GM Will Dedicate New Technical Center

Bus Walkout Strands 25,000 in City, County

Greyhound Men Out in Contract Dispute; Commuters Stranded

Some 25,000 Oakland County commuters that normally use the Greyhound buses were stranded by a walkout of the Great Lakes Greyhound bus drivers.

An estimated 80,000 commuters were affected by the wildcat strike that has halted both suburban, intrastate and interstate Greyhound service.

Also seeking other means of transportation this morning were 3,000 school children that ride 30 buses out of the Birmingham terminal to reach eight schools daily.

Bus riders were left waiting on street corners between Pontiac and Detroit as the morning rush to Detroit swept by them.

At Bloomfield Hills High School, there were 200 absentees today.

There were no pickets reported at either terminal but picket lines were thrown up at the Detroit garage.

The walkout began at midnight after a meeting in the union hall of the Amalgamated Assn. of Street Electric Railroad and Motor Coach Operators (CIO-AFL) in Detroit. The session was called to ratify a new contract signed by union officials and management.

STRIKE UNSANCTIONED

An official of the Detroit local, William G. Marshall, warned bus drivers the strike was not sanctioned by the union.

Officials of Local 1097 of the Pontiac branch of the CIO-AFL union could not be reached this morning for comment.

Vernon L. Crawford, vice president of the Detroit local, said the issues were widespread and ranged from pay raises to fringe benefits. He said although the old contract expired May 1, drivers have been working under a day-to-day agreement and negotiations were continuing in Chicago.

A company spokesman said if the strike continues the walkout could affect divisions in Indiana, Illinois, Missouri, Kentucky, and Ohio.

