

## City Pastor Going Abroad on U.S. Goodwill Tour

The Rev. Kenneth Stephens, pastor of St. Luke's Methodist Church, will be leaving for an extended trip abroad on Jan. 19 as a member of the Wayne State University Tour Co.

Composed of 16 people, the group is being sent to Europe and the Near East under President Eisenhower's program for the international exchange of culture by the United States State Department and the American National Theater Academy.

The company will spend about two months in India touring all the major universities and colleges. Their job is not just to entertain with the repertoire of five plays but to further increase a better understanding of American culture and customs by presenting lectures and leading discussions.

Another feature of the tour will be a week's appearance at the International Drama Festival held yearly in the historic town of Parma, Italy. Here representative companies from all over the world will vie for recognition on the stage of one of the world's oldest theaters.

**STRESS IMPORTANCE**  
"It is significant," said the Rev. Mr. Stephens, "that many leading educators have, with the advent of Sputnik, stressed the importance of deeper understanding and appreciation of other peoples as one of the more sure ways of keeping the peace."

The St. Luke's pastor has arranged for the Rev. James W. Deeg, pastor of Oakland Park Methodist, to be a guest preacher during his absence. The Rev. Harry Lord, a former minister of the church, and the Rev. Nina Miller will also be among the guest speakers.

A reception honoring the Rev. Mr. Stephens will be held from 7 to 9 p.m. Saturday in the church fellowship rooms. Friends of the pastor and his wife are invited.

GOODWILL TRIP — The Rev. Kenneth Stephens, packs for a goodwill tour abroad under auspices of the State Department.

### Ziem Studies Records

## Sullenberger Probe May Take Long Time

With assurances that Pontiac General Hospital administration will cooperate, if needed, investigation by public authorities of Dr. Nell H. Sullenberger had gathered greater momentum today.

Prosecutor Frederick C. Ziem, studying the case to determine if any criminal action is warranted, said an adequate list of possible witnesses has been compiled. "We have the names of more people now that we can keep up with," Ziem said. "The investigation is proceeding, but because of its highly complicated nature, it will take a long time."

The original list had been furnished by Dr. Sullenberger himself as he gave investigators his reply to charges of unprofessional practices brought by Carl I. Flath, hospital director.

Flath, who made the charges in answer to Dr. Sullenberger's \$250,000 damage suit against the hospital, declined earlier in the investigation to open hospital files to produce evidence against Dr. Sullenberger.

At a meeting yesterday at which Flath's position was considered were Ziem, Assistant Atty. Gen. Maurice M. Moule, City Attorney William A. Ewart and Dean G. Beier, counsel for the hospital staff.

Details of the discussion were not disclosed, but in a statement which he said was for all the conferees, Ziem said:

"If in the course of the investigation the cooperation of the hospital is needed, Mr. Ewart and Mr. Beier have assured Mr. Moule and myself that it will be forthcoming."

Dr. Sullenberger's attorney yesterday filed his written reply to Flath's charges, on file in circuit court. The reply, a 31-page document filed by Attorney Henry N. Dell made a sweeping denial of all charges that professional standards had been violated by Dr. Sullenberger at the hospital and specifically answered each of 25 charges.

In all the cases, the reply said, "there is no basis of fact for the false, malicious and irresponsible allegations made directly or by innuendo. Such allegations are untrue and libelous."

## New Rocket Clears Senate

McElroy's Decision Met  
With Approval, Demand  
for More Action

WASHINGTON (INS) — Leading lawmakers gave Defense Secretary Neil McElroy a pat on the back today for his decision to go ahead with a new rocket but made it clear they want more such positive action.

McElroy ordered the Army Friday to develop on a "top priority basis" a solid-propellant ballistic missile to succeed the Redstone.

The new missile—yet unnamed—will be smaller, lighter and more mobile than the Redstone it is to succeed, according to testimony before the Senate missile-satellite inquiry.

Assistant Democratic leader Mike Mansfield (Mont.) said that McElroy, in ordering development of the new 200-mile rocket, is "living up to expectations and is fulfilling the promise he made to the congressional leadership at a breakfast last Monday morning."

Mansfield continued: "It is to be anticipated that on the basis of the secretary's fine performance to date, he will keep the momentum going to bring about at every opportunity the improvements necessary to overcome our deficiencies in both the intermediate range and intercontinental missile fields."

