Grizz Facts: A look at rising graduation rates

For the first time on record, more than half of an OU entering class has graduated within six years. This rate, set by the 2012 student cohort, exceeds the previous record rate by 8 percent. The five-year graduation rate for the 2013 cohort and the four-year rate for the 2014 cohort have set similar records.

These increases can be attributed to multiple student success initiatives focused on persistence and graduation, as well as continued emphasis on the importance of early and sustained credit accumulation.
