

Highway Action Next

House OKs Auto Safety Bill

WASHINGTON (AP) — The House turns its attention today to slaughter on the nation's highways after voting unanimously to make cars safer by requiring auto makers to meet federal safety standards starting with 1968 models.

A highway safety bill containing \$650 million in state aid to set up such programs as vehicle inspection and driver education is expected to get overwhelming approval by tonight.

The chief controversy probably will center over a provision

which would permit the secretary of commerce to penalize a state 10 per cent of its federal highway aid for failing to have a safety program in effect by Jan. 1, 1968.

The version of the legislation passed unanimously by the Senate in June contains no such fund cutoff. But it does call for spending more money — some \$410 million.

The auto safety bill passed by the House on a 371-0 roll call

vote yesterday would cover used vehicles and make certain that all cars, buses and trucks are subject to federal safety standards.

SENATE VERSION

The Senate version contained possible loopholes that could have exempted most motor vehicles and also did not apply to used cars.

Although the House proposals are likely to be accepted by the Senate, enough other differences exist to require a Senate-House conference committee.

Both bills would require the secretary of commerce to set initial federal standards by Jan. 31, 1967, to take effect not sooner than 180 days or later than one year afterward.

Seated in the gallery as the House debated and voted on the bill was Ralph Nader, the young attorney whose book about auto safety — "Unsafe at Any Speed" — is considered by many to have been a big factor in the growing public demand for auto safety legislation.

The bill's initial standards are expected to be largely the same as those issued by the General Services Administration for 1968 model cars to be bought by the government.

Included are such safety features as head rests, improved safety glass and additional padding and anchorages for shoulder harnesses.

Under the House bill, the secretary of commerce would issue standards for used cars within two years of enactment of the bill.

Antibias Action Urged in City

"Positive and affirmative action" aimed at minority group problems in Pontiac was urged yesterday following a three-hour closed-door meeting of city officials, business leaders and agency representatives.

The conference, held in the board room of the Pontiac Area Chamber of Commerce, was called because of what ones spokesman called "recent violent disorders" in other cities.

Shortly after the meeting an 11-point memo summarizing "problem areas" in Pontiac was distributed to participants in the discussion by representatives of the National Association for Advancement of Colored People (NAACP), the Progressive Action Committee for Equality (PACE) and the Pontiac Area Urban League.

NAACP Notes Rise in Tension

Hate Sheet Blamed for Increase in Unrest

Charles M. Tucker, Jr., president of the Oakland County Chapter of the National Association for the Advancement of Colored People (NAACP), today said that "increasing racial tensions in the City of Pontiac" have come to the attention of the county NAACP chapter and other groups.

Tucker, who is also a regional director of the Michigan State NAACP, issued the following statement concerning the matter:

"This acceleration has been due to the distribution of a racially designed hate sheet which has been circulated in certain areas of the city.

"The sheet purports and supports racial violence and unrest.

"The Oakland County Chapter of the NAACP unequivocally condemns the content, authorship and distribution of such material.

"There is no evidence that this material has emitted from any civil rights organization or any section of the Negro community.

"There has not been and is not any mass demonstration planned.

"Due to the intensity of rumor and hearsay now rampant in the community, we strongly urge any citizens having knowledge of these matters to immediately report them to the Pontiac Police Department.

"We ask that our citizens not repeat nor encourage these attitudes and expressions.

"Progress and accomplishments cannot be obtained by hate and violence."

It's a Lovely Day Today—Friday, Too

The weatherman has decided to spread a bit of sunshine and pleasant weather around the

Pontiac area with highs of 70 to 75 predicted for tomorrow.

Tonight will be fair and cool with lows of 52 to 56.

Northwest winds of 15 to 22 m.p.h. this afternoon will diminish tonight.

The forecast for Saturday is partly cloudy with possible showers.

Sixty-eight was the low recorded in downtown Pontiac this morning. At 1 p.m. the temperature reading was 88.

Wage Demand Sweeps UAW

Production Workers Echo Cry on Contract

DETROIT (AP) — Production worker members of the United Auto Workers Union now are clamoring to be included in contracts with the Big Three auto makers are reopened for any wage increases.

The UAW has requested reopening to give skilled tradesmen an immediate pay hike and has demanded an answer by Monday from General Motors Corp., Ford Motor Co. and Chrysler Corp. Current contracts still have a year to run.

Industry sources had indicated the answer would be "no," even before production workers asked inclusion. They expressed fear of just such a demand from the Big Three's 700,000 semiskilled and unskilled.

The production worker request came from Ford Local 600, the UAW's largest with 30,000 production and 10,000 skilled members.

Jointly, all production unit chairmen dispatched a letter to UAW President Walter P. Reuther, asking inclusion in any reopening and quoting him as having told many union conventions: "WORK TOGETHER"

"Let us work together. Let us build together. Let us fight together. With teamwork in the leadership and solidarity in our ranks, we will win together."

Skilled tradesmen, outnumbered more than three to one in UAW ranks, stepped up pressure meanwhile yesterday in their reopening campaign.

ROMNEY BOOSTER — A GOP Girl, Linda Strom, 18, of Birmingham, pins a name tag on Gov. George Romney as he arrives to give the keynote address at the Republican County Convention at the

Southfield High School last night. Linda, whose mother, Mrs. Allen Strom, is chairman of the State GOP Girls, was one of more than a dozen members of the organization who greeted delegates.

Romney Keynotes County Confab

GOP Moderates Keep Control

By JIM LONG

Sparked by an emotion-packed speech by Gov. Romney, Oakland County Republicans last night united to beat down a threatened take-over by right-wingers within the party.

Romney's impassioned plea for party unity came in an off-the-cuff keynote address at the GOP County Convention at the Southfield High School.

His appeal followed an intra-party struggle which ended with County GOP Chairman Joseph R. Farnham narrowly winning the permanent chairmanship of the 18th District convention over Sen. Robert J. Huber of Troy.

Farnham edged Huber by a 105 to 96 vote of the 18th District delegates.

Subsequently, as a result of the vote and on the recommendation of Romney, delegates from the 18th and 19th districts unanimously elected Farnham to head the full county convention in November.

CONSIDERED A MODERATE

Farnham is considered to be a party line moderate. Huber is a professed conservative.

Charles Lyle, head of the 18th Congressional District Committee, was nominated as chairman of that district's convention, but withdrew his name because he said he would be out of town when the state convention is held Aug. 28-29.

Internal party problems were absent in the 19th Congressional District Convention where District Chairman Christian Powell was unanimously elected to lead the proceedings. He was without opposition.

Following his defeat, Huber told the crowd, "You people put your name on the line to support me. We were not successful, but it was a good endeavor."

CALLS FOR UNITY

He said that the most crucial thing facing them is the November election, and "if we do not

unite we will split the party right in half.

"To beat the Democrats we must be united. And I will support Joe (Farnham) as far as I can," said Huber.

When Romney arrived later after speaking at several other area conventions, he was warmly greeted by delegates.

A few cat-calls were directed at Romney, however, during his speech, and one delegate walked out during his remarks.

Following the Aug. 2 primary election, county GOP leaders announced they had withstood an effort by the John Birch Society and other right-wing groups to increase their influence in the party.

They say right-wing sympathizers continue to hold about 34 of the 385 precinct delegate seats within the county, most of them in the southern portion of the county.

Romney's attack on the right (Continued on Page 2, Col. 6)

Witnesses on Own at House Quiz

WASHINGTON (AP) — Witnesses whose attorneys marched out of a stormy hearing of the House Committee on Un-American Activities insisted today they will act as their own lawyers.

Jerry C. Rubin of Berkeley, Calif., said he was expressing the views of the dozen witnesses called to testify about their anti-Viet Nam war activities, when he said: "As of now, I'm my own lawyer."

He said all the witnesses would take that stand when called before the committee which had set a noon deadline for them to get new lawyers.

Most of the witnesses were absent at the start of the day's

See Picture, Page A-2

session, leaving many vacant seats in the front row reserved for them.

Their attorneys stalked out of the hearings room Wednesday in protest against the expulsion of the lawyer for two of the witnesses.

FACE DECISION

The stand announced by Rubin and his fellow witnesses leaves the committee with a decision on whether to serve as their own attorneys, hire lawyers for them, or dismisse them as witnesses.

Ford Plans New Plant in Area

A new assembly plant initially employing 200 persons is planned for a 180-acre site on East 26 Mile Road near Romeo by the Ford Tractor Division, Ford Motor Co.

Plans to build the plant were announced by Ford officials today. It is scheduled for completion next spring. The cost was not disclosed.

More employees will be hired as the plant expands into a manufacturing facility, but an accurate estimate was not available.

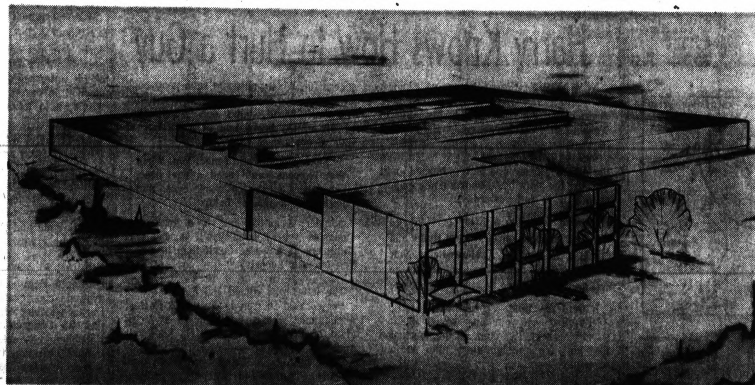

"The new Romeo Equipment Plant will serve as the U.S. as-

sembly facility for our growing line of industrial tractors, backhoes and loaders as well as the world headquarters for Ford Tractor Division Equipment Operations," said R. R. Owen, the division's Equipment Operations general operations manager.

The three-part structure will provide a manufacturing area, office area and employee facilities area.

Approximately 100,000 square feet of space will be devoted to manufacturing. Walls will be of precast concrete and aluminum.

A two-story office building (Continued on Page 2, Col. 3)

Architect's Concept Of Proposed Ford Tractor Division Plant

Two Planes Downed as Yanks Continue Pounding North Viet

SAIGON, South Viet Nam (AP) — American warplanes continued their pounding of targets in North Viet Nam, the U.S. Military Command reported today, but two planes were lost.

On the ground, South Vietnamese government troops launched a new drive against Viet Cong guerrillas only three miles from Saigon after an upsurge of terrorist attacks on the fringes of the capital.

Weekly Viet Toll Is 101 Gls

Increase of 30 Over Previous Seven Days

SAIGON, South Viet Nam (AP) — The U.S. Military Command announced today that 101 American servicemen were killed in the war in Viet Nam last week, an increase of 30 over the previous week.

A spokesman reported that 593 others were wounded in action and 11 were listed as missing.

The Military Command also said 284 enemy troops were captured during the week, the highest number for a one-week period in the war.

Enemy battle dead for the week were put at 1,436, the highest figure since 1,988 Viet Cong and North Vietnamese soldiers were killed during the week ending March 28.

TOLL FOR YEAR
U.S. battle dead for the year now stand at 2,683. Since Jan. 1, 1961, when the United States became involved in the war, 4,711 Americans have been killed.

Last week's casualties compared to 71 killed and 615 wounded in action the week before.

A South Vietnamese military spokesman said 128 Vietnamese troops were killed in action last week and 28 were reported missing.

Since the first of the year, 5,853 Vietnamese soldiers have been killed by enemy fire and 2,204 have been listed as missing or captured.

The week's toll raised the enemy dead for the year to 32,134 and their men taken prisoner to 4,470.

Ford to Build Plant in Area

(Continued From Page One)
will be constructed in front of the manufacturing building and joined to it by a one-story employee facilities building.

Ford industrial tractors are manufactured for the U.S. market at the Highland Park Tractor Plant.

Industrial equipment produced at Ford Tractor Division plants in Royal Oak and Des Moines, Iowa will be installed on tractors at the new plant.

EVENTUAL PLANS
"While the Romeo plant will start out as an assembly facility, we plan eventually to manufacture various items of industrial equipment at this plant as our product line expands for such a growing market for these products," Owen said.

"Ford industrial tractors already occupy a leadership position in the U.S. market. They serve such industries as construction, landscaping, excavation contractors, highway and golf course maintenance, and public works."

"The market already is strong and the bounce in the U.S. economy indicates it will continue to strengthen."

Policewoman to Get Rank, Back Wages

Oakland County Circuit Judge Clark J. Adams yesterday ordered the city of Pontiac to restore the rank of sergeant to a policewoman and to pay her back wages from the time she was dismissed.

In ruling, Adams said that Mrs. Mary P. Caronis had been "unjustly" reclassified when the city reduced her pay grade to that of a patrolman in September 1964.

At that time the city established a new pay schedule for police, but refused to give Mrs. Caronis the new rate for sergeant on the grounds that she was a patrolman.

Before the new rates went into effect, Mrs. Caronis, a policewoman since 1953, had been receiving the salary paid to sergeants.

Legal action was started against the city by Mrs. Caronis in April 1965.

She contends that she has been deprived of \$74 a month in additional pay for the last two years because of the downgrading in rank.

Action Urged Against Bias

(Continued From Page One)
to a statement by Tucker on "rumor and hearsay" relating to racial disturbances.

"I'm more concerned about the tensions and effects of the rumors than I am about their validity," Hanger said.

"We've had at least a dozen so-called target dates this summer and they've all been equally unfulfilled."

Tucker's statement ruled the existence of "mass demonstrations" and urged citizens to report "hearsay" of racial disturbance directly to police.

Sen. George McGovern, D-S.D., offered the proposal to cut the funds from the \$58,189,872,000 recommended by the Senate Appropriations Committee.

McGovern described his proposed move as "a modest reduction that would bring the bill in line with the administration's budget requests."

Joining him were Sens. Joseph S. Clark, D-Pa., Gaylord Nelson, D-Wis., William Proxmire, D-Wis., and Stephen M. Young, D-Ohio.

ANOTHER REJECT — An unidentified woman yesterday was hustled from the hearing room of the House Committee on Un-American Activities in Washington. She was one of several women who were rushed out during a disturbance in the afternoon session of the committee, which is investigating anti-Viet Nam war activities.

Senate Gives LBJ Power to Call Reservists to Duty

WASHINGTON (AP) — The Senate, overriding objections from the White House and the Pentagon, has voted standby authority for President Johnson to call up thousands of Reservists for possible active duty in Viet Nam.

The rider still is subject to House acceptance.

Voting 66 to 21 Wednesday to tie the provision to the pending \$58.2-billion annual defense money bill, the Senate heeded arguments that many draft-age youths were joining the Army Reserve and National Guard to avoid duty in the Southeast Asian war.

"We can't permit the six-month Reserve training program to become an umbrella to avoid active service," declared Sen. Stuart Symington, D-Mo., a former secretary of the Air Force.

Wednesday's vote amounted to a hard-fought victory for Sen. Richard B. Russell, D-Ga., chairman of the Senate Armed Services Committee, and Sen. Leverett Saltonstall, R-Mass., its ranking Republican.

PREVIOUSLY REJECTED
President Johnson and Secretary of Defense Robert S. McNamara have rejected previous proposals for mobilizing any of the citizen-soldier units of the armed services.

The Senate faces another battle over the huge defense bill today — this time from a small band of dissenting Democrats who are seeking to slash more than \$500 million from it.

Sen. George McGovern, D-S.D., offered the proposal to cut the funds from the \$58,189,872,000 recommended by the Senate Appropriations Committee.

McGovern described his proposed move as "a modest reduction that would bring the bill in line with the administration's budget requests."

Board Ratifies Teacher Pact

BLOOMFIELD HILLS — The board of education has ratified a contract agreement with teachers represented by the Bloomfield Hills Education Association.

Schools Supt. Eugene L. Johnson said the vote was unanimous among the board members and that the contract has been "signed, sealed and delivered."

The teachers had ratified the contract last week by a vote of 89 to 21.

At Tuesday night's board meeting equipment bids for the new high school were approved for a total of \$102,000.

Johnson also reported that construction of West Hills Junior High School is on schedule and that work on the new senior high school is "picking up time."

NO NAME
No name for the new high school has been chosen. The board voted to postpone any decision until a future meeting.

One of the names being considered is Bloomfield Hills High School North.

Johnson said the name is needed to avoid deliveries destined for the new school being dropped off at the present high school and to acquaint parents with the correct name.

Richard Spiess, principal of Bloomfield Hills High School, reported to the board on high school dropouts.

UNDER 2 PCT.
Johnson said the dropout rate is under 2 per cent of the senior class.

He said that there will always be a few but that he believed Bloomfield has the lowest dropout rate in the state.

Johnson said the problem has arisen in the last year or so in the district due to increasing numbers of students and facilities.

He said the main reason students drop out of school are poor grades and no interest in school.

Some of the plans to avoid future dropouts are to offer more noncollege preparatory courses, improve the curriculum, increase counseling services and screen teachers.

Johnson said the problem has arisen in the last year or so in the district due to increasing numbers of students and facilities.

County GOP Hears Romney

(Continued From Page One)
wingers met with loud applause, and three times the audience rose to its feet during his heated speech.

The governor started with a prepared text but, after a few minutes, tossed it aside to devote all his time to the power fight.

RAPS MINORITY
"I think everybody in this room is devoted to strengthening the Republican Party," said Romney, "but there is a minority not interested in this — they have other objectives."

He said that he has the "highest respect for a genuine conservative," and added, "I think that I am a genuine conservative."

"There is no basic difference between genuine conservatism and true liberalism," Romney said.

"A true conservative solves problems by using proven experience and proven principles. A genuine liberal believes that the individual is more important than the group and places the individual first," he added.

He criticized what he said was pseudo-conservatism, terming it a "refusal to recognize problems or the opposition of solutions without offering better solutions."

"False liberalism is thinking you can solve all problems with government and money," Romney apologized to the "sincere" precinct delegate candidates who were defeated because of his intervention before the election in recommending the voters to follow the party's choice.

THAD TO BE A WAY
"As far as I know they all ran in support of the Romney-Griffin ticket," said Romney, "but when it developed that there were those who were trying to divide and confuse, there had to be a way of recognizing them."

Despite Romney's appeal, moderate conservative Richard Durand was elected chairman of the 14th Congressional District Republican convention in Wayne County, beating former Gov. Wilbur Brucker 158-99.

Romney candidate Dan McKinnon lost in the race for McComb County chairman 106-66.

He said that there will always be a few but that he believed Bloomfield has the lowest dropout rate in the state.

Johnson said the problem has arisen in the last year or so in the district due to increasing numbers of students and facilities.

May Lengthen
Gemini Walk

SPACE CENTER, Houston, Tex. (AP) — The length of Gemini 11 pilot Richard F. Gordon Jr.'s space walk likely will be nearly double that originally planned.

"I think there's a good chance it will be expanded," said Clifford Charlesworth, the flight director who explained that the 55 minutes currently allotted the busy walk might not give Gordon enough time to do all his tasks.

Flight planners are considering stretching the stroll to about 100 minutes, which would let him walk in space for a complete orbit of the globe.

Gordon, a Navy lieutenant commander, is to set out on the walk the morning of the second day of the three-day orbital journey after he and Navy Cmdr. Charles A. Conrad Jr. catch and link with an Agena rocket the first day, Sept. 9.

SPACE MECHANIC
Gordon hopes to tie the Agena to the spacecraft with a 100-foot cord, try his hand at being a space mechanic by tightening and loosening bolts with a special tool designed for weightless operation, and move about with a jet gun.

The next day he will stand in his seat and poke part of his body out of the spacecraft for a 2½-hour picture-taking session. Later that day Gordon and Conrad will attempt to fly Gemini 11 in formation with the Agena while still tied to it 100 feet apart.

Charlesworth said officials were reviewing Gordon's walk to determine if it needed to be lengthened.

He said, "I think there's a good chance it will be expanded. I would say that he wouldn't get any more than about 100 minutes, probably 100 to 106 minutes would be the maximum."

In 1951 the Rev. Lorenzo L. Langstroth invented a better beehive. He revolutionized beekeeping by devising a hive with removable frames for honeycombs. His basic design still is almost universally used.

Increase in Medical Schools Seen

By 1970, there will be a big jump in full operation then, rise in medical schools. Four bringing the United States total ten new schools are scheduled to 101.

Cavanagh Will Stump for Soapy

DETROIT (UPI)—Mayor Jerome Cavanagh will hit the campaign trail on behalf of his onetime political foe, G. Mennen Williams, an aide revealed today.

Cavanagh, who was soundly beaten by the former governor in the Democratic senatorial primary, will begin his role this weekend at the Democratic State Convention in Grand Rapids.

He will introduce Williams to the delegates.

"We've been discussing what part the mayor would play in the convention ever since the election," a top aide said.

"After all, he's still a major figure in the party."

CONFIRMATION

He also confirmed that Cavanagh would campaign around the state for Williams. The extent of the campaigning is not yet determined, the aide said.

Cavanagh's future role in the party has been in doubt since the election.

He failed to give wholesale support to his victor when the returns were in and there was speculation that his work for Williams might be only perfunctory.

But his decision to take on active campaign work "as extensively as his responsibilities" allow seemed to indicate he planned to play a major part in the Williams campaign against Sen. Robert P. Griffin, R-Mich.

Hubert to Tour Oceanographic Installations

WASHINGTON (UPI)—Vice President Hubert H. Humphrey is emerging as the administration's No. 1 man of the sea. He is planning to visit all major oceanographic installations in the nation beginning next month.

The vice president chaired the first meeting yesterday of the new National Council on Marine Resources and Development, a cabinet-level agency formed by Congress to give direction and coordination to national maritime science programs.

Afterward at a news conference, he announced plans for visiting the installations, adding that he "wouldn't mind" going down in a deep-diving bathyscaphe.

AP Wirephoto

DREAMING UP REVENGE—Rick Willard came home Tuesday night and found his bedroom outside on the sidewalk—courtesy of fun-loving neighbors. The stunned Willard, rather than fight it, settled down

for a night's sleep under the stars. The sun and a morning phone call (unposed) roused him yesterday. Now he's dreaming up revenge.

Foreign News Commentary

Bulgarian Chief Will Visit France

By K. C. THALER

United Press International

SOFIA, Bulgaria — Todor Zhivkov, Bulgaria's premier and Communist party chief, will visit France in October for talks with government leaders, according to official quarters.

It will be the first visit by a Bulgarian government chief to the West and the first by an East European Communist party leader to Western Europe for formal talks.

The move spotlights the shifts which are taking place in this part of the world and points up the widening chink in the Iron Curtain.

Zhivkov's forthcoming Paris trip has been preceded by the recent visit here of French Foreign Minister Maurice Couve de Murville.

In addition a high-level Bulgarian delegation visited London.

VISIT TO TURKEY

In the fall, Bulgaria's own foreign minister, Ivan Bashev, will visit Turkey, a member of NATO. Turkey recently received

an official call from Romanian Premier Ion Maurer for a look into possible chances of a new wider Balkan alignment in the future.

The choice of France as the target of the first westward journey of an East European Communist party chief is no mere accident.

France has become the primary Western center of political attention here, as in other capitals of the Communist East because of its recent dissociation with NATO military alignment and its go-it-alone policy in Europe.

Communist diplomacy is watching eagerly for any sign that smacks of French anti-Americanism. It hopes to find what it believes to be an unexpected sympathizer of a policy designed in the Communist committee of the board of aid directed against American "imperialism."

TRADE DESIGNS

Beyond this, there are genuine ties for more trade with the West.

There is already a sub-

stantially increased trade of this country, as most of the other East European nations, above all with West Germany, but also with France, Britain, Italy and Scandinavian countries.

Despite these developments, Bulgaria remains a staunch ally of Russia, probably the staunchest among the East European nations today.

By tradition, history and language, Bulgaria continues to be firmly entrenched in the Russian camp. It has placed itself squarely behind the Kremlin in the current Sino-Soviet conflict.

Victim Identified as Indiana Man

BAY CITY (UPI)—A transient struck by a car and killed early yesterday was identified later in the day as Steve Cis, 58, Hammond, Ind. Cis had been staying at a motel in Omer, Mich. He was struck while crossing a street in the middle of a block in downtown Bay City.

Errant Drivers Fighting Back

LANSING (AP)—The state is cracking down harder than ever on errant drivers—and more of them are fighting back, too.

Suspensions, revocations and other punitive actions against drivers for the first seven months of the year are nearly double the 1964 totals, the secretary of state's office said Wednesday.

"We're much more strict," explained Milan Clark, supervisor of driver improvement control. "You name it, that's

what we've been pulling them in on."

In the first seven months of 1964, the department summoned 25,338 drivers for hearings and took action against 15,338 of them. This year, 37,774 have been called and 28,740 penalized.

APPEALS TRIPLED

More than half of those penalized—15,252—have asked for an appeal board hearing. That's more than triple the 1964 appeal total of 4,961 for a similar period.

More than half of the appeals heard so far have been denied. Clark said one example of the department's tougher policy concerns drivers whose physical condition may impair driving.

Now, instead of letting a marginal driver go for three years between physical exams, the state is rechecking in six to 12 months.

"It's not just the old people, either," said Clark. "There are young ones, too, especially with eye problems."

A new computer operation is also helping the department keep up with its violation and licensing reports, and Clark says reports from local officials are steadily improving.

2 Yank Brothers in Hungarian Jail Since June

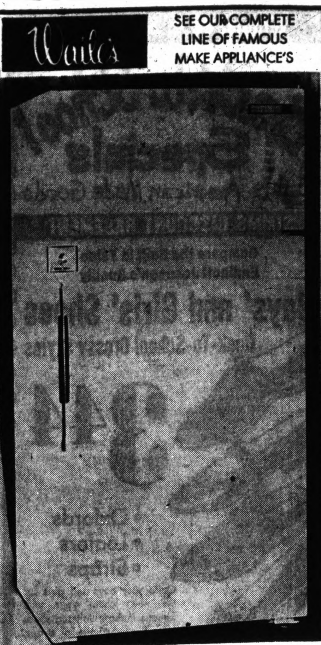

WASHINGTON (AP)—The State Department confirmed yesterday that two young Americans were jailed in Hungary last June.

John Savko, 25, and Michael Savko, 23, brothers from Van Nuys, Calif., wrote the U.S. Legation in Budapest from prison that they were arrested June 30 on a "small political crime."

The letter, which passed the prison censor, did not give a charge.

The letter was received Aug. 11 and the legation immediately requested the Hungarian foreign ministry to spell out the charges and to permit a U.S. consular official to visit the brothers.

The State Department, press officer Robert J. McCloskey told a news conference, has notified Mr. and Mrs. John Savko, parents of the brothers. McCloskey also said that the Hungarian foreign ministry has not replied to the legation's note.

Rumors Sow Seeds of Disturbance

Unless uprooted, rumors spread like weeds. They thrive in the fertile minds of the troubled.

Recently, there have been rumors in Pontiac of planned Negro marches with implication of the riotous aftermath that many communities have suffered.

So far as we and the local police department know, the rumors are just that. But passed from lip to lip they grow in the telling. No rumor is ever diminished in repetition.

While the lot of the local Negro community leaves room for improvement, we think that the City's racial climate has been generally wholesome, with leaders of both races displaying understanding and enlightenment in facing the problems calling for solution.

As recently as yesterday morning a group of leading citizens including Negroes and whites met to discuss and develop plans to improve inter-racial relations.

But such a spirit of cooperation is seriously damaged by the sort of rumors borne on the winds of ignorance and anxiety that have been circulated here.

Where and how a rumor — any rumor — starts is usually impossible to determine. But anyone who repeats unfounded "information" is doing himself and his community a disservice.

Every area resident is urged to resolve now to scotch the sort of inflammatory rumors to which we refer.

How? Simply by calling the police department for confirmation or denial of the "report" that has reached his ears. If there is substance to it, the police will have such knowledge. If none, they will be glad to learn of it, that it may be checked out.

In short, when you hear a rumor that implies violence, don't tell your neighbor — tell the police.

Are Basic Values Ignored in Academic Halls?

Recent addresses to the graduating classes of two of our Nation's largest colleges were noteworthy for their lack of comment on pride in United States citizenship and a free economy. One stressed the problems of technology, education, military aid, leadership, food production, peace and the hydrogen age.

The other was confined to problems of the university and the times, and the hope for a recognition of responsibility for maintaining and building the institution. Nowhere was there a forthright statement that the future of academic freedom and independent universities rests on perpetuation of our constitutional form of government and a free enterprise system, as contrasted with the totalitarian state.

No word was spoken to build pride in private property ownership and private enterprise, which are the foundation of our independent school system support. But it still remains for our schools and colleges to teach sound economics. It's about time some of our educators got over being afraid to use the terms private enterprise and private property and teach their students what these terms mean to their future.

For if they are swallowed by government, academic freedom, as well as freedom of the individual, will be a thing of the past and representative government will die. The two freedoms must sink or swim together.

Gullible Swindled by 'Bank Suspect' Hoax

There comes to light another case of an elderly couple being bilked of several thousand dollars by confidence men employing one of the oldest dodges of their despicable craft.