McElroy promised congressional leaders at the breakfast that he would not hesitate to take any action he feels will advance the defense effort.

Mansfield said that leaders of both parties assured the secretary in turn that they would give him "every possible bit of support."

McElroy's decision to go ahead with a small, solid-propellant ballistic missile was announced to the Senate Preparedness subcommittee by Maj. Gen. John B. Medaris. (Continued on Page 2, Col. 6)

### 4 Die in Hotel Blaze

EAST ST. LOUIS, Ill. (INS) — Four men were burned to death, six persons are missing and two women were injured today in a fire which destroyed a small brick hotel near the stockyards at East St. Louis.

## City Police Nab Holdup Suspect

Waitress Says Bandit  
Ran Wrong Way, Then  
Returned to Car

Alert police work resulted in the arrest of a suspect shortly after an armed holdup of the Cigar Box Restaurant, 386 N. Perry St., this morning.

Wilma Jean Williams, 28, a waitress, told police a lone man came into the cafe at 4:25 a.m. and ordered coffee. He then pulled a gun and said "This is a stickup." The gunman went to the cash register and started to rifle it. Miss Williams said, and she seized the opportunity to run from the restaurant.

The bandit fled in the wrong direction, turned and ran back to his car and drove off, she said.

Detectives James LaPonsie and Orville Johnston, answering the robbery call, saw an old car near the scene and jotted down the license number.

A description of the bandit's car from Miss Williams tallied with the one they had seen. They traced the owner and arrested John M. Elwell, 46, of 329 N. Saginaw St., for further investigation. They found a toy revolver and \$60 on his person. He was identified this morning by Miss Williams, according to police.

## Muskegon Bus Lines Cost City \$20,000

MUSKEGON — Reports of the first 12 months of operation of Muskegon City Coach Lines show it has cost this city and its suburbs more than \$20,000 in subsidies.

Operations began Nov. 1, 1956, when Muskegon City Coach took over the lines from Peoples Transport Corp.

The transaction at that time included an agreement with the city and surrounding municipalities for assurance that the bus company would receive a return of six per cent.

The governor, in a message to the Legislature this week, called for a 21-million-dollar boost in the levy on stocks, bonds and other so-called "paper wealth." He suggested the raise be put into effect immediately and cover the next two years.

Not everyone with his savings in stocks or bank deposits or other intangibles must brace himself for a possible tax raise, however. If your investments are comparatively small, or if you've sunk your money in government

bonds or a pension plan, you would pay little tax or none at all.

All U.S. bonds, or state or municipal bonds, for example, are exempt from the intangibles tax. So are all pensions, if the pensioner paid no more than half the cost of financing it.

There is no tax either for nearly all non-profit organizations, credit unions, insurance companies, banks, trust companies and public utilities.

Who does pay then?

**PAID 45 PER CENT**  
Some 57,000 individuals paid about 45 per cent of the \$23,600,000 collected in Michigan intangible taxes last year. All these reaped an income of at least \$571 from their intangible properties or owned, non-income-producing prop-

## Russians Deny Knowing About Mystery Beeps

Europeans Wonder if  
Red Scientists Firing  
Rocket to Moon

LONDON (INS) — Strong beeps similar to those flashed by Soviet Sputniks were picked up by several European stations today, but Russian officials pooh-poohed rumors they had launched their long expected attempt to fire a rocket to the moon.

The signals were heard in Finland, Norway and Britain for periods of up to an hour, unleashing a flood of speculation that Soviet scientists had made another sensational assault on the mysteries of outer space.

But official circles in Moscow said they had no information about the beeps, and, in Washington, a spokesman for the U.S. Naval Research Laboratory said that "no reports have been received from our tracking stations on any new satellites."

**QUICK TO TELL**

The officials in Russia hinted that they would not hesitate to announce any new rocket-launchings. Russia was quick to tell the world when it sent Sputniks I and II aloft.

A spokesman for the Soviet Academy of Science said "we have absolutely no information" that Russia had fired another rocket and he expressed "doubt" that it had.

