

Cheered by Southland Gifts

COCONUTS FROM GRANDPA — Parcel postman William A. Weaver of 20 W. Cornell St. is delivering two coconuts to Mark Newman of by his grandfather, the Rev. L. A. Parent, pastor 360 Going St. The coconuts were sent to Mark

of the Apostolic Church of God, who is attending a church convention in Florida. Mr. Weaver has been with the Pontiac Post Office for more than 28 years.

Florida Visitor Remembers

Keeps His Promise to Injured Grandson

"Send me a coconut," called out Mark Newman to his grandfather, the Rev. L. A. Parent, as he left for Florida to attend a church convention a few weeks ago.

"I'll mail you two," promised grandfather Parent, anxious to please Mark who is confined to a couch with his leg and foot in a cast.

Five-year-old Mark was hit by a truck last November when on his way home from kindergarten at the McConnell School. His leg was broken just below the hip.

AFL-CIO Maps Overseas Help

Asks U. S. to Provide \$2 Billion Annually for Undeveloped Nations

FROM OUR NEWS WIRES

MIAMI BEACH, Fla. — The AFL-CIO Executive Council proposed today a five-point foreign economic program calling for two billion dollars a year in aid to undeveloped countries.

The council adopted a statement on foreign economic policy declaring that the \$625 million requested by President Eisenhower for a development loan fund to aid poorer countries "is inadequate even to begin to do the necessary job."

The AFL-CIO governing body also called for an extension of the reciprocal trade agreement program for "at least five years" and declared that the President should be given authority to negotiate further tariff cuts on a multilateral basis.

However, the council said that continued authority should be given the President to raise tariffs to (Continued on Page 2, Col. 7)

He was in traction in the hospital until the day before Christmas when he was taken home. On Valentine's Day, his doctor will remove the cast and Mark will be on crutches.

And grandfather Parent kept his promise. Two coconuts weighing nine pounds each were picked by Mark's uncle, Roy Parent, in Miami, and mailed to Mark. When they arrived in the Pontiac Post Office, parcel post man William A. Weaver of 20 W. Cornell St. delivered them just as they grew on the tree.

The brownish green outer casing of husk, similar to that of the walnut, was three inches thick, and so hard, Mark's mother used a hatchet to break the shell.

The Newmans have three other children, Daniel who is nine; Ida Kay, three-years-old and Timothy just four months.

Mark's father is employed at the downtown Post Office.

Churchill Plans Visit to Eisenhower in April

NICE, France (INS) — Sir Winston Churchill has decided to visit President Eisenhower next April. Churchill's secretary announced at Roquebrune that the former British prime minister definitely had accepted President Eisenhower's invitation.

Work Continues on Atlas ICBM

Air Force Redoubles Efforts With Missile After Failure

CAPE CANAVERAL, Fla. (INS) — Three failures in five tests spurred the Air Force today to redouble its efforts in removing flaws from its 5,000-mile Atlas intercontinental ballistic missile.

Obviously concerned, officials sought to determine what went wrong when an Atlas blew up in a cloudbank yesterday two minutes and 15 seconds after what appeared to be a perfect launching.

The Air Force explained later that the missile "destroyed itself shortly after completion of the powered phase of its flight," but gave no further details.

The only discernible evidence was a puff of smoke soon after the takeoff at 2:37 p.m. EST, indicating a "burnout."

To observers, this meant the missile was not ignited long enough to propel the missile on its flight. If it had burned properly, it was pointed out, no fuel would have been left, and hence, no explosion.

Officials said they doubted any of the parts could be retrieved since the failure occurred so far over the Atlantic Ocean that the debris would be widely dispersed in deep water.

Shrouded in a 100-foot-high fireball, the bullet-shaped monster soared beautifully for almost three minutes before it slipped behind a cloud and vanished in smoke.

Yesterday's test, however, was more successful than two other flights. In June and in September, the Atlas was destroyed shortly after streaking from its launching pad. On Dec. 17 and on Jan. 10, it was flown successfully.

The Atlas figures prominently in the nation's space-age plans. Together with the Titan, they form the long-range missile weapons in the Air Force arsenal.

GE Executive Named to Head Space Agency

McElroy Believes AF Should Provide Crews for Future Space Ships

WASHINGTON (AP) — Secretary of Defense McElroy has picked a boss for outer space projects and handed the new Advanced Research Projects Agency its assignment of developing weapons of tomorrow.

He also has decided tentatively that the Air Force should provide crews for any space ships of the future.

Named to head the ARPA was Roy W. Johnson, 52, vice president of the General Electric Co., where he formerly was in charge of electronics business.