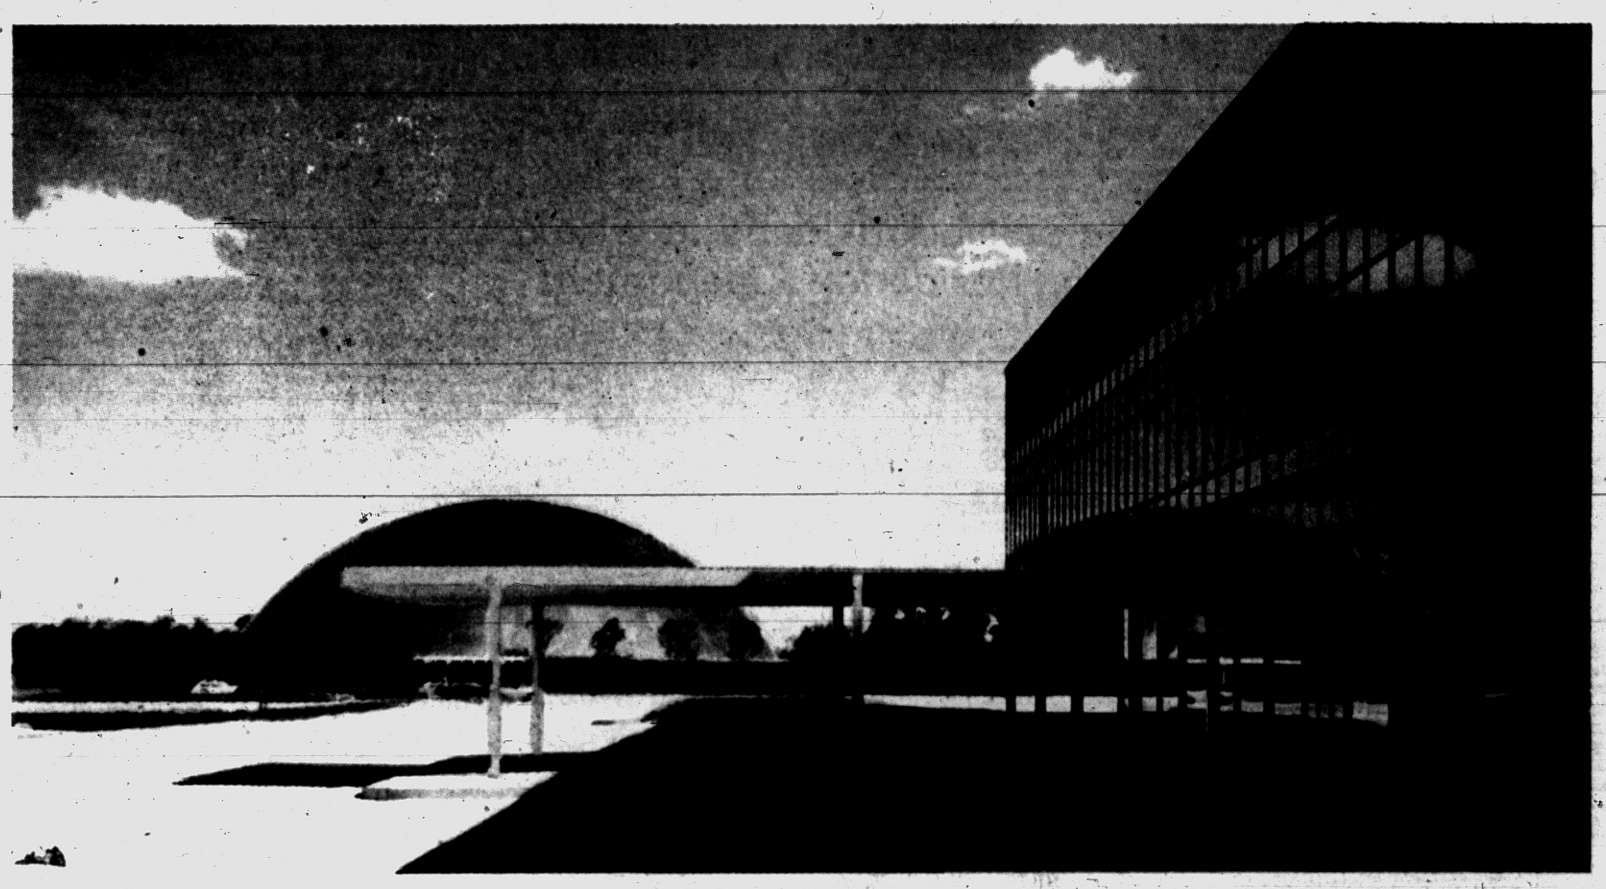

Lester Stewart, vice president in charge of operations for Greyhound, said the company would try to maintain curtailed service outside the Detroit suburban area. He said any operations will be on a "very skeleton basis."

High Court Post Goes to Edwards

LANSING (UP)—Gov. Williams today appointed Judge George Edwards of the Wayne County Circuit Court to the state Supreme Court.

Judge Edwards said he plans to resign his present post and to take the high court seat as soon as present duties can be discharged—probably within a few days.

Color and Modern Materials Blend in Beauty at New Center

STYLING GROUP — Shown above are two major units at the General Motors Technical Center. The dome is the Styling Auditorium, designed for advance display of models. The dome is aluminum plated and is 188 feet wide and 65 feet high. The building at the right is the Styling Administration building which houses the five car studios.

5,000 Invited to Ceremonies on Wednesday

Eisenhower Will Talk Over Closed Circuit Television Network

BY ROBERT B. TARR
Managing Editor, Pontiac Press

General Motors' gigantic Technical Center at Mound and Twelve Mile Roads, southeast of Pontiac, will be dedicated tomorrow.

Five thousand leaders of science, education and industry will be on hand to celebrate the culmination of seven years of planning and construction of the largest and most modern research facility ever developed by industry anywhere.

The 320-acre center, started in 1949, is the workshop for 4,000 scientists, engineers, stylists and technicians and has been described as an "industrial miracle in architecture."

In addition, a closed circuit television network will carry the ceremonies to 20,000 guests at meetings in 61 cities in the United States and Canada. The network will extend almost 20,000 miles.