Posing as lawmen, they profess to be investigating the dishonesty of an employee of a local bank and, as part of a plan to trap the suspect, induce their prey to withdraw a sum of money from their account to be turned over to the "investigators."

A substantial reward along with the return of the money plant when the case is "broken" is promised the victims for their cooperation.

It is, of course, hard to understand the gullibility of those who hand over money to strangers regardless of their representations and confidence-winning plays. But this nefarious scheme is but one of many that take hard-earned and saved dollars from the trusting, for whom the loss, in most cases, is a serious blow to their security.

There is only one safe rule in dealing with strangers where transfer of money is involved: Take no action until you have consulted a knowledgeable friend or reputable member of the business community.

America Changing -- for the Worse

By RUTH MONTGOMERY
WASHINGTON — We learned in school that the "government is best that governs least." Today, Big Brother seems intent on imposing his will on every nonorganized person in the nation, from cradle to grave.

Our vast regulatory agencies are reaching out to decree the shapes and sizes of packaged foods in supermarkets, as well as the amount of food that farmers can grow.

Oldsters are told that they cannot benefit from Social Security-paid Medicare, unless their hospital bedmates are of a different race than their own.

Congress is considering legislation that would require home owners to rent their apartments and houses to people whom they consider unsound or undesirable tenants.

Schoolchildren are pulled from neighborhood schools and forced to attend classes with "deprived" youngsters, whose learning capacity or intellectual levels are less than their own.

Rapists and murderers must now be treated like pampered princelings. Instead of being asked for a confession, they are given lawyers and

they must be politely escorted to a comfortable room, and a tax-paid attorney summoned to "protect their rights," and defend them.

ENCOURAGED DISORDER
Big Brother has benignly encouraged street demonstrations against local city and state governments in the Southland.

Such willful disregard of established law and pampering of criminals have been the forerunners of mass rioting and mass murders: a condition that has prompted worldwide moralizing about the state of American society.

An aging Supreme Court justice who has regularly voted for criminal pampering, and against school prayers, has just taken a fourth wife who is a third his age, after three previous divorces.

Morality is at a low ebb in America, as evidenced by the widespread sale of dope and birth control pills on college campuses.

CRIME ON INCREASE

Where are we headed? A recent FBI report discloses that crime has increased in America, while convictions have decreased. No one is safe in his bed, or on city streets at night. Women are raped in public parks in broad daylight, while the Great Society busies itself with expanded welfare services, nipping regulations, and codifying of rioters.

Half A Job!

David Lawrence Says:

Russian Role in Viet Confirmed

WASHINGTON—Proof that the Soviet Union is directly involved in the Viet Nam war and is providing the weapons to kill American soldiers is being revealed not only from Saigon but from Moscow. This significant piece of news was disclosed by two United Press International dispatches. One, from Viet Nam, said:

"A Communist guided missile missed a flight of U.S. Navy jets over North Viet Nam Tuesday, then plunged to the ground and exploded in a populated area near the port of Haiphong, American military spokesmen reported Wednesday."

"Navy pilots reported seeing the Russian designed surface-to-air missile set off a fire after it hit east of Haiphong."

"In another air war incident Tuesday, Communist 'Migs' striking farther south than ever before, attacked a flight of U.S. Navy Skyhawk jets as the American planes were bombing a North Vietnamese supply train."

From the Soviet Union itself another dispatch quotes the Soviet military newspaper "Red Star" as boasting that the improved air defenses of North Viet Nam are beginning to show results.

SUPPLIED MISSILES

The Moscow correspondent declares that Russia has supplied surface-to-air missiles to the North Vietnamese. The "Red Star" article adds:

"Now (North Viet Nam) has up-to-date anti-aircraft guns and well-trained personnel."

Many members of Congress feel that the time has come to cut off diplomatic relations with the Soviet Union and also to ask the United Nations to make its own inquiry as to whether what the Soviets are doing is in violation of the charter, which denounces aggression or any support of aggressors.

There have been many speeches in Congress in recent months demanding that the United States impose an economic blockade on North Viet Nam as a military measure.

Certainly fuel and other

strategic materials, as well as weapons, are being shipped into the ports of North Viet Nam from Red China and the Soviet Union, though in many cases ships flying the flags of other countries are used.

Inasmuch as it now is disclosed that the Soviet Union is taking a direct part in the Viet Nam war, the question of an embargo against all trade with the Soviet Union becomes a pertinent subject for Congress to discuss, and even to authorize retaliatory measures.

Certainly it is a paradox to find departments of the government here planning to increase trade relations with the Communist countries while some of those same countries, particularly the Soviet Union, are furnishing the weapons and the plan being used to kill citizens of the United States fighting to protect the independence of the South Vietnamese people.

Bob Considine Says:

CBS Abuzz Over Plans for New York Yankees

NEW YORK — People Places... Things... The buzz around CBS is that the network is getting ready to "do something" about the New York Yankees.

What the action will be is still under study, but the report from sources

CONSIDINE of substance is that Dan Topping's remaining 10 per cent share and his \$50,000-a-year contract as club president — which has three years to run after this season — will be bought up.

Topping has not been too well, spends much of his time in Miami. Diplomatic relations between Topping and CBS's vice-president-in-charge of baseball, war hero Mike Burke, have deteriorated.

It is perhaps significant that Ralph Houk's managerial contract was signed for the unusual term of four years, which extends his commitment to the organization longer than Topping's commitment.

Mickey Mantle's impending retirement, the rundown springs of other stars, the inevitable drop in the league standings (and, worse, the Nielsen rating) are crises which CBS's rulers recognize clearly from experience.

CBS has no thought of sell-

ing the \$14,000,000 bauble that bobbled. It plans to pump in fresh blood, fresh money, and maybe even seek a change of climate — a move into Shea Stadium.

The New York Times gave front-page display to the lost love affair of President Roosevelt and Lucy Page Mercer.

The paragon of pieties also featured on Page 1 a story about the leap in local birthrates precisely nine months after the city's great blackout. The good blue times.

It's a rotten war in Viet Nam, but the U.S. Navy will never knock it. The war has given the chief Navy gobbler golden opportunities to coin a new series of unpronounceable designations.

Latest is DECOMPACTIV-NAVFACENGCOM, S E A which any old salt worth his salt recognizes instantly as the Deputy Commander of the Pacific Division Naval Facilities Engineering Command, South-east Asia.

The Associated Press is entitled to use the name printed in this newspaper as well as all AP news dispatches.

The Pontiac Press is delivered by carrier for 30 cents a week, where mailed in Oakland, Genesee, Livingston, Macomb, Lapeer, and Washtenaw Counties it is \$2.00 a year elsewhere in Michigan and all other places in the United States \$3.00 a year. All mail subscriptions payable in advance. Postage has been paid at the 2nd class rate at Pontiac, Michigan. Member of A.S.C.

Voice of the People:

'Civil Anarchy Nurtured by High Public Officials'

The war in Viet Nam, the rising cost of living, and disrespect of law and order are major issues of 1966.

Civil anarchy has been nurtured by respected Americans and high public officials.

There is a need for appeal to churchmen, educators, and civil-rights leaders to advance the cause of civil rights through the peoples' representatives in government. The majority of Americans would like to see civil disobedience stopped.

GEORGE McCART
204 LINDEN

'W. Huron a Speedway Without Stoplights'

Pontiac has its newest and fastest speedway on West Huron Street between Johnson Avenue and Genesee Street with no traffic lights to slow the traffic.

Where and how does the humble pedestrian cross the street without getting thrown into eternity? Even the new overpass, with its wide open mesh flooring, is impossible for most folks.

A traffic light at Dwight Street could be the answer and would be appreciated.

Varied Response to the Hellfire Hypothesis

The views expressed by "Geddie" regarding humanity's lack of fear of hellfire are certainly appalling to any well-educated person of our society. One can easily place the blame for the wrongs of society on others and fail to see where it actually should fall.

Geddie's attack on our educational system is a narrow-minded view that few, if any, take in our modern society. If the world today is to be strong and enduring we must revise those unrealistic myths and draw back the young people with understanding and firm foundations.

JERRY

Disbelief and denial of hell do not alter the fact of hell. The Bible declares — they were judged every man according to their works — and whosoever was not found written in the book of life, was cast into the lake of fire.

The Lord Jesus Christ speaks of persons being cast into everlasting fire, and again, into hellfire. Ministers and teachers who say there is no such place as everlasting hellfire deceive themselves and their hearers.

BENJAMIN F. KRANICH
DRAYTON PLAINS

Lennon Is Defended, Condemned, Excused

The Beatles did not say that "they" were more popular than Jesus, but stated that "Rock 'n' Roll" is more popular than Jesus.

A FAITHFUL FAN

John Lennon is from dust and will return to dust. Jesus is from everlasting to everlasting. Lucifer was cast out of heaven for exalting himself above the Most High.

MRS. ALTA KING
WHITE LAKE TWP.

It is too bad John Lennon made such an irresponsible statement. Regardless of their popularity, the Beatles are just another rock 'n' roll group. Whether they believe in Christ or not, they shouldn't be punished by banning of their records, etc. Everyone is entitled to his opinion, right or wrong.

NON-TYPICAL TEEN-AGER

Residents Worry About Well Contamination

We bought our house because of the wonderful clear water in the well. Now a new laundry is being built across the street. The owners were given a permit to use 8,000 gallons a day which adds up to 56,000 gallons a week, which will be run off into lagoons behind the property with the expectation that it will seep away through the ground or evaporate.

Our wells in this neighborhood are 15 to 20 feet deep. This seepage will almost certainly contaminate our water. Why should this be permitted?

LOUTVIG AND VICTOIRE MOURADIAN

Home owners in the Round Lake area are faced with the establishment of an automatic laundry in a 30x330 ft. area where I believe facilities for disposal of the waste water are inadequate.

In the absence of sewers, it is planned to have the waste run into open trenches from which it is expected that it will be taken care of through a combination of evaporation and ground seepage. I understand this system doesn't work. The stagnant water fills the surrounding area with choking odors, and nearby wells are contaminated. Yet the Water Resources Commission and the Oakland County Health Department say they can do nothing.

MRS. WILLIAM K. HANGER
UNION LAKE

'Who Pays for Luci and Pat's Honeymoon?'

It is nice that Luci and Patrick Nugent are honeymooning in a \$250,000 Nassau Beach Estate. I'm just wondering who is paying for it?

A DEMOCRAT

Question and Answer

It seems strange to me a two-ender should be released on \$2,500 bail for a small personal injury accident, but an older, uninsured man could kill another man in an accident and go free on \$200 bail. Is it the law that allows a man to go free on such a trivial bail, or the difference in judges? What can be done about this?

CONCERNED

REPLY

Asst. Prosecutor Thomas Plunkett tells us the purpose of bail is not to fine or punish, but to insure the defendant's appearance in court. The amount is discretionary, and if the judge or justice of the peace is reasonably sure the defendant will appear as instructed, the amount of bail may be relatively small. If there is some doubt about the defendant showing up, bail is set much higher. Changes in laws governing this matter, as with other laws, must be done through local, state and federal legislation.

South Viet Nam's Unarmed Civilians Caught in the Middle

By GEORGE ESPER
SAIGON, South Viet Nam (AP) — There are no sanctuaries in South Viet Nam for unarmed civilians.

Almost daily, guerrilla warfare takes its toll of civilian lives. Civilians are not even safe in the streets of Saigon.

There are no statistics on civilian deaths, but they run into the thousands. More are likely to die.

Incidents last week, including the bombing of a Mekong River zone, and Vietnamese police select for assassination one or two key leaders of a government-controlled village, South Vietnamese troops might call an air strike on a village to cut

innocent civilian caught between the Viet Cong and allied forces.

OTHER BOMBING

There have been other such bombings in which civilians were killed, unnoticed or unknown to the public. As one Vietnamese officer put it, "It happens all the time."

Last September, U.S. jets dropped four bombs in the hamlet of Gia Linh in the southern part of the demilitarized zone.

Whereas the Viet Cong might select for assassination one or two key leaders of a government-controlled village, South Vietnamese troops might call an air strike on a village to cut

Why so much firepower? When American troops take heavy fire from a Viet Cong village, they often have no choice but to reply with artillery or air strikes.

Civilians are often reluctant to leave their villages. Instead, they build bomb shelters near their huts.

In some cases, civilians killed in military operations are simply listed as Viet Cong.

Civilians also face the perils

of bombs accidentally released or a crippled airplane crashing into their towns.

On July 1, eight Vietnamese civilians—seven of them school children—were killed and 32 persons wounded when U.S. Air Force planes jetisoned their unused explosives.

As is often the case, a Viet Cong terrorist attack will catch some innocent civilians or pre-Cong.

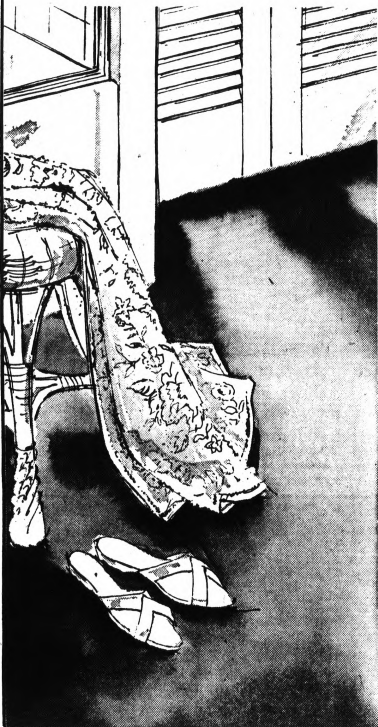

capitate a counterattack with civilians caught in the crossfire.

On May 10, a terrorist set off a mine in Saigon, America Military Police opened up with machine guns. Seven civilians were killed and 26 wounded.

In many instances, Vietnamese dependents—women and children—go to the wars with their living with them. Often, they are attacked by the Viet

THEY'LL WED AUG. 27 — Robert A. Humphrey, 22, son of the vice president, and Donna Erickson, 21, beamed as they announced their engagement at a New Year's eve party in Minneapolis, Minn., hotel. They set the wedding date for July 9, but she was hospitalized with pneumonia and the ceremony was delayed. The date is now Aug. 27. In Minneapolis, when a nuptial Mass will be celebrated. She's Catholic and he's Protestant.

Nuptials of VP's Son Getting Little Notice

WASHINGTON (AP) — Although almost unnoticed in the tumult and glare of publicity of Luci Banes Johnson's wedding, there's another marriage this summer with high official interest.

The vice president's son, Robert A. Humphrey, marries a stunning blue-eyed blonde of Norwegian descent on Aug. 27 in Minneapolis, Minn.

It should be a picture wedding: Luci is 22, dark and handsome. His bride, Donna Erickson, 21, is a 5-foot-4 former beauty queen from Hampton, Minn.

Like Luci, Donna insists her wedding is "a family affair."

LIKE LUCI

Like Luci, Donna plans a Saturday nuptial Mass. She is Roman Catholic. Bob is Protestant. And like Luci, Donna chose to move her ceremony from her parish church to a larger sanctuary, the 1,200-seat St. Olaf's Catholic church in Minneapolis.

Bob and Donna's wedding originally was scheduled for July 9, but was postponed when she was hospitalized for three weeks with pneumonia.

She was out of the hospital Aug. 6, but that was Luci's day to become Mrs. Patrick J. Nugent at the Shrine of the Immaculate Conception in Washington. Vice President and Mrs. Hubert H. Humphrey attended that wedding. Bob and Donna did not.

Whereas hundreds of newsmen covered the Nugent rites, the Humphrey's Washington press office said it has only about a dozen requests for coverage.

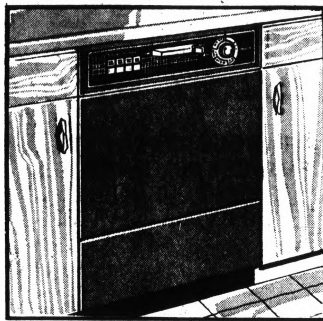

GOWN SECRET

Donna's wedding party will include 16 persons. Her bridal gown is as carefully guarded a secret as was Luci's. An uncle, Larry Doffing of Hampton, Minn., will give her away.

The reception will be at the Humphrey's lakeside retreat in Waverly, Minn., 40 miles west of Minneapolis. Green and white tents will be set up on the lawn and a combo will provide music.

During the postponement, Bob moved into the couple's one-bedroom honeymoon apartment with a college classmate, Greg Schermann, who will be a groomsman in the wedding.

Bob and Donna's romance blossomed at Mankato State College where both were students.

Kalamazoo Man Seeks Post at 'M'

KALAMAZOO (AP) — Robert Brown, 62, a Kalamazoo businessman, announced Tuesday he will seek nomination as a candidate for the University of Michigan Board of Regents at the Republican state convention Aug. 27.

Brown, who has served as treasurer of the Republican State Central Committee for the past six years, unsuccessfully sought the GOP nomination for auditor general in 1960.

Brown, former chairman of the Kalamazoo County Board of Supervisors, was graduated from the U-M in 1926.

Getting Out Cuban Door Is Not So Easy

By ISAAC M. FLORES

HAVANA (AP) — Fidel Castro has proclaimed an "open-door policy" for Cuban refugees, but the door is still shut for many who want out.

Thousands of Castro dissidents are leaving to start life anew in the United States. A great number who want to go find many obstacles, some intentional, others not. They all have the same result.

Mariano X and his 65-year-old wife, who is in poor health, want to join their oldest son in the United States — "to get away from this increasingly depress-

ing life, with its total control over the individual." But they say they won't abandon their other son, a prisoner on the Isle of Pines.

A similar situation confronts many relatives of the estimated 75,000 political prisoners in the country.

WANT ESCAPE

Raymond, 40, his wife and three children want "to escape from this madness." But their oldest son is 16 — military age. Young men 16 to 27 are prohibited from leaving.

Gregorio and his wife have wanted to leave for a number of years, but both are doctors.

They also have a draft-age son. It is virtually impossible for a doctor to obtain permission to leave.

Cubans discuss with increasing frankness their reasons for wanting to abandon their homeland. There is not as much fear

of being overheard as in the past. They apparently find safety in numbers.

In the main, they want more freedom to live and work, to criticize and act, to come and go. To many an average Cuban, communism is a dream world of promises in the bitter reality of want.

INTEREST LACKING

Foreign observers and diplomats here note the so-called average Cuban is little interested in the political theories of his leaders. He wants more and better food, housing, clothes, and personal comforts than he is getting.

Many of these reasons form the basis for his desire to leave.

But he's discovered many reasons why he cannot.

Movie Censors Out of Business

KANSAS CITY, Kan. (AP) — The Kansas State Board of Motion Picture Review is going out of business. The board, recently declared unconstitutional by the Kansas Supreme Court, was ordered shut down by Gov. William H. Avery.

Center to Report Earthquake Data

By Science Service
WASHINGTON — A National Earthquake Information Center was established here by the Environmental Sciences Services Administration to quickly inform the American public of sizable earthquakes anywhere in the world.

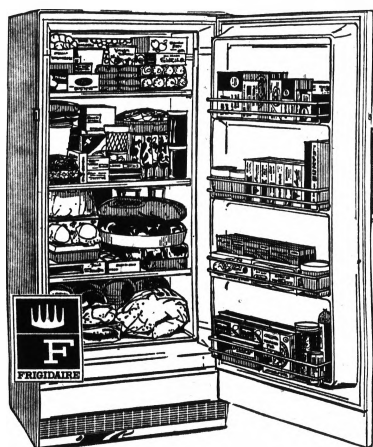

The national earthquake early reporting system started official operation Monday after several weeks of exhaustive tests.

The center is located in the headquarters of ESSA's Coast and Geodetic Survey in Rockville, Md., from which the earthquake reports will be issued.

ALWAYS FIRST QUALITY

TRAILBLAZER — Jane Anne Betts, 19, wears the tools of the trade as she checks a connection at the New York Telephone Co. Building in New York. Her employer says that Jane is the first female frameman in the building since World War I. The Queens Village, N. Y., girl got the job by answering a newspaper ad.

A.P. Wirephoto

Buyers' Laboratory Tests Products Used in Offices

NEW YORK (UPI) — If you are dissatisfied with the performance of anything you use in your office from paper clips to automatic typewriters, maybe Arthur Kallet and Ed Orloff can help you.

They will charge you, though, by asking you to subscribe to their Buyers Laboratory Reports.

Like the widely known Consumer Reports, Buyers Laboratory is a testing organization that buys machines and materials and products of competing brands, tests them exhaustively, then publishes reports on the tests, letting the chips fall where they may.

The reports are becoming

rather widely known in offices across the land.

A company that used duplicators saved \$105 per machine on one purchase.

SAVED THOUSANDS

Some firms told Kallet and Orloff that they had saved several thousand dollars a year by reading Buyers Laboratory Reports.

And just as Consumer Reports now is read avidly by sales managers and design engineers of all sorts of consumer products from fountain pens to automobiles, so makers of office equipment and supplies are becoming acutely conscious of Buyers Laboratory Reports' influence on their business.

For example, the engineering staff of a large diversified manufacturer of business machines was delighted when Buyers Laboratory gave a most uncomplimentary rating to their electric typewriter.

The engineers told Orloff, "We've been trying to tell top management the typewriter was lousy but they wouldn't listen to us."

MANY CHANGES

Although Buyers Laboratory was started only in 1961, its reports already have been responsible for many changes by manufacturers in the office equipment and supplies they make.

The company has received many letters from manufacturers expressing appreciation for the discovery of faults they did not know existed in their products.

Arthritic Aches Hard to Weather

WASHINGTON (AP) — The next time grandpa says it's going to rain because his arthritis is bothering him, you might do well to pay some heed.

A government report said today falling atmospheric pressure and rising humidity, conditions which often precede rain, can cause pains and swelling of joints in rheumatoid arthritis.

The report said progress in relating weather to disease has lagged behind advances in other fields of health-related science because "the atmosphere and the human body are highly complex systems and the interactions between the two are often very involved."

SPECIAL DELIVERY — Navy Postal Clerk Edward Vincent squeezes through the porthole of his ship, the destroyer Stickle, to plant a kiss on his wife, June, for the first time in eight months. Eighteen-month-old Susan, their daughter, looks the other way. The ship had returned to Newport, R.I., after deployment off the coast of Viet Nam since January.

By Russians

NATO Fleet Shadowed

NORFOLK, Va. (AP)—The Navy says the Russians are using aircraft, ships and submarines to shadow a NATO exercise in the North Atlantic.

Five nations are taking part in the exercise, which includes simulated air attacks against Northern European targets and refueling and replenishment operations. It began Monday and ends Friday.

Russian planes began shadowing the fleet Sunday as it approached the Norwegian coast, the Navy said yesterday.

The next day, the surveillance included Soviet surface ships with a guided missile destroyer and two trawlers. They remained on the scene until Tuesday night.

A Soviet submarine was spotted on the surface Sunday by the heavy cruiser USS Newport News.

State Dems Drawing Blank on Lieutenant Governor Hopeful

By DICK BARNES

LANSING (AP)—If you'd like to run for lieutenant governor, drop by the Democratic State Convention this weekend in Grand Rapids—there may be an opening.

Two days in advance of the nomination, there is no standout candidate and little apparent enthusiasm about or from some of the names being mentioned as a running mate for gubernatorial candidate Zoltan Ferency.

Selection of the Ferency

running mate is the major job of the convention, which meets Saturday morning after district caucuses Friday night — and possibly some pre-convention maneuvering Thursday night.

Action on a new slate chairman, to succeed the resigning Ferency, will apparently be deferred until next winter.

NO TROUBLE

The Democrats' other major statewide candidates, Atty. Gen. Frank Kelley and Secretary of State James Hare, should have no trouble winning

renomination. Ferency was nominated without opposition at the Aug. 2 primary election.

Dr. Leon Fill of Huntington Woods and Donald Thurber of Grosse Pointe are expected to be renominated to the board of education, leaving other possible contests only for some seats on university boards of control.

The convention will also write a platform for the November campaign.

There has been recurrent talk of nominating a Negro for

lieutenant governor, but chances of this happening appear to be fading.

STATEWIDE CANDIDATE

Some Democrats believe this could lose more votes than it would gain and might endanger party candidates farther down the ticket. And they point out that Democrat Otis Smith, a Negro, is already a statewide candidate running for reelection to the Supreme Court.

A Pole has traditionally been the number two man on the

ticket, but Ferency, a Hungarian, is expected to exert the ethnic group pull usually assigned to the running mate.

Some Democrats believe that since Ferency is from the East Lansing-Lansing area, a Wayne County, or at least tri-county figure should be No. 2.

Ferency remains an underdog to Republican Gov. George Romney, another factor adding to the difficulty in finding a nominee.

delivered the waterlogged pair to St. Joseph Coast Guard station. The MehaFFEys were stranded 34½ hours in Lake Michigan on the bottom of their overturned 30-foot sailboat.

2 Rescued in Lake Michigan

Before the sailboat could reach port, the two men were transferred, tired but unhurt, to a 42-foot cabin cruiser owned and sailed by Mr. and Mrs. Oliver Burkee of Chicago, and brought safely to shore.

SUNBURNED

Both men stood on the underside of the deck between the two hulls, suffering only sunburn and what they described as "water-logged feet."

WOODY ALLEN and MONIQUE VAN VOOREN

It's the drink to start with and stay with—a cool refreshing Mule made with Smirnoff and 7-Up®. Pour a jigger of Smirnoff over ice. Add juice of ¼ lime. Fill Mule mug or glass with 7-Up to your taste. Delicious!

Set of 6 Mule mugs \$3.00. A great idea for parties. Send check or money order payable to Smirnoff Mule, Dept. T, P.O. Box 225, Brooklyn, New York 11202.

CONVENIENT CREDIT PLANS – UP TO 3 YEARS TO PAY

MONEY CLIPS by Maud Read

A Command Performance.

In 1865, the United States acquired a specific symbol but it wasn't until 1909 that this symbol was used on our currency. This specific was Abraham Lincoln—a tradition and a symbol that would show the world that we were beginning to mature and would soon be a nation to reckon with.

Victor D. Brenner, a Russian-born artist and designer, was a great admirer of Lincoln and often sculptured pieces bearing his likeness as mementos for close friends and associates. One plaque in particular was shown to President Theodore Roosevelt and he was so impressed with the strength and character displayed in the profile that he requested Brenner to design the one-cent piece contemplated to commemorate the one-hundredth anniversary of Lincoln's birth.

Roosevelt opposed any reference to the Deity on a coin and ordered the motto, "In God We Trust," re-

moved from the design. However, William Howard Taft succeeded Roosevelt in 1909 and final approval of the completed design rested with him. He noticed the omission of the motto and ordered it restored before production.

Lincoln cents issued in 1909 carried the designer's initials V. D. B. on the reverse, just inside the lower rim. In 1909 the initials were removed but restored in 1918—this time they were placed just under the cutoff of Mr. Lincoln's sleeve.

Virus Is Linked to Leukemia in Lab Tests With Rodents

By Science Service

MOSCOW — Scientists have proof that a virus causes leukemia, at least in mice, but effective treatment hinges on further research that would show how the virus works to make the blood-forming organs cancerous.

There are two theories: either the virus transforms a normal cell into a tumor cell and disappears, or it "short-circuits" some mechanism of the healthy body and continues to aid cancer growth.

If the first theory is true, said Dr. Marvin A. Rich of Philadelphia's Albert Einstein Medical Center, treatment would be with drugs—the use of chemicals to kill the tumor cells.

If the second theory is proved and the virus remains in the body, the cure probably would be found in killing the virus, possibly with a vaccine, thus restoring the body's normal control mechanisms.

Dr. Rich, who discovered the Rich virus, one of several known to cause mouse leukemia, reported to the Ninth International Congress of Biology here on the present status of leukemia research, which appears to stand at a figurative fork in the road.

No one has yet proved that a virus causes leukemia in humans, although research points in this direction.

Children and elderly persons are most often affected, and all higher animals, fish, amphibians, birds and mammals including chickens and cows, develop the disease.

Although life has been lengthened by treatment, leukemia is usually fatal within approximately 18 months after symptoms appear.

Herb Alpert Isn't Big-Headed Over Tijuana Brass Success

By HAL BOYLE

NEW YORK (AP)—"I don't seem able to get caught up with success," said Herb Alpert.

"I'm not used to it."

"My goal isn't to make money—it's to find out what life is."

But at 29, Herb, whose dark sideburns and matador build make him look like the late Rudolph

BOYLE

Valentino, is riding a golden avalanche.

The slender trumpeter and his famed Tijuana Brass Band will gross, he figures, an estimated \$32 million this year as the result of breaking the sound barrier.

NEW SOUND

The sound barrier they broke was the sound of rock 'n' roll which has dominated the music world for years. They created a rollicking new sound, a sound in which Alpert wedded Dixieland jazz and the spirited rhythms of

Mexico's strolling mariachi bands.

Herb, who has been blowing the trumpet since he was 8, first experimented with the new sound in a Los Angeles garage in 1962. But it was a full two years before the sound really caught the national fancy.

"There have been a lot of new musical sounds, and you can never in advance really put your finger on one that the public will take to," said Herb.

"But perhaps people were tired of protest music. Ours has a happy sound."