Other officials in Moscow replied in the same vein when asked about the beep signals, advising newsmen to "look in the newspapers." Russian papers, which could be expected to trumpet about any new Soviet strides in outer space research, did not say anything about rockets today.

Adding weight to these denials from Russia was the fact that the Soviet Union's leading rocket specialists are now meeting in Moscow for a discussion of their space program.

Monitors at the Degersee monitoring station in Helsinki had said the signals were heard for 60 minutes. They came to the conclusion that the beeps might have been coming from some object — possibly a rocket — moving away from earth.

Finnish radio experts said the signals were on the same wavelengths, 20 and 40 megacycles, which the Russians used for their first two earth satellites.

**HEARS SIGNALS**

In Columbus, Ohio, a ham radio operator, Francis Strait, reported hearing strong signals for a period of about two hours but said he

## AF General Rips Ike's Space Plan

WASHINGTON (INS) — President Eisenhower's plan for an independent space agency has been branded by the Air Force's missiles chief as costly "duplication" and wasted effort.

Maj. Gen. Bernard A. Schriever, commander of the Ballistic Missile Division, believes the Air Force has the rockets to make a prompt start on both manned and unmanned space flight.

His views were aired in secret testimony before the Senate Preparedness Subcommittee Thursday. It was released last night by the Air Force, instead of the congressional group, after Pentagon clearance.

Schriever placed no time limit on the space feat, but he said that "bold decisions and calculated risks" must be taken if the U.S. is to achieve technological leadership in the 1955-1970 period.

He said that the present 1,500-mile Thor missile, with one stage added, could launch a satellite "with a respectable payload." With two more stages, he added, it could reconnoiter the moon "at a relatively early date."

In a veiled attack on the Advanced Research Projects Agency, which the Pentagon is now setting up, Schriever said the Air Force could undertake manned and unmanned space flights "at the earliest dates and at the greatest economy."

He added: "I believe that any program to develop a separate aerospace agency would result in duplication of capability already existing in the Air Force ballistic program, and at a cost in funds and time similar to that already expended in these programs."

Schriever said the 5,000-mile Titan, now being developed by Martin Aircraft near Denver, Colo., is capable of powering manned flights "around the moon and back to earth." The missile is expected to be ready for tests next year.

Calling for a 50 per cent increase in production for the Thor and Titan, Schriever said "it will be a colossal blunder if we were not prepared beyond the point of matching every Soviet ballistic missile with one of our own."

The strike began Monday afternoon when 2,700 workers walked off their jobs in protest against rates of pay and job classifications.

The new plant, located west of Wisconsin road and north of Grand River avenue (U.S. 16), assembles Lincolns, Continentals and Thunderbirds.

A spokesman for the Lincoln-Mercury Division of the Ford Motor Co. said the strike caused a production loss of 700 Lincoln and Continental cars. There was no estimate for the Thunderbirds.

**Breaks Neck at MSU**  
EAST LANSING (U-P) — A University of Minnesota gymnast was reported in "serious" condition today after suffering a broken neck in a meet at Michigan State University.

The 100-ton Atlas was hurled hundreds of miles over the Atlantic yesterday and the Defense Department announced it plunged into the ocean far southeast of the cape in a successful test. The 5,500-mile missile was first successfully fired on Dec. 17.

Photographers were severely handicapped several weeks ago when the Air Force clamped on new restrictions which had the effect of making the lensmen move their cameras back an additional three miles, placing them some eight miles from the launching pads.

From the newsmen's standpoint, the security clampdown comes at a particularly bad time, since another satellite attempt is expected next week, probably on Wednesday or Thursday — or maybe even sooner.

## Lincoln Lines Ready to Roll

Expect Union Members  
to Ratify Agreement  
Today as Strike Ends

Production lines at the Wixom Lincoln Division plant were expected to roll again Monday as the union and company reached a strike settlement Friday afternoon.

Members of Local 36 UAW were scheduled to meet today at 2 to ratify terms of the agreement.

The strike began Monday afternoon when 2,700 workers walked off their jobs in protest against rates of pay and job classifications.

The new plant, located west of Wisconsin road and north of Grand River avenue (U.S. 16), assembles Lincolns, Continentals and Thunderbirds.

A spokesman for the Lincoln-Mercury Division of the Ford Motor Co. said the strike caused a production loss of 700 Lincoln and Continental cars. There was no estimate for the Thunderbirds.