Guests at the meeting will inspect key areas of the GM center, greatest facility of its kind, as news comentator Walter Cronkite conducts a televised tour of the campus-like grounds in Firebird II, experimental GM gas turbine automobile.

PRESIDENT TO SPEAK

Following the tour, the telecast will carry remarks by President Eisenhower from the White House in Washington and addresses at the Technical Center by President Harlow H. Curtice of General Motors; Dr. Lawrence R. Hafstad, GM vice president in charge of research; and C. F. Kettering, famed inventor and GM research consultant.

A prelude to Wednesday's ceremonies will be a news conference and reception this afternoon.

GM is inviting the public to take part in its salute to progress by visiting one or more of the approximately 130 GM plants and training centers in the United States and Canada which will hold Open House in connection with the Technical Center dedication.

PLANTS INVITE PUBLIC

In the Detroit and Pontiac area, 15 General Motors plants and one General Motors Training center are holding open houses.

The Technical Center itself will be placed on public view in a nationwide telecast from 3:00 to 4:30 p.m., Sunday, May 20, over the NBC network (WWJ-TV).

The 5,000 guests at the Technical Center will tour shops, laboratories, test cells, styling studios and office areas of the Center, where GM scientists, engineers, stylists and technicians are helping to shape the world of tomorrow. Along the route will be a profusion of exhibits and working models of science and technology in action.

Among the most important exhibits will be the XP-500, GM Research Staff's recently announced experimental free piston car.

Visitors also will see GM styling studios, including a layout showing how the body of Firebird II was designed and developed; a new ordnance vehicle, the T101 gun carrier, exhibited for the first time since it was militarily declassified; the first successful mechanical heart ever used in heart surgery; a new artificial lung; and many other achievements of GM scientists, engineers and stylists.

Technical Center Stories, Pictures Pages 13-33

Another Long Is Seated as Louisiana Governor

NEW ORLEANS (INS)—A Long is back in the Louisiana governor's chair today and if he has his way the state will be securely in the Democratic Party fold this fall.

And when it comes to influence on the ordinary voter, you would have to go a long way to find a man in the state with more of it than Earl K. Long, brother of the late "Kingfish" Huey Long and uncle of U.S. Sen. Russell B. Long.

Long, who takes over from "Eisenhower Democrat" Robert Kennon at Baton Rouge today, is the unchallenged leader of the Louisiana delegation to the Democratic National Convention in Chicago this August.

The governor is an unflinching Democrat who presently favors a ticket of Adlai E. Stevenson for president and Sen. Estes Kefauver for vice president.

In any case, he says he will remain a Democrat, and positively predicts Louisiana will support the national Democratic ticket.

But while Long may be strong enough to prevent a possible third party from winning the state, he may not be able to keep President Eisenhower from winding up with a majority of the state's votes.

In 1952, Stevenson slipped by Eisenhower with a margin of 39,000 votes out of more than 650,000 cast. The GOP cause at that time was aided, of course, by the strong pro-Eisenhower stand of Gov. Kennon.

* * *

In 1948, Louisiana was one of the states that joined the "states rights" movement and gave its 10 electoral votes to Strom Thurmond.

Possible Showers, Cooler for Tonight

There is a chance of a few showers early tonight. It will be cooler with a low of 45 degrees.

Tomorrow will be partly cloudy and cooler. The high will be 60 to 64 degrees.

Temperatures will average about two degrees below normal for the next five days. Cooler temperatures are predicted for Wednesday and warmer ones again Thursday. It will turn cool Friday or Saturday.

The lowest thermometer reading in downtown Pontiac preceding 8 a. m. was 52 degrees. The mercury rose to 62 at 1 p. m.

Bing's Boy in Army

LOS ANGELES (UP) — Bing Crosby's eldest son Gary, 23, was sworn into the Army yesterday at the armed forces induction center here and ordered to Ft. Ord for eight weeks of basic training.

Storm Loss $4 Million

DETROIT (UP) — Michigan totaled up around four million dollars in tornado and flood damage today.