Perhaps Alpert himself was subconsciously looking for a happier sound. One of his chores during a two-year stint in the Army had been the playing of "Taps" at funeral services. Some days he blew this mournful farewell salute as many as 18 times at military cemeteries.

His six-man band has made six albums of which 11 million recordings have been sold.

One of his two firms, the A & M Record Co., expects a gross of \$30 million during 1966. His other firm, Tijuana Brass En-

terprises, should gross better than \$2 million from the band's concert and television appearances.

Herb and his bandmen next month invade Europe and England — home territory of his friendly rivals, the Beatles — and plan to make a movie early next year.

"It's nice to be occupied," said Alpert, a family man who actually prefers to stay home. "I can remember the time when I had nothing to fill my time and could goof off whenever I wanted to. I was miserable."

A MODEL RECOVERY—Michael Wetzel, 16-year-old son of Mr. and Mrs. Robert R. Wetzel (right) of Vandercook Lake, has many thoughts about the operation in which he was given one of his father's kidneys, but

one of the most pleasant memories is the time he devoted to making models of cars, spacecraft and airplanes. He spent 94 days at the University Medical Center in Ann Arbor.

Kidney Transplant Means New Hope, Life for Youth

(EDITOR'S NOTE — A kidney transplant has brought Michael Wetzel new hope for the future and for his family, hopefully, an end to months of worry about Michael and themselves.)

JACKSON (AP) — Sixteen-year-old Michael Wetzel has new hope and a new life. These ingredients are contained in the kidney recently supplied by his father, Robert.

Before the kidney transplant, Michael didn't have much chance of life. Now, the chance is very good, plus Michael is finding himself in a new world. From the team of 18 physicians who performed the surgery at the University Medical Center in Ann Arbor last month comes the explanation: The cells of Michael's body were filled with poison. They couldn't function properly.

MORE INTERESTED "Now," Michael says, "I'm more interested in everything. As the doctors said, all of my senses have been affected by the new kidney. They even tell me to have my eyes tested soon so that I can be fitted for new glasses."

All of this makes Michael anxious to start the 11th grade at Vandercook Lake High School. He got Bs and Cs in previous grades. He completed his 10th grade work at the medical center while convalescing from the kidney transplant. He received all As.

Michael was the victim of hydronephrosis, a birth defect that destroyed his kidneys. Starting April 1, he underwent treatments to flush his body of ingredients normally removed by the kidneys.

Early in June, he entered University Medical Center for four-hour treatments twice a week on a kidney machine to purify his blood for the transplant. In preparation for the operation, his father underwent four days of tests at the hospital.

Form Speeds Work on GI Benefits

Veterans who plan on attending school under the new GI Bill can speed up the processing of a certificate of approval if they will attach a copy of their service separation form, DD 214 to their application, according to R. M. Fitzgerald, manager of the Veterans Administration Regional Office in Detroit.

This form is required to determine the amount of training time a veteran is entitled to receive and is necessary to the processing of an application, he said.

Fitzgerald further stated that veterans with dependents can save themselves much inconvenience and needless adjustments in monthly payments of training allowance if they will submit marriage certificates, and birth certificates of children, with their initial application form.

It will enable the Veterans Administration to award benefits initially without delay.

Kenyans Face Marital Woes

NAIROBI, Kenya (AP) — The marital troubles of Kenya's labor minister, Dr. Julius Kiano, have touched off a lively debate, half-comic, half-serious.

The wisdom of marrying any foreigner, whether of the same color, has been questioned.

The dapper Dr. Kiano was married for 13 years to an American Negro girl he wooed and won at college in California.

Two months ago she was deprived of her Kenya citizenship for allegedly having "shown herself by act and speech to be disloyal and disaffected toward Kenya."

NEW WIFE — Earnestine Kiano returned to the United States. Less than a month later her husband went through a Kikuyu trial ceremony by act and speech to be disloyal and disaffected toward Kenya.

This love tangle was in the minds of legislators when they debated a bill designed to help Kenyans wishing to marry abroad.

DIFFICULT MARRIAGE — Nevertheless, Mrs. Lukalo agreed that marriage to a foreigner was difficult at best.

"We know our men go abroad and bring back wives even though they are already married," she said. "The Kenya suffers, but not as much as the foreign girl led to believe she was marrying a single man."

Parley to Focus on Rhodesia

WELLINGTON, New Zealand (AP) — The Rhodesian crisis will dominate the Commonwealth prime ministers conference in London Sept. 6-15. Prime Minister Keith J. Holyoake said today.

Holyoake told a Wellington news conference the Rhodesian crisis had placed a severe strain on relations between Commonwealth members.

A vociferous body of opinion opposed any such bill. One member of Parliament protested that American women married to Kenyans were still working in government offices even though they were separated from their husbands.

SECURITY RISK — He saw them as a security risk.

"By encouraging our students to have expatriate wives we shall be exposing the country to dangers because some of these girls are trained spies," claimed another.

Foreign girls might "dilute African socialism," others warned.

There is a surplus of Kenya girls without bringing in foreign women to make matters worse, they complained.

Those who could not find husbands would be forced to go on the streets, the legislators contended.

HAVE SAY — No woman sit in Kenya's Parliament but they were determined to have their say.

Sarah Lukalo, secretary of Kenya's National Council of Women and a member of the executive committee of the Progress of Women organization, said:

COOK & DUNN

The Negro and Black Power - 4

Militants Harken to the 'Overthrow' Theme

(Fourth in a Series)

By TOM TIEDE
Newspaper Enterprise Assn.

NEW YORK — It is against the law of this land for any of its citizens to knowingly or willfully "advocate, abet, advise or teach" the desirability of forcibly overthrowing the federal government.

But Daniel Watts, an angry Negro, said he doesn't care.

And he said growing numbers of his race feel the same.

Watts is editor of a passionately antiwhite, antiestablishment magazine called "Liberator" and has admitted to any and all that his avowed intentions are to "unite the black community" to achieve their "dignity" in or out of the law.

Said he frankly: "This whole business of getting rights from Charlie (the white man) has gone beyond the law. Besides, when the Constitution of the United States was framed, the general opinion of the authors was that a black was only three-fifths of a man."

So, he added, "Why should I pay any attention to it?" Watts, a 42-year-old one-time architect, has been described as the most outspoken example of "responsible colored militancy" in the country today.

Defined, the terminology means he is university-trained (Columbia) and can pay his rent; thus is distinguished from the shouting black radicals who aren't and can't.

Many of the other extremists are known to be plotting everything from riots to warfare in their quest to "get a piece of the action" from white America.

Recently, three such who belonged to something called the Black Liberation Front were caught and convicted of planning to blow up the Statue of Liberty.

OTHER ARRESTS

Other militants have been arrested for possession of weapons, disorderly conduct and subversion.

Watts, on the other hand, was more cautious about open inflammation. He said only that he is "a revolutionist" who is "fed up with the white power structure," a statement which is hardly shocking in fed-up Negro circles.

But the editor is less cautious in print. In the July issue of his 24-page publication, he said:

"We (Black) people are demanding all the action, now, here on earth, not in Mr. Charlie's nigger heaven. The cry is Black Power. Power to punish. Power to destroy. After 350 years of struggle . . . Brothers

and Sisters, Charlie's finger is on the panic button. Let our Black Power help him push it, to hell."

Obviously, Watts and those he influences (he prints 15,000 magazines a month), are after complete Negro independence politically, socially and economically.

"And not by asking for it," he demanded of this reporter, lately in Viet Nam.

"You don't think all those black soldiers learning how to shoot machine guns are doing it for Whitey's sake do you?"

By 1971, five years hence, the militant opinion is that "the foot

of suppression will be off our backs." Negroes will control elections (by black voting blocs), industries, utilities "and all of the things we've never gotten by begging for them."

Black Power will do this, Watts insisted. "Black Power to take our bread (money) out of white-owned banks and start our own banks. Black Power to take over land in the rural and agrarian south. Black Power for closing ranks for survival."

Nonviolence is dead, the editor asserted. And so seemingly was reason, as he said:

"Whitey can do no right."

BLACK MEN!!
WHITEY'S PLAN FOR YOU IS DEATH IN VIET NAM
CHOOSE JAIL
STAY HERE AND FIGHT FOR YOUR MANHOOD
BLACK WOMEN WILL NOT ALLOW YOU TO STAND ALONE IN YOUR DECISION

BLACK WOMEN ENRAGED

Handbill may be in contact from the following address: 1234 N. 1st St., Detroit, MI 48201

HANDBILL ISSUED—This handbill was distributed on the streets of Brooklyn, N.Y., during the recent riots there. Many extremists are suspected of plotting everything from riots to warfare in the United States today.

Climacteric Studied

Secrets to Slow Aging Hunted

NEW YORK (UPI) — A British specialist is doing research on what he calls "preventive geriatrics" — the prevention or slowing down of the processes of aging which contribute to the degenerative diseases of old age.

E. Schleyer-Saunders (specialists in Britain do not use the title "doctor") offered some hope of progress in prolonging active life in a paper at the International Congress of Gerontology in Vienna.

Although he is aiming his research at the general age group between 40 and 60 years old, he said he has found sharp differences in the rate of aging — "some people can be described as old at 40 while others retain full possession of their mental and physical abilities at 70."

The stage at which the aging process starts in women is well known because it roughly coincides with menopause. Men, Schleyer-Saunders said, usually reject that they also experience a "climacteric" because the change is less dramatic and sexual powers may persist in some degree even up to advanced age.

"However," he added, "this is now considered as a definite clinical entity."

And it is at this point in a life, the climacteric, that Schleyer-Saunders believes preventive geriatrics can be best applied especially against diseases of the heart and arteries, the nervous system and malignancies.

He recommended a four-point program: health education; regular medical checkups; treatment of discovered illnesses together with advice as to diet, exercise, and relaxation, and especially, correction of hormonal imbalance.

Schleyer-Saunders said that part of the preventive treatment must be the replacement of the diminishing sex hormones in older people.

OPEN MON. THURS., FRIDAY 'TIL 9 P.M.

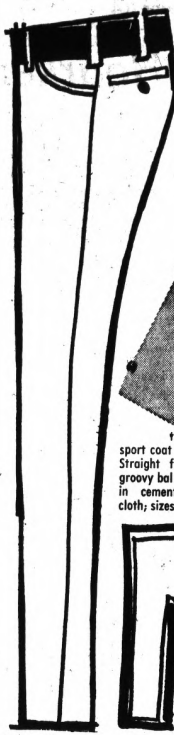

FE 2-4231

you must be satisfied - this we guarantee

Mod is Edwardian, like this double-breasted vest. It's square-cut with 6 buttons and an adjustable back strap. It's Today . . . in camel or dark brown; sizes 36-46 . . . \$10

Mod is Skinny slacks in scrubbed Denim with a groovy wide black belt, scoop front pockets, low-slung waist, and stovepipe legs. Sizes 29 to 38 . . . \$8

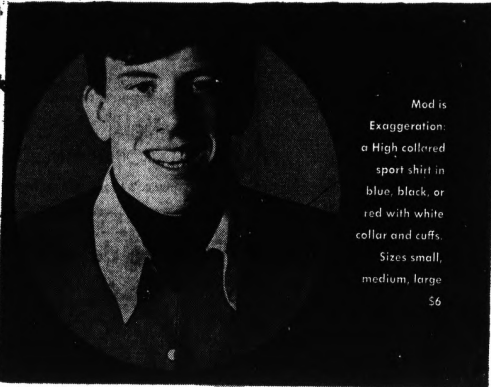

Mod is a Straight-from-the-shoulder sport coat with 4-buttons, Straight flap pockets, a groovy bol collar. It moves in cement heel suede cloth; sizes 36-44 . . . \$40

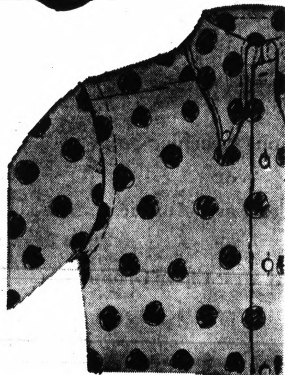

Mod is thin white pencil stripes on low-slung black pants; cut tight to the knee, then straight to the cuffless bottoms, and gripped on the hips by a wide black belt. Permanently pressed. Sizes 29-38 . . . \$9

Mod is Exaggeration: a High collared sport shirt in blue, black, or red with white collar and cuffs. Sizes small, medium, large . . . \$6

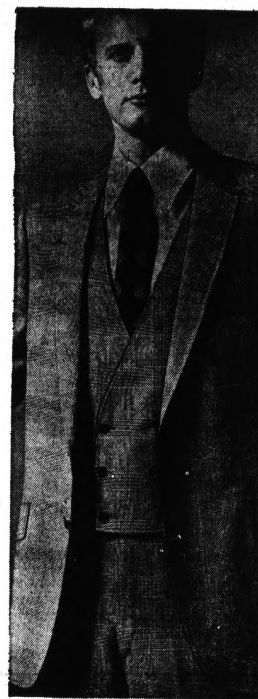

Mod can be Classic, like the Pea Coat, boldly borrowed from British Fleet, and seen here in an American Mod-ification. It's double-breasted, of course, with six great big buttons, two upper slash pockets and two lower pockets, and a quilted red lining. In navy, sizes 36-46 . . . \$30

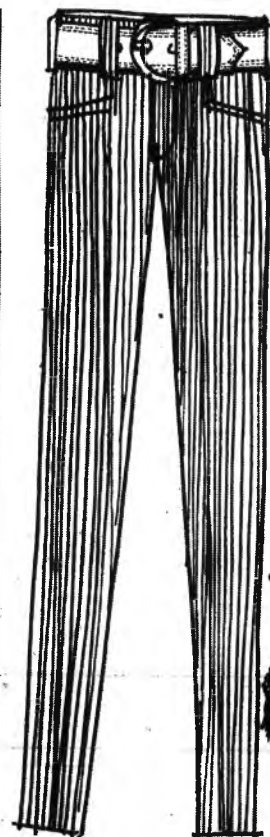

Mod is a Gassy polka dot shirt with a High button-down collar. The colors: blue/blue, blue/red, gold/red. The price . . . \$6

Mod is a fitted double-breasted sport coat with six buttons, deep side vents and straight flap pockets. It's new and it's handsome in wool-and-mohair herringbone, in blue or cedar . . . \$9.95

Mod is Pattern: a black-and-white glen plaid worsted suit with a double-breasted vest. Vaddy British high side vents and 2-button coat with wide lapels. Vaddy trim trousers . . . \$9.50

Mod is Western Gear slacks of wide wale knuckle corduroy. Groovy stovepipe legs and drop front pockets. And very low-slung. Olive or brown, sizes 28-38 . . . \$13

WHAT'S MOD? Gear with an English accent: the freshest influence on menswear in decades. The look is Edwardian with a touch of the military, a touch of the dandy: suppressed waistline, epaulets, low rise pants and high rise collars. It's seen in off-beat accents: the wide leather belt, the paisley print, the bold tie. Mod is adventure, but it's not to be mistaken for the outlandish or the scruffy. For at HHS, we've interpreted the look to American tastes—blending the English avant grade with the American traditional. Of course it's not for everyone. Neither is punting on the Thames.

Mod takes a wide turn. It's tied up in floral prints or oversize polka dots (not shown) in fab color combinations. All cotton, and priced at . . . 2.50

Mod can be Quiet, like this 4-button hopsack suit with fitted waist, deep side vents, and a double-breasted vest that reverses to suede. Heather shades of olive or coffee . . . \$9.50

Mod is a Prim Rib Poor Boy turtleneck sweater of pure wool. Groovy shades of golden malt, honeygreen, navy or Wedgwood blue . . . \$10

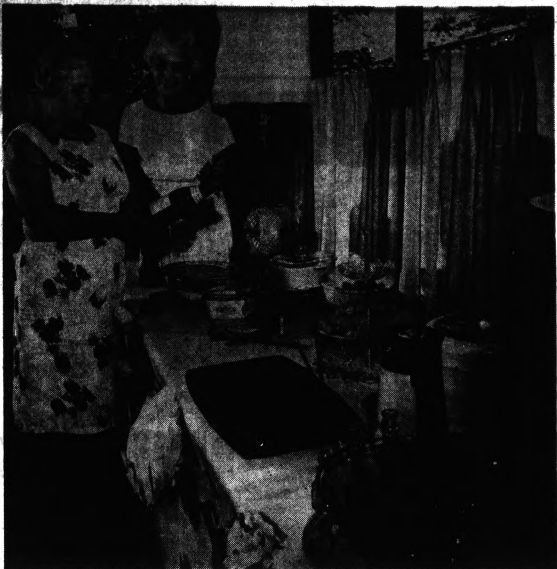

(You'll find these and many more Mod items in the Men's Dept's of all HHS stores.)

League of Catholic Women Gala

"That was a good year," agree Mrs. Leonard Kapuscinski of Desmond Avenue (left) and Mrs. Joseph A. Lorenz of Tuttle Street, both members of the League of

Catholic Women as they look over the prizes at Wednesday's benefit card party. Proceeds will be used for the League's half-way house.

There's nothing like a friendly cup of coffee to liven up a bridge game. Mrs. M. J. Bohach of Eileen Drive pours one for Mrs. Lester W. Bell of Liberty Street at the League of Catholic Women card party which took place in the clubhouse.

Women's Section

Several Showers Fete Bride-Elect

Entertaining recently at a shower given in honor of Barbara Jean Stevens were Mrs. Charles Izydorek and Mrs. Paul Izydorek both of Decker.

A kitchen shower was given jointly by Mrs. Jack Heizer of Cedar Street, and Mrs. Carl St. Clair of Weaverton Street, Avon Township.

Hostess for a linen shower was Sandra Losey of LeBaron Avenue.

A shower was also given by

Mrs. Alfred Guida of Elizabeth Lake Road, Mrs. Robert Com, Oak Vista Drive and Mrs. Arnold Getzen of Heath Street, Independence Township.

Parents of Barbara Jean are Mr. and Mrs. Albert A. Stevens of North Perry Street. Her fiancé is George Louis Izydorek of Rochester, the son of Mrs. Val Izydorek of Cass City and the late Mr. Izydorek.

Albert Benters Celebrate Date

The golden wedding anniversary of the Albert C. Benters of Southfield was celebrated at a recent open house in the home of their daughter and son-in-law, Mr. and Mrs. Charles A. Rogers of Miami Road.

Other children are Mrs. William R. Kent of Delmar, N.Y. and Albert C. Benter Jr. of New York City.

The Benters, wed in Detroit Aug. 17, 1916 have nine grandchildren and two great-grandchildren.

Barbara Marx Leaves for Convention

Barbara Marx, public relations director of the Birmingham School System will be among those attending Theta Sigma Phi's annual convention in Fort Worth, Texas today through Saturday.

She is a past president of the sorority.

Student representatives are Ariene Chruska, Wayne State University and Kathie Immormino, University of Michigan.

"Spur Ahead to New Ventures in Communications" is this year's theme as the national professional and student writer's association goes western.

A Headliner dinner, barbecue dinner and a formal Matrix dinner Saturday evening is scheduled for the three-day event.

Also on the agenda will be an election of officers and an open meeting of the TSP board of directors.

Meadow Brook Music Festival, Friday 8:30 p.m. Meadow Brook School of Music Orchestra, featuring student soloist, Tom Schneller of Royal Oak, in Mühlau's Percussion Concerto and the Meadow Brook Youth Chorus in Bernstein's "Chichester Psalms." Baldwin Pavilion. Admission charge.

Blabbermouth Husband Reveals All Life Histories

By ABIGAIL VAN BUREN
DEAR ABBY: What do you do about a husband who can't keep his big mouth shut? Every time we have company he talks, talks, talks! Nothing is too personal for him to talk about, and he's never heard a secret.

When our guests leave, they know how much we owe, which relatives we don't get along with, and how much we paid for everything in the house.
No one tells us THEIR business, and of course we are seldom invited anywhere. My big-mouthed husband refuses to believe it's because he can't keep anything to himself.

How can I wake him up short of dragging him through the divorce court?

DEAR DESPERATE: And if you dragged him through the divorce court, what would you have accomplished? Dumping a man with all these lovely qualities you saw in him before you married him, who finally learned how to keep his mouth shut. But he wouldn't be yours anymore. Try to educate the blabbermouth.

DEAR ABBY: I have a girl-friend who is in trouble. Just about everyone in the neighborhood knows about her. Well, I feel I shouldn't desert her now as we have been friends for a long time and I really like her. My problem is people say I am getting a bad reputation from being her friend because she is bad. Should I stick with this girl although everyone says, "Birds of a feather fly together?"

CONFUSED
DEAR CONFUSED: "Birds of a feather may or may not always fly together," but I am reminded of another saying: "One swallow doesn't make a summer."

And one mistake does not make a girl "bad." If she is your friend, she is your friend. Stick with her.

DEAR ABBY: My father passed away last year and this friend of my mother's has been coming here a lot lately trying to make friends with me. I just can't accept him because I have an idea that he and my mother were more than just friends before my father died. I can't talk to my mother about it, but I just can't like this man either.

I go to Sunday school and know right from wrong, and I don't think I will ever be able to forgive my mother and this

man for what they have done and are doing. Can you give me some advice? I am 14.

NEEDS HELP
DEAR NEEDS: The Bible says, "Judge not, lest ye be judged." You could be mistaken.

CONFIDENTIAL TO WINTER WEDDING IN SALT LAKE CITY: I think every girl should marry for love. If she

loves money, my advice goes double because the girl who loves money and marries a man without it is sure to make both herself and her husband miserable.

DEAR ABBY: Far as I'm concerned, you, Dear Abby, AND the Madison M. D. both missed the point. I would not prescribe birth control pills to

an unmarried 16-year-old girl, neither would I prescribe them to a married woman for the simple reason that I think they are still in the experimental stages.

No patient of mine will ever be a guinea pig if I can help it. DAYTON, OHIO, M. D.

CONFIDENTIAL TO "WANTS TO BE POPULAR": When you enter a room, do you say,

"There YOU are," or "Here I am"? Ponder that a while.

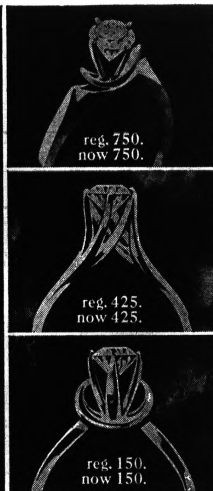

Problems? Write to Abby, in care of The Pontiac Press. For a personal reply, enclose a stamped, self-addressed envelope.

Hate to write letters? Send \$1 to Abby, in care of The Pontiac Press for Abby's booklet, "How to Write Letters for All Occasions."

Nancy Khan Becomes Bride at Ceremony

A recent ceremony in the First United Missionary Church marked the vows of Nancy Z. Khan of South Telegraph Road and Roland D. Systermann.

Earl B. Carr Jr. escorted his cousin, daughter of Mrs. Felice Khan of Dwight Street and the late Mr. Khan at the afternoon rite performed by Rev. Kenneth Pernell.

An illusion veil and Bible arrangement of white orchids complemented her gown of white bridal satin styled with cathedral train.

Matron of honor was Mrs. Woodrow Dunn with bridesmaids Mrs. Van Van Guilder, Carol and Elizabeth Khan. The bridegroom, son of the Nicolas F. Systermanns of Uica, had James Backus for best man. Seating guests were John Doras and Daniel Pendley.

After a reception in the Y.W.C.A. parlors, the newlyweds left for a trip to Mackinac Island.

MRS. SYSTERMANN

Eliminate Those Grays

Graying of fabrics is generally caused by using insufficient detergent, water that's not hot enough or a combination of the two.

To restore fabric brightness and cleanness, simply set your home hot water heater two or three notches higher and increase the amount of detergent added to the washer, or use the regular amount of detergent and add a non-precipitating water softener.

Put the clothing through normal wash cycles until the gray disappears — it may take three or four consecutive washings to do the job.

Should Women Try to Be Substitute Fathers?

By MURIEL LAWRENCE

DEAR MRS. LAWRENCE: You recently said something that worries me. You were talking about a group of boys with irresponsible "pal" type fathers don't need manly strength to turn to. For every time we've reached for it, it just hasn't been there. Disappointment after disappointment piles up until it hardens into the conviction that manly strength isn't available anymore.

Finally, in a kind of grim despair of which we are not fully conscious, we say to ourselves, "All right, I'll make do without it."

It's then we can turn ourselves into "dominating ogres."

We're not ogres at all, of course. We're just horribly disappointed women who are try-

ing to be too brave, too strong. We're also very angry. Because the retardate to whom we are married cannot be a man, he also makes it impossible for us to be a woman.

Yet that's what we are. And when we human beings are not allowed to be what we are, we are bound to become furiously angry.

Thus, women who are not

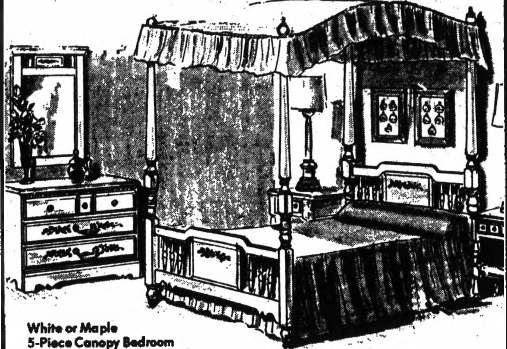

allowed to be women get furiously angry. Our discipline of our children becomes bitter, too commanding, too complaining. We start bawling about and yelling at them in order to stop them from being what they are, too.

It's usual to tell unbalanced mothers that their children need a "relationship" to some genuine male figure. Well, if the kids we are — a woman.

That being our case, a nice handy psychiatrist can be the right male figure to seek out for that manliness we need if we're not to go haywire.

I'm not talking about sex, you know, at all. I'm talking about that manly appreciation of us "relationship" to some genuine male figure. Well, if the kids we are — a woman.

Garden Furniture Cleaned Easily

Garden furniture has a way of becoming unsightly — especially if left outdoors. Mildew, residue of backyard picnics, and reminders of feathered friends in the neighborhood contribute to soil.

It's troublesome to keep clean — unless you go after it with a brush dipped in a solution of three tablespoons of chlorine bleach in a quart of water. That'll make your reed and wicker sparkle for weekend company.

Don't Let Stains Set

More and more laundering experts are urging homemakers to get away from the extra burden of spring and fall housecleaning by keeping things spotless throughout the year. So, start your fall clean-up — NOW.

One way is to tackle stains immediately — don't wait for them to set, then have to struggle with them when you put things away. Rapid soaking action (15 to 30 minutes) in a solution of half a cup of chlorine bleach to a gallon of water can save much grief

Girls of All Ages!

Two favorite combos: A. Slim pull-on skirt, 10.98. Tapestry knit V-neck cardigan, 16.98. Slouchy pants, 14.98. Diagonal stripe, turnneck top, 14.98. Sizes 8 to 16. Tops: 34 to 40. Sports Wear—Main Floor

MRS. JACK LAMPHERE

MRS. G. C. GARLAND

Honeymoon at Falls

Honeymooning at Niagara Falls are the Jack Lampheres (Judith Ann Miller) who were married recently in the immaculate Conception Church, LaPeer.

Parents of the couple, wed by Rev. Charles J. Goenges, are the William M. Millers of Metamora and the Roy Lampheres of LaPeer.

The bride wore a gown and cathedral train of white Chantilly lace over tulle and carried miniature pink roses, white carnations and ivy on a prayer book. Her veil was silk illusion.

Honor maid was Sue Marshall with bridesmaids Margaret Schland, Julie DeLong, Shirley Lamphere and Bernadette Miller the bride's sister. Mary Stanford was flower girl.

Michael Miller was best man. Groomsmen were John Russell, Michael and William Best and Roger Lamphere. Ushers were Russell Stroup, Richard Davenport, Robert Best and William Miller.

The reception was held at the American Legion Hall, LaPeer.

Keep Battery

Since more and more appliances and toys are battery powered these days, many homeowners like to keep extra cells handy. Batteries will deteriorate from age even when not used. A good way to prolong battery life is to place them in plastic bags and store them in the freezer.

(Advertisement)

A Beauty Hint

Margaret Merrill advises that it is quite simple for every woman to promote an English countryside complexion. Her hint to gain a peaches-and-cream loveliness is to damp a cloth with cold water from your refrigerator and press it over your face for a few minutes once or twice a day. Then, to hold the good of the complexion-beautifying cold water smooth on a little tropical oil of Olay. This oil is rather scarce and expensive but your drug store should be able to get you a small supply.

Vows Taken by Garlands Recently

Reception in the Middle Straits Community Center followed the recent marriage of Cynthia Darlene Anderson to Gary Curtis Garland in St. Mark's Lutheran Church.

The bride, daughter of the LaVerne R. Andersons of Park Drive, West Bloomfield Township, appeared in white silk organza and Chantilly lace with tiered train.

Her bouffant veil was silk illusion and she held a nosegay of white roses and carnations.

Honor attendant at the candlelight rite performed by Rev. W. C. Grafe was Donna Teen Shekel of Oxford, with bridesmaids Jane Paddock, and Mrs. Fred Pavelski of Birmingham.