These developments yesterday indicated that the long-delayed Pentagon space agency finally was getting ready for business — the development of such weapons as military satellites, antimissile missiles and space platforms.

Johnson's appointment came after a weeks-long quest for some executive who would take on the job. He will take over the ARPA post on April 1, when he will resign from General Electric. Johnson lives in Stamford, Conn., and works in New York.

McElroy said Johnson's salary (Continued on Page 2, Col. 3)

Area Residents Stay in Deepfreeze

TODAY'S TEMPERATURES
Midnight . . . 15 9 a.m. . . . 5
4 a.m. . . . 10 10 a.m. . . . 6
6 a.m. . . . 7 11 a.m. . . . 9
8 a.m. . . . 4 12 m. . . . 13

Pontiac area residents found themselves in deep-freeze again today; with cold continuing tonight, and slight relief tomorrow.

The U.S. Weather Bureau's forecast is partly cloudy and cold with a few snow flurries tonight and tomorrow.

The low tonight will be 7 degrees and the high tomorrow near 20. The outlook for Monday is partly cloudy and continued cold.

The weather bureau's five-day forecast predicts temperatures will average around eight degrees below the normal high of 33 and normal low of 19.

The cold weather will continue with only minor day-to-day changes. Snow flurries are expected daily.

The lowest recorded temperature at the Pontiac State Hospital preceding 8 a.m. was 4. At 1 p.m. the reading in downtown Pontiac was 15.

Enough Cyanide to Kill 500,000 Lost in England

LIVERPOOL, England (AP) — A barrel containing enough cyanide to kill half a million persons has been lost along a 14-mile road. Police said today the cyanide is in pellets that children might mistake for candy.

The barrel rolled off a truck sometime during a trip from the Liverpool docks to a factory at Widnes. A yard-by-yard search of the road failed to discover it.

Police warned that the finder should not even touch the barrel. "Your fingernails could carry enough to kill you," an officer said.

'The Egg and I' Creator Dies

Cancer Takes the Life of 51-Year-Old Author Betty MacDonald

SEATTLE (INS) — Death wrote "thirty" to the fabulous literary career of Betty MacDonald, author of "The Egg and I," late last night at Seattle's Maynard Hospital.

Mrs. MacDonald, 51, who parlayed a deft writer's touch with vignettes from her life as wife and mother on a chicken farm to bring a twinkle of humor into the lives of millions, died of cancer which had plagued her for months. She had been in a coma for the past week.

At her bedside were her husband, Donald, her two daughters, Mrs. Robert Evans and Mrs. Gerald Kiel, and three sisters. She is also survived by a brother and seven grandchildren.

Mrs. MacDonald was born in Boulder, Colo., in 1907. Her father, Darsie C. Bard, was a mining engineer, and the family moved around a great deal during Mrs. MacDonald's early childhood.

But in 1916, they moved to Seattle, and she lived in and near Seattle for most of the remainder of her life. She was a graduate of Roosevelt High School in Seattle and attended the University of Washington, where she was a member of Alpha Phi sorority.

Reigns at MSU J-Hop

MSU QUEEN FROM BIRMINGHAM — Denise Donmoyer, 19, of Birmingham, was chosen "Miss MSU" from a group of seven finalists at East Lansing last night. The MSU sophomore will be crowned tonight at the J-Hop dance on the campus. She is a daughter of Mr. and Mrs. William L. Donmoyer, of 32474 Sheridan Dr. Miss Donmoyer is a swimmer, and one of State's outstanding ballet swimmers.

Firm Policy on Trouble-Makers

Expelling of Students Old Story in Pontiac

By HAROLD S. COHEN

The policy adopted Friday by the New York Board of Education is an old story in Pontiac, school officials disclosed today.

Francis Staley, principal of Pontiac Northern High School, said he has been expelling incorrigible students since he took the post.

Dr. Dana P. Whitmer, superintendent, said the policy goes back at least 30 years.

Both men pointed out, however, that Pontiac rarely has the type of violence uncovered by a grand jury in New York. Neither could remember a case of rape, armed assault or a similar crime.

However, Pontiac has had students whose poor attendance record and disruption of class discipline made expulsion necessary.

"We have about a half dozen (Continued on Page 2, Col. 8)

Italy Struck by Series of Volcanic Eruptions

CATANIA, Sicily (INS) — Italy was struck today by a series of volcanic eruptions and a violent earthquake.

No casualties were reported.

Stromboli belched flames and lava every six minutes but there was no danger to inhabitants on the volcanic island.

Authorities Act After Outbreak of Youth Crimes

Troublemaking Pupils Dropped From Classes for Indefinite Period

NEW YORK (AP) — The Board of Education's new policy of ousting violent students to protect the innocent resulted yesterday in the suspension of at least 644 pupils.