But there were no indications of a return of the kind of weather that sent twisters hopscotching through the Upper and Lower Peninsulas over the weekend.

Most of the tornadoes dragged along torrential rainstorms or hailstorms. In the latter some stones attained the size of baseballs and were estimated to have caused a million dollars damage in western Michigan, principally in the Muskegon area.

Streams which shot up with the tornado rainfall were receding and threats of dangerous floods had passed, barring new rains.

Clear and cooler was the forecast for today, but the U. S. Weather Bureau said that a low pressure area moving up from the southwest might bring general rain to the southeastern counties by tonight.

Rainfall within the low pressure cycle was diminishing as it moved northward and unless there were a change in precipitation, no serious new flood threats were anticipated.

The weekend tornadoes were estimated to have done $2,200,000 damage in the Flint area, plus $750,000 in the Detroit suburbs of Allen Park and Lincoln Park.

Several homes, barns and businesses in Ortonville, South Lyon and New Hudson were damaged or destroyed, with no fatalities.

There was spotted damage elsewhere in the state, too, particularly in the area where Mecosta, Montcalm and Gratiot counties join.

In the region around Windsor, Ont., across the Detroit River from Detroit, twister damage was figured at roughly a million dollars.

At the request of Gov. G. Mennen Williams, President Eisenhower yesterday proclaimed seven Michigan counties as disaster areas. The counties are: Genesee (Flint), Kent (Grand Rapids), Ionia, Oakland, Ottawa, Wayne (Detroit) and Saginaw.

The designation will permit residents who suffered damage to homes or businesses to apply for three per cent disaster rehabilitation loans.

The government's Small Business Administration (SBA) said persons in the Oakland, Genesee and Saginaw area may apply at a temporary office set up in the Flint Chamber of Commerce office.

Chicago Teen Is a Matricide

Youth Stabs Mother When Refused Keys to Family Car

CHICAGO (UP) — A 15-year-old boy admitted last night, police said, he fatally stabbed his mother because he wanted her car "and I knew she wouldn't give it to me."

The youth, John L. McKiernan, was quoted by police as saying he stabbed his mother Mrs. Johnnie Louise McKiernan, 39, with a butcher knife with a six-inch blade when she returned home from work yesterday.

He told police he had waited for his mother for more than an hour and had planned to stab her.

When she walked into the kitchen of their West Side home and saw him with the knife in his hand, he said, she screamed, "No, Buck, no!"

Lt. James McMahon said the boy took his mother's car keys and $2.57 from her purse and drove off in the car, which he abandoned later.

Mrs. McKiernan's body was found about an hour later by her husband, 41, when he returned home from work as a bus driver.

The son was picked up by police shortly after near his home.

Martha Raye Gets 5th Divorce Notice

NEW YORK (UP)—Comedienne Martha Raye has been served with a notice that her fifth husband, dancer Ed Begley, plans to sue her for divorce.

* * *

Nick Condos, Miss Raye's manager and one of her ex-husbands, said a process server showed up at a Brooklyn hotel where the comedienne is staying. He said Miss Raye willingly went to the hotel lobby to accept the papers.

* * *

In Westport, Conn., a $50,000 alienation of affections suit is pending against Miss Raye. The suit was filed by the wife of a Westport patrolman who once worked for Miss Raye as a bodyguard.

H-Bomb May Drop

USS MT. McKINLEY (UP)—Unstable weather which has repeatedly postponed the H-bomb test appeared to be settling today with a possibility that the blast could come off Thursday morning, which is Wednesday afternoon, U. S. time.

Frank Costello Goes to Jail

Notorious Gambler Begins 5-Year Term; Faces Deportation

NEW YORK (UP) — Gambler Frank Costello was behind bars again today—this time under a five-year sentence for federal income tax evasion.

Taken to the Federal House of Detention in handcuffs, he will remain there until assigned to a prison by the U. S. Bureau of Prisons.

Costello, 65, surrendered at the U. S. marshal's office yesterday after losing in last-minute legal maneuvers to get his sentence suspended or reduced.