## 2 Rocket Tests Focus Attention on Florida Cape

Increased AF Secrecy  
Alerts Reporters and  
Photographers

CAPE CANAVERAL, Fla., (INS) — Weary newsmen and photographers kept a close watch on the Cape Canaveral rocket test center today to make sure that the government does not surprise them with a "sneak" satellite launching.

Two big rockets — an Atlas intercontinental ballistic missile and a Navaho pilotless bomber — were triggered from the ultra secret cape yesterday in a space of four hours.

Both launchings were successful, but newsmen and photographers were nearly caught flat because of a switch in pre-launching procedures.

In the past, the Air Force has always hoisted a red warning ball over the cape when a launching was imminent. Yesterday, however, the ball was raised, then lowered—and while it was down, the Atlas and Navaho were fired in quick succession.

After recovering from the wild scramble that resulted, incensed newsmen called the Air Force public information office at Patrick Air Force Base for an explanation.

A prepared statement had been treaded which left little doubt that the purpose of the switch had been aimed at throwing newsmen off the track. It said in part:

"... The warning indicate procedure which has been under study was modified as planned and the red balls were lowered to preclude alerting unauthorized persons to the fact that a classified test launching was imminent."

**CONSTANT WATCH**  
The new procedure means that reporters will have to watch the cape constantly or run the risk of missing a "shoot."

Photographers were severely handicapped several weeks ago when the Air Force clamped on new restrictions which had the effect of making the lensmen move their cameras back an additional three miles, placing them some eight miles from the launching pads.

From the newsmen's standpoint, the security clampdown comes at a particularly bad time, since another satellite attempt is expected next week, probably on Wednesday or Thursday — or maybe even sooner.

## Policeman Slain in Bar Holdup

Detroit Officer Killed  
by Shotgun Blast After  
Walking In on Bandits

DETROIT (U-P) — Apparently walking in on a holdup, Policeman Donald W. Coulter, 33, was blasted to death with a sawed-off shotgun in a Detroit East Side bar today.

Police said two men apparently between 20 and 30 years of age ran out a rear door after fatally wounding the policeman. The blast caught Coulter in the head.

Coulter was a plain clothes patrolman assigned to a cruiser. Police said he was a friend of the bar owner and apparently stopped in there on route to work today. He was shot at 8:25 a.m.

A state-wide radio police alarm was broadcast immediately and road blocks set up throughout southeastern Michigan.

**Judges Still Checking  
Pot-O-Gold Answers**

Eager puzzle fans will have to wait another couple of days before hearing the outcome of last week's Pot-O-Gold puzzle. Our judges still are checking the more than 22,000 entries that came in. Because two errors are allowed, the checking goes much slower, and judges must be particularly careful now that the contest is nearing an end. We're almost certain to have the results tabulated on Monday.

### Doubled Intangibles Levy Aimed Mainly at Investor

## What Would Governor's New Tax Plans Cost You?

LANSING (U-P) — Chances are, Mr. Taxpayer, that you've been wondering what will happen to your tax bill if the Legislature goes along with Gov. Williams' plan to double the state tax on intangible properties.

All U.S. bonds, or state or municipal bonds, for example, are exempt from the intangibles tax. So are all pensions, if the pensioner paid no more than half the cost of financing it.

There is no tax either for nearly all non-profit organizations, credit unions, insurance companies, banks, trust companies and public utilities.

Who does pay then?

**PAID 45 PER CENT**  
Some 57,000 individuals paid about 45 per cent of the \$23,600,000 collected in Michigan intangible taxes last year. All these reaped an income of at least \$571 from their intangible properties or owned, non-income-producing prop-

erties having a par value of at least \$20,000.

Partnerships, corporations, fiduciaries and various financial institutions paid the rest.

**Income-producing intangibles**—like stocks and bonds—currently are taxed at 2½ per cent of their income. Non-income tangibles—like a growth stock on which no dividend is paid—are taxed at 10 cents per \$100.

Bank deposits and money are taxed at four cents per \$100 and bank shares at a 5½ mill rate, although banks themselves now absorb the tax on deposits.

Important to note is the fact that Michigan gives a \$20 yearly credit on your total intangibles tax.