In elementary, junior and vocational high schools, 544 students were suspended. At least 100 others were suspended from academic high schools. This last figure, however, was incomplete because many of the schools operated sessions well into the afternoon and after the suspension total was released.

Both boys and girls were included in the ouster but the announcement gave no numerical breakdown by sex. Nor was a breakdown given by race. The suspensions presumably are for an indefinite period.

There are 800,000 students enrolled in the elementary, junior and vocational high schools. Before yesterday, 219 students were on suspension from these schools.

A parallel figure for academic high schools, where more than 150,000 students are enrolled, was not available.

The largest exodus was from Brooklyn, scene of many of the recent school rapes, stabbings and disorders in which both Negro and white students were involved.

Aside from academic high school students, 339 students were suspended in Brooklyn, 113 in Manhattan, 51 in the Bronx, 36 in Queens and 5 in Staten Island.

SWIFT FOLLOW UP

The action was a swift implementation of a decision taken by the Board of Education Thursday night. The board at that time adopted a resolution authorizing suspension of any pupils "charged with violation of law involving violence or insubordination."

Schools Supt. William Jansen, spelling out in detail the categories of pupils to which the new policy applied, made no reference to an actual law violation as a precondition of suspension.

He said the policy would apply (Continued on Page 2, Col. 2)

Our Language Also Expanding

Space Age Brings Many New Words

By JOHN A. BARBOUR
AP Science Reporter

NEW YORK (AP) — Today's parent probably feels that his old world is crumbling about him.

His children plan futuristic careers in the sciences or engineering. Headlines tell of rockets that trip away from the earth at speeds 600 times faster than the law allows on the streets of his town.

To help keep up with the wild space talk that fills the modern world, we've compiled this glossary of terms. Let's look at space flight definitions.

Rocket — A rocket is designed to break into space and leave the atmosphere of the earth behind.

Ordinary gasoline and jet engines breathe air to get the oxygen to burn their fuels—much as you'd fan air into a charcoal fire.

A rocket engine carries its own oxygen, as well as its fuel, and so

can travel in places where ordinary engines would smother for lack of air.

A rocket is usually composed of engine, fuel tanks and instruments. It can be used for studying upper atmosphere and space or perhaps to launch a satellite.

When a rocket carries an explosive warhead, it is more correct to call it a missile.

Countdown — In liquid fuel engines especially, loading the fuel and checking the various valves, pipes and instruments before firing is a long, careful job.

In solid fuel rockets considerably less preparation is needed before firing.

In rocket preparations countdowns are conducted by the clock. The clock provides a ready measure of the expected time before firing and still allows each item

to be checked off as it is completed.

Blast off or scrub — When the countdown hits zero, everything is ready. The hours of checking are over. Pressure is brought up in the fuel tanks to force the fuel out, and the engine is ignited.

When the countdown is cancelled

anytime before blastoff, rocketmen borrow an air force slang expression to say the mission is "scrubbed," or washed out.

ICBM — This stands as most people now know for intercontinental ballistic missile. It is a rocket carrying an explosive warhead that can reach some 5,500 miles, spanning continents.

The Air Force has two planned. The Titan, built by Martin Co., is due soon out of the design stage. The Atlas, built by Convair, has been successfully fired at short range.

The ICBM, like an artillery shell, is fired into the air at the proper angle so it will come down on a specific target, much as a football player throws a long pass.

One difference between the artillery shell and the ICBM is the (Continued on Page 2, Col. 4)

Court Returns Dusky Diana to Owners

Horse Freed of Legal Shackles

The legal shackles are off Dusky Diana — at least for the time being.

Freed Friday on an order signed by Oakland County Circuit Judge George B. Hartrick, the 10-year-

old trotter race horse today neighs a sigh of freedom in her new stable at Northville Downs race track.

Judge Hartrick ordered Sheriff

Frank W. Irons to return the mare to its Detroit owners Hoyt L. Wilson, 28, and William Young, 33, after the defendant in a writ of replevin/suit failed to post a \$300 surety bond on time.

GREAT TO BE FREE — Dusky Diana, a 10-year-old trotter race horse stands between her Detroit owners Hoyt L. Wilson (l.) and William Young, after the horse was returned to the pair under an order signed by Circuit Judge George B. Hartrick.

Under the writ, she was trucked off to the farm of Jerome Geisler, special sheriff's deputy, at 5630 Wing Lake Rd., Bloomfield Township, where she remained a legal "prisoner" until today.