His surrender automatically canceled the $50,000 bail under which he had been free during lengthy appeals as high as the Supreme Court.

A newsman asked him how he felt.

"I got an ulcer that's killing me," Costello whispered.

He did not mention cancer. In a recent move for suspension or reduction of his sentence, he filed in court a doctor's affidavit saying he had a recurring case of cancer and needed an operation. He also said he had an ulcer.

(See picture on page 2)

Costello was fined $20,000 in addition to the prison sentence.

He also faces government proceedings seeking to take away his citizenship and deport him. The government charges Costello, who came here from Italy as a child, obtained citizenship fraudulently in 1925 by concealing his criminal record.

The denaturalization trial is scheduled to begin in Federal Court June 4.

Costello offered recently to deport himself voluntarily to some foreign country, which he did not name, in a move to escape the prison term. The government turned him down.

Interpreting the News

Russia Builds Up Satellite Military Strength

BY J. M. ROBERTS
Associated Press News Analyst

Something to remember in connection with reports of cuts in Russia's armed forces is that she continues to help build up the military strength of Red China.

* * *

One of the fundamentals of Communist policy always has been to encourage wars between other nations in order to create conditions favoring its own spread.

Russia already has used North Korea and Red China to conduct a war. It turned out poorly for her, and may be partly responsible for her sudden reticence in the Middle East recently when it looked like her actions might help promote another.

Nevertheless, the fact is there, that while Russia may need her own men for economic and agricultural development, and while she may need the propaganda effect of manpower cuts to promote the smile offensive, there is no over-all reduction of Communist military strength.

As Secretary Dulles said recently, it may be that she has reduced some, and may do some more, but the object is not peace.

WANT CLAMORING

There have been persistent reports since the visit of Khrushchev and Bulganin to London that Russia planned to reduce her armed forces to 1½ million men, a cut from 4½ million to about half of the number maintained by the United States.

B or K may have dropped a hint where it would become public just for the sake of seeing what the reaction would be.

They would, of course, like to start a public clamor for arms reductions among the free nations. This would be very popular.

It also would reduce the power of the North Atlantic Treaty Organization which, along with the Marshall Plan and America's A-bomb stockpile, stopped the snowball of expansion which Russia set rolling in the first postwar years.

Russia knows that she can safely divert her strength to economic warfare without danger of military attack from the democracies.

The democracies have no such assurance. They must fight the economic war while still carrying the burden of military establishments which could meet attack by the combined communist forces.

Only their highly developed industrial strength could make such a two-pronged effort possible.

Russia is also well aware of the central position of the communist forces, which can operate from a self-contained position while allied forces must man the vast red perimeter and depend for a great part of their material on ocean transport from America.

Russia is in a beautiful position for remobilization when she decides it is needed.

City Police Join in Crackdown

Seek to Rid Highways of Dangerous Drivers by Campaign

The Pontiac police department has joined in a statewide campaign to clear roads of bad drivers.

Chief Herbert W. Straley said that speeders and reckless drivers will be cited for possible license re-examination and perhaps license suspension or revocation.

The crackdown was ordered by State Police Commissioner Joseph A. Childs, who has hopes the drive will save lives.

Straley said that special forms distributed from the office of James M. Hare, Secretary of State, had been in use here one week.

The forms will be sent back to Hare's office with the names of speeders, reckless drivers and other motorists whom officers consider physically or mentally unfit to drive.

Straley pointed out that Pontiac police have been reporting the names of reckless and drunk drivers for at least three years. He said:

"We will be glad to participate in a campaign to save lives and property. It is time all drivers recognized that a license to drive is not a license to kill."

Heart Attack Claims Pupil in Gym Class

A Pontiac High School boy suffered a fatal heart attack during gym class this morning.

Efforts by a fire department inhalator crew failed to revive Richard W. Menzel, 16, who was dead on arrival at Pontiac General Hospital at 10:30 a.m.