**PAY NO TAX**  
Thus, if you collect \$500 in dividends or interest in a year you pay

no tax since 3½ per cent of \$500 is \$17.50. By bringing the tax rate to about the level of Ohio's intangibles tax, which the governor proposes, your tax on \$500 income would amount to \$5.

Someone who picks up \$3,000 annually from his stocks and bonds dividends now pays \$85 in taxes. Under the Ohio plan, he would pay \$130, allowing the same \$20 credit.

If you've got \$1,500 in bank deposits, the annual tax is 45 cents. At the Ohio level, it would amount to \$2.40.

Some other examples of the current tax and the possible changes if the raise is approved (with Michigan's \$20 tax credit):

1. Mr. A. gets \$1,500 income from rent on property he owns. He pays no intangible tax now nor would he under the proposed increase. It's not counted as intangible property.

2. Mr. B. owns stock having a par value of \$25,000 but it produces

no income. Currently, his intangibles tax bill is \$5. At the Ohio level, it would rise to \$30.

**NO TAX DUE**  
3. Mr. C. has income from social security totaling \$1,000 and also collects a \$1,400 pension paid for by his employer. Neither at the present level or at the Ohio level would he pay any intangibles tax.

4. Mr. D. has \$5,000 in U.S. government bonds plus life insurance policies with a cash surrender value of \$12,000. Again, he is totally exempt.

5. Mr. E. has \$2,000 on deposit with a credit union, which pays him an annual dividend of \$30. No tax. If his income from the credit union surpassed \$571, he starts paying the tax, as he does on dividends from other investments.

# State Defense Costs Revealed

Michigan's Share Totals \$68,759,000 in Ike's New Military Program

WASHINGTON (INS) — Sen. Charles E. Potter (R-Mich.), and Rep. Gerald Ford (R-Mich.), announced today that Michigan's share of emergency military construction funds requested by President Eisenhower is \$68,759,000.

"This is part of the President's program to maintain present United States military superiority over the Soviets."

The funds include:

- \$27,510,000 for a SAGE system and SAC dispersal at K. I. Sawyer air base, Marquette.
- \$23,762,000 for SAC dispersal at Kinross air base, Sault Ste. Marie.
- \$17,487,000 for SAC dispersal at Selfridge air base, Mt. Clemens.

Michigan's share adds up to 13 per cent of the total military construction figure of \$520,000,000. President Eisenhower's total request for supplemental defense funds was one billion, 200 million dollars.

The President's emergency request also includes at least 104 million dollars for further financing of the Jupiter missile work now under way at the Chrysler plant.

# Decides Next Week on Woman's Death

A definite decision on the death of Mrs. Helen C. Henson, 57, of Hazel Park, will be made Monday or Tuesday by Chief Assistant Prosecutor George F. Taylor.

Taylor said that he still is not decided on the cause of her death Dec. 23 after studying an autopsy reported late yesterday from Dr. Malcolm C. Young, pathologist at William Beaumont Hospital.

Dr. Young said the housewife, who was found by her husband dead on his kitchen floor, died of loss of blood from 13 scalp wounds. He said brain damage was not the cause of death.

Taylor said he will confer over the weekend with Dr. Richard E. Olsen, pathologist at St. Joseph Mercy Hospital.

By E. H. SIMS

Why does the first hard freeze of the winter often prove more damaging to plants and shrubbery, and some trees, than later, more severe freezes?

The first hard freeze of the winter, especially if it comes early, often catches plants and trees unprepared, so to speak. In some trees the growth cycle is proceeding and the sudden freeze sometimes kills these trees.

After the first few cold waves plants and trees are dormant and can often withstand a severe freeze better than earlier in the season. In areas where tropical plants and trees are precariously surviving, covering with cloth or otherwise protecting the plant or shrub, especially against the earliest freezes, will sometimes bring the prize plant or tree through the winter safely.

**Pigs' Knuckles Blamed**  
CHATTANOOGA, Tenn. (AP)—Minutes after three pieces of fire fighting equipment, including a hook and ladder truck, answered a call, a fire officer radioed headquarters everything was under control. Just a skillet of over-heated pigs' knuckles, he reported.