But the law courts haven't heard the last of Dusky. Attorney for Simms, Robert B. Delaney, of Plymouth, said he would move Monday to dismiss the writ claiming it was invalid. "We're by no means licked," he insisted.

Delaney said his client also would sue for the \$1,201, and threatened legal action against Sheriff Irons claiming he held the mare over a statutory 24-hour limit.

Meantime, Wilson and Young's counsel, John McWilliams, of Dearborn, threatened further legal action to collect \$1,000 in back race earnings Simms reportedly owes the pair.

Meanwhile, back at the track, "Dusky has put on her legal blinders to all this. She's 'fed up' and ready to be trained for another season — win, place or show."

Chapter 33

Lucy told the doctor that she had cooked the dinner.

"And what was it? In detail," he asked.

"Mushroom soup. Curried chicken and rice. Syllabubs. A savory of chicken livers in bacon."

"Canapes Diane," said Dr. Quimper unexpectedly.

"Yes, Canapes Diane."

"All right—let's go through it. Mushroom Soup—out of a tin, I suppose?"

"Certainly not, I made it."

"You made it. Out of what?"

"Half a pound of mushrooms, chicken stock, milk, a roux of butter and flour, and lemon juice."

"Ah, and one's supposed to say it must have been the mushrooms?"

"It wasn't the mushrooms. I had some of the soup myself and I'm quite all right."

"Yes, you're quite all right. I hadn't forgotten that."

Lucy flushed.

"If you mean—" "I don't mean. You're a highly intelligent girl. You'd be groaning upstairs, too. If I'd meant what you thought I meant. Anyway, I know all about you. I've taken the trouble to find out."

"Why on earth did you do that?" Dr. Quimper's lips were set in a grim line.

"Because I'm making it my business to find out about the people who come here and settle themselves in. You're a bona fide young woman who does this particular job for a livelihood, and you seem never to have had any contact with the Crackenthorpe family previous to coming here. So you're not a girl friend of either Cedric, Harold, or Alfred—helping them to do a bit of dirty work."

"Do you really think—" "I think quite a lot of things," said Quimper. "But I have to be careful. That's the worst of being a doctor. Now let's get on. Curried chicken. Did you have some of that?"

"No, when you've cooked a curry, you've dined off the smell, I find. I tasted it, of course. I had soup and some syllabub."

"How did you serve the syllabub?"

"In individual glasses."

"Now then, how much of all this is cleared up?"

"If you mean washing up, everything was washed up and put away."

Dr. Quimper groaned.

"There's such a thing as being over zealous," he said.

"Yes, I can see that, as things have turned out, but there it is, I'm afraid."

"What do you have still?"

"There's some of the curried left—in a bowl in the larder. I was planning to use it as a basis for mulligatawny soup this evening. There's some mushroom soup left, too. No syllabub and none of the savory."

"I'll take the curried and the soup. What about chutney? Did they have chutney with it?"

"Yes. In one of those stone jars."

"I'll have some of that, too."

He rose: "I'll go up and have a look at them again. After that, can you hold the fort until morning. Keep an eye on them all? I can have a nurse round, with full instructions, by eight o'clock."

"I wish you'd tell me straight out—do you think it's food poisoning—or—or, well, poisoning."

"I've told you already. Doctors can't think—they have to be sure. If there's a positive result from these food specimens I can go ahead. Otherwise—"

"Otherwise?" Lucy repeated.

Dr. Quimper laid a hand on her shoulder.

"Look after two people in particular," he said. "Look after Emma. I'm not going to have anything happen to Emma."

There was emotion in his voice that could not be disguised. "She's not even begun to live yet," he said. "And you know, people like Emma Crackenthorpe are the salt of the earth... Emma—well, Emma means a lot to me. I've never told her so—but I shall. Look after Emma."

"You bet I will," said Lucy.

"And look after the old man. I can't say that he's ever been my favorite patient—but he is my patient, and I'm damned if I'm going to let him be hustled out of the world because one or other of his unpleasant sons—or all three of them, maybe—want him out of the way so that they can handle his money."

He threw her a sudden quizzical glance.

"There," he said. "I've opened my mouth too wide. But keep your eyes skinned, there's a good girl, and incidentally, keep your mouth shut."

Inspector Bacon was looking up.

"Arsenic?" he said. "Arsenic?"

"Yes. It was in the curried. Here's the rest of the curried—for your fellow to have a go at. I've only done a very rough test on a little of it, but the result was quite definite."

"So there's a poisoner at work?"

"It would seem so," said Dr. Quimper drily.

"And they're all affected, you say except that Miss Eyesbarrow."

"Except Miss Eyesbarrow."

