards, medical strategies and technology. The program will also include lectures from invited acknowledged specialists, debates and roundtable discussions to complement the scientific sessions.

SUMMARY

OU graduate student Narine Mirijanian will present her research on breast cancer at the 2nd Young Medics' International Conference in Aremenia.