George Garland was best man for his brother. They are the sons of the Carl C. Garlands of Detroit. Clinton Jackson, Ronald Pettie and Richard Garland ushered.

After a honeymoon, the couple will reside in Ann Arbor for his sophomore year at University of Michigan.

Mail Order Charm Book Is Available

UNIVERSITY PARK, Pa. — To help gain the charm and poise desired by all women. The Pennsylvania State University offers a correspondence course titled "Personality and Grooming."

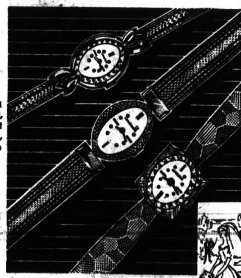

Exercises for a trim figure are described. Practical help is given on good grooming practices for hands, teeth, feet and skin. Charts illustrate hair styles that bring out a woman's most attractive features.

The importance of food to control weight is emphasized with calorie values of foods listed. Mental attitudes and personality traits are explained.

Anyone may obtain the complete course by sending \$1.75 to Correspondence Courses, 202 Agricultural Education Building, University Park, Pennsylvania. A check or money order should be made payable to The Pennsylvania State University.

All the material is in a looseleaf folder and will be sent prepaid.

Personalities Reflected

CHICAGO — The bedroom is a sanctuary or place of refuge as well as a place to sleep. The bedroom and its contents are seen as the woman's responsibility and as an expression of her personality.

These findings are based on an in-depth survey on sleep habits and sleep equipment conducted recently. Sturdy results were presented recently at the annual convention of the National Association of Bedding Manufacturers in Chicago.

The study also reveals that there are distinct personality types who approach sleep differently.

• There are those who regard sleep as a time consuming but necessary function.

• Others are "escape-oriented." Sleep serves as a respite from the pressures and cares of the real world.

• Some individuals sleep to fill unscheduled time and escape boredom.

• Still others look forward to sleep as a "reward" for attention to responsibilities, as compensation "for a hard day's work."

Other attitudes toward sleep environment and bedding brought out by the survey are these:

The mattress is a highly personal object. The study found that deep-seated psychological associations are formed with one's mattress. To many individuals, sleeping on an unfamiliar mattress is an uncomfortable experience.

People resist parting with their mattresses, even when it's time to replace them. Comments suggest the primary reason mattresses get passed

down to children is that parents rationalize indulging themselves in a new mattress by passing their old one along to the children.

The oversize bed seems to satisfy deep-seated personal needs for companionship, indulgence and added comfort. Negative comments reveal that the terms "king" and "queen" size suggest an opulence with which many individuals cannot personally identify.

Naked Look for Shoes

By GAY PAULEY
NEW YORK — Now it's the peekaboo shoe.

Designers give the naked look to the foot with see-through vinyls in the whole

range of women's footwear from low-heeled pumps to high rising boots.

Cutouts for shoes were bound to follow the rest of fashion, with some of the new fall and winter dressup clothes slashed to deep U's at the back, with strapless tops, and armholes cut so deep and wide the view from the side is the startler.

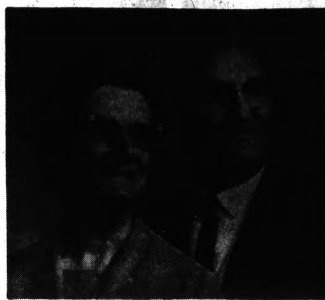

NO FAD

Don't think the see-through shoes are a fad, either. Herbert and Beth Levine, a New York husband-wife design team which has pioneered many new shoe fashions, scoff at such a suggestion. The Levines call the vinyls the most comfortable shoes around, and when made fashionably with leather trim, "they have a basic elegance which eliminates all jazz overtones."

The vinyls are almost invisibly perforated, and the Levines show them as low-heeled pumps, moccasins, spectators, and some made fashionably with leather trim. There's even a copy of the Texas boot in clear vinyl with the traditional stacked heels, stitched across and leather pipings.

Designer David Evans used vinyl to make a dressy slipper that has a free-floating, two-piece look. A jeweled "collar" circling the leg just below the ankle bone is anchored at mid-vamp and at the open heel with thin vinyl straps.

Couples Celebrate Golden Weddings

The Henry B. Mehlbergs of Andersonville Road, Waterford Township, will celebrate their anniversary at an open house given by their children from 2 to 5 p.m. at Waterford Community Church on Sunday. Mr. and Mrs. Mehlberg were married Aug. 22, 1916. They have three children, Robert J. Mehlberg, Mrs. Fred L. Tuck and David H. Mehlberg. The couple has nine grandchildren.

Mr. and Mrs. Arthur L. Giestler, Orchard Lake Road, West Bloomfield Township, who were married on Aug. 24, 1916 will celebrate their golden wedding anniversary at an open house given by their children, Sunday from 3 to 7 p.m. at the home of a daughter, Mrs. Neal L. Hargrave of Orchard Lake Road, Commerce Township. The Giestlers' other children are Mrs. Joseph E. Comer and Floyd A. Giestler. They have 10 grandchildren and two great-grandchildren.

To Sears for
an eye exam
and then
to school!

Style conscious girls really like the complete selection of fashion eyewear at Sears. Naturally, Janie's glasses were a priority item in her new school wardrobe — both to Janie and her parents. Janie wanted to look her very best — and her wish came true when she saw the countless frames she could choose from. Her parents — well, they want Janie to do well in school, and they knew Sears glasses would assure greater classroom participation. Bring your youngster in — for better schoolwork and more fun throughout the school year!

Man's Cologne Is An Old Idea

Leading researchers in men's toiletries, point out that one of man's early "colognes" was developed in the days of ancient Greece. A solution of water and oregano

— the Greeks pronounce it "ree-gin-ee" — was set at each place following dinner. The scented water in much the same way that modern men use his cologne.

NEW STYLES ARE HERE

HACK'S BACK-TO-SCHOOL-SHOES!

Shop early for the most complete selection of patterns in your size.

FOR GIRLS

Black smooth leather with white harness stitching; also black nylon velvet. Beige, navy and the traditional saddle as well as combinations.

FOR BOYS

Black, brown, cordovan color and pigskin. Some with scuff toes and others in dressier patterns.

And even Pre-Schoolers will need new shoes — to keep up with their growing feet.

HACK SHOE COMPANY

Why Grow Old?

JOSEPHINE LOWMAN

Q. I have read your column in the paper and followed your advice. I have lost 10 pounds and firmed up. However, I still have two problems; my abdomen and a double chin. If I could reduce those, I would look fine. I am not overweight any more so these won't go down because of losing more weight. Please take this problem into consideration.

A. Do slimming exercises for these two spots. Here is an exercise for the double chin. Lower your head backward. Open your mouth. Keep your mouth open as you try to bring your lower lip up over your upper lip. At the same time, push your chin toward the ceiling. Return

head to natural position. Continue, slowly for 10 times.

Do this one for the tummy. Stand tall with your feet separated and your arms raised overhead. Bend at the waist and try to touch your fingers to your toes. If you can't do this, go as far over as you can.

Raise the trunk and bend backward as far as you can with your arms still overhead. Continue bending forward, then raising the trunk, and bending backward. Feel the pull on the backward bend? That is important.

Q. In a recent column you said what an older woman could do for being flat chested. I am 15 years old and am quite flat. Should I visit a doctor? I would be very thankful for your advice.

A. I guess that you are speaking of my answer to a woman who asked about plastic surgery for enlarging the bust. You are too young to consider such a thing. You still have time to develop some more. Also the decision to have this operation should be a very mature one. Give nature more time!

Q. I have a problem. All the kids I hang around with have nice figures — and then there is me. My figure isn't so bad, but my left bust is larger than my right bust. Kids are getting married younger and younger these days and wouldn't my husband be surprised if I got married? Please advise me.

A. The most important advice I can give you is to forget about getting married for a long time. It is true that there are more and more younger marriages today than before. However, most of the young folks who marry at your age regret it.

You may have a terrific crush on someone, but you are not old enough to know with whom you would like to spend the rest of your life. A young man your age doesn't either, and neither is he in a position to assume the responsibilities of marriage.

Enjoy your girlhood and young womanhood. There is plenty of time to get married. Take your bust measurement increasing exercises using the arm or hand only on the small side.

If any of my readers would like to have my exercises which will increase the bust measurement, send a stamped self-addressed envelope with your request for them. Address Josephine Lowman in care of The Pontiac Press.

Coils Decline

Furniture cushions used to have coil springs inside them. Today, the cushions are made from latex foam. Now, the foam is catching on for mattresses, and nearly two million foam mattresses will be sold in 1966. Latex foam is used for upper bracket models and for super-size mattresses while plastic urethane foam mattresses are popular for budget price units.

Creamed Dish Has Subtle Curry Flavor

By JANET ODELL
Pontiac Press Food Editor

Quick casserole recipes are always welcome to any busy homemaker. Mrs. T. O. Williams sent us an interesting one some time ago.

Her recipe calls for a cup of diced luncheon meat. There is no reason why you can't use a cup of diced leftover roast if that is what you have on hand.

JEFFY INDIA CURRY RICE

By Mrs. T. O. Williams

1 can condensed cream of chicken soup
3 stalks celery, diced
1 medium onion, sliced
1 cup frozen carrots and peas
1/2 cup milk

2 tablespoons flour
3 teaspoons curry powder
1 cup diced luncheon meat
Salt and pepper to taste

In saucepan melt one tablespoon butter or margarine. Sauté diced celery and onions until lightly browned. Add soup and meat.

Stir milk into flour, salt and pepper and curry powder mixed. Add smooth mixture to mixture in saucepan. Add one-half teaspoon sugar.

Stir over medium heat until all is smooth and slightly thickened. Add frozen peas and carrots and let heat thoroughly.

Serve over rice. Garnish with parsley. Makes four servings.

The Edgar G. Swifts of Cranlane Drive, Independence Township, announce the engagement of their daughter, Gloria Anne, a Western Michigan University sophomore, to Candidate C. James Morocco of Fort Leonard Wood, Mo. His parents are the Sidre Morrocos, Whims Lane, Avon Township.

Rebecca Burris Exchanges Vows

Rebecca J. Burris, the daughter of Mr. and Mrs. George E. Burris of Tienken Road, Avon Township, became the bride of Raymond A. Hansen in the Gethsemane Lutheran Church.

The bride's gown was fashioned of white Chantilly lace tiers over satin. Her silk illusion veil fell from a pearl and crystal headpiece. Orchids centered a bouquet of white carnations.

Ronan J. Pace served as maid of honor with bridesmaids Linda Rudatis and Janice Lembach of Troy.

Best man was John Peaterston with Darwin and Harel Hansen. Ushers were Ted Burris and Ted Pace.

A reception at Stemmer's Hall in Rochester followed the rite.

Sooth Skin

To relieve summertime chafed skin, keep it scrupulously clean. Wash the affected areas gently with soap and water, dry thoroughly with a clean towel, then sprinkle with soothing powder.

Checks Are 'In'

Check in with a snappy bouquet of checks. Suit costumes team traditional navy and white or black-and-white with citrus yellow in a boutonniere or weskit. Dresses of checks show snap and crackle.

Long or Short Hair— You Can Have Both

By JEAN SPRAIN WILSON
AP Fashion Writer

NEW YORK (AP) — Why don't the fashion trendsetters make up their minds? Is hair to be very short? Or very, very long?

There is no reason why anyone should be arbitrary about this when, if you are young enough, it can look great both ways, especially since it is possible to go to all lengths with hairdos, and sometimes all in the same day.

Supplemental hairpieces do the trick.

They are a part of the tidal wave which after beginning as a ripple five years ago has continued to surge without any hint of subsiding. These have special appeal to the portion of the female population — i.e. the young with silken crowns of glory — who have no desire to cover them fully.

The long-haired versions have a small triangular base with combs which fit into the top of the short head of hair. Lots of hair, what amounts to three ordinary wigs of it, cascade to the shoulders and sometimes to the middle of the back, little-girl style.

CRISS-CROSS BANDS

A part of the hair can be wound around the head to form criss-cross bands at the point where the hair piece is attached. Or, by back teasing

it can be worked into the rooted hair. In any event the result is the profusion of hair naturally possessed by few people, save jet setter Baby Jane Holzer.

When California designer Galanos introduced his spring collection, recently, hair stylist Michel Kazan added glamorous new lengths to the models in elegant party garb. Made of real hair, these are comparatively expensive.

Blonde locks cost more because the natural hairs are unbleached. Red heads are second most costly. Brunettes can match their hair the most cheaply.

However, man who has learned to produce almost anything in a test tube, has learned to lick the high cost of fake hair, even in long, generous bunches.

Today dinal hairpieces are as luxuriantly glossy as the real thing, and come in any combination of color strands that nature or hair dye companies can produce.

BEST WIGS

Of course, the real thing in wigs is best if you can afford it. But swinging teenagers who can't are very happily satisfied with beguiling fake locks at not even half the price of the others.

Take a dip in the Fountain of Youth

Fluffy clouds against a sapphire-blue sky... tiny rosebuds opening into beautiful blossoms... a crystal-clear pond reflecting delicately scented flowers... your skin radiating the loveliness provided by 2nd Debut. Only 2nd Debut creates such loveliness... softer glowing skin that is all yours... not an illusion... 2nd Debut contains an element called C-E-F 600 (C-E-F 1200 for double potency). When spread over the skin's surface... C-E-F-Cellular Expansion Factor... penetrates deeply into the outer skin layers to the cells below... as it penetrates, C-E-F carries with it molecules of pure water that expand to plump up and fill in facial lines on the surface to make them less visible. Get 2nd Debut, regular or double potency at your drug or department store today.

Pioneer 7 in Excellent Solar Orbit

PASADENA, Calif. (UPI) — The United States' Pioneer 7 satellite, carrying instruments to check on the perils of interplanetary travel, zipped along on a near-perfect orbit around the sun today.

The gleaming 140-pound solar satellite carried six experiments to monitor deadly solar radiation, measure a wind-like stream of charged solar gases and map magnetic forces in deep space.

Pioneer was launched yesterday atop a Delta rocket from Cape Kennedy. It was expected to take 404 days to circle the sun on an orbital path ranging from 92 million to 162 million miles in distance from the sun.

A spokesman for the Ames Research Center at Moffett Field, Calif., said the final crucial orientation maneuver will occur Friday when Pioneer's antenna is aligned with earth.

Tracking reports from the deep space network at Jet Propulsion Laboratory here showed the flying physics lab was on a course that will take it between the orbital paths of earth and Mars as planned.

It joined Pioneer 6, the first in the new series launched last December, which is now about two-thirds of the way around the sun on an "in" orbit — closer to the sun on the Venus side of earth.

★ ★ ★
Data from the pioneer spacecraft "are absolutely essential in understanding the interplanetary medium — this sea through which man must travel in his quest for knowledge concerning outer space," said project scientist John W. Wolfe.

AP Wirephoto

RED-CARPET ROLE — The guided missile frigate USS Northampton is pushed into berth at Portsmouth, N.H., yesterday, where she will be made ready to accommodate

President Johnson on a weekend trip to New England. The White House announced yesterday that he will spend one day aboard the vessel.

Trip to Northeast

LBJ Likely to Do Some 'Nonpoliticking'

WASHINGTON (AP) — President Johnson's quickie sortie into the Northeast this weekend is billed as nonpolitical, but he is expected to do what he can to promote several freshman Democratic House members to the status of sophomores.

★ ★ ★

The trip also could have impact on governorship and senatorial contests.

The whirlwind journey beginning tomorrow will take the President into New York state, Rhode Island, Vermont, New Hampshire and Maine.

He and Prime Minister Lester Pearson of Canada will meet Sunday to discuss international questions.

Among these, Pearson told a news conference yesterday in Ottawa, presumably will be Viet Nam.

DETAILS SKETCHY

"I suspect that the subject might come up," the prime minister said, adding that details of the meeting are incomplete.

The scene of this meeting will be Roosevelt Campobello International Park on Campobello Island, New Brunswick, Canada.

The park was established by the United States and Canada in honor of Franklin D. Roosevelt, who had a summer home there.

★ ★ ★

Johnson and Pearson will lay the cornerstone of a visitors' pavilion.

Signs Indicate That Air Strike Near End

WASHINGTON (AP) — There were growing signs — and enthusiastic predictions — today that striking machinists will vote approval Friday of a new contract offer and end their walkout against five airlines. On the positive side were:

— Reports from President P.L. (Roy) Siemiller and other top officials of the AFL-CIO International Association of Machinists that reaction to the contract proposal is very favorable. Siemiller predicted the 35,400 striking union members would accept it.

—AFL-CIO President George Meany's urging to the machinists that they accept the contract offer. Meany telegraphed the presidents of the 13 biggest machinists locals Wednesday and said the proposal is a "wonderful settlement."

— Reports from union local presidents in Kansas City, Washington, Miami and New York that acceptance was reasonably assured.

END DAY

The strike against United, National, Northwest, Eastern

and Trans World airlines is in ers back to work for up to 180
its 42nd day. days.

The machinists rejected a previous management offer last month by a 3-to-1 margin, after most of their local presidents urged them to vote it down.

The new contract offer, agreed to by negotiators Monday, calls for pay hikes totaling 56 cents an hour over three years for top mechanics now earning \$10.40 an hour, plus cost of living escalators.

Congress had been poised for final action on historic legislation aimed at forcing the strike.

Strike effects continued severe. In Europe, an estimated 1,000 stranded American tourists were reported to be jamming airports from Greece to Ireland longing for a way home.

One tourist appealed to President Johnson to make a U.S. Air Force transport plane available. The OIA said it suffered three standbys of up to 48 hours that most airports reported necessary before they could board a flight bound for home.

Congress had been poised for final action on historic legislation aimed at forcing the strikers to return to work by 11:00 a.m. today. But the strike continued through Sunday, and by 11:00 a.m. today, most airports reported hours that most airports reported necessary before they could board a flight bound for home.

HOT DOG!—This 6-year-old, one of 5,000 orphans and underprivileged persons treated to a picnic in Chicago's Lincoln Park yesterday, shows just how generous she can be.

Here she lets Rodney the Pony sample her hot dog. Chicago area businessmen picked up the tab.

Lin Stands Next to Mao; More Proof He's No. 2

HONG KONG (UPI) — Communist Chinese Defense Minister Lin Piao appeared side-by-side with Party Chairman Mao Tse-tung at a mass rally in Peking today, providing further evidence the Red army chief is now the No. 2 man in Peking hierarchy.

In the clearest indication of Lin's new prominence in top leadership of Communist nation, Peking Radio listed the 59-year-old defense minister second to Mao in its broadcast report of the nation's leaders attending the rally.

The Chinese attach great importance to such listings which usually indicate the order of precedence in the power hierarchy.

Today was the second time in less than a week that Lin had been named in Chinese broadcasts in a way that inferred he had become the second most powerful man in Red China.

Last Saturday the Communist party's ruling central committee issued a communique in which Lin was the only Chinese official mentioned by name aside from Mao.

NEWS DISPATCH

The official Yugoslav news agency Tanjug, in a Monday dispatch accepted at face value by many Western observers, said Lin emerged from the committee meeting with two key party posts — those of first deputy chairman of the central committee and chairman of the committee's military commission.

Frank Kelley Universities Plague Belittles Story Argentine Regime

Plans to Dump Him at Confab Reported

BUENOS AIRES, Argentina (AP) — The military regime of President Juan Carlos Onganía

is still looking for a way to "relieve its first big headache" — the three-week university crisis. One big problem: replacing several hundred professors who resigned following government takeover of the nine state universities July 28.

The universities, closed for a cooling-off period, were to reopen last Tuesday but only three did. The government said the others would open Monday. Onganía, encountering the first large scale defiance since he took over the country following the June 28 military coup, appears firmly set on reshaping the universities, which, he charges, are Communist-infiltrated.

'WON'T CHANGE PLANS'

A government spokesman said, "The resignations or any other pressure will not change the government's plans." Onganía has said a new university system will be set up and has promised to respect the autonomy of the institutions. But government officials say the government is expected to retain a voice in policy matters.

New professors, and others asked to stay on, will be carefully screened to keep out any with Communist leanings, a spokesman added. Some 1,500 professors announced their intention to resign day night. Earlier this summer, she was runner-up in the Cherry Festival in Traverse City.

'Mural in Boston Not JFK Death'

WASHINGTON (AP) — Sen. Edward M. Kennedy says a mural in Boston's federal office building is not intended to depict the assassination of President John F. Kennedy, as some have interpreted.

"I am personally satisfied that the painting is not meant to represent any specific event," the Massachusetts Democrat said. "I respect the artist's freedom to decide on the approach he wishes to use in his work."

Kennedy received a telegram from Stephen E. Weil of the Marlborough-Gerson Gallery, New York, which Weil said was intended to correct "an unfortunate misunderstanding in the press" concerning the \$25,000 mural. The gallery represents artist Robert Motherwell, who did the painting on a government commission.

Queen of Pine

ATLANTA (AP) — Linda K. Christa, 18, of Alpena was chosen Queen of the Pine at the Atlanta 4-H Fair Wednesday night. Earlier this summer, she was runner-up in the Cherry Festival in Traverse City.

Nugents' Duplex to Be Ready

AUSTIN, Tex. (AP)—The duplex rented to Pat and Luci Nugent will be furnished, cleaned and ready for occupancy when they arrive in Austin to take up housekeeping.

The brick apartment has been the scene of activity all week. Furniture has been moved in, the lawn mowed and spruced up, and the inside has been cleaned.

The Nugents were married Aug. 6. President Johnson's daughter is scheduled to take part in the wedding here Saturday of an old friend, Kathleen

Carter, daughter of Clifton C. Carter, who recently resigned as executive director of the Democratic National Committee.

Neighbors said the furniture and a number of boxes were moved in Monday, delivered by two pickup trucks, identified as belonging to Texas Broadcasting Co., which operates the Johnson family interests' radio and television station, KTBC.

Workmen turned on the gas and electricity.

'Road' Found off East Coast

By Science Service
RICHMOND, Va. — An underwater "road" has been discovered off the coast of Florida, Georgia and South Carolina. A relatively flat underwater terrace extending to depths of 3,000 feet has been found covered by a pavement of manganese oxide.

The Aluminaut, the world's deepest diving submarine, discovered the highway along a 150-mile by 100-mile area off the southern coast of the United States.

"The Gulf Stream currents evidently keep the pavement swept clean of sediment so that it resembles a black-top road."

"We attached wheels to the Aluminaut and it actually rode along the deposits as though it was on a country road," reported Arthur L. Markel, vice president and general manager of Reynolds Submarine Services Corp., operators of the sub.

Dr. Wayne G. Brandstadt Says:

Motion Sickness Affects Many on Flight

Most long-distance travel is now done by air.

In many persons this results in motion sickness which may vary from a slight loss of appetite to vomiting and retching when there is a high degree of turbulence.

Motion sickness is less frequent on night flights than on day flights and is less frequent on large jet-propelled planes than on small or propeller-driven planes.

Pills to prevent motion sickness can be prescribed by your doctor and persons who are highly susceptible should take one just before boarding the plane.

Although motion sickness is not "all in your mind," as

some hungry souls insist, it does help if you busy yourself reading or watching the movie.

Even eating the meal served airtight will often help.

SOURCE OF TROUBLE
Another source of trouble is the change in air pressure.

When you are traveling at 35,000 feet, your cabin is pressurized to simulate an altitude of 5,000 to 8,000 feet.

Such an altitude is enough, however, to cause the air in your middle ear, nasal sinuses and digestive tract to expand.

The pressure within your ears and sinuses will equalize with the outside pressure unless the passages are obstructed — usually by an inflammatory swelling.

BEST WAY
Inhalation of a nasal decongestant, such as oxymetazoline (Afrin), is the best way to get relief from pain in the sinuses.

For obstruction of the eustachian tube leading to your middle ear, yawning or chewing gum should help.

On the descent, gentle blowing with your mouth and nose closed will often equalize the pressure.

CAN ENDURE
It is said that anyone who is able to walk aboard a plane can endure the flight.

I would make an exception of a woman in the last month of pregnancy.

If you have a leaky heart or are recovering from a coronary attack, you should not travel by plane unless oxygen is available.

This is standard equipment on all large commercial planes. If you have had an abdominal operation, it is well to postpone your flight until 10 days after the surgery.

As for safety in general, there is less loss of life per mile of travel by plane than in any other form of transportation.

Lightning may strike your plane repeatedly without doing the slightest bit of harm.

Since, if anything goes wrong, your pilot will alert you, you should relax. No news is good news.

Disease Kills 20

SEOUL, South Korea (AP) — Twenty persons have died this month of a disease suspected to be encephalitis, the Korean Health Ministry announced today. The ministry said 124 cases have been reported. The symptoms were similar to those of the sleeping sickness.

Pickles and Relishes Made at Home Are Unsurpassed

By JANET ODELL,
Pontiac Press Food Editor

When you buy your next gallon of vinegar, you're going to be pleasantly surprised. One company, at least, is packaging its vinegar in plastic containers.

White vinegar is used when light color is desirable. Cider vinegar has a mellow taste, but may darken fruits or vegetables.

The new USDA bulletin on pickles and relishes (No. 92) says not to dilute vinegar unless the recipe so specifies. Added sugar will give a less sour product.

This bulletin is available from the Oakland County Agriculture Extension Office, 155 North Saginaw.

There's lots of good winter eating to be found in the following recipes.

CORN RELISH

16-20 ears young, tender corn
1 1/2 cups chopped onions (4 medium)
1 cup chopped green pepper (2 medium)
1 cup chopped sweet red pepper (2 medium)
1 cup chopped celery

2 1/2 cups distilled white vinegar
2 cups water
1 1/2 cups granulated sugar
1 1/2 tablespoons mustard seed
1 teaspoon celery seed
1/2 teaspoon turmeric

Peel husks and silks, from corn; trim blemishes. Boil corn 5 minutes, then quickly dip in cold water.

Cut kernels from cobs; measure 2 1/2 quarts cut corn. Combine corn with onions and remaining ingredients in large kettle; simmer, uncovered, 20 minutes.

Pack into clean, hot jars; leave a head space as jar manufacturer directs; make sure vinegar solution covers vegetables. Adjust covers; process in boiling water bath 15 minutes. Makes 6 to 7 pints.

DILL PICKLES

4 pounds 4-inch pickling cucumbers
4 tablespoons salt
2 1/2 cups distilled white vinegar
3 cups water
1 cup dill seed
28 peppercorns

Wash cucumbers thoroughly; cut in half lengthwise. Combine salt, vinegar and water; heat to boiling.

Pack cucumbers into clean, hot jars. Add 2 tablespoons dill seed and 4 peppercorns to each jar. Fill with boiling pickling syrup to within 1/2-inch from top of jar.

Immediately adjust covers as jar manufacturer directs. Process in boiling water bath 10 minutes. Makes 6-7 pints.

GOLDEN ONION RELISH

1/2 cup sugar
1/2 cup light corn syrup
1/4 cup white vinegar
1/2 teaspoon salt
1/2 teaspoon pepper
1/2 teaspoon turmeric
1/2 teaspoon celery seed
1/2 teaspoon dry mustard
2 cups finely chopped onion

Mix together the sugar, corn syrup, vinegar, salt, pepper, turmeric, celery seed, and mustard in small saucepan. Cook over medium heat, stirring constantly, until mixture comes to boil and sugar is dissolved.

Simmer 2 minutes. Stir in onion. Bring to boil; cover and simmer until onion is tender but still crisp, about 5 minutes.

Store in covered container in refrigerator. Makes 1 pint.

To store out of refrigerator: Spoon boiling hot relish to within 1/2-inch of the top of 2 steril-

ized 16-pint fruit jars. Put domes on lids of jars; screw jars there is more than will fill there's just enough relish to fill them, boil down a little of the jars as directed.

CORN RELISH

DILL PICKLES

GOLDEN ONION RELISH

Sauce for Dish Has a Surprise

Actually this macaroni, cottage cheese and tomato sauce with cheese entree can be served any day of the year. It has so much appetite appeal it will be requested often.

The two important flavor agents are the surprising combination of crunchy peanut butter and tomato sauce with cheese. Mix with macaroni and cottage cheese.

Friday Casserole
2 cups cooked shell macaroni
1/4 cup chopped onion
1/4 cup chopped green pepper

1 tablespoon pure vegetable oil
2 tablespoons crunchy-style peanut butter
1 (8-oz.) can tomato sauce with cheese
1 pint cottage cheese, creamed large curd

Cook onion and green pepper in pure vegetable oil until onion is transparent. Stir in peanut butter and tomato sauce with cheese. Mix with macaroni and cottage cheese.

Pour into 1 1/2 quart casserole and bake at 350 degrees 25 minutes.

Convenient Mixes Make Delicious Rich Dessert

Chocolate has been a favorite flavor since the first Spaniards tasted it as a beverage in the court of the great Aztec chief Montezuma. The Indians called this drink xocoatl or chocolate and made it from cacao beans, flavored with vanilla, sweetened with honey, and served icy cold.

In today's world we are able to find this flavor in many convenience foods such as the new chocolate fudge whipped dessert mix. This new flavor has a rich fudge taste and whips up quickly with the addition of milk and water.