THE BERRYS

"Looks a bit fishy for her..." "What motive could she possibly have?"

"Might be barmy," suggested Bacon. "Seem all right, they do, sometimes, and yet all the time they're right off their rocker, so to speak."

"Miss Eyesbarrow isn't off her rocker. Speaking as a medical man, Miss Eyesbarrow is as sane as you or I are. If Miss Eyesbarrow is feeding the family arsenic in their curried, she's doing it for a reason. Moreover, being a highly intelligent young woman, she'd be careful not to be the only one affected what she'd do, what any intelligent poisoner would do, would be to eat a very little of the poisoned curried, and then exaggerate the symptoms."

"And then you wouldn't be able to tell?"

"That she'd had less than the others? Probably not. People don't all react alike to poisons anyway—the same amount will upset some people more than others. Of course," added Dr. Quimper cheerfully, "once the patient's dead, you can estimate fairly closely how much was taken."

"Then it might be—" Inspector Bacon paused to consolidate his ideas. "It might be that, there's one of the family now whose making more fuss than he need—someone who you might say is in with the rest so as to avoid arousing suspicion. How's that?"

"The idea has already occurred to me. That's why I'm reporting to you. It's in your hands now. I've got a nurse on the job that I can trust, but she can't be everywhere at once. In my opinion, nobody's had enough to cause death."

"Made a mistake, the poisoner did?"

"No. It seems to me more likely that the idea was to put enough in the curried to cause signs of food poisoning—for which probably the mushrooms would be blamed. People are always obsessed with the idea of mushroom poisoning. Then one person would probably take a turn for the worse and die."

"Because he'd been given a second dose?"

"That's why I'm reporting to you at once, and why I've put a special nurse on the job."

"She knows about the arsenic?"

"Of course. She knows and so does Miss Eyesbarrow. You know your own job best, of course, but if I were you, I'd get up there and make it quite clear to them all that they're suffering from arsenic poisoning. That will probably put the fear of the Lord into our murderer and he won't dare to carry out his plan. He's probably been banking on the food poisoning theory."

Cities Also Spending More

Cities Spending Much More as Standard of Living Rises

By ROGER LANE
AP Lansing Correspondent
(Seventh in a series of articles on municipal problems)

Just as the American standard of living has risen to unprecedented heights for individuals and families, so it has for cities.

This fact combined with a parallel rise in the cost of living plus population growth go far toward explaining the dizzy climb in municipal spending in the last 10 years.

For a family, the higher living standard may mean a finer home, a bigger automobile, a summer cottage, more steaks on the table, a fur coat and automatic dishwasher for mother and a bike for each child.

For a city, it means bigger, better equipped and higher paid fire and police forces, more parking space, wider boulevards and a more elaborate and costly city hospital set up.

It also means special treatment of children to cut down tooth decay, tuberculosis testing programs, quicker plowing after a snow, more supervised play at parks, larger sewers for the exhaust from automatic clothes and dish washers, a bigger airport, slum clearance and new welfare programs.

At Flint, a study of selected services showed costs in 1956 were up 4.2 times over 1940. Police salaries, for a larger force, were five times the level of 18 years before.

This budget year, Saginaw is putting by more than \$300,000 for employee pensions, an amount equal to about one-third of the entire property tax levy of 10 years ago.

The pattern of rising demand on the city treasury has varied little in the large outstate cities.

You think of property tax when you think of city spending—and no wonder since this source remains the biggest single revenue produced.

Some 25 years ago the proportion of city revenue derived from property was estimated as high as 80 per cent. That was when residents were voting to cut back property taxing powers of many cities.

Now, about one-half of city revenues comes from property taxes in Battle Creek, Muskegon, Sault Ste. Marie and a good many other cities. The proportion is

lower in some places, running about 38 per cent in Saginaw.

Most cities receive roughly one-third of revenues from taxes and fees collected by the state and shared locally. These are taxes on sales, gasoline, motor vehicles, intangible property and liquor license fees.

Still, property taxes are a sore point. The burden is felt the same by home owners and renters, who pay indirectly in higher rent.

Informed critics of residential property taxation procedures have a byword—"inequity." They are talking about assessment practices, especially outside cities.

Reviewing authorities nearly always multiply the original assessment—in rare cases as much as five times although usually in the city by one and a fraction. You're hit hard at this point if the assessment is too high to begin with.

(NEXT—INDUSTRY MAKES A BIG DIFFERENCE)

New York Police Say Juvenile Arrests Up

NEW YORK (AP)—The police department reports a 13.3 per cent increase in juvenile arrests in New York City in 1957 over the previous year.