## Margaret Is Making Her Comeback at 20

By EARL WILSON  
NEW YORK—Margaret O'Brien started work at 3½ and was a washed-up has-been at 15—but her 20th birthday on Jan. 15 will find her on a great comeback, due to TV, and in a husband-snatching mood.

WILSON

"You should get married," I dared tell her the other day when she mentioned that some directors still think of her as pig-tailed. "That would make an impression on them. Besides," I added, "it wouldn't be a bad story."

"I intend to!" Margaret, looking a little like Vivian Leigh or Jean Simmons, flashed a shy smile across the hotel suite. Margaret was on her own now; her always attentive mother was in the next room, with the door closed. "Maybe when I'm about 24," she said. "I was about 18 before I started going out."

"Now I think I like one boy, and after about a month, I don't like him. When I was 16, I had a crush on Burt Lancaster. I hated to go to the dentist for the braces on my teeth, but when I saw him going to the same dentist, I guess I even liked to go!"

She wore a chignon and a dress with very little back, and they say she looks real shapely in a bathing suit.

"But you can't rush the looking older," the wise child said. In her washed-up, pre-comeback period, she studied... and waited to age a little. "Do you have to study much? Weren't you a born actress?" I asked.

"Nobody's a born actress, every actress is made!" Her voice took on fire. "You have to grow up in the business, or study hard. Then there are the people behind you. Everybody has somebody. Tony Perkins had his father. Susan Strasberg had her parents."

Everybody knows that in Margaret's case it was her mother.

### THE WEEKEND WINDUP

Gloria Swanson's miffed at an admirer who gave her a Rolls Royce, because he didn't include a chauffeur, and it's costing her \$90 a week. Meredith Willson, author-composer of "Music Man," introduces himself to customers waiting at the theater box office and says, "Gee, I'm mighty glad you're buying tickets!" One of the King Sisters lost her purse in a N.Y. taxi, got it back in the mail—complete with the \$640 and gold keys... Myron Cohen writes he's not enjoying Miami Beach quite as much this year. His wife hid his binoculars... That's earl, brother.

(Copyright 1958)

## Johnnie Ray to Learn if His Hearing Restored

NEW YORK (AP)—Singer Johnnie Ray, who underwent a major ear operation, will know next week whether his hearing has been restored.

Ray celebrated his 31st birthday yesterday in Mt. Sinai Hospital, where surgery was performed Tuesday to make a new opening in the ear to replace a nonfunctioning natural channel.

Ray has been hard of hearing since childhood.

## Chrome-Ore Output Up

ANKARA—Turkey's chrome-ore reserves are estimated at 3,500,000 metric tons. Some 550,000 tons of chrome ore were mined in 1956, an increase of 100,000 tons over 1955.

Four of five British automobiles are produced for export markets.

## ST. FRANCIS BIRD FEEDER

19" HIGH  
PATTERN 444

THIS GARDEN FIGURE is cut out of wood, painted in soft browns and mounted in a charming shelter that has a bin to be filled with grain. Pattern 444, which gives actual-size guides and directions, is 25 cents. This pattern also is included in packet 32 which is a set of five bird house and feeder patterns all for \$1. Orders under \$1 add 10 cents service charge. The Pontiac Press Pattern Dept., Bedford Hills, New York.

The U.S. Department of Commerce reports that the nation now uses 262 billion gallons of water a day and that by 1975 daily water consumption will probably total 453 billion gallons, almost double today's figure.

## NEWS VIEWS

Well, with the holidays behind us, and the pace slowed up a bit... I guess it's safe to pass on a bit of warning about income taxes. We won't have the final reckoning with the "revenuers" till about April... but it's kind of a good idea to get your records together before you have to do it like a fellow with boxing gloves picking up confetti in a high wind.

Uncle Sam has no objections to us taking the "deducts" we have coming... but you've got to support your claims with some sort of records. Now's the time to make sure you have those records handy. You might even help yourself by making sure you know all the deductions you're entitled to. As old Ben Franklin said... "A penny saved is a penny earned."

A lady in here says there's nothing so comforting as the patter of children's feet around the house... because when it stops you know they're up to some mischief. Well, while everything's nice and quiet for a moment, we'd like to remind you that we have solved real estate problems for literally thousands of people in the Pontiac area, and we'd like to do the same thing for you. We specialize in residential properties in this area, and businesses and commercial properties throughout the State. Remember, Realtor Patridge is the "bird" to see. 1050 W. Huron St. FE 4-3581.