It is ready to serve as a cup dessert after chilling for about an hour in the refrigerator.

For glamorous rich tasting chocolate desserts you might choose to serve Mocha Pot de Creme. In this recipe the chocolate fudge flavor of whipped dessert mix is complemented by the addition of instant coffee and blended with cooked chocolate pudding.

If you don't have the traditional pot de creme, use coffee cups or plain custard cups.

Mocha Pot de Creme
1 package (4 oz.) chocolate pudding and pie filling
2 tablespoons sugar
1 tablespoon instant quality coffee
1 1/2 cups milk
1 egg, slightly beaten
1 package chocolate fudge whipped dessert mix

1/2 cup cold milk
1/2 cup cold water
Combine pudding mix, sugar, instant coffee, and 1 1/4 cups milk in saucepan. Cook and stir over low heat until mixture comes to a full boil. Remove from heat.

Pour a little of hot mixture into egg, stirring quickly to blend. Add to mixture in saucepan. Return to heat and stir 1 minute. Cover surface of pudding with wax paper. Chill at least 2 hours.

Prepare dessert mix with the cold milk and cold water according to package directions. Thoroughly beat chilled pudding mixture until smooth.

Blend prepared whipped dessert into pudding. Pour into pot de creme, custard cups or coffee cups. Chill 2 hours or more. Makes about 7 servings.

MOCHA POT DE CREME — Chocolate has been a favorite flavor in beverages and desserts for centuries. In today's busy world we are able to enjoy this flavor in many convenience packaged foods, such as the new chocolate fudge whipped dessert mix. In Mocha Pot de Creme, the flavor of chocolate fudge whipped dessert mix is complemented by the addition of instant coffee for a doubly delicious dessert.

When making jelly, four layers of cheesecloth will do just as well for straining the juice as a jelly bag.

Salines make a crisp accompaniment for chile con carne and are handy to serve when French bread isn't on hand.

Layer Ice Cream, Preserves Top With Cookie Crumbs

How many people do you know that don't like dessert? If you know any at all, you can probably count them on the fingers of one hand. A good dessert appeals to the eye as well as leaving a lingering memory of a delicious flavor.

Ice cream and all its frozen relatives are among the most popular desserts that come to American tables. Tortoni Squares features ice cream in an easy-to-make dessert that is fairly reminiscent of Biscuit Tortoni.

Because the dessert must reside in the freezer until serving, it can be made long before serving time. This make-ahead feature is always welcome no matter whether the dessert is served for family or friends.

Tortoni Squares are good tasting and because they are made with a nutritious dairy product, good for you, too. Plan to treat all the dessert fans at your house to Tortoni Squares soon.

Tortoni Squares
1/2 cup chopped toasted almonds
3 tablespoons melted butter
1 cup fine vanilla wafer crumbs
1 teaspoon almond extract
3 pints vanilla ice cream, softened
1 12-ounce jar apricot or peach preserves
Whipped cream, optional

Combine almonds, butter, crumbs and extract; mix well. Save 1/4 cup of crumb mixture for top. Sprinkle half of the re-

Two Fruits Add Special Taste to Cool Drinks

Peaches and plums can be used in lots of ways, both solo and in combination. Each is cool and refreshing for out-of-hand eating or mixed into salads, desserts and breakfast fare.

For an extra special treat during these hot, sultry days, concoct a tangy peach punch or a delicious cranberry-plum shake.

For a tall Summer Peach Cooler, put into each glass 1/4 cup slightly sweetened crushed fresh peaches, 1/4 cup orange juice, and 1/4 cup white Port wine.

Add a scoop of vanilla ice cream. Fill to the top with sparkling water. Really cool, really good!

To prepare a sipping-sweet Cranberry-Plum Shake for 4, place in an electric blender or mixing bowl, 1 pint cranberry juice cocktail, 2 whole eggs, 1 cup fresh plum pieces (skins and pits removed), and 6 ice cubes, (omit ice cubes in mixing bowl). Beat well until frothy. Pour into glasses and serve immediately.

Salt, Vinegar Are Answer

To keep fruit that you are canning from darkening, drop apples, peaches, apricots and pears into salt-vinegar water as they are pared. Add two tablespoons each of salt and vinegar to one gallon of cool water.

Do not leave fruit longer than 20 minutes in this water, and rinse before using.

Fill With Sherbet

Scoop raspberry sherbet into packaged or homemade baked party shells. Top with fresh raspberries and sliced natural almonds for a cool dessert beauty.

BIRD'S-EYE VIEW—A sparrow perches atop a rear-view mirror on a parked car in Seattle, possibly so he can get a look at his feathered attires, or maybe he just thought

it was a good place to rest while making his round for crumbs dropped by patrons of the drive-in where the car was parked.

Ore Site Seen as Ski Resort

Project Undertaken in Ironwood Vicinity

IRONWOOD (UPI) — The planners and the leaders in this rugged northern Michigan country don't give up easily.

Until about five years ago, the ore mines of the Gogebic Range around Ironwood produced five million tons of high-grade ore annually and made the industrial city of 10,000 a mining and trading hub.

Then, with the rapid closing of the deep iron ore operations, Gogebic County political and civic leaders, challenged by the economic decline began laying plans for a joint developmental and private drive to reactivate the community.

The tough mountainous area showed potential for development of a flourishing winter resort industry, so community leaders threw their efforts into getting federal assistance to develop the only "ski flying" hill in North America.

Community leaders and members of the Gogebic Range Ski Club proposed to the Area Redevelopment Administration in Washington to build the Copper Peak Ski Flying Hill suitable for competitive ski jumping.

SKI FLYING

As recognized by the Federation Internationale de Ski, competitive jumping includes jumps up to 90 feet. It is called ski flying on all sanctioned jumps of 90 to 120 feet.

Backers contend a minimum of \$2 million will be spent directly in the area annually as a result of the project.

The project was to be located seven miles north of U.S. 2 in Ironwood Township. It is contiguous to the Ottawa National Forest and the Black River Parkway area, a scenic spot adjacent to Lake Superior.

Cervical Cancer Best Detected in Doctor's Office

By SCIENCE SERVICE
LONDON — The do-it-yourself method of taking cervical cancer tests and mailing material to doctors and laboratories is not as accurate as going to the physician's office for personal examination, the British Medical Journal reports.

Use of the Davis cytopipette for self-administered tests has been extensive in Denmark and in the United States, three Manchester, England, pathologists point out, but its advantage lies mainly in screening programs where expert gynecological examination facilities are not widely available.

When more than 900 women were tested with both the Davis pipette and a conventional smear test, the pipette successfully diagnosed only half as many malignant cells as did the smear test, half as many atypical cells and only 40 per cent of the trichomonads. While the smear test revealed only 228 normal results, the pipette "passed" 862.

George M. Cohan was credited with writing more than 500 songs and musical numbers and 31 plays. He died in New York City in 1942.

"Only The Beginning" Of Demery's Future Expansion Plans

Monday in Farmington Twp.

New Demery's Store to Open

FARMINGTON TOWNSHIP — Demery's will be cutting a ribbon instead of a cake on its 55th anniversary next Monday.

The occasion will be the opening of the firm's third department store, located at 12 Mile and Farmington in the Kendallwood Shopping Center.

Demery's board chairman, John W. Butler, has invited township and city officials to participate in the brief ceremony, scheduled for 9:30 a.m.

The first Demery store was opened in 1911 at Woodward and Milwaukee in Detroit. Fifty

years later, April of 1961, the firm opened its second store at Woodward and Hamilton in Birmingham.

Commenting on Demery's future expansion plans, Butler indicated that the Farmington Township store is "only the beginning."

"The success of our Birmingham branch has proven our ability to expand with an expanding Detroit," he said.

The new store is constructed

on two levels with a centrally located escalator stair well.

The exterior features panels of white aggregate surfacing contrasted with gold panels accented with aluminum tubing.

Each department has its own decorative motif.

The building was designed by Clifford N. Wright Associates of Birmingham.

Brandon Lists Sign-Up Times

BRANDON TOWNSHIP — All students who have not registered for the coming school year should do so at the school offices, open each weekday from 7:30 to 11:30 a.m. and 12:30 to 3:30 p.m.

School will open on Sept. 6. Students in grades 1, 3, 5, 7, 8 and 9 will report at 8:30 a.m. Those in grades 2, 4, 6, 10, 12 and special education classes should report to school at 12:30 p.m.

Regular classes will start Sept. 7.

Buses will run last year's elementary route morning and afternoon. High school students should be at the regular elementary bus stops.

Lake Louise subdivision students, 7th through 12th grades, will board buses at the Belle Ann School.

Morning session kindergarten will report Sept. 7. The afternoon kindergarten group will start at 1 p.m. Sept. 6. Regular kindergarten classes will begin Sept. 9.

Parkgoers Set Record for July

Combined attendance for the four major parks in the Huron-Clinton Metropolitan Authority totaled 1,403,400 persons in July, establishing a new record for the month.

Kensington Metropolitan Park near Milford had 454,300 visitors, compared to 433,900 in July 1965.

The July record for the 4,300-acre park was established in 1958 when attendance topped 480,000.

Metropolitan Beach near Mount Clemens had 397,400 visitors last month, down slightly from the 407,000 total counted in July 1965.

The record for the beach, which covers 550 acres, was set in 1964 when the total for the month reached 455,000.

NEWEST PARK — Stony Creek Metropolitan Park near Rochester, the newest park in the five-county system, continued its rapid rise in popularity with a July record of 280,200 visitors.

Previous July attendance figures were 237,900 last year and 237,000 in July 1964, when the park opened.

Lower Huron Metropolitan Park near Belleville took a sharp drop from a year ago, hosting 281,500 visitors last month, compared to 282,000 in July 1965.

The July record for the 1,000-acre park is 348,000, set in 1961.

The shortest list admitted to probate consisted of only three words: "All for Mother."

No Diversion for '67 Wheat

Farmers in Program Can Receive Loans

Wheat farmers were reminded today that no diversion program will be in effect for the 1967 wheat crop.

Wheat program participants will be able to qualify for domestic marketing certificates and price-support loans, however, according to Alfred Haack, chairman of the Oakland County Agricultural Stabilization and Conservation Committee.

It is particularly important for farmers with small wheat allotments to remember that diversion payments are no longer available, Haack said.

"Many of these farmers have been diverting all or part of their wheat allotment acres for payment in recent years," Haack said. "However, no income can be derived from the wheat program in 1967 unless the crop is planted."

Haack said growers participating in the 1967 wheat program will again be guaranteed full parity on the part of their crop which is allocated for domestic food use.

DIFFERENCE

The domestic marketing certificates will be valued at the difference between full parity as of July 1, 1967, and the \$1.25 loan value announced for the 1967 crop.

The certificate value for the 1966 crop is \$1.22 per bushel. The regular price-support loan will be available on all the wheat produced on a participating farm, Haack said.

The increased national wheat allotment acreage for the 1967 crop is expected to increase wheat-producer income by \$75-\$100 million because of increased marketings in 1967.

Complete details of the 1967 program are yet to be announced. Signup will be held sometime in early 1967, according to Haack.

2 Special Services Planned at Church

WEST BLOOMFIELD TOWNSHIP — Two special services will be held this weekend at the Union Lake Nazarene Church, 2269 Keith.

Rev. J. L. Harris of the Church of the Nazarene in Richfield will be the guest speaker at 7:30 p.m. Friday.

Rev. William Kelvington, newly appointed missionary to Japan, will be the guest speaker at 7 p.m. Sunday.

Visitors are welcome to attend.

Killer Suspect Bound Over After Exam

MOUNT CLEMENS — A 21-year-old Bruce Township man was bound over to Macomb County Circuit Court yesterday in connection with the slaying of Mrs. John Riemann of 7008 Van Dyke, Romeo.

Johnnie Prince, of 319 Chandler, is charged with first degree murder in the death of his former employer, who was stabbed in her home on Aug. 4.

Her body was discovered by her husband in the basement of their home a few hours after the killing.

Prince appeared before Mount Clemens Justice of the Peace Edmund Schmidt, who heard nearly three days of testimony in the case.

No date was set for arraignment.

Prince was arrested at his home the day of the killing. In his possession were a radio and some money which police say were taken from the Riemann home.

Chicory has not been grown in the United States in large amounts since 1954. Much of it is now imported from Belgium.

Complex Gets Zoning Okay

AVON TOWNSHIP — the township zoning board last night gave its approval to a request that two parcels of land totaling nearly 400 acres be rezoned to allow for construction of part of a 960-acre residential-commercial complex.

The zoning board's actions are not final since the rezoning petitions must be sent to the Oakland County Coordinating, Zoning and Planning Committee for approval and then to the township board for final endorsement.

The Northgates Realty Company had requested the change from general farm use to single family residential for a 272-acre section and from farm to freeway service district for a 16.5 acre section.

The board on Sept. 21 will consider three other parcels involved in the complex. All are presently zoned for general farm use.

The three sections are of 84, 28 and 15 acres and would be changed to allow, for town houses, a shopping center and an office complex.

The total cost of the proposed

complex is estimated by the realty company to be near \$100 million.

Work on construction of the project will be delayed, said a spokesman for the company, because part of the acreage is in Pontiac Township.

He said no action has yet been taken by Pontiac Township on their rezoning petitions.

The Avon Township portion of the proposed complex is located south of the Oakland University campus, east of the Pontiac Township-Avon Township border and west of Adams Road.

All of the acreage is south of M-59 except for those sections designated for residential use.

Automobile dealers spent nearly \$75 million for advertising last year.

Herman Boggs: He Beat The Odds

Survives Heart Operation

Medical Miracle, Will to Live Save Man

WASHINGTON TOWNSHIP — Thanks to a combination of a determined will to live and a modern medical miracle, a 37-year-old Washington Township man is on his way to a state of health which doctors three years ago thought he'd never see.

Herman Boggs of 6730 West St. said his problem started in the spring of 1962 when he began feeling progressively more tired early in his workday as a construction laborer.

Doctors at the time examined him and found that he had a slowly closing heart valve. Tests revealed that the condition was serious and that an operation to correct it would offer only one chance in 100 of success.

Experts at the University of Michigan Medical Center in early 1963 gave him a maximum of five years to live.

Tests continued through 1965. He was kept on a strict diet, given medication, limited to a minimum of exercise and kept under close medical surveillance.

HEART ATTACK

In January of this year Boggs suffered his first heart attack. An operation was still judged too risky, however, and the program of medication and surveillance continued.

The decision to operate finally came in April when

doctors said he might not live through the summer without one.

The risk was still high — one chance in four that he would live through it.

A 14-hour operation was performed on May 12 at the U. of M. Medical Center with 20 doctors in attendance.

MACHINE AID

A heart-lung machine was used to keep Boggs alive while a plastic valve was inserted into his heart.

A heavy layer of scar tissue and calcium had been building up around a valve that had apparently been damaged by rheumatic fever when he was a youngster.

Boggs said he had never

Homecoming Set at Seymour Lake

BRANDON TOWNSHIP — The annual Seymour Lake Homecoming will be held Saturday in the Methodist Church on Sashabaw Road.

A dinner sponsored by the Women's Society of Christian Service will be served at noon. A program featuring organ and vocal numbers and an account of a resident family's recent missionary trip to Mexico will begin at 2 p.m.

known that he had the disease.

About two weeks after the first operation, Boggs suffered a second attack. His heart jumped into an erratic beat that was snapped back to normal in an operation that applied a 50,000-volt jolt of electricity.

HOPE DIMMED

Boggs' wife, Francis, said, "We thought sure we had lost him after that second attack."

No trouble has been encountered since the second operation.

Boggs returned to his home in early June. He was well enough to attend the graduation ceremonies of his oldest son, Jim, from Romeo High School on June 16.

"I feel like I could return to work tomorrow but at the same time I realize that I have limitations," said Boggs.

AMAZING PROGRESS

Doctors say they are amazed at his progress and speculate that he can start back to work within a year, although not at his former construction job.

Since he has not worked for the past four years, the family has been supported largely on the earnings of Mrs. Boggs, who works as a dietary aide at Almont Community Hospital.

The Boggs' have two other sons, Douglas, 17, and Kerry, 11; and a daughter Vickie, 6.

Dieting Is Strictly For People

Don't ever try to put this human practice across with horses.

If your Wife leans over the dinner table and says: "You eat like a horse," she is trying to get a message through to you.

The 1,250 thoroughbred horses stabled at the Detroit Race Course eat extremely well. It is a safe bet their "grocery" bill will top yours.

Many fans are extremely curious about the daily menu of the Thoroughbreds they bet on. I think you will find what it takes to satisfy a horse's appetite both interesting and surprising.

The average horse eats between six and 10 quarts of oats and consumes approximately 50 pounds of hay or grass daily. This is topped off by vitamins, minerals and other feeds.

With an appetite like that, do you wonder what a horse weighs?

The average Thoroughbred weighs between 1,000 and 1,200 pounds. He attains his maximum growth when five years old.

A Thoroughbred's size is measured in "hands," rather than inches and feet as is the case with humans. A "hand" is equal to four inches. The average horse stands between 15 and 16 hands, which means he is between five feet and five feet, four inches tall.

I think the more interesting bits you know about Thoroughbred Racing, the more fascinating you will find the Sport.

During our 84-day meeting, which continues through November 5, our every effort is directed toward providing the highest caliber of racing in a setting with the maximum in beauty, comfort and convenience for you.

We have a new \$3,000,000 clubhouse, which ranks among the Sport Showplaces of the Nation. Included in it are two excellent Dining Terraces, where you can obtain the finest in food and beverages.

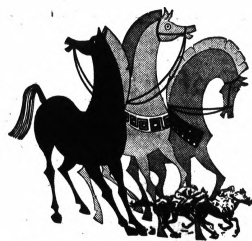

An addition this season is Ye Old Third Horse Pub, an authentic English Pub, where you can enjoy a snack or a refreshing drink. There is never a Cover or a minimum charge.

There are three Easy-In entrances to the track. They are on Schoolcraft, Middlebelt and Inkster Roads. We have close-in parking for 12,000 cars.

The Fabulous Twin Double is part of our daily racing program.

Top racing and fine facilities are the combination we offer for your pleasure. I invite you to visit us soon.

China Trying to Wipe Out Past, Visiting Swedish Teen Finds

EDITOR'S NOTE—Per Kronvall, 19, student and budding Swedish journalist, has just spent a month in Communist China with a Swedish education of mission and in the following story, written for the Associated Press, he reports some of his observations.

By PER KRONVALL

Written for the Associated Press

Changes are taking place in China. Popular Peking operas are being replaced by spectacles in which actors and actresses read from the works of Mao Tse-tung and urge the Chinese people to hate "American imperialism."

It is all part of China's cultural

revolution, with the motto: "Learn from the peasants, workers and soldiers."

The campaign is aimed at wiping out the past and crushing desire to own land and other property.

Things that were accepted before are now condemned. For example, leading author Ku Mo-jo was forced to make a public statement saying he was deeply ashamed of everything he had written. He said everybody should regard his works as rubbish.

AUDIENCE BOOS

In Peking I saw a film produced a few years ago. The story relates how a Communist

military leader convinces a besieged nationalist leader that communism is the correct line.

The closing scene showed a handshake between the two military leaders. The audience boomed because Mao Tse-tung has said:

"Once he is a capitalist he cannot become a good Communist."

The picture later was banned. Those who are under severe attack are mainly teachers and other intellectuals. Many of them, I was told, have been under newspaper attacks since last fall. But things fared up in the spring when students in the Peking University started demonstrations against some teachers and schoolmates.

DENONCE AS TRAITORS

The demonstrators denounced the teachers and students as traitors and enemies of the spring. Most foreign students,

including Russians, North Koreans and North Vietnamese, were asked to leave the university. Peking University refused to give these students report cards.

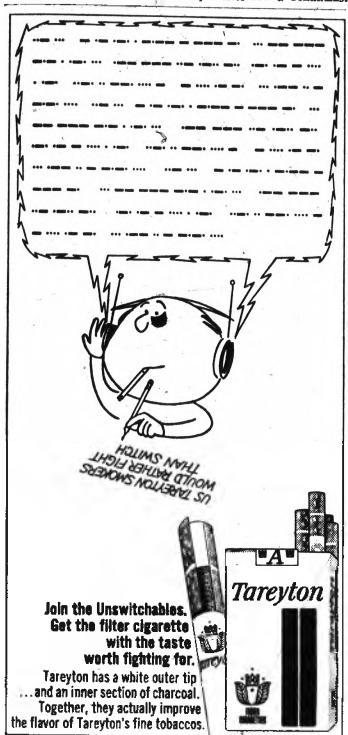

DRASTIC CHANGES
For the average Chinese the cultural revolution has resulted in drastic changes. In factories production has slowed down because workers have to attend political meetings usually last-

ing several hours. During these meetings, the workers study the works of Mao Tse-tung and sometimes carry out self-criticism.

Each meeting usually is attended by 15 to 20 workers. They often criticize a fellow worker for not spending his private time properly or not studying the works of Mao Tse-tung thoroughly. The workers can defend himself but this is not very proudly. "We studied Mao Tse-tung's works carefully."

Students in Communist China used to have a six-week vacation in the summer and they spent two weeks working in a farm or a factory. The vacation this year was canceled so that the students could attend political meetings from 8 a.m. to 10 p.m. daily.

This so-called cultural revolution appeared to me to be an inner political struggle between the military and political circles.

Join the Unswitchables. Get the filter cigarette with the taste worth fighting for. Tareyton has a white outer tip... and an inner section of charcoal. Together, they actually improve the flavor of Tareyton's fine tobaccos.

Junior Editors Quiz on BOATS

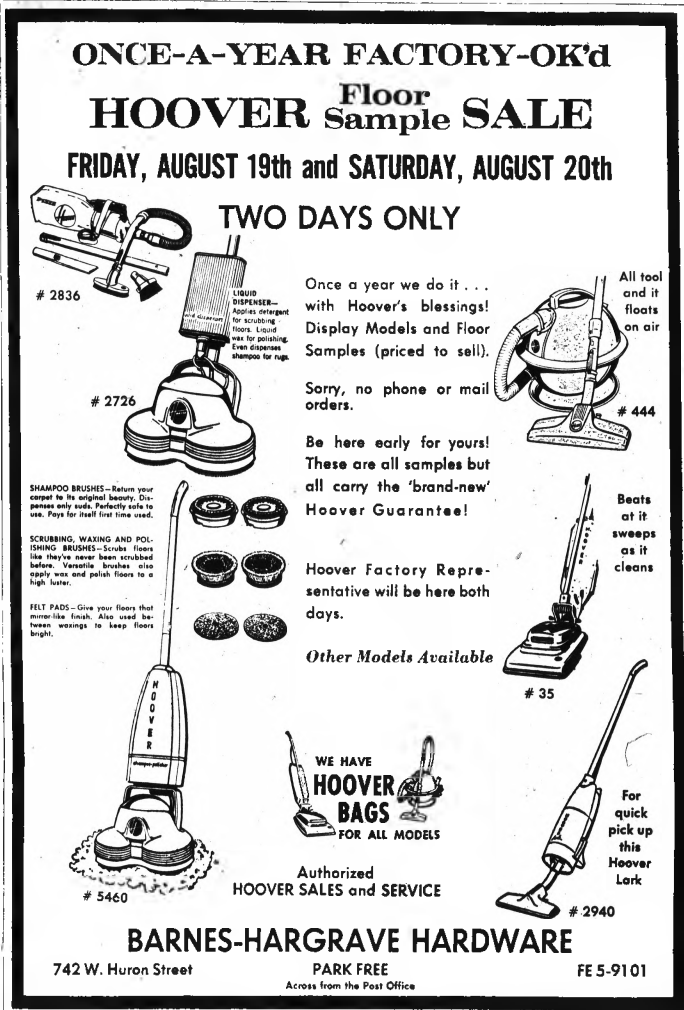

QUESTION: How are modern boats built?

ANSWER: Most modern boats are strikingly different in construction from the earlier ones. In older style boats (1), curving wooden ribs were attached to strong keel, stem and transom pieces; long planks were then added outside the ribs. Such boats were heavy and strong, but likely to leak. Nowadays, many small boats are built with wide waterproof plywood sheets (2) instead of planks. These are much lighter and are less liable to leak. Many firms now mould an entire hull out of plywood (3) and fit the other parts in later. The most striking modern development is shown in (4): the wide use of boat hulls made of reinforced plastic, which cannot deteriorate or leak from normal causes. Various ways of using plastic are employed; in the one we show (4) a core, or plug, of the boat's shape is put down and a sheet of glass fiber cloth laid over it, which is then impregnated with polyester resin plastic. This dries strong as steel. When a heavy enough shell is built up, it is lifted off the plug and finished into a boat. Boat after boat can be made from the same plug.

FOR YOU TO DO: Look over the boats in a boatyard to see how many are made of plastic.

County Residents Refresh in 'Soda Pop Generation'

(Special to the Press)
NEW YORK — Oakland County residents are going for bubbly beverages — the nonalcoholic kind — in a big way, a survey shows.

They are also spending more than ever before for these thirst quenchers.

The findings are based upon reports issued by the Department of Commerce and the soft drink industry. They show the relative rate of consumption throughout the country, state by state.

According to the latest figures, soft drinks are being consumed in the local area at the annual rate of 154 eight-ounce bottles for every man, woman and child.

That's a lot of soda pop. For the local population as a whole, soft drink consumption amounted to 121,552,000 eight-ounce bottles in the past year.

BOTTLES GROW
This compares with a total of 79,960,000 bottles in 1960, when a similar survey was made.

The rise in the five-year period was 52 per cent. It was a bigger gain than in most parts of the United States (47 per cent) or in the East North Central States (44 per cent).

As would be expected, the warm weather months — June, July and August — are the biggest ones for soda pop.

In these three months, people in the United States consume between one-third and one-half of the annual total.

This year, especially, with the hottest weather in a long time, the bottling plants are going full tilt. They have been unable, in some instances, to keep up with the demand.

HIGH LEVELS
Sales of ice cream and beer are also at a record level, the reports show.

Geography seems to have a great deal to do with what kind of carbonated drinks are most wanted. The preferences for particular flavors vary greatly from area to area.

In the Southern states, for example, 70 per cent of all beverages sold are cola drinks. In the East, on the other hand, they account for only 40 per cent of the total.

Ginger ale is a big favorite in the Northeastern part of the country. People there use three times as much of it as those in the Pacific states.

DOLLAR FIGURES
The extent of the soft drink business in Oakland County is revealed by the dollar figures. They show that county residents spent \$11,912,000 for soda pop last year, as against \$7,100,000 in 1960.

MILK LINE IN VIET NAM — South Vietnamese women and children squeeze together in line outside a small shop in downtown Saigon, waiting to buy canned condensed milk, a scarce item in the country. When the supplies do arrive, the women and children line up for hours to make a purchase.

Helen Hayes Puts Theater Ahead of Retirement Plans

By BOB THOMAS

AP Movie-Television Writer
HOLLYWOOD — "I thought perhaps that the theater had changed and I was passe. How nice it is to find it's still there."

Helen Hayes was explaining why at age 64 she has put aside thoughts of retirement to sign on for a year with the APA Repertory Company. She has been appearing in two plays, "School for Scandal" and "Right You Are" at the Huntington Hartford Theater and will add a Walt Whitman adaptation as she travels to Ann Arbor, Mich., Toronto and back to the company's home base in New York.

Why, after 60 years of triumphs in the theater, would Miss Hayes take on such an exacting assignment?

Her main reason is altruistic to help the APA, "which offers the best hope for the success of repertory in America."

PERSONAL REWARDS
The experience has already reaped personal rewards for her. She admitted a sense of defeatism about the American theater and her place in it.

"The whole concept of the new theater is something I could neither understand nor enjoy," she remarked at her rented Beverly Hills home. "It reflects the spirit that pervades everything today — education, art, music. Permissiveness is the key to everything."

NEW WAY
"I began to feel that I was out of step with the process of aging and so unable to adjust to new ways. So I decided I had better try the new system myself. In doing so I managed to muck up a number of performances."

The vehicle was "The Glass Menagerie," which Miss Hayes had performed to acclaim in London and New York. When she was engaged for a State Department tour of Europe in the play, the director was a member of the new self-expression school.

so we could start all over again and figure out what we were doing and why."

The experience helped push Miss Hayes toward her long-cherished notion of retiring. Her inclination was supported by visits to Alfred Lunt and Lynn Fontanne and to Katharine Cornell.

"Lynn was sewing and Alfred was raising his vegetables and cooking. The talk about returning to the theater, but I don't think they ever will. They are happy as clams. So is Katharine. She had spent the whole winter at Martha's Vineyard and had taken a course in English literature at the local high school. I don't think she'll ever step on a stage again."

Miss Hayes harbored such thoughts until she was approached by APA after returning from a government-sponsored tour of the Orient.

"How glad I am to discover there are still dedicated actors schooled in the classic tradition," she enthused. "It restores my faith."

It's Dog's Life That's at Stake

NEW YORK (AP) — The city says Pete the collie has been one more bite than the law allows and must die as a vicious dog.

William Jones, 17, the dog's owner, insists Pete is not vicious, merely playful.