The department's annual report, made yesterday, showed that arrests for all crimes, both adult and juvenile, increased 3.2 per cent.

Driver Fined \$150 for Drunk-Plowing

STATELINE, Nev. (AP)—Drunk plowing cost a California snowplow driver a \$150 fine and his job.

Harry O. Darrington, 31, told Justice Ellsworth Chappel yesterday he had "one too many martinis" when he drove across the state line for a warmup drink at a Lake Tahoe tavern Sunday. A Nevada highway patrolman nabbed him as he plowed back toward California. He was employed by the California Highway Department.

In about 1942 only 22 oil refineries were producing 100-octane gasoline or its components. Now there are more than 100 modern plants in the U.S. engaged in producing the fuel.

A new Havana hotel boasts a stage curtain of steam and one theaters-restaurant which has a of rain.

Reflections

LINCOLN'S BIRTHDAY

April 8, 1861 Lincoln told Gov. Andrew Curtin of Pennsylvania, "I think the necessity of being READY increases. Look at it—". I believe this short quotation sums up Abe Lincoln from early boyhood to the culmination of his career.

There was every reason for Abe Lincoln to have been just another human being. His poverty is well known—only dirt for a floor in his log cabin, what few dollars there were went for staples, certainly not for expensive books and yet Abe became one of the most beloved men in our United States. Abe anticipated chaos in the South, prepared for it; his plans would have smoothly, orderly reconstructed the war shattered land of the South.

As you hang up your flag to honor the birth of this great, noble man think of the compassion he held for all mankind.

Learn How to Ride With the Tide

Be Adaptable to Live Successfully

By JOSEPHINE LOWMAN
Science teaches us that life must adapt to its environment if it is to survive successfully. Some forms of life can live only in fresh wa-

ter, others in shallow ocean beds, some on high mountains, some in northern forests and others on plains, in woodlands or even in the icy wastes of Antarctica.

Some species seem to be able to live only in one environment while others can survive in many. The most successful species are able to adapt themselves to the widest range of conditions.

If some accident happens to change one environment the restricted species die out while the more adaptable ones simply move over to another of nature's

living rooms. They are able to adapt to change circumstance.

So it is with people! Some are much more pliable than others. Some can live happily anywhere while others are only satisfied in a large city or a small town. Some hate or like wind, others hot weather and still others snow.

So many folks are so tied to their environment that some large companies hesitate to employ those who come from a drastically different part of the country. However, cars and superhighways and planes have made this less true today than it used to be.

MODERN PRESSURE

Adaptation to brand new living conditions is part of the pressure of modern living. Any man or woman lives most easily in the place he or she likes best. Therefore it seems wise to weigh this in planning your life.

However, much more important than adapting to the place in which we live is the ability to adjust to the things which happen to us in daily living, to the intimate conditions in which we live. The test of truly successful living is the ability to adapt to a change in physical condition or financial state and even more to the loss of one we loved.

BUT, many folks find it difficult to adjust themselves to the most mundane changes. In order to live gallantly, to build a successful marriage or home, or to succeed in any of our personal relationships, we must be adaptable.

Once you stop fighting the change it sometimes turns out to be a blessing, or at least you may discover that it has some advantages. Anyway, it makes life much more pleasant for you and for those who know you if you will ride with the tide.

Concert by Eger Players Shows Brilliant Artistry

By MARY LOUISE LINDQUIST
A magnificent display of artistry and brilliant technique was experienced by concert-goers who heard the Eger Players last night at the Waterford Township Civic Music Association concert. A program of such dynamic contrasts and beautiful tonal qualities is rare indeed.

The ensemble consists of French horn, piano, violin and cello. The director of the group is Joseph Eger, America's foremost French hornist, with Herbert Rogers at the piano, Dixie Blackstone, violin, and Howard Colf, cello.

Each member of the ensemble is an artist with great ability, and blends his talent with sensitivity and respect for the expression of the various types and periods of music.

The program opened with violin and cello blending their tones in a delicately clear number by Handel entitled "Pavane." Brahms' lovely "Horn Trio in E flat, Opus 40" followed with great contrast. The soft, melodious beginning of the horn was repeated by the violin and piano. The trio consists of four movements that offer much variety of style and tone. The blend of the instruments was exquisite.

After an intermission, Mr. Colf, the cellist, played two very charming dances. The lilting melodies and rhythms of these numbers

were portrayed with a sensitive and gentle style.

STRENGTH AND CLARITY

It was a great pleasure, after hearing unsurpassed accompaniments by Herbert Rogers, to hear him play Chopin's "Scherzo in C Sharp Minor." Mr. Rogers, who has had two successful concert tours in Europe, plays with superb strength and clarity of tone. His consecutive octaves and runs were equally well done.