His father, Douglas G. Menzel, a city milkman, was notified. The Menzels recently had moved to Montroyal street near Silver Lake from a home at 179 Prospect St.

Ike Aids Aides With Campaign Photographs

WASHINGTON (AP) — President Eisenhower apparently is going to provide Republican Senate and House candidates with autographed pictures and letters calculated to have campaign appeal.

* * *

White House aides already have talked to some candidates in critical states, offering services that have been snapped up. Among others, Sen. Bender (R-Ohio), who had no primary opposition, is displaying in a glossy campaign book a picture made with Eisenhower and a laudatory letter from the President.

Such material in most cases may substitute for personal appearances by Eisenhower. He has said he plans only limited campaign activity.

The effectiveness of such photographs and letters may test the validity of a contention by Democratic Chairman Paul M. Butler that Eisenhower's vote appeal has "sagged" and what is left of it can't be transferred to other candidates.

"Sen. Bush (R-Conn) said Butler is "talking absolute nonsense."

"Butler is swinging wildly and missing all of the time," Bush said. "He certainly is giving a demonstration of a frustrated politician."

Justice of Peace Fined on Drunk Driving Count

CADILLAC (AP)—Justice of the Peace Fred P. Roussin was fined $100 and his driver's license suspended for 90 days after he pleaded guilty before Recorder's Judge B. G. Kearney yesterday to a charge of driving while drunk.

The warrant was issued at the request of Deputy Sheriff John Sosenko, who said a car driven by Roussin plowed into his on Manton's main street. Manton is 11 miles north of Cadillac.

Interest Mounts in New Suburban Women's Club

BIRMINGHAM — With 400 of the 900 invited women expecting to attend the membership meeting at 10 a.m. tomorrow, leaders of the new Women's Village Club have had to switch meeting place to larger quarters.

Instead of St. Dunstan's Playhouse, the group will have its first meeting at the Cranbrook gymnasium, in the Cranbrook for boys section.

Pattern after Detroit's Women's City Club, the club would have a clubhouse and dining room, to provide space for social activites.

A group of officers, tentative until after final organization, is headed by Mrs. James Nance.

The group of Birmingham and Bloomfield women has incorporated. A 500 membership limit is being considered.

Builders Seek Ruling Change

Appeal to Gain Location for $5 Million Center in City of Troy

Still another complication in the legal tangle surrounding the Louise Most estate in Troy cropped up yesterday.

A ruling by Oakland County Probate Judge Arthur E. Moore setting aside sale of the proposed $5,000,000 shopping center and residential community site was appealed yesterday by Kaufman and Wolf Associates, Detroit builders and developers.

Judge Moore's ruling was made April 23 when John Most, administrator of the 70-acre estate at Livernois and Maple Roads, told the judge he had not understood what he was signing when he sold Kaufman and Wolf the estate for $318,500 on April 2.

The judge's approval of the sale was necessary because the estate of Miss Most, who died in 1932, still is being settled. He approved the sale after all four heirs had signified their consent.

Oakland County Circuit Judge Frank L. Doty issued a temporary injunction April 23 restraining Most from selling the estate pending hearing on another suit filed by Clem H. Block, attorney who handled the original sale to Kaufman and Wolf.

* * *

Block charged in his suit he had never been informed of the petition to set aside the sale, which was filed for Most by Royal Oak attorney Howard K. Kelley.

Block said the sale was agreed on after long consideration, and the price offered by Kaufman and Wolf was the best obtainable.

Slate Radar Beams to Watch Twisters

DETROIT (AP) — Long-range assistance against tornadoes has been promised Michigan. The state will get one of about a dozen new style $100,000 radar storm detection facilities.

* * *

Money already has been allocated for the new storm detection centers. Each will be designed by the Weather Bureau for locating, identifying and tracking violent storms. They will have a radius of up to 300 miles.

Other radar units consisting of surplus navy equipment are scheduled to go into operation in about a year at Muskegon and Bay City-Midland. They will cost about $10,000 each.