And he has many friends who agree with him. With Jones, they have hired an attorney and gone to court to try to save Pete's life.

They haven't won yet, but they haven't lost either.

A State Supreme Court judge in Queens granted Pete a few extra days of life on Tuesday.

ISSUED ORDER

He issued an order, returnable after three days, to the American Society for the Prevention of Cruelty to Animals (ASPCA) to show why it should not be stopped from destroying the dog.

The ASPCA and the Health Department's Bureau of Preventive Medicine, say they have received three complaints during Pete's two-year lifetime from persons who claim Pete had bitten them.

The law, according to the ASPCA, states that the three bites are the limit, and after those have been used up, a dog is automatically categorized as vicious and must be destroyed.

But Jones, a sanitation worker from East Elmhurst, Queens, says he never was shown any proof of the bites and neighborhood children who used to walk Pete say he never showed any signs of viciousness.

SHOWING AFFECTION

He would clamp his mouth around somebody's arm or hand but wouldn't bite because it was just his way of showing affection, they say.

The story of Pete's predicament spread through Queens after it was publicized by the Long Island Press and the Long Island Star Journal.

Pete's supporters now look more like an army. They've been picketing the courthouse, carrying placards reading, "Please Don't Let Pete Die... Save Pete."

Kalamazoo County Workers in Accord
KALAMAZOO (UPI) — County road workers reached tentative agreement yesterday on a new contract, and set a ratification vote for tomorrow.
The workers, members of the Federal, State, County and Municipal Employees Union and employed by the Kalamazoo County Road Commission, reportedly had voted to strike, but no negotiations deadline had been set.
Negotiations on the new contract have continued since January when the old contract expired.

Beatles Scurry to Boston; Back Antiwar Stand

TORONTO (AP) — The Beatles fly to Boston today after giving two performances in Toronto — and some comments on war.

George Harrison led the comments this time, saying "people have a right not to go in the army. We all just don't agree with war for any reason whatsoever."

Britain's mop-haired quartet made their comments to newsmen in response to a question about Americans reportedly taking refuge in Canada to escape the U.S. draft.
The quartet gave two performances to less-than-capacity crowds at Toronto's Maple Leaf Gardens. But the audience was enthusiastic — 167 teen-age girls were given first aid and 15 were sent to hospitals.

Half-Mill Park Levy Faces County Voters

Oakland County voters will decide Nov. 8 whether to accept a proposed half-mill levy over 10 years to finance an extensive park program calling for 45 to 50 recreation centers county-wide.

The millage proposal was authorized as an election issue yesterday by the County Board of Supervisors.

The election for park millage was solidly supported by the full board despite strong opposition of some supervisors.

David Levinson, chairman of the powerful ways and means committee of the board of supervisors, led the attack.

"I think it would be irresponsible to put the millage proposal to the voters when no complete study on the park situation is available to the public," Levinson said.

\$15 MILLION
He estimated, with increasing county valuation, that \$15 million would be raised over 10 years by the county's half-mill tax levy.

This amount would be matched by the state. Federal funds would match the combined county-state amount for a total of \$60 million, Levinson said.

The Oakland County Parks and Recreation Commission, which is spearheading the drive for park development, estimated a lower total cost.

Based on the county's current valuation of nearly \$2.7 billion, the commission discounts valuation increase and projects an annual local tax income of \$1.35 million or \$13.5 million over 10 years.

It estimates a total cost of about \$40 million because the state's 25 per cent matching share and the 50 per cent match-

ing federal funds are not applicable to every phase of the park development program.

OUTLINES NEED

Daniel T. Murphy, chairman of the County Board of Auditors and a parks and recreation commission member, made a presentation of the need for park development to the full board.

He cited the crowded conditions of present parks in the county and pointed out that a heavy increase in the county's population is projected.

Murphy said also that several organizations have expressed interest in helping in the campaign to develop parks.

Also objecting to the millage proposal was Mrs. Elizabeth W. Mitchell, supervisor from Lathrup Village, who suggested a smaller millage rate for a longer period of time.

Mrs. Mitchell argued that future residents of the county should help pay for a county-wide park network. She proposed a 10-year financing period.

AMENDMENT DIES

Edward Coey, supervisor from White Lake Township, then advocated amending the proposal to a quarter-mill for 10 years but the amendment was voted down.

Among the strong proponents of the millage issue was John Carey, supervisor from Springfield Township.

Carey cited the rising cost of land and said that people should have an opportunity now to decide on the park program.

Clarence A. Durbin, Supervisor from Southfield, noted that with the county's present 800,000 population and \$2.7 million

valuation, each resident would be taxed only \$1.70 per year if the issue passes.

*** * ***

Kenneth Van Natta, director of parks and recreation and lands and grounds for the county, said that printed information on the parks proposal will be available to the public long before the election.

NO FUNDS

Van Natta pointed out that the county has allowed no funds for the campaign to win public support of the parks issue and added that he would approach various charitable foundations and industry seeking contributions.

**Siamese Twins
Both Dead From
Lung Ailment**

BYRN MAWR, Pa. (AP) — Siamese twin girls born Sunday died today apparently from respiratory difficulties, Bryn Mawr Hospital announced.

The hospital said no attempt was made to separate the babies, joined at the chest and abdomen, since they died simultaneously.

*** * ***

The hospital said tests were performed Wednesday to study the possibility of separating them. Then "toward late evening," said a hospital spokesman, "a respiratory difficulty was noted. Respiratory failure occurred at 12:25 a.m."

*** * ***

The hospital said an autopsy would be performed. The parents are Mr. and Mrs. Richard Kross, Brookline, Pa. They have two other children, aged 3 and 1.

HONORED — Anthony Spehar (right), of 920 Hazel, Birmingham, a Pontiac Motor Division electrician, receives the General Motors Lifesaving Award from Kenneth S. Hedges, GM safety director. Spehar is credited with saving the life of John W. Carter, a Pontiac electrician trainee, who had become grounded by 440 volts of electricity.

Lifesaver Honored With Award by GM

For putting to safety a fellow Pontiac Motor Division employee who was grounded by 440 volts of electricity, Anthony Spehar, of 920 Hazel, Birmingham, saving the life of John W. Carter, while at the employ of General Motors same time exposing himself to Corp. has to offer: the GM Life-extreme danger saving Award.

After accepting the GM award from Kenneth S. Hedges, GM safety director, Spehar was also presented a specially engraved wristwatch from John Z. DeLoe, a GM vice president and general manager of the division.

Witnessing the ceremonies was the Spehar family, including his wife, Frances, and their son, David, and his wife, Carter and his wife, Jane, also attended.

The incident occurred when Carter's shirt, freeing Carter and avoiding grounding himself by touching Carter's body.

In accepting the award Spehar said, "I just did what anyone else would have done."

Spehar is the ninth Pontiac employee to have received the GM award.

Gowdy's car crashed head-on into an auto in which Mrs. Taylor was a passenger.

The crash occurred, according to Pontiac police, when Gowdy crossed the center line on South Saginaw near Osburn.

Normal dialing time requires eight to fourteen seconds," according to Charles B. Woodhead, Pontiac manager for the Bell Telephone Co.

The additional monthly charge for Touch-Tone service is \$1.50 a line for residential customers and \$2 a line for business customers.

A one-time installation charge of \$5 is made for each type of service.

The new instruments are available in desk or wall models with no extra charge for color.

The Touch-Tone service is being gradually introduced because major equipment modifications, including additional installations in central offices, are necessary.

"A new dial tone somewhat lower in pitch than the former signal was put in service Aug. 3 in the 682 exchange to prepare for the push-button phone introduction," said Woodhead.

Open to Public

ANN ARBOR (AP) — The University of Michigan announced today that its radio astronomy observatory, which explores the universe with its 11-story-high, 250-foot antenna, will be open to the public Sunday hours 9 to 4:30 p.m.

AIR-COOLED—Eight-year-old boys can find novel ways of accomplishing two ends with the same means. Young Paul Ross, son of Mr. and Mrs. Wilfred L. Ross of 6310 Greer, West Bloomfield Township, demonstrates how to stay cool and read a book at the same time.

County OKs Lease Plan With Board of Education

An agreement to lease 20 acres of service center land to Oakland Schools in exchange for the present school system headquarters facility was approved yesterday by the Oakland County Board of Supervisors.

The 99-year lease proposal, already informally approved by the county board of education, will receive final consideration by the board Aug. 23.

A token \$1 annual lease fee was specified for the 28 acres on the northwest corner of Pontiac Lake Road and Telegraph which has been appraised at \$300,000.

The existing school system building on county land in the service center contains 32,000 square-feet and was appraised at \$400,000.

Construction of the new school facility on the leased land is expected to begin early next year with completion of the 80,000-square-foot building scheduled by Jan. 1, 1969.

PRESENT FACILITY

The county will take over the present school facility when the new building is completed.

Daniel T. Murphy, chairman of the County Board of Auditors, said that this acquisition and the new east wing of the courthouse will allow the county to move out of its present auxiliary office building at 1 Lafayette.

The lease agreement won board approval despite strong objections of two supervisors.

Harry W. Horton of Royal Oak felt the appraised value of the existing building was excessive and said that more than one appraisal should have been taken.

ALTERATIONS

Charles B. Edwards of Madison Heights complained that

AID Workers for Viet Sought

More than 1,000 area people are being sought by the U.S. Agency for International Development (AID) for civilian posts in Viet Nam during the week-long recruiting effort to begin Monday in Detroit.

William A. Platt, AID public affairs chief, said that the basic aim of the AID mission in Viet Nam is to help people resist communist aggression by coping with agrarian discontent, lack of schools, lack of doctors and nurses, and low agricultural productivity through a self-help program.

Applicants should call the temporary recruitment headquarters in Room 714 in the Veterans Memorial Building, Detroit.

Out of town calls may be made collect, according to Platt. Existing buildings will require extensive alterations and that supervisors should know this cost before voting on the lease agreement.

Survey Shows City Worker Pay Lag

By L. GARY THORNE

Most Pontiac city employees are underpaid, compared to employees in municipalities of similar size and character, according to initial results of a survey being compiled by city administrators.

With one eye on Pontiac's tax limitations and another on the growing trend toward unionism of public employees, city officials don't know quite what to do about it.

The city's hard-pressed financial condition was clearly exhibited nearly two years ago by the ill-fated attempt to enact a city income tax.

Increased employee benefits, namely wage boosts, would have been granted had not voters soundly trounced the tax proposal at the polls.

Despite the defeat, city em-

ployee wages were hiked last summer at a total cost of nearly \$300,000.

ADDED REVENUE

The enriched pay checks were granted on the premise that the city would receive added reve-

due in 1966 from an increase in the tax base.

The City Hall crystal ball was right, although the jump in tax base fell some \$5 million short of projections.

Adopted on the basis of a survey by the Michigan Municipal League, the new pay schedules put Pontiac in a good position compared to wages elsewhere.

However, the city's edge has almost disappeared in the first half of 1966.

For example, the salary on some job classifications at one point registered number two in the state, but by July 1 this year had sunk to second to last among comparable cities.

Two employee groups, police and firemen, have already told City Hall they want more money.

Specifically, they seek longevity pay and an annual pay boost of \$1,276. The latter is a 20 per cent hike for the lowest ranks.

In preparation for negotiations with employee groups the city's new personnel director, Nicholas Santivan, has gathered salary data from neighboring municipalities.

CONFIRMS POSITION

The data confirms the underpaid position at least for police and firemen.

In some 15 cities, annual wages for firemen have climbed an average of 7.8 per cent (\$477) at the minimum level and 8.8 per cent (\$694) at the maximum.

The average pay for fire fighters ranges from \$6,629 to \$7,498. Pontiac pays \$6,064 to \$7,059. The maximum pay is attained after three years service.

*** * ***
During the same period, the average annual pay of policemen in the same 15 communities has jumped 8.8 per cent (\$537) at the minimum level and 10.2 per cent (\$706) at the maximum.

TO FOLLOW TREND
Meantime, Pontiac pays a beginning patrolman \$6,084 and a senior patrolman (after five years satisfactory service) \$7,228.

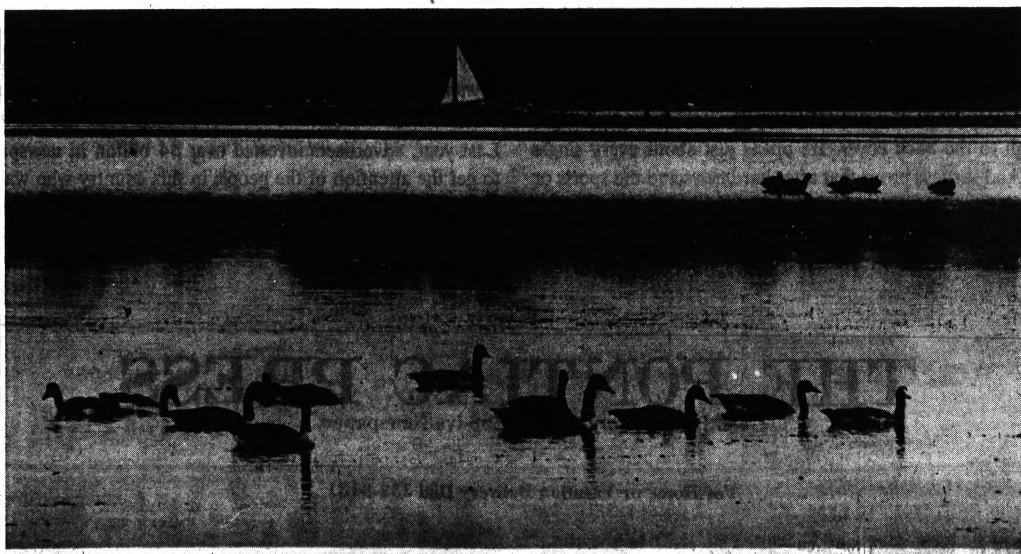

When all the statistics are compiled, city officials expect wages for other city employees to follow the trend set by police and fire salaries.

Thus, the City Hall crystal ball indicates local wages may have to climb by an amount similar to the boost provided last year.

*** * ***
This presents a financial problem with many alternatives that add up to more taxes. Of course, the alternative is always open to just say "no" to wage demands.

CROSS SECTION
City commissioners are expected to seek the advice of a cross section of the community before they give their answer.

*** * ***
Representatives of labor, business and other civic groups will be asked for comment.

A White Sail Fades Into The Dusk Of Summer; Canadian Geese Glide Peacefully On Orchard Lake — Autumn Is Near

Pontiac Press Photos by Bill Winter

I don't know. I don't want to know.

Don't tell me.

People who read the daily newspaper don't feel this way. In fact, the average reader spends more than half an hour with his paper every day. He starts from page one and reads right through to the back cover. He opens just about every single page. And surveys prove that after hard news and the sports or women's page, most people enjoy reading the ads best.

Why the curiosity? Because people believe that their daily newspaper is filled with things they ought to know—things that are important and immediate. Things that are the truth. Last year, advertisers invested over \$4 billion in newspapers to get the attention of the people in this country who want to know. That was a pretty good investment, wouldn't you say?

Commission Not Satisfied With Progress in Watts

LOS ANGELES (AP) — Significant progress has been made in correcting conditions which led to the south-central Los Angeles riots a year ago, but much remains to be done, says the McCone Commission.

"We are encouraged but far from satisfied," the commission said in its progress report Wednesday.

Following six days of rioting in the Watts area that left 34 dead a year ago, Gov. Edmund G. Brown appointed the commission with John A. McCone as its chairman to investigate and make recommendations.

Now, in a follow-up study of the predominantly Negro area, a chief disappointment was progress in education.

"NOT EFFECTIVE" — "Despite substantial aid from federal and state agencies, placement efforts to implement new programs have not been effective in meeting the unique educational needs of the un-

ally disadvantaged," the new report said.

The commission said its recommendation for a "massive onslaught on illiteracy" has not been fulfilled, recommended reduction in school class sizes has not been accomplished, and the Head Start program for preschoolers is inadequate.

The commission did find improved counseling and cafeteria facilities in schools.

Lack of progress in education, the commission said, could be

blamed on budgetary considerations at the federal, state and local levels. "The absence of greater achievement does not stem from any lack of agreement."

On the positive side, the commission found "impressive results have been achieved in the field of employment and training." Although stating that accurate figures are difficult to obtain, the report said it appears 10,000 residents of the area have found jobs.

Separately, McCone said the

greatest improvement he could see was in employment.

Also, the commission said, "it is encouraging to find new and promising initiatives by law enforcement agencies in their relations with members of the minority communities and in their efforts to recruit officers from these communities."

However, the status report noted that the police inspector general, recommended by the commission, has not received sufficient staff to investigate

civilian complaints outside the chain of command, and the police commission still meets only once a week.

The 49-page document also noted that "there has been no major disturbance this summer in the south-central area of Los Angeles. Nevertheless, tension has continued to be high."

Direct expenditures by state and local governments have been increasing an average of 8.9 per cent annually since the end of World War 2.

SCHOLAR DIES — Dr. Moses Hadas, world-famous classical scholar, died of an apparent heart attack in Aspen, Colo., yesterday. The 66-year-old professor taught Greek at Columbia University.

Encephalitis Spreads Across Dallas County

DALLAS (UPI) — Three Air Force planes will take off tomorrow in an assault on the Culex Mosquito, the carrier of encephalitis, a fatal disease that has spread across Dallas County in epidemic proportions. Three persons have died and at least 64 others have been stricken with the disease.

The planes, carrying a payload of deadly insecticide, were ordered into action yesterday when health officials said they were convinced the epidemic would get much worse if something wasn't done. As many as 88 cases of encephalitis have been suspected.

"People are pretty jumpy," said an official at Parkland Hospital. "It's like infantile paralysis was years ago. It has people concerned."

The last fatal victim of the disease was an 87-year-old man. Officials have declined to identify any of the victims or divulge any details of their deaths.

Officials said the disease was St. Louis encephalitis, which is not the type commonly called sleeping sickness although some of its symptoms are similar.

STRUCK AGAIN

The type first was recorded in 1933 during an outbreak in St. Louis, where it struck again in 1937. Other outbreaks of St. Louis encephalitis have occurred in Florida and Houston.

There is no drug to cure encephalitis, only treatment for the symptoms, some of which are similar to those of other disease. Early symptoms are headaches, extreme lethargy and twitching of muscles.

Thant to Tell His Decision in Two Weeks

UNITED NATIONS (UPI) — Although he has made his decision, Secretary General Thant will wait another two weeks before announcing whether he will seek reelection as chief executive of the United Nations.

All signs pointed to a decision to remain for an abbreviated period after his current five-year term expires Nov. 3.

A spokesman for Thant said yesterday the secretary general would reveal his plans either Sept. 1 or Sept. 2 after he returns from visits to Mexico and Chile.

A cross-section of key diplomats recently agreed that with no logical successor in sight, Thant will probably agree to remain in office for another two or three years to avoid a chaotic situation at the world organization.

In an unannounced visit yesterday to the U.N., Sen. Robert F. Kennedy, D-N.Y., met with Thant for 30 minutes.

DISCUSS PROSPECTS

Following the talks, Kennedy told newsmen he and the secretary general discussed developments in Southeast Asia and "the prospects of finding a peaceful solution" to the Viet Nam war.

Thant said he and Kennedy "exchanged views on the situation in Viet Nam and other international problems."

Both men called the talks "very useful" but gave no specifics.

Dolphin Rookie Earns Start

By the Associated Press
They said Frank Emanuel was tough and he's turned out to be too tough even for Walter McDaniel, a successful professional wrestler when he's not playing pro football.

Emanuel, the All-America linebacker from Tennessee who got a reported \$200,000 to sign with Miami's new American Football League team, has grappled with McDaniel, the former New York Jet, for the Dolphins' middle linebacker spot.

Wednesday, Miami Coach George Wilson said that Emanuel would start at middle linebacker in Saturday's exhibition game against the Jets at Jacksonville, Fla. McDaniel will move to the right side.

Emanuel, a 225-pounder from Newport News, Va., was kicked off Tennessee's football team two years ago for getting involved in an off-campus altercation. He was later cleared of the incident, and followed this by joining the Fellowship of Christian Athletes and making talks to youth groups.

The All-America climaxed an outstanding season in 1965 by being named Most Valuable Lineman after the Vols crushed Tulsa 27-6 in the Bluebonnet Bowl.

"Frank was the heartbeat of our defensive unit," said Doug Dickey, Tennessee's coach. "He was truly a dedicated football player. He worked hard and improved his play tremendously during the season."

The Dolphins outbid the Philadelphia Eagles of the National League for Emanuel's services. He was the Eagles' fourth draft choice.

While Emanuel was winning his battle for a regular berth in the Dolphins' camp at Boca Raton, Fla., Frank Buncom, another linebacker, returned to the training quarters of the San Diego Chargers in Escondido, Calif., and signed his 1966 contract.

Buncom and Ron Mix, an all-league tackle, left camp Monday following a salary dispute. Mix is still unsigned.

Meanwhile in the National League, the Washington Redskins traded defensive end John Palack to the Chicago Bears for

veteran defensive tackle Stan Jones and a future high draft choice. Green Bay and Atlanta also negotiated. The new Falcons acquired kicking specialist Larry Moore from the Packers for a future draft choice.

Heat Stroke Blamed for Prep Grider Dies

NEW ORLEANS, La. (AP) — An autopsy indicated that Robert W. Mocabacab, 16-year-old high school junior who died Wednesday after football practice, died of a heat stroke. Dr. Lloyd Locascio, assistant coroner, said the exact cause of death has not been established, but that the autopsy findings were compatible with heat stroke.

Seeded Players Enter Semifinals in Women's Play

ST. LOUIS 18 — The first and second seeded players in the Women's Singles Division of the National Public Parks Tennis Tourney advanced to the semifinal round with victories Wednesday.

Pat Cody of Los Angeles, the No. 1 seed, defeated Barbara Krueger of St. Louis, 6-0, 6-3. The No. 2 seed, Shirley Jones of Los Angeles, defeated Nancy Morrison of Pittsburgh, Pa., 6-2, 6-2.

In the men's singles, No. 1 seed John Powles of Flora, Ill., advanced to the quarter finals by defeating Leo Estopare of St. Louis, 6-1, 6-2. Jim Parker, the No. 2 seed, beat Bobby McKinley of St. Louis, 6-0, 6-0, to advance to the quarter final round.

Bob-Ken's 9 in Easy Tourney Win

Bob-Ken's Bar rolled up an early 8-0 lead and went on to a 9-4 victory over Waterford Midget Bar in the semifinals of the Class D Michigan Softball Association district tournament at the Drayton Plains Park last night.

The winners will now take on unbeaten Morion's Bar of Holly in the finals at 7 p.m. tomorrow. They'll play a doubleheader if Bob-Ken's takes the first game.

In a Class B game this evening, Lakeland Pharmacy of Waterford takes on Town & Country at 7:30 p.m. with the winner moving on to regional action.

Town & Country's Roger Reynolds pitched no-hitters against Lakeland in the first two games.

He won the first, 3-0, and errors led to his downfall in the second, 4-3.

Krause Wins PLCC Title

Jim Krause won his second Pine Lake Club championship this week with a 54-hole score of 232.

Runnerup for the second straight time was Clare Shepherd with 237 and defending champion Dick Griffith was third with 240.

The women's club tourney continues today and tomorrow with Kathy Shanahan regarded as the second with 2,897 and Britain third with 2,857.

Bob-Ken's pushed across three runs in the first inning and added five more in the third. Earl McKee belted a two-run home run in the third to spark the attack and the losers helped out by committing five errors. Dave Simmons paced the winners with a pair of hits.

Bob-Ken's Bar
Winner — Jimmie Hughes. Loser — Jim McDaniel.

Pace Shooters

LONDON (UPI) — United States marksmen took top honors at the third small arms competition for Central Treaty Organization Forces Wednesday, scoring 3,070 points. Iran was second with 2,897 and Britain third with 2,857.

"This whole problem of having different international organizations, recognizing different champions in some classes, will be thrashed out at the council meeting," said council President Luis Spota at Mexico.

"The WBA is not even recognized in California or New York. It is absurd that an organization which cannot even control all of its own country should try to control the whole world."

Spota is the champion of the argument advanced by boxing officials of other nations — that the WBA is a United States organization with little international backing, and should stick to the United States.

America is no longer the undisputed boxing capital of the world, they say.

Baltimore Rolls, 8-4

Orioles Thrive on Sneak Attack

By the Associated Press
Having had enough of winning with the more mundane weapons — hitting, pitching, homers, things like that — the Baltimore Orioles have come across a method that puts a little fun back in the game — the sneak attack.

Wednesday for the second night running, Baltimore scored five runs in the ninth inning, snatching the game away from the disbelieving Boston Red Sox.

By the time the blitz had ended, Baltimore had an 8-4 victory. Tuesday, the Birds came from behind with five in the ninth to win 6-4 and on Monday they tied it in the ninth and went on to win 4-2 in 11.

"I don't know who can stop them," moaned Boston Manager Billy Herman, "but I know we can't in the ninth inning."

LOOKS SAFE NOW
Baltimore Manager Hank Bauer, who is now beginning to admit that his team might just win the pennant at that, said:

"We've pulled out a lot of all planned, said, 'Too many things can happen in this game don't know exactly how many, to become over-confident, but it's a lot better feeling being where we are than chasing other clubs.'"

Don Mincher hit a two-run single in the eighth sparking a three-run Minnesota rally. The Angels had gone ahead in the top of the inning when Jay Johnstone tripled and scored on Zola Versalles' wide throw to the plate on a grounder by Jim Fregosi.

Bob Johnson squeezed Brooks home and Stu Miller (a relief pitcher yet) knocked in the last two with a single.

Elsewhere in the American for Cleveland and Dick Radatz struck out six men in two innings of relief. Rocky Colavito hit his 26th homer. Bill Skowron homered with two men on for Chicago in the opening game and Tom Agee and John Romano hit them out in the nightcap.

Mr. Shahan discovers pure Yellow

Vernon Shahan, owner,
Vernon Shahan Real Estate,
Jackson

Vernon Shahan, owner of the Shahan Real Estate Company, Jackson, writes: "We discovered that 30% of our telephone inquiries were coming directly from our Yellow Pages ad. The way we could tell was by listing a special phone number in our ad. Today, 30% of our prospects still come to us through the Yellow Pages. No wonder we increased our space in the Yellow Pages."

Call it finding pure yellow, solid gold, or whatever symbol you choose. The Yellow Pages again proves that it can increase your business. Mr.

Shahan's story is typical. It is a fact that 37% of all the people who looked for real estate and housing in Michigan during a 12-month period consulted their Yellow Pages before making a selection. 90% took action.* And it's similar with other businesses.

Make sure your Yellow Pages advertising tells these ready-to-buy prospects enough about you to make them your customers. Call 888-9999 today — Michigan Bell Telephone Company.

A FAIR SHAKE — Umpire Chris Pelekoudas is the first to greet San Francisco's Willie Mays after the Giants' slugger clouted his 535th home run to become the greatest right-handed hitter of all time. Willie's blow went over the right field fence at Candlestick Park in San Francisco. Catcher is St. Louis' Tim McCarver.

Win 4-1 Slow Pitch Tilt

Lougemen in Finals

Five-hit pitching by Tim Maloney will play a second game to lone carry Sport-O-Rama determine the champ. A victory Loungemen past a Pontiac Press for MGM will end the tourney.

Maloney checked the Pressmen on a triple, two doubles and two singles, and teammate Bob Amaguer stroked a three-run home run in the top of the fourth inning to give Maloney all the help he needed.

Amaguer picked up a single to go with his homer. Right fielder Dennis Snyder went three-for-three and center fielder Bill Manner came through with a pair of hits for the winners.

Tonight, the Sport-O-Rama squad takes on regular-season leader MGM-Shales at Candlestick Park at 7 p.m. If Sport-O-Rama wins the game, the

Koufax Ailing

Mays Belts Record Homer

By the Associated Press
Willie felt great; Sandy felt pain.

Mays' feeling came in the fourth inning Wednesday when he hit a home run that triggered San Francisco to a 4-3 victory over St. Louis.

Koufax' came in the second inning of Los Angeles' 5-1 loss to Cincinnati when he hurt his arthritic left elbow.

The home run was an historic one. It was the 535th of Mays' career and made him the second greatest home run hitter and the greatest right-handed homer hitter of all time.

The blast, on a 3-2 pitch from Ray Washburn, sailed over the right field fence at Candlestick Park and vaulted Mays ahead of Jimmy Fox on the all-time list.

RUTH RECORD NEXT

The Giant center fielder, who tied Fox's night before, now trails only Babe Ruth and his 714 homers. Ruth batted left-handed.

"I feel real great about it," Mays said afterward. "This is the first time anyone has achieved this in so short a time. The rest of those guys ahead of me, I've had only 15."

Koufax was seeking his 20th victory Wednesday night but instead wound up with a sore elbow. He hurt it in the second inning when he struck out the side but didn't leave until the fifth.

"It's nothing different from what has happened to him before," said Dr. Robert Kertan, Dodger team physician. "The elbow hurt him all season, but usually the pain is between pitching assignments."