For her solo appearance on her violin, Miss Blackstone chose a Fritz Kreisler composition, "Prelude and Allegro in the Style of Pugnani." The "Prelude," majestic in scope, is a series of sweeping strokes of the bow covering the whole range of the instrument. It is followed by the "Allegro" with a light style and mood.

Mr. Eger then played a group of three numbers transcribed for French horn. The haunting melody of the Schubert "Serenade," along with its sensitive accompaniment, will long be remembered.

"Two Pieces for Children," by the Hungarian composer Bartok, were transcriptions of folk melodies, containing the infectious song and dance rhythms common to this unornamented style.

For the final group, the entire ensemble gathered to play some Gershwin "Preludes" and the "Overture on Hebrew Themes" by Prokofiev.

Dear Abby....

Prospect in Mixed-Marriage: '...Lonely Road Each Sunday'

By ABIGAIL VAN BUREN
"DEAR ABBY: You must get lots of letters from young people who want to know what their chances for happiness are when they go into a mixed-marriage. Please may I tell them from my own experience?"

"When you are young and deeply in love you think that nothing matters but being together. Soon after you marry, he goes his way to church and you go yours, and you get your perspective back. You discover that your religion means

more to you than you thought it did. Then children come along and you drag them first to one church and then to another.

"Slowly you drift apart because neither will give in. It's a lonely road to travel every Sunday alone. I kept praying he would go my way and he kept praying I would go his way. It's too late for us now as we are 76. I should have let one of his own girls have him and married my own kind. Please listen to me, young people, and save yourselves a lifetime of heart-aches."

SORRY NOW

"DEAR ABBY: My husband is a long-distance truck driver and is gone from one to three weeks at a time. I am not Marilyn Monroe but I'm not bad either. His boss waits until he is safely out on the road and then he drops over here and tries to get palsy-walsy with me. I am not that kind of a woman but if I were, I wouldn't choose him.

"My husband makes good

money on this job and I hate to tell him about it or he would quit. If I get real rude to this man he might fire my husband. A friendly hug or squeeze wouldn't kill me but I'm afraid it would lead to something more serious. Please tell me how to handle this."

HAVING TROUBLES
DEAR ABBY: If you have to put up with "friendly" hugs and squeezes to insure your husband's job—your husband is working for the wrong man. Tell the wayward boss-man to detour and get lost. If he wants to fire your husband, won't he have to answer to the Union?"

CONFIDENTIAL TO "Man's Not Made of Wood": He's not made of steel, either. Down, boy!

If you have a problem, write to Abigail Van Buren in care of this paper. He will be glad to answer your letter. For a personal reply, please enclose a stamped, self-addressed envelope.

Spadea's american designer pattern

by Anne Klein

Junior Sophisticates

Junior Dress Highlights the 'Made to Order' Look

Anne Klein has achieved success by giving her junior-sized collections that enviable air of sophistication that makes them right for any age that happens to have junior measurements.

This princess model with its snap-in fluted gilet and collar is cut with a special curve over the bust and side darts that give shape in the midriff. This is the kind of handling that gives a "made-to-order" look and is simple to achieve since the pattern is accurately cut by hand.

A step-in dress that can be lined if you make it in the three-quarter sleeve version in wool, it is delightful for summer in novelty cottons, shantung, or linen with contrasting trim. The ruffles are gathered onto the

buttoned bands for easy lacing and ironing.

From this chart select the one size best for you:

Size	Bust	Waist	Hips	Length
8	32 1/2	25 1/2	34 1/2	36
10	34 1/2	27 1/2	36 1/2	36
12	36 1/2	29 1/2	38 1/2	36
14	38 1/2	31 1/2	40 1/2	36
16	40 1/2	33 1/2	42 1/2	36
18	42 1/2	35 1/2	44 1/2	36
20	44 1/2	37 1/2	46 1/2	36

Size 12 requires 3 1/2 yards of 54-inch material for dress and one-half yard of 36-inch material for interfacing. To order Pattern 1249, state size, send \$1. — for Ann Klein label, send 25 cents. For 66-page Pattern Booklet 14, send 50 cents.

Address Spadea, The Pontiac Press, Box 535, G.P.O., Dept. P-6, New York 1, N.Y.

If paid by check, bank requires 4 cents handling charge.

Mrs. Jane Permissible in One Case

Proper to Use on Invitations for Her Remarriage

By EMILY POST

"Dear Mrs. Post: It was quite a surprise to me to read the answer in your column recently regarding the wording of a middle-aged widow's wedding invitations. In the form you suggested you give her name as Mrs. Jane Smith.