## Visit Models in Winter, Too

Improved modern heating is one of the big advantages of today's new homes and the prospective buyer has more opportunities than ever to see it in action in model homes.

He'll find it rewarding to make a midwinter visit to one or more model dwellings even though his personal situation may keep him out of the market for some months to come, says the Gas Appliance Manufacturers Association.

As he steps out of the winter winds, the heating system will be likely to capture his attention more dramatically than it would on a warm-weather inspection trip. And there's also the opportunity to note a dwelling's basic lines, and its neighborhood, under conditions more demanding and less flattering, than might be the case amid summer greenery.

To be sure, reminds GAMA, heating conditions in a home on display aren't quite what they would be in ordinary occupancy. People are moving in and out all day, and the temperature may be deliberately kept down to avoid discomfort for those in heavy outer garments. Still, there's opportunity to see and feel the effectiveness of modern heating plants, the systems through which heat is distributed and the automatic controls that regulate the process.

In the case of new homes with gas-fueled furnaces or boilers, the compactness of the heating equipment and the noiselessness of its operation will be particular points of interest, it is stated.

While the technical features for efficiency and durability may be harder for the layman to grasp, realty salesmen at model homes can help explain many of these. Some manufacturers and distributors are providing literature for this purpose.

## Couples Hoard Space

A good many young couples buying houses today are "space hoarders." They buy a larger house than they need at first. The builder leaves one or more rooms unfinished—stud, rafters and sub-flooring not covered with finishing materials. As the family grows, the young parents install wood paneling, flooring and the rest of the interior finish to carry out their own decorative ideas.

## Check Roof Supports

If a home buyer expects to make future changes in the interior layout of his house, it is best to buy one with trussed rafters or with plank-and-beam roof framing carried on a few posts. Interior walls may be arranged as desired, since they are not required to support the roof, the National Lumber Manufacturers Association points out.

To achieve a feeling of spaciousness, choose carpeting and wall color in the same color family, blend to suit.

THE SLOT CONSTRUCTION of these shelves makes them easy to put together and unusually strong. Pattern 209 which gives a wide variety of designs and actual-size cutting guides for shaped parts, is 25 cents. This pattern for shelves also is included in packet 20 which is a set of five patterns for living room furnishings all for \$1. Add 10c service charge for orders under \$1.  
Pontiac Press Pattern Dept.  
Bedford Hills, New York.

## Pink Walls Are Flattering

The beauty of pink for your wall coating depends largely on what color accents are used with it. Soft pinks are more flattering than the harder strident shades. A living room done recently by a well-known decorator had carpeting in a shade slightly deeper than the walls. One sofa was upholstered in turquoise silk with another sofa and several chairs in pale gray. The window draperies were pale gray striped in turquoise.

Cushion-edge at the facial edge. Ceramic tile that does not have this curvature is called "square-edge."

## This Is an AUTOCLAVED Concrete Block

Which Has Been High  
Pressure Steam Cured

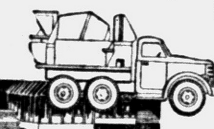

... and Here's Why an  
AUTOCLAVED Block  
Is a Superior Block!

They have been subjected to 350 steam at 100% humidity under 125 psi. This produces a superior lightweight block which is stronger permanently. It stabilizes the strength of the block and reduces shrinkage and expansion... eliminating cracked walls. Remember Boice is the place in Oakland County that gives you high pressure steam cured blocks

## Seal Porous Floors

If your kitchen floor covering has reached the age where it has become porous, you can give it a new look with self-polishing vinyl floor wax. This new wax tends to seal the pores, give the flooring a highly water repellent, scuff resistant surface, in addition to a bright, long lasting shine. Be sure your flooring is as clean as you can get it before starting its rejuvenation treatment.

## New Draftless Windows

The tricky business of building a house window so it won't be drafty or leaky around the frame is simplified greatly with a new series of aluminum windows for residential use introduced by Ceco Steel Products Corp., Chicago. They have

fins or flanges around the sides, where the windows come in variously nailed or screwed, without need for additional trim or hard-izes.