"It's possible that Sandy will be able to warm up on the sidelines two days from now and then take his usual starting turn if the elbow is not swollen."

Koufax, whose next scheduled turn would be Sunday, received a cortisone injection in the elbow, then placed it in a bucket of ice — the usual ice treatment he gets after a game.

Fortunately for the Reds, they didn't get Koufax' usual treatment during a game. In other National League

games, New York edged Pittsburgh, cutting the Pirates' lead to one-half game over San Francisco; Chicago trimmed Philadelphia 5-3 in 10 innings; and Atlanta whipped Houston 6-1.

Bob Taylor accounted for the last four runs with the first pinch-hit grand slam homer in Mets' history.

Ron Hunt then won it for New York with a two-out, two-run single in the sixth.

Slow Pitch Softball Makes Successful Debut

The Pontiac recreation department's first slow pitch softball campaign will end tonight at Beaudette Park with the finals of the post-season tournament. MGM Cleaners-Shales Lounge plays Sport-O-Rama Lounge at 7 p.m. If MGM-Shales loses, a second game is set for 8:30 p.m.

For many seasons the men's softball program included three fast pitch leagues, but the lack of pitching and over-all calibre of play in the International League saw it grow smaller.

Meanwhile, previous attempts at organizing a Slow Pitch (sometimes called Blooperball) League died for lack of interest, partly because of the department's tough entry requirements. But the entry fee was lowered

and uniforms eliminated this spring and five teams were attracted into a league.

The same differs from fast pitch softball in that speed and defense replace pitching a kill. A 10th player is used.

Although high scoring games are common, the circuit had a slant recently in the playoffs; and lower scoring contests, because more frequent as the teams improved.

A distinct advantage in Slow Pitch is that playing talent is readily available. Church groups, school clubs, neighborhood schools and company teams are easily formed.

"The league is definitely going to grow," recreation supervisor Dick Cain reports. "I expect it at least to double next year."

Cain also anticipates a slight rise in the entry fee to cover operating costs which will include representation in state tournaments next summer.

In order to improve the loop's image, shirt-and-cap uniforms probably will be mandatory next season.

Michigan Netter Enters Semifinals

TAMPA, Fla. (AP)—Detroit's Mark Conti goes against Doug Verdick today in the semifinal match of the Jaycee International Tennis Championships' 18-and-under age division.

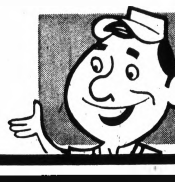

Top-seeded Tommy Leonard of California tussles with Gordon Traylor, Shevport, La., in the other semifinal.

Man Charged in Stabbing

Accused of stabbing a woman in an argument, a Pontiac man was arraigned yesterday in Municipal Court on a charge of felonious assault.

Cleve Bell, 36, of 231 Raeburn demanded examination on the charge at his appearance before Judge Cecil B. McCallum.

McCallum set the hearing for Aug. 22 and released Bell on \$500 bond.

Bell was apprehended by Pontiac police Tuesday afternoon after 35-year-old Mrs. Melvin Bell of 338 Howard McNeil, no relation to the defendant, said she had been cut on the right hand and left shoulder.

She was admitted to St. Joseph Mercy Hospital following the alleged assault and is reported in fair condition.

O'Brien Unit Plans Water Pollution Tour

LANSING (UPI) — State Sen. Carl W. O'Brien, D-Pontiac, said yesterday his Senate Conservation Committee would go on a statewide tour this fall to check on water pollution.

O'Brien said the committee would be mainly concerned about implementation of anti-water pollution laws passed during the recent legislative session.

"We will check municipalities which are polluting our lakes and streams and also the extent of pollution caused by industrial resources," said O'Brien.

O'Brien said he would again seek legislative support for placing on the ballot a plan to establish a 10-year, \$100-million bonding program to aid local communities in the fight against water pollution.

Highway Post

LANSING (AP) — Larry Suboski, highway department district engineer for the eastern half of the Upper Peninsula since 1961, was named Wednesday as supervisor of the surveillance unit in the department's new safety and surveillance section.

French Producers Retouch Their U.S. Western Films

By EARL WILSON

LONDON — The "western wave" that has hit Europe—making fortunes for such cowboy stars as Lex Barker on "ranchers" from Berlin to Belgrade—has produced tall tales about the shoot-em-up boys on this side of the Atlantic.

A French producer, filming an American script for a French audience, was making changes from English to French as he went along.

"Gimme a shot of redneck," a cowboy was supposed to yell to the bartender.

The French producer switched it to French. The cowboy barked to the bartender:

"Un Dubonnet, s'il vous plait."

For the London world premiere of "The Countess of Hong Kong" in December, Universal hopes to have Charles Chaplin, Sophia Loren and Marlon Brando together. Brando's always a question mark. But he's expected to attend, just to make sure Sophia Loren doesn't get all the attention.

When he was ill at the start of the film and thought he'd require an appendectomy, he was asked by a friend, "Is there anything I can do?"

"Yes," he said, "if I die, don't let Sophia steal my funeral by weeping over my casket."

Naturally Johnson, the playwright-scenarist-director, told Bob Goldstein his doctor had ordered him to quit smoking, drinking and going without sleep.

"Ah think," said the Dixie-talking Johnson, "Ah must be in the hands of a quack!"

THE MIDNIGHT EARL

Singer-actor-restaurantier Bernice Parks confirms that she and George N. Richard, wealthy widower of actress-producer Heien Menken, were married recently. They first met the night Miss Menken died, Mar. 27. Richard took Miss Menken, who had been ill, to Miss Parks' restaurant, Ruby Foo's, for dinner. Miss Parks came from her upstairs apt. to meet and greet them. They went on to the Lambs Club where Miss Menken collapsed and died.

Two weeks later, Miss Parks participated in a memorial to Miss Menken. A romance developed between Richard and Miss Parks whose husband, Dr. Lawrence Shefts, a San Antonio surgeon, had died 18 months before. They will honeymoon in Europe.

Maureen O'Sullivan—off to Indianapolis for "The Subject Was Roses"—says in September she'll enter her dr. Prudence, 19, in finishing school in Florence. "Yes, she's the dr. whose neck I intended to wound when she gave out the rumor I was married!" laughs Miss O.

REMEMBERED QUOTE: "We go through life saving and saving for the Senior Prom—and when it comes we're on time to dance."—Arnold Glaw.

EARL'S PEARLS: The worst thing about being on time is that everybody thinks you have nothing else to do.

Bob Orton reports that today's kids play a game called Zip Code. It's like Post Office, but faster. That's earl, brother.

TALE OF BITTERNESS — Former Cuban diplomat Dr. Leonel Alonso, who recently defected from his post as Cuban ambassador to Lebanon, tells at a news conference yesterday of the bitter enmity that he knew existed between Fidel Castro and Ernesto (Che) Guevara. Guevara was a top Castro revolutionary aide who disappeared in March 1965. Dr. Alonso's daughter, Mirisa, 5, is at left.

Envoy Tells of Discontent

Defector Says Castro Haunted by Fear

MIAMI (UPI) — A Cuban diplomat who defected from the Communist regime pictures Fidel Castro as a man who is haunted by fear and surrounded by discontent and conspiracy.

"Sooner or later these conspiracies will result in Castro's overthrow," said Dr. Leonel Alonso yesterday. Alonso left his post as ambassador to Lebanon last week and sought asylum in the U.S. Embassy.

The 34-year-old defector who brought his wife and 5-year-old daughter into exile with him, said Castro's fear and insecurity at home has led him to make Cuban embassies throughout the world centers of espionage and subversion.

"Fear has overtaken Castro and his position weakens internally. He increases subversion in every continent," Alonso said.

He described his embassy in Lebanon as a center of subversion in the Middle East and told how he had been required to meet with Communists and help finance their revolutionary activities.

"Numerous times I handed over thousands of dollars to couriers from the Lebanese Communist party to finance subversion," he said.

Alonso also served as Cuban envoy to Indonesia and Ghana before taking the post in Lebanon.

He said Castro embassies in Spain, Mexico, the Middle East and Africa were principal espionage centers, and he told of plans by the Cuban government to replace some 200 Cuban diplomats with trained agents next month.

In a related development, the newspaper Diario de las Americas reported that Castro's home Havana has been turned into a "bomb-proof" fortress, laced with secret tunnels and stocked with food and sleeping accommodations for a large number of people. The reports came from "newly arrived exiles," the newspaper said.

Alonso said the conspiracies against Castro are concentrated in the armed forces and that anti-Castro elements have "put a price on Fidel's head."

Police Seal Off Deaths in Pontiac Area

LONDON (AP) — Armed police sealed off London Airport today in the hunt for 30-year-old Harry Roberts, the third man sought in the killing of three Scotland Yard detectives.

Everyone of the thousands of passengers leaving the crowded airport was put under close police scrutiny after a tip that Roberts had been seen in airport departure lounges.

The tip came from an airport employee who once shared a room with the fugitive. Other British and European airports were alerted in case Roberts had slipped through the net.

Across London, hundreds more police combed the undergrowth of Epping Forest, a 6,000-acre playground bordering the eastern suburbs.

A woman who spent Sunday night with Roberts in a Bloomsbury hotel told police she traveled with him to a pub in the heart of the forest.

Teen Is Charged With Possession of Explosives

A 16-year-old Pontiac youth is in the custody of juvenile authorities after being arrested by Pontiac police early today on a charge of possessing explosives.

Found in the suspect's car, according to police, were quantities of saltpeter, sulphur, charcoal brick, and heavy paper tubing.

Police said it was not yet known whether a waiver would be asked to try the youth as an adult on the charge, a felony punishable by 25 years imprisonment.

The youth was apprehended at about 3:45 a.m. when police responded to a call from a citizen that someone was tampering with his automobile at 68 Henry Clay.

No Truce Reached in Chicago Protests

CHICAGO (AP) — Civil rights open city in housing in the future, said. "The demonstrations in Chicago will continue to keep the issue to the forefront. We made it clear in the meeting there would be no commitments on cessation of demonstrations."

King said commitments brought up in the session were not broad enough to warrant calling off the marches.

King, though terming Wednesday's talks "amicable and significant in making Chicago an open city in housing in the future," said that the demonstrators in Chicago will continue to keep the issue to the forefront.

Heineman added that another meeting of leaders was scheduled for Aug. 26. A committee also was selected to meet Friday and draw up recommendations to be presented Aug. 26.

Mayor Richard J. Daley, present during both sessions Wednesday, was named to the committee with Bishop James W. Montgomery, bishop-elect of the Chicago Episcopal Diocese and chairman of the civil rights delegation, to be selected, and several civic leaders also will serve on the committee.

Civic leaders proposed an immediate suspension of the riot-sparking marches to all-white neighborhoods.

King and his aides announced their counterdemands which included civil support of an extension to the Chicago fair housing ordinance which would forbid discrimination by private-property owners as well as real estate firms.

Shelby Twp. Crash Injures 2 Women

Two Detroit women were admitted to St. Joseph Hospital today with injuries sustained in an auto accident in Shelby Township this morning.

Township police said Ozzie Belle Wright, 38, and her passenger Linda Larkin, 25, were driving north on Ryan Road at about 7 a.m. when a car ran a stop sign at Hamlin and drove across Ryan in front of them.

They swerved to avoid the car and flipped over into a ditch at the roadside.

Police said the other driver stopped briefly and then drove away.

Bridge Building Starts

LANSING (AP) — The state has begun construction of a bridge to carry Seven Mile Road traffic over I-75 in Detroit. Seven Mile traffic is being diverted.

Their appearance here is sponsored by the Pontiac Area Junior Chamber of Commerce. Proceeds will be used for various youth activities.

Torro, "The Littlest Hobo," has an understanding vocabulary of 5,000 words, including English, French and German, said Eisenmann.

Method Can Trace LSD in Sugar Cubes

By SCIENCE SERVICE

WASHINGTON — A sensitive method for detecting LSD in sugar cubes was reported today by two members of the Canadian Food and Drug Directorate.

Dr. Czeslawa Radecka and Ishwar C. Nigam said the method will identify LSD doses as small as 50 micrograms, comparable to one or two flakes of bath powder. The dose usually taken is four times that amount.

As described in the Journal of Pharmaceutical Sciences, the new method dissolves the cubes, and hydrolyzes the extract. A process known as thin-layer chromatography will then clearly identify the presence of LSD, said the Canadians.

The detection method is another step toward control of illicit use of LSD.

Suspect Arrested Cyclist Hurt in Hit-and-Run

A 17-year-old youth is in satisfaction of a witness who reported his license number.

Howell was admitted to the hospital with superficial lacerations and multiple fractures of both legs.

Patrolmen John K. Hedrick and Gerald L. Schroeder said they arrested Ody about 2:20 a.m. hiding in a basement store room of Wind's Market, 904 Mt. Clemens.

In Ody's possession was about \$16 police said was taken from the market's cash register.

Man Found in Mart Jailed

A man apprehended inside a Pontiac market early today faces arraignment on a charge of breaking and entering.

Pontiac police identified the suspect as Frederick J. Ody, 39, who declined to give his address.

Statistics on Weather

NEW YORK (AP) — Paso Robles, Calif., was the country's hottest spot Wednesday with 106 degrees. The overnight low was 41 at Williston, N.D.

Aide Denies LBJ Is Remiss

Defends Programs for Riot-Torn Cities

WASHINGTON (UPI) — Another top administration official today denied implications that President Johnson has been "derelict" in combatting the ills plaguing the nation's riot-torn cities.

Secretary John W. Gardner of Health, education and welfare defended administration programs in testimony before the Senate subcommittee on executive organization.

The panel is trying to determine the effectiveness of \$13 billion in federal aid to U.S. cities this year.

"I cannot find this Congress spending this administration derelict in its attention to the problem," Gardner told the panel.

Sen. Robert F. Kennedy, D-N.Y., a subcommittee member, has accused the administration of failing to spend enough on urban aid programs.

SPENDING NO SOLUTION

Gardner said the administration did not consider mere spending a solution to city problems.

"I think we should be particularly wary of the old American habit of spending a lot of money to still our anxieties," he said. He compared the practice to the rain dance of a southwestern Indian tribe.

"The dance didn't bring rain but it made the tribe feel a lot better."

Atty. Gen. Nicholas DeB. Katzenbach had told the panel that the administration was spending \$13 billion in 1966 in direct urban aid to transform cities into what the president calls "masterpieces of civilization." But he said there still were 30 to 40 cities where tension could burst into rioting at any time.

City Man Faces Assault Charge in Shooting Case

A Pontiac man charged with felonious assault in a neighborhood altercation is scheduled to be arraigned Aug. 23 in Circuit Court.

Bobbie L. Odoneal, 22, of 443 Orchard Lake is accused of shooting a 20-year-old girl in the leg with a pistol in a skirmish July 26.

He was ordered by Municipal Judge Cecil B. McCallum to stand trial on the felonious assault count after originally being charged with attempted murder.

Odoneal was released on \$500 bond pending his arraignment.

City Man's Exam in Brawl Delayed

Pretrial examination of a Pontiac man accused of attempted murder was postponed yesterday to Aug. 31.

Daniel Moreno, 24, of 426 Midway is charged in connection with a tavern brawl July 2 which hospitalized two men.

Moreno allegedly beat another man in a battle which Pontiac police said involved about 10 persons.

The owner and bartender of Bud & Lou's Bar at 416 Auburn, where police said the fight took place, were cited for lesser offenses growing from the same incident.

Committee Is Formed Park Sought for Handicapped

A citizens committee has been formed to promote the creation of a park in Waterford Township for physically and mentally handicapped children. It was announced today.

Chairman of the group is Donald Place, 2100 Oakdale.

"The goal is to construct a centrally located playground and picnic area to be used as a recreational facility by the handicapped and their families," said Place.

"Plans for the area also include a day camp program."

Represented at the meeting were the Waterford Township Junior Chamber of Commerce, the Waterford Organization for Retarded Children, the Waterford Township Board of Education and the Oakland Schools Board of Education.

Although details remain to be worked out, the park is tentatively planned to be from five to 20 acres in size.

EYES ON THEIR WORK—Reflected in the glasses of two engineers is a Mark 1B satellite communications terminal at Fullerton, Calif. A section of the cocon-like radome is peeped open to show the terminal's "ears," a 40-foot diameter antenna.

More Than Subs in Soviet 'Blue Belt'

MOSCOW (AP) — The Soviet Union's vaunted "blue belt" of defense is being traced to its naval power, which, by the best available yardsticks, includes the world's largest fleet of submarines with an increasing number of them powered by nuclear energy.

These presumably can launch missiles underwater, multiplying the West's defense problems in the same way that American

information now available on the mysterious "blue belt" indicates that it includes other elements besides submarines.

One is possibly the expanding Soviet naval air force for long range defense against Western navies.

The defense minister, Marsh-

al Rodion Y. Malinovsky, started the "blue belt" mystery in a speech April 1. "The creation of the blue belt for defense of our state has been completed," he said without explanation.

PART OF BELT

Soviet admirals said privately later that nuclear submarines were part of the belt.

Then on May 25 the defense minister of East Germany, Gen. Heinz Hoffmann, described the striking power of Soviet land-based missiles and said: "To this are added the atomic submarines of the blue defense belt, which can operate in every sea in the world."

This is the clearest statement on public record that the "blue belt" involves submarines. Its context indicates that Malinovsky was using the word "defense" in a general sense that includes offensive power.

The worldwide offensive capability was demonstrated by a six-week submarine cruise around the world in February and March by two or three Soviet nuclear submarines.

The director of the U.S. Navy's antisubmarine warfare program, Vice Adm. Charles B. Martell, said last October that Soviet subs are now operating all over the world.

INTERLOCHEN (UPI) — About 400 delegates, most of them from outside the continental United States, were here today for the festival-conference of the International Society of Music Educators.

Dr. Egon Kraus of Cologne, Germany, is secretary-general of the society. Members will attend classes, concerts and rehearsals and start their own program Monday.

The society will end its conference next Friday.

Moscow-Tokyo Round Trip Ends

MOSCOW (AP) — A Soviet passenger plane returned today from a test flight to Tokyo, making the nonstop trip back in 11 hours 22 minutes.

The plane, of the Soviet government airline Aeroflot, checked out the route for regular commercial service between Moscow and Tokyo, for which Aeroflot has been negotiating. Both sides seem confident the service will be started soon.

Injuries Fatal

TRAVERSE CITY (AP) — A Detroit truck driver, George Manis Jr., 24, died Wednesday of injuries suffered in a wreck Tuesday night. Manis' truck ran off a Roscommon County road and he died later at a Traverse City hospital.

Griffin: Law I Sponsored Has Helped Rank and File

WASHINGTON (AP) — Sen. Robert P. Griffin, R-Mich., said today there is no question that the Landrum-Griffin Act has had an impact on organized labor but all the evidence shows labor has benefited from it.

"This legislation," he said in a statement, "has given rank-and-file members the tools to make union organizations of which they can be proud."

"The Landrum-Griffin Act has brought about significant reforms without fanfare."

Apparently, he said, there are those who would take away from rank-and-file labor union members the rights they are enjoying under the Landrum-Griffin Act, of which he was a cosponsor in 1959.

GRIFFIN DISAGREES

Griffin disagreed with a statement made in the House by Rep. Roman C. Pucinski, D-Ill.,

Sunspots Affect Harvest-Russian

By SCIENCE SERVICE

MOSCOW — Sunspots, known for playing havoc with radio transmissions, also affect farm prices, a Soviet scientist says.

The harvest of agricultural products, and thus farm product prices, depend on solar activity, Central Soil Science Museum here.

Studying harvest charts of a number of crops, he discovered that once in 11 years there is a drop in the harvest, resulting in a rise in the price of farm produce. According to Mr. Dolotov, this decline is connected with the 11-year cycle of maximum sunspot activity.

The increased solar emissions "to some degree violate the photosynthesis in plants, unfavorably influencing their development."

Laundry Fire in Petoskey

PETOSKEY (UP) — A \$100,000 blaze roared through the Hooker Laundry Co. yesterday and knocked out electric power and phone service in a wide area.

Besides machinery, a load of summer season laundry was destroyed by the fire which was of undetermined origin.

Damage was estimated by La Vern and Barton Hooker, the laundry owners.

What Makes Sammy Bite? Zoo Knows?

CINCINNATI (AP) — Sammy the Orangutan is keeping his teeth bared, but he's losing his mate.

William Hoff, director of the Cincinnati Zoo, says Hippv, a young female Orangutan brought here last fall from the Bronx Zoo, is not likely to be mated.

It seems that 15-year-old Sammy and Hippv just weren't compatible and Sammy had a habit of hitting her hand when he was spurned.

Hoff said zoo officials considered pulling Sammy's teeth but decided that was not likely to improve relations between the couple.

So Hippv is going back to Illinois and the Cincinnati Zoo will try to find another mate for Sammy.

Camel Filter Tip Is Going on Market

WINSTON-SALEM, N.C. — R. J. Reynolds Tobacco Co., the firm that introduced "Camel" cigarettes more than a half century ago, is introducing a new filter tip cigarette bearing the name "Camel."

According to A. H. Galloway, president of the concern, the "Camel" filter brand has been successful in test markets.

The company will begin distribution immediately, and will have the new brand on cigarette counters nationwide by the last week in August.

Migrant Workers' Child Is Killed

BATTLE CREEK (UPI) — The 2½-year-old son of migrant workers was killed yesterday when run over by a truck being loaded with pickles on a pickle farm.

Authorities said Robert Miralles, son of Emilio and Juana Miralles of Emilio Marshall, was run over by a truck driven by his uncle, Luis Hernandez, 23, rural Marshall, who said he did not see the boy behind the vehicle.

Bat Bites a Woman

FLINT (UP) — Holy bat bite!

Mrs. Flora Stephens of Flint, who was awakened early yesterday by a stinging sensation on her hand. She shook her hand and a bat flew into her face.

She aroused her husband who killed the bat. He then took Mrs. Stephens to Briley Hospital where she was treated for bat bite.

Computer Aid for State Police

Network Will Help in Finding Criminals

LANSING (UPI) — Michigan State Police soon will get a boost in tracking down criminals and stolen cars from their own computer network.

The State Legislature approved \$399,193 to establish a police information network in the state.

Glenn Allen, state budget director, said yesterday an order for a Burroughs B-5500 electronic computer has been made.

With the use of the new computer, police will have speedy access to stolen car records, revoked driver license information, unanswered traffic warrants and wanted persons information.

Gov. George Romney said a combination of the present radio network and a teletype network connected to the computer will provide the up-to-date minute information.

The computer is expected to be placed in operation by next spring.

Russia: Will Aid Hanoi if Asked

MOSCOW (AP) — The Soviet Union said today it was ready — if asked — to help North Viet Nam with its air force as well as other military personnel.

Premier Alexei N. Kosygin wrote British philosopher Bertrand Russell the Soviet air force was ready to act "the moment the request comes."

Antibias Action Road Laws Next Urged in City

“Positive and affirmative action” aimed at minority group problems in Pontiac was urged yesterday following a three-hour closed-door meeting of city officials, business leaders and agency representatives.

The conference, held in the board room of the Pontiac Area Chamber of Commerce, was called because of what one spokesman called “recent violent disorders” in other cities.

NAACP Notes Rise in Tension

Hate Sheet Blamed for Increase in Unrest

Charles M. Tucker, Jr., president of the Oakland County Chapter of the National Association for the Advancement of Colored People (NAACP), today said that “increasing racial tensions in the City of Pontiac” have come to the attention of the county NAACP chapter and other groups.

Tucker, who is also a regional director of the Michigan State NAACP, issued the following statement concerning the matter:

“This acceleration has been due to the distribution of a racially designed hate sheet which has been circulated in certain areas of the city.

“The sheet purports and supports racial violence and unrest. “The Oakland County Chapter of the NAACP unequivocally condemns the content, authorship and distribution of such material.

“There is no evidence that this material has emitted from any civil rights organization or any section of the Negro community.

“There has not been and is not any mass demonstrations planned.

“Due to the intensity of rumor and hearsay now rampant in the community, we strongly urge any citizen having knowledge of these matters to immediately report them to the Pontiac Police Department.

“We ask that our citizens not repeat nor encourage these attitudes and expressions.

“Progress and accomplishments cannot be achieved by hate and violence.”

Thai Child Killed as Plane Skids

BANGKOK, Thailand (AP) — A Thai air force C123 plane piloted by an American skidded off the runway on landing at Chuengmai in northwest Thailand, killed a Thai child and injuring two other persons, reports reaching here said today.

The pilot of the plane, identified as Maj. Gobart Crocker, member of the U.S. advisory group to Thailand, and his Thai copilot were injured.

Car Safety Bill Passed

WASHINGTON (AP) — The House turns its attention today to slaughter on the nation's highways after voting unanimously to make cars safer by requiring auto makers to meet federal safety standards starting with 1968 models.

A highway safety bill containing \$260 million in state aid to set up such programs as vehicle inspection and driver education is expected to get overwhelming approval by tonight.

The chief controversy probably will center over a provision

that would permit the secretary of commerce to penalize a state 10 per cent of its federal highway aid for failing to have a safety program in effect by Jan. 1, 1968.

The version of the legislation passed unanimously by the Senate in June contains no such fund cutoff. But it does call for spending more money — some \$410 million.

The auto safety bill passed by the House on a 371-0 roll call

yesterday would cover used vehicles and make certain that all cars, buses and trucks are subject to federal safety standards.

SENATE VERSION

The Senate version contained possible loopholes that could have exempted most motor vehicles and also did not apply to used cars.

Although the House proposals are likely to be accepted by the Senate, enough other differences exist to require a Senate-House conference committee.

Both bills would require the secretary of commerce to set initial federal standards by Jan. 31, 1967, to take effect not sooner than 180 days or later than one year afterward.

Seated in the gallery as the House debated and voted on the bill was Ralph Nader, the young attorney whose book about auto safety — “Unsafe at Any Speed” — is considered by many to have been a big factor in the growing public demand for auto safety legislation.

The bill's initial standards are expected to be largely the same as those issued by the General Services Administration for 1968 model cars to be bought by the government.

Included are such safety features as head rests, improved safety glass and additional padding and anchorages for shoulder harnesses.

Under the House bill, the secretary of commerce would issue standards for used cars within two years of enactment of the bill.

Wage Demand Sweeps UAW

Production Workers Echo Cry on Contract

DETROIT (AP) — Production worker members of the United Auto Workers Union now are clamoring to be included in contracts with the Big Three automakers are reopened for any wage increases.

The UAW has requested reopening to give skilled tradesmen an immediate pay hike and has demanded an answer by Monday from General Motors Corp., Ford Motor Co. and Chrysler Corp. Current contracts still have a year to run.

Industry sources had indicated the answer would be “no,” even before production workers asked inclusion. They expressed fear of just such a demand from the Big Three's 700,000 semiskilled and unskilled.

The production worker request came from Ford Local 600, the UAW's largest with 30,000 production and 10,000 skilled members.

Jointly, all production unit chairmen dispatched a letter to UAW President Walter P. Reuther, asking inclusion in any reopening and quoting him as having told many union conventions:

‘WORK TOGETHER’

“Let us work together. Let us build together. Let us fight together. With teamwork in the leadership and solidarity in our ranks, we will win together.”

Skilled tradesmen, outnumbered more than three to one in UAW ranks, stepped up pressure meanwhile yesterday in their reopening campaign.

ROMNEY BOOSTER — A GOP Girl, Linda Strom, 18, of Birmingham, pins a name tag on Gov. George Romney as he arrives to give the keynote address at the Republican County Convention at the

Southfield High School last night. Linda, whose mother, Mrs. Allen Strom, is chairman of the State GOP Girls, was one of more than a dozen members of the organization who greeted delegates.

Romney Keynotes County Confab

GOP Moderates Keep Control

By JIM LONG
Sparked by an emotion-packed speech by Gov. Romney, Oakland County Republicans last night united to beat down a threatened take-over by right-wingers within the party.

Romney's impassioned plea for party unity came in an off-the-cuff keynote address at the

GOP County Convention at the Southfield High School.

His appeal followed an intraparty struggle which ended with County GOP Chairman Joseph R. Farnham narrowly winning the permanent chairmanship of the 18th District convention over Sen. Robert J. Huber of Troy.

Farnham edged Huber by a 105 to 96 vote of the 18th District delegation.

Subsequently, as a result of the vote and on the recommendation of Romney, delegates from the 18th and 19th districts unanimously elected Farnham to head the full county convention in November.

Farnham is considered to be a party line moderate. Huber is a professed conservative.

Charles Lyle, head of the 18th Congressional District Committee, was nominated as chairman of that district's convention, but withdrew his name because he said he will be out of town when the state convention is held Aug. 28-27.

Internal party problems were absent in the 19th Congressional District Convention where District Chairman Christian Powell was unanimously elected to lead the proceedings. He was without opposition.

Following his defeat, Huber told the crowd, “You people put your name on the line to support me. We were not successful, but it was a good endeavor.”

CALLS FOR UNITY

He said that the most crucial thing facing them is the November election, and “if we do not unite we will split the party right in half.”

“To beat the Democrats we must be united. And I will support Joe (Farnham) as far as I can,” said Huber.