"It has always been my understanding — and I am sure you have said it many times — that, correctly, a widow continues to use her husband's name. Is this no longer true, or can it be that I have misunderstood?"

Answer: It is still best taste for the widow of John Smith to call herself Mrs. John Smith in her private life, and particularly in connection with matters concerning her family.

It seems to me, however, the objection to "Mrs." followed by a woman's Christian name is removed on the occasion of her own remarriage, which certainly is that of Jane Smith, and necessarily the title Mrs.

"Dear Mrs. Post: My son has recently become engaged and for an engagement present, my husband and I are giving his fiancée a chest of sterling silver. The chest has a metal plate mounted on the top for engraving. Will you please tell me how this should be marked?"

"Should it be marked with my son's fiancée's initials alone, or since the silver is really for them both, would a combination of their first initials and my son's last initials in the center be correct?"

Answer: Have the chest marked with the initials that will be hers when she is married to your son.

"Dear Mrs. Post: The other day I had occasion to write a letter to a minister who holds several doctor's degrees. I addressed him as the Rev. Dr. John Jones. I was told that it was incorrect to use two titles together and that either one or the other should be used. Will you please tell me what is correct?"

Answer: What you have been told is correct. You should have addressed him either as Dr. John Jones or the Rev. John Jones.

Four Received Into DeMolay Mothers Club

Mrs. Oscar Wallen, Mrs. R. E. Cronis, Mrs. W. J. Liechty and Mrs. Henry Norlund were received as new members of Pontiac DeMolay Mothers Club Thursday.

Earl Hudnell, chairman of the advisory board, spoke at the cooperative dinner in Masonic Temple.

DeMolay boys' installation services will be preceded March 1 by a dinner at Roosevelt Temple. Mrs. Roy Wilton is in charge of a money-making project.

FIRST FLOOR PLAN — The first floor plan shows the original house plan as well as plans for later additions. From the large foyer all rooms can be reached without walking through the

house. Note that the split bath has two entrances to it. Located at the front of the house, the kitchen can serve guests in the breezeway, the future family room.

FUTURE ATTIC FLOOR PLAN — The future attic floor plan shows the arrangement of bedrooms, bath and storage space to be added later.

Build Only Basic House, Plan to Expand Later

By JOHN O. B. WALLACE

Mr. and Mrs. Home Buyer: Here's an American home that meets your needs of today—and will meet them tomorrow. Build it now, at minimum cost.

Enlarge and improve it in the future when you can afford it—also at minimum cost because it is designed just for that purpose.

The basic house—a one and a half story Cape Cod with five rooms including two bedrooms—has been designed without frills.

Based on a homeowner's own idea for a truly practical way to build now and for the future simultaneously, it was worked out by an eminent American architect whose small home plans have won him many awards.

The essence of this plan lies in its flexibility. It calls for two bedrooms, living room, dining room and kitchen plus a lavatory, split bath, laundry, breezeway and a one-car garage.

studs are used without wasted cutting.

The exterior has no brick; wood shingles are used instead. But a concrete ledge is provided at grade level so brick can be added later.

The breezeway and the garage, if the builder so desired, could be eliminated and built at a future date along with other expansion and improvement features.

The house has drywall throughout; other finishes may be added later. All closets may be left unfinished in the original house, and finished later.

The stair from the attic—designed for two additional bedrooms a bath and storage space for the future—leads to the first floor hall. This permits access to the bath below should the owner wish to not add the upstairs bath until later.

The attic bedrooms could be left unfinished at the time of construction, and finished later. Cantilevered construction has been used for the rear wall of the dining room so the foundation becomes a straight wall with no breaks. This saves masonry costs.

From the large foyer, all rooms can be reached without walking through the house. Stairs to the attic are located in this area.

There is a split arrangement in the first floor bath—a door separates the lavatory and linen closet area from the tub and shower area, and the bath has two entrance doors, one from the master bedroom, the other from the hall.

The kitchen is off the entrance

foyer so it can easily serve guests in the breezeway (the future family room) and the future dining terrace off the dining room.

The first floor lavatory could be used as a pantry until later changes are made, and it is conveniently located near the breezeway-future family room.

The living room has an outside rear door to give access to the future terrace.

Exterior details include wood shingles and vertical boards, a gabled front for the bedroom wing, white asphalt shingle roof, a slate or flagstone walk set over a finished grade and a wood louver at the front of the breezeway. The latter item permits full circulation of air but still provides privacy.

Flagstone or slate, set in concrete, is suggested for the breezeway floor at the time of construction.

Don't scrub oak floors with soap and water. Use a wax base cleaner.