When Romney arrived later after speaking at several other area conventions, he was warmly greeted by delegates.

A few call-calls were directed at Romney, however, during his (Continued on Page 2, Col. 6)

We're on Own, Say Witnesses at House Quiz

Foes of Viet Policy Left Unrepresented by Lawyers' Walkout

WASHINGTON (AP) — Witnesses whose attorneys marched out of a stormy hearing of the House Committee on Un-American Activities insisted today they will act as their own lawyers.

Jerry C. Rubin of Berkeley, Calif., said he was expressing the views of the dozen witnesses called to testify about their anti-Viet Nam war activities, when he said: “As of now, I'm my own lawyer.”

He said all the witnesses would take that stand when called before the committee which had set a noon deadline for them to get new lawyers.

Most of the witnesses were absent at the start of the day's

See Picture, Page A-2

session, leaving many vacant seats in the front row reserved for them.

Their attorneys stalked out of the hearings room Wednesday in protest against the expulsion of the lawyer for two of the witnesses.

FACE DECISION

The stand announced by Rubin and his fellow witnesses leaves the committee with a decision on whether to serve as their own attorneys, hire lawyers for them, or dismiss them as witnesses.

Area Can Powder Face With Sunshine

The weatherman has decided to spread a bit of sunshine and pleasant weather around the Pontiac area with highs of 70 to 78 predicted for tomorrow.

Tonight will be fair and cool with lows of 52 to 56.

Northwest winds at 15 to 22 m.p.h. this afternoon will diminish tonight.

The forecast for Saturday is partly cloudy with possible showers.

Sixty-eight was the low recorded in downtown Pontiac this morning. At 1 p.m. the temperature reading was 85.

L'I L ONES

“I'm trying to remember if I changed or if I still have on my school clothes.”

Ford Plans New Plant in Area

A new assembly plant initially employing 200 persons is planned for a 160-acre site on East 26 Mile Road near Romeo by the Ford Tractor Division, Ford Motor Co.

Plans to build the plant were announced by Ford officials today. It is scheduled for completion next spring. The cost was not disclosed.

More employees will be hired as the plant expands into a manufacturing facility, but no date estimate was available.

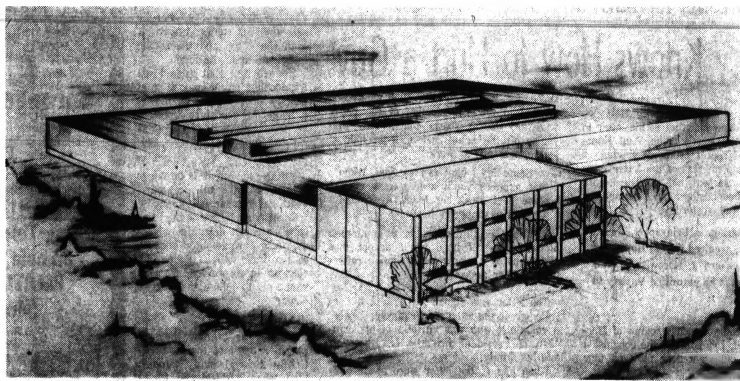

“The new Romeo Equipment

Plant will serve as the U.S. assembly facility for our growing line of industrial tractors, backhoes and loaders as well as the world headquarters for Ford Tractor Division Equipment Operations,” said R. R. Owen, the division's Equipment Operations general operations manager.

The three-part structure will provide a manufacturing area, office area and employee facilities area.

Approximately 100,000 square feet of space will be provided.

South Viet Nam's Unarmed Civilians Caught in the Middle

By GEORGE ESPER
SAIGON, South Viet Nam (AP) — There are no sanctuaries in South Viet Nam for unarmed civilians. Almost daily, guerrilla warfare takes its toll of civilian lives. Civilians are not even safe in the streets of Saigon. There are no statistics on civilian deaths, but they run into the thousands. More are likely to die.

Incidents last week, including the bombing of a Mekong River delta village by U.S. Air Force jets with the death of 26 villagers and injury to another wounded. Later, a military Vietnamese spokesman said the bombings air strike on a village to cut

innocent civilian caught between the Viet Cong and allied forces.

OTHER BOMBING

There have been other such bombings in which civilians were killed, unnoticed or unknown to the public. As one Vietnamese officer put it, "It happens all the time."

Last September, U.S. jets dropped four bombs in the hamlet of Gia Linh in the southern portion of the demilitarized zone, and Vietnamese police men reported that 20 persons were killed and 12 others injured. The Viet Cong might select for assassination one or two key leaders of a government-controlled village. South Vietnamese troops might call an air strike on a village to cut

down a Viet Cong platoon or two. Why so much firepower? Why didn't a company of South Vietnamese ground troops—perhaps 150 men—surround the Viet Cong?

Whenever American troops plan a search and clear operation in a village, they call on the civilians to come out to a collection point where they will be protected. This is done by a helicopter flying at low level with loudspeakers.

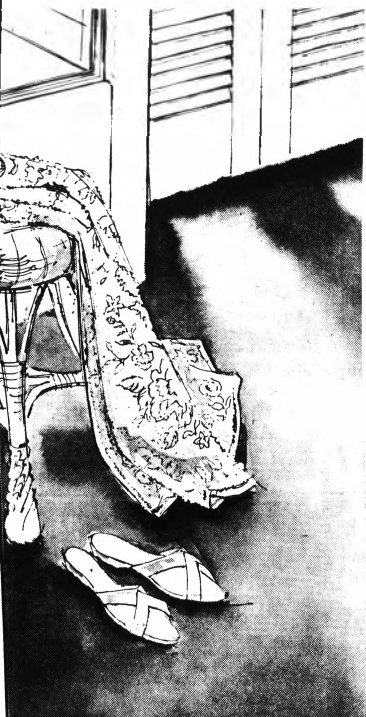

When American troops take heavy fire from a Viet Cong village, they often have no choice but to reply with artillery or air strikes.

In some cases, civilians killed in military operations are simply listed as Viet Cong. Civilians also face the perils of a counterattack with a crippled airplane crashing, civilians caught in the crossfire.

On May 10, a terrorist set off a mine in Saigon. American Military Police opened up with machine guns. Seven civilians were killed and 26 wounded. In many instances, Vietnamese dependents—women and children—go to the war with their fathers. Often, they are attacked by the Viet Cong.

THEY'LL WED AUG. 27 — Robert A. Humphrey, 22, son of the vice president, and Donna Erickson, 21, beamed as they announced their engagement at a New Year's eve party in Minneapolis, Minn., hotel. They set the wedding date for July 9, but she was hospitalized with pneumonia and the ceremony was delayed. The date is now Aug. 27, in Minneapolis, when a nuptial Mass will be celebrated. She's Catholic and he's Protestant.

Nuptials of VP's Son Getting Little Notice

WASHINGTON (AP) — Although almost unnoticed in the tumult and glare of publicity of Luci Banes Johnson's wedding, there's another marriage this summer with high official interest.

The vice president's son, Robert A. Humphrey, marries a stunning blue-eyed blonde of Norwegian descent on Aug. 27 in Minneapolis, Minn.

It should be a picture wedding: Bob is 22, dark and handsome. His bride, Donna Erickson, 21, is a 5-foot-4 former beauty queen from Hampton, Minn.

Like Luci, Donna insists her wedding is "a family affair."

LIKE LUCI

Like Luci, Donna plans a Saturday nuptial Mass. She is Roman Catholic. Bob is Protestant. And like Luci, Donna chose to move her ceremony from her parish church to a larger sanctuary, the 1,200-seat St. Olaf's Catholic church in Minneapolis.

Bob and Donna's wedding originally was scheduled for July 9, but was postponed when she was hospitalized for three weeks with pneumonia.

She was out of the hospital Aug. 6, but that was Luci's day to become Mrs. Patrick J. Nugent at the Shrine of the Immaculate Conception in Washington. Vice President and Mrs. Hubert H. Humphrey attended that wedding. Bob and Donna did not.

Whereas hundreds of newsmen covered the Nugent rites, the Humphrey's Washington press office said it has only about a dozen requests for coverage.

GOWN SECRET

Donna's wedding party will include 16 persons. Her bridal gown is as carefully guarded a secret as was Luci's. An uncle, Larry Doffing of Hampton, Minn., will give her away.

The reception will be at the Humphrey's lakeside retreat in Waverly, Minn., 40 miles west of Minneapolis. Green and white tents will be set up on the lawn and a combo will provide music.

During the postponement, Bob moved into the couple's one-bedroom honeymoon apartment with a college classmate, Greg Schermann, who will be a groomsman in the wedding.

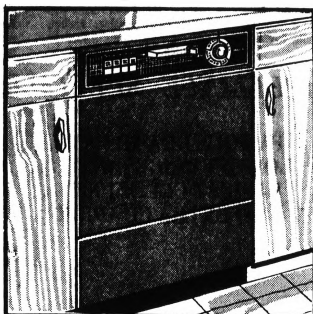

Bob and Donna's romance blossomed at Mankato State College where both were students.

Wife Stabbed, Man Charged

Accused of stabbing his former wife in an argument, a Pontiac man was arraigned yesterday in Municipal Court on a charge of felonious assault.

Cleve Bell, 36, of 231 Raeburn demanded examination on the charge at his appearance before Judge Cecil B. McCallum.

McCallum set the hearing for Aug. 23 and released Bell on \$500 bond.

Bell was apprehended by Pontiac police Tuesday afternoon after 35-year-old Mrs. Pauline Bell of 308 Howard McCallum said she had been cut on the right hand and left shoulder by her former husband.

She was admitted to St. Joseph Mercy Hospital following the alleged assault and is reported in fair condition.

O'Brien Unit Plans Water Pollution Tour

LANSING (UPI) — State Sen. Carl W. O'Brien, D-Pontiac, said yesterday his Senate Conservation Committee would go on a statewide tour this fall to check on water pollution.

O'Brien said the committee would be mainly concerned about implementation of anti-water pollution laws passed during the recent legislative session.

"We will check municipalities which are polluting our lakes and streams and also the extent of pollution caused by industrial resources," said O'Brien.

O'Brien said he would again seek legislative support for placing on the ballot a plan to establish a 10-year, \$100-million bonding program to aid local communities in the fight against water pollution.

TALE OF BITTERNESS — Former Cuban diplomat Dr. Lennel Alonso, who recently defected from his post as Cuban ambassador to Lebanon, tells at a news conference yesterday of the bitter enmity that he knew existed between Fidel Castro and Ernesto (Che) Guevara. Guevara was a top Castro revolutionary aide who disappeared in March 1965. Dr. Alonso's daughter, Mirisa, 5, is at left.

Envoy Tells of Discontent Defector Says Castro Haunted by Fear

MIAMI (UPI) — A Cuban diplomat who defected from the Communist regime pictures Fidel Castro as a man who is haunted by fear and surrounded by discontent and conspiracy.

"Sooner or later these conspiracies will result in Castro's overthrow," said Dr. Lennel Alonso yesterday. Alonso left his post as ambassador to Lebanon last week and sought asylum in the U.S. Embassy.

The 34-year-old defector who brought his wife and 5-year-old daughter into exile with him, said Castro's fear and insecurity at home had led him to make Cuban embassies throughout the world centers of espionage and subversion.

"Fear has overtaken Castro and his position weakens internally as he increases subversion in every continent," Alonso said.

He described his embassy in Lebanon as a center of subversion in the Middle East and told how he had been required to meet with Communists and help finance their revolutionary activities.

MONEY FOR COMMUNISTS

"Numerous times I handed over thousands of dollars to couriers from the Lebanese Communist party to finance subversion," he said.

Alonso also served as Cuban envoy to Indonesia and Ghana before taking the post in Lebanon.

He said Castro embassies in Spain, Mexico, the Middle East and Africa were principal espionage centers, and he told of plans by the Cuban government to replace some 200 Cuban diplomats with trained agents next month.

In a related development, the newspaper *Diario de las Americas* reported that Castro's home near Havana has been turned into a "bomb-proof" fortress laced with secret tunnels and stocked with food and sleeping accommodations for a large number of people. The reports came from "newly arrived exiles," the newspaper said.

Alonso said the conspiracies against Castro are concentrated in the armed forces and that anti-Castro elements have "put a price on Fidel's head."

Police Seal Off London Airport

LONDON (AP) — Armed police sealed off London Airport today in the hunt for 30-year-old Harry Roberts, the third man sought in the killing of three Scotland Yard detectives.

Everyone of the thousands of passengers leaving the crowded airport was put under close police scrutiny after a tip that Roberts had been seen in airport departure lounges.

The tip came from an airport employee who once shared a room with the fugitive. Other British and European airports were alerted in case Roberts had slipped through the net.

Across London, hundreds more police combed the undergrowth of Epping Forest, a 6,000-acre playground bordering the eastern suburbs.

A woman who spent Sunday night with Roberts in a Bloomsbury hotel told police she traveled with him to a pub in the heart of the forest.

Deaths in Pontiac Area

Mrs. Walter Hodges

Service for Mrs. Walter (Audrey) Hodges, 57, of 966 Hatchery, Waterford Township, will be 1 p.m. tomorrow at Coats Funeral Home with burial in Drayton Plains Cemetery.

Mrs. Hodges died yesterday after a short illness.

Surviving besides her husband are one daughter, Mrs. Betty Cartagier of Mount Clemens; five sons, Marvin and Richard of Waterford Township, Allen of Orionville, Monty of Clarkston and Bruce of Royal Oak; 13 grandchildren; and a brother, Glen Hurley, Waterford Township.

Gustave Kukowski

Service for Gustave Kukowski, 83, of 3040 Old Orchard, Waterford Township, will be 11 a.m. Monday at the C. J. Godhardt Funeral Home, Keego Harbor, with burial in Perry Mount Park Cemetery.

Mr. Kukowski, a retired landscaper, died Tuesday after a long illness. He was a member of Grace Lutheran Church.

Surviving are his wife, Auguste; a daughter, Mrs. Alfrida Lieber of Waterford Township; three sons, Adolf of Waterford Township, Otto of Orlando, Fla., and Fred Kuhn of Bloomfield Township; 12 grandchildren; and four great-grandchildren.

Mrs. Clarence Marks

Service for Mrs. Clarence (Anna) Marks, 86, of 425 Midway, will be 1:30 p.m. Sunday at the Donald-John Funeral Home with burial in White Chapel Memorial Cemetery.

Mrs. Marks died yesterday after a long illness.

George Singleton

Service for George Singleton, 36, of 436 E. Wilson will be 1 p.m. Sunday at the C. J. Godhardt Funeral Home, Keego Harbor. Burial will be in Ansonville Cemetery, Anderson, S.C.

Three youths are being held in connection with an illegal entry last night at the Concession Stand of the Tam-O-Shanter Country Club, 5051 Orchard Lake.

West Bloomfield Township police said two officers saw three boys enter and leave the stand with beer, liquor, and cigarettes.

Held are Wayne Morris, 19, of Allen Park; Frederick Martin, 17, of 715 Pierce, Birmingham; and Culver Anderson, 18, of 255 E. Lawrence, Birmingham.

Police said one of the youths had a key to the stand and that all three were employed at the club.

Trains Crash; 50 Hurt

NAPLES, Italy (AP) — Fifty persons were injured today in the head-on collision of two passenger trains near the station of La Pietra, southeast of Naples.

A 17-year-old youth is in satisfactory condition at William Beaumont Hospital, Royal Oak, today with injuries sustained in a hit-and-run accident last night.

Troy police said William H. Howell Jr. of Sandusky was riding his bicycle north on John R. in Troy between 15 and 16 Mile at 8:47 p.m. when he was struck head-on by a car going south.

Howell was riding in the right hand lane, police said, when a southbound car driven by Leroy D. McCarty, 23, of Hazel Park struck him as he was passing another car.

McCarty left the scene of the accident, according to police, but was apprehended at his home last night with the help of a witness who reported his license number.

Howell was admitted to the hospital with superficial lacerations and multiple fractures of both legs.

Man Found in Mart Jailed

A man apprehended inside a Pontiac market early today faces arraignment on a charge of breaking and entering.

Pontiac police identified the suspect as Frederick J. Ody, 29, who declined to give his address.

Patrolmen John K. Hedrick and Gerald L. Schroeder said they arrested Ody about 2:20 a.m. hiding in a basement storeroom of Wink's Market, 904 Mt. Clemens.

In Ody's possession was about \$16 police said taken from the market's cash register.

Statistics on Weather

NEW YORK (AP) — Paso Robles, Calif., was the country's hottest spot Wednesday with 108 degrees. The overnight low was 41 at Williston, N.D.

Aide Denies LBJ Is Remiss

Defends Programs for Riot-Torn Cities

WASHINGTON (UPI) — Another top administration official today denied implications that President Johnson has been "derelict" in combating the ills plaguing the nation's riot-torn cities.

Secretary John W. Gardner of Health, education and welfare defended administration programs in testimony before the Senate subcommittee on executive organization.

The panel is trying to determine the effectiveness of \$13 billion in federal aid to U.S. cities this year.

"I cannot find this Congress nor this administration derelict in its attention to the problem," Gardner told the panel.

Sen. Robert F. Kennedy, D-N.Y., a subcommittee member, has accused the administration of failing to spend enough on urban aid programs.

SPENDING NO SOLUTION

Gardner said the administration did not consider mere spending a solution to city problems.

"I think we should be particularly wary of the old American habit of spending a lot of money to still our anxieties," he said. He compared the practice to the rain dance of a southwestern Indian tribe.

"The dance didn't bring rain but it made the tribe feel a lot better."

Atty. Gen. Nicolas DeB. Katzenbach had told the panel that the administration was spending \$13 billion in 1966 in direct urban aid to transform cities into what the president calls "masterpieces of civilization." But he said there still were 30 to 40 cities where tensions could burst into rioting at any time.

Highway Post

LANSING (AP) — Larry Subkow, highway department district engineer for the eastern half of the Upper Peninsula since 1961, was named Wednesday as supervisor of the surveillance unit in the department's new safety and surveillance section.

No Truce Reached in Chicago Protests

CHICAGO (AP) — Civil rights leaders planned new protest marches after seven hours of discussion failed to produce an armistice to the demonstrations for open housing.

Martin Luther King Jr. and his top lieutenants will tell a meeting of civil rights workers today where and when the next protest parade will be staged.

King, though terming Wednesday's talks "amiable and significant" in making Chicago an open city in housing in the future, said, "The demonstrations in Chicago will continue to keep the issue to the forefront. We made it clear in the meeting there would be no commitments on cessation of demonstrations."

King said commitments brought up in the session were not broad enough to warrant calling off the marches.

HOPE EXPRESSED

Ben Heineman, chairman of the session that was called by the Chicago Conference on Race and Religion, expressed the hope that "all citizens of Chicago will respect their (the marchers') constitutional rights and refrain from any improper action."

Heineman added that another meeting of leaders was scheduled for Aug. 26. A committee also was selected to meet Friday and draw up recommendations to be presented Aug. 26.

Mayor Richard J. Daley present during both sessions Wednesday, was named to the committee with Bishop James W. Montgomery, bishop coadjutor of the Chicago Episcopal Diocese and chairman of the conference. Two members of the civil rights delegation, to be the marchers' legal counsel, also will serve on the committee.

City leaders proposed an immediate suspension of the riot-sparking marches to all-white neighborhoods.

King and his aides announced their counterdemands which included civil support of an extension to the Chicago fair housing ordinance which would forbid discrimination by private-party owners as well as real estate firms.

Method Can Trace LSD in Sugar Cubes

By SCIENCE SERVICE

WASHINGTON — A sensitive method of detecting LSD in sugar cubes were reported today by two members of the Canadian Food and Drug Directorate.

Drs. Czeslawa Radecka and Ishwar C. Nigam said the method would identify LSD doses as small as 50 micrograms, comparable to one or two flakes of white powder. The dose usually taken is four times that amount.

As described in the *Journal of Pharmaceutical Sciences*, the new method dissolves the cubes and hydrolyzes the extract. A process known as thin-layer chromatography will then clearly identify the presence of LSD, said the Canadians.

The detection method is an other step toward control of the illicit use of LSD.

3 Youths Held in Illegal Entry at Club Stand

Three youths are being held in connection with an illegal entry last night at the Concession Stand of the Tam-O-Shanter Country Club, 5051 Orchard Lake.

West Bloomfield Township police said two officers saw three boys enter and leave the stand with beer, liquor, and cigarettes.

Held are Wayne Morris, 19, of Allen Park; Frederick Martin, 17, of 715 Pierce, Birmingham; and Culver Anderson, 18, of 255 E. Lawrence, Birmingham.

Police said one of the youths had a key to the stand and that all three were employed at the club.

Aden R. Hanson

ORCHARD LAKE — Service for former resident Aden R. Hanson, 47, of California will be 1 p.m. Saturday at the C. J. Godhardt Funeral Home, Keego Harbor. Burial will be in Ansonville Cemetery, Anderson, S.C.

Mr. Hanson died Saturday.

Surviving are two sons, Jimmy and Jerry, both of California; six brothers, Palmer of Wall, La., Basil, Roy and Roger, all of Waterford Township; Billy of Viroqua, Wis., and Louis of Pontiac; and two sisters, Mrs. John Hanson and Mrs. Harry Linton, both of Wall, La.

Louis G. Lafayette

MILFORD — Service for former resident Louis C. Lafayette, 66, of Grosse Ile will be 9 a.m. Saturday at Sacred Heart Church, Grosse Ile. Burial will be in Sacred Heart Cemetery, Grosse Ile.

Mr. Lafayette died yesterday.

A retired foreman for the Detroit Edison Co., he was a member of the Michigan Mineralogy Society and VFW Post No. 7310.

Surviving are his wife, Katherine; one son, Louis of Grosse Ile; one daughter, Mrs. Wallace Barber of Toledo, Ohio; one brother; two sisters; and three grandchildren.

City Man Faces Assault Charge in Shooting Case

A Pontiac man charged with felonious assault in a neighborhood altercation is scheduled to be arraigned Aug. 23 in Circuit Court.

Bobbie L. Odneal, 22, of 443 Orchard Lake is accused of shooting a 20-year-old girl in the leg with a pistol in a skirmish July 26.

He was ordered by Municipal Judge Cecil B. McCallum to stand trial on the felonious assault count after originally being charged with attempted murder.

Odneal was released on \$500 bond pending his arraignment.

French Producers Retouch Their U.S. Western Films

By EARL WILSON

LONDON — The "western wave" that has hit Europe—making fortunes for such cowboy stars as Lex Barker on "ranches" from Berlin to Belgrade—has produced tall tales about the shoot-'em-up boys on this side of the Atlantic.

A French producer, filming an American script for a French audience, was making changes from English to French as he went along.

"Gimmie a shot of red-eye!" a cowboy was supposed to yell to the bartender.

The French producer switched it to French. The cowboy barked to the bartender: "Un Dubonnet, s'il vous plait."

For the London world premiere of "The Countess of Hong Kong" in December, Universal hopes to have Charles Chaplin, Sophia Loren and Marlon Brando together. Brando's always a question mark. But he's expected to attend, just to make sure Sophia Loren doesn't get all the attention.

When he was ill at the start of the film and thought he'd require an appendectomy, he was asked by a friend, "Is there anything I can do?"

Yes, he said, "if I die, don't let Sophia steal my funeral by weeping over my casket."

Naturally Johnson, the playwright-director, said Bob Goldstein his doctor had ordered him to quit smoking, drinking and going without sleep.

"Ah, think," said the Dixie-talking Johnson, "Ah must be in the hands of a quack!"

Shelby Twp. Crash Injures 2 Women

Two Detroit women were admitted to St. Joseph Hospital, Mount Clemens, today with injuries sustained in an auto accident in Shelby Township this morning.

Township police said Ozzie Belle Wright, 39, and her passenger Linda Larkins, 23, were driving north on Ryan Road about 7 a.m. when a car ran a stop sign at Hamlin and drove across Ryan in front of them.

The car, a 1965 Ford, and the car flipped over into a ditch at the roadside.

Police said the other driver stopped briefly and then drove away.

Suspect Arrested Cyclist Hurt in Hit-and-Run

A 17-year-old youth is in satisfactory condition at William Beaumont Hospital, Royal Oak, today with injuries sustained in a hit-and-run accident last night.

Troy police said William H. Howell Jr. of Sandusky was riding his bicycle north on John R. in Troy between 15 and 16 Mile at 8:47 p.m. when he was struck head-on by a car going south.

Howell was riding in the right hand lane, police said, when a southbound car driven by Leroy D. McCarty, 23, of Hazel Park struck him as he was passing another car.

McCarty left the scene of the accident, according to police, but was apprehended at his home last night with the help of a witness who reported his license number.

Howell was admitted to the hospital with superficial lacerations and multiple fractures of both legs.

Man Found in Mart Jailed

A man apprehended inside a Pontiac market early today faces arraignment on a charge of breaking and entering.

Pontiac police identified the suspect as Frederick J. Ody, 29, who declined to give his address.

Patrolmen John K. Hedrick and Gerald L. Schroeder said they arrested Ody about 2:20 a.m. hiding in a basement storeroom of Wink's Market, 904 Mt. Clemens.

In Ody's possession was about \$16 police said taken from the market's cash register.

Mrs. Harry Wendell

HIGHLAND TOWNSHIP — Service for Mrs. Harry (Adele) Wendell, 61, of 3432 N. Milford will be 1 p.m. Saturday at the Richardson-Bird Funeral Home, Milford. Burial will be in Ansonville Cemetery, Anderson, S.C.

Mrs. Wendell died yesterday after a long illness. She was a member of the Clyde Methodist Church.

City Man's Exam in Brawl Delayed

Pretrial examination of a Pontiac man accused of attempted murder was postponed yesterday to Aug. 31.

Daniel Moreno, 24, of 426 Midway is charged in connection with a tavern brawl July 2 which hospitalized two men.

Moreno allegedly beat another man with a wooden club in a battle which Pontiac police said involved about 10 persons.

The owner and bartender of Bud & Lou's Bar at 416 Auburn, where police said the fight took place, were cited for lesser offenses growing from the same incident.

THE MIDNIGHT EARL

Singer-actress-restaurantier Bernice Parks confirms that she and George N. Richard, wealthy widower of actress-producer Helen Menken, were married recently. They first met the night Miss Menken died, Mar. 27. Richard took Miss Menken, who had been ill, to Miss Parks' restaurant, Ruby Foo's, for dinner. Miss Parks came from her upstairs apt. to meet and greet them. They went on to the Lambs Club where Miss Menken collapsed and died.

Two weeks later, Miss Parks participated in a memorial to Miss Menken. A romance developed between Richard and Miss Parks whose husband, Dr. Lawrence Shetles, a San Antonio surgeon, had died 18 months before they met. They were honeymooning in Europe.

Maureen O'Sullivan—off to Indianapolis for "The Subject Was Roses"—says in September she'll enter her dr. Prudence, 19, in finishing school in Florence. "Yes, she's the dr. whose neck I intended to wring when she gave out the rumor I was married!" laughs Miss O.

REMEMBERED QUOTE: "We go through life saving and saving for the Senior Prom, and when it comes we're too tired to dance." —Arnold Glasow.

EARLY PEARLS: The worst thing about being on time is that everybody thinks you have nothing else to do.

Bob Orben reports that today's kids play a game called Zip Code. It's like Post Office, but faster. That's early, brother.

Bridge Building Starts

LANSING (AP) — The state has begun construction of a bridge to carry Seven Mile Road over I-75 in Detroit. Seven Mile traffic is being diverted.

'Intelligent' Dog Group Will Perform at PNH

A canine quartet from a television show "The Littlest Hobo," sponsored by the Pontiac Area Junior Chamber of Commerce, will perform at the Pontiac Northern High School gymnasium Saturday at 10 a.m. and 2 and 8 p.m.

The dogs are Thorn, Little London, Loudon, and Torro.

Their appearance here is sponsored by the Pontiac Area Junior Chamber of Commerce.

Proceeds will be used for various Jaycee-sponsored youth activities.

Torro, "The Littlest Hobo," has an understanding vocabulary of 5,000 words, including English, French and German, said Eisenmann.

Police Network

LANSING (AP) — The state has placed an order for an electronic computer to aid in the fight against crime.

The program, to be in operation by late 1967, will give officers rapid access to stolen car records, driver's license information, criminal warrants and other police information.

Statistics on Weather

NEW YORK (AP) — Paso Robles, Calif., was the country's hottest spot Wednesday with 108 degrees. The overnight low was 41 at Williston, N.D.

Committee Is Formed

A citizens committee has been formed to promote the creation of a park in Waterford Township for physically and mentally handicapped children. It was announced today.

Chairman of the group is Donald Lake, 2100 Oakdale.

"The goal is to construct a centrally located playground and picnic area to be used by the handicapped and their families," said Lake.

"Plans for the area also include a day camp program."

Park Sought for Handicapped

The park proposal was announced after a meeting last night at the Community Activities, Inc. Building.

ATTEND MEETING

Represented at the meeting were the Waterford Township Junior Chamber of Commerce, the Waterford Organization for Retarded Children, the Waterford Township Board of Education and the Oakland Schools Board of Education.

Although details remain to be worked out, the park is tentatively planned to be from five to 20 acres in size.