Hospitals of Pontiac Offer Tornado Aid

Pontiac hospitals were ready to help victims of the Flint tornado Saturday night.

Offers to provide shelter and treatment if Flint hospitals became too crowded were made by Pontiac General, Pontiac Osteopathic and St. Joseph Mercy hospitals.

However, Flint had enough facilities to take care of its injured, authorities said.

Temporary facilities were readied in the dining room at Pontiac General and in the uncompleted upper floors of the osteopathic hospital.

FREE TRANSPORTATION—Chester Heavner, driver for Bee Line, Inc. checks facilities for transporting visitors to the Pontiac Division plants on Wednesday. Free buses will operate between the Huron street side of the County Court House and the plant parking lot during Pontiac Motor's Open House from 1 p. m. until 8 p. m.

City Police Association Plans to Seek August Vote on Residency Amendment

Representatives of the Pontiac Police Officer's Assn. are expected to ask the City Commission tonight to place the charter amendment vote on police-fire residence on the August primary ballot.

They will appear at the commission's weekly meeting on the second floor of the City Hall. The session will begin at 8.

The city attorney last week told the association that only the commission could place the special election vote in August.

The commissioners reportedly favor the vote at the November balloting as another city charter amendment vote on the employe pension plan supplemented by Social Security is already slated for an August decision.

Other action scheduled on the 23-point agenda will include an authorization to the city manager and director of finance to establish a $500,000 reserve in the capital improvement fund to aid in construction of the Pontiac General Hospital wing.

Included in the list of 12 public improvement items will be the following public hearings on special assessment rolls for:

Sidewalk on the east side of Oneida road from Menominee to Algonquin for lot 10 of the Crofoot Western Subdivision.

Sidewalk on the north side of Hazel Bend avenue from Jessie to Belmont.

Sidewalk for the south side of Auburn avenue from the east line of Lot 2 East Side Park Subdivision to Seward and from Russell to east line of lot 131 of the subdivision.

Grading and graveling on Joslyn avenue extended from Perry street to Linda Vista avenue and on Linda Vista from Joslyn extended east approximately 307 feet.

Other public improvement topics on the slate are four engineer estimates, two resolutions to receive special assessment rolls, and two resolutions of public necessity.

City Attorny W. A. Ewart is expected to present two reports at tonight's session. One concerns an agreement with the Randall Building Co. and the other involves a land contract for the purchase of lot 2 in the Seminole Hills Subdivision.

More protests from citizens of Anderson's Western Addition is expected tonight as the commission will hear the first reading of an ordinance to rezone to Residential 3 five lots in the area. Residents have filed a protest petition objecting to the rezoning.

Other business will include the first reading of an ordinance to rezone to Commercial 1 part of lots 62-66 in the Hillside Manor Subdivision providing a 20 foot alley is deeded.

Action is also expected on a petition requesting grading and graveling of the alley in assessor's plat 13 from Linda Vista drive to thee east line of lot 40 in the plat.

A resolution is expected to be passed authorizing setting May 28 at 2 p.m. as the closing of bids for the sale of buildings on lots purchased by the city for use in the new municipal parking program.

Royal Oak Teacher Dies While Studying

A 21-year-old widowed Royal Oak school teacher who was studying for a university degree died of a heart attack yesterday while preparing a class assignment.

Mrs. Bonabel J. Bassett who enrolled as a freshman at Wayne University in Detroit six years ago collapsed and died in her home, 229 Fairgrove.

Mrs. Bassett told university officials when she enrolled she wanted to go back to teaching because she didn't want to be a burden on her married children. Her husband died in 1942.

She took a reduced schedule of courses and still had two semesters to go when she died. She had accumplated enough credits, however, to get a temporary certificate as a substitute teacher. For the past two years she had been teaching in Royal Oak and nearby Madison Heights, and Clawson.

Socialite Gets Divorce From Skater Henie

WEST PALM BEACH, Fla. (AP) Socialite Winthrop Gardiner was granted a divorce yesterday from Sonja Henie, the ice skating star, on grounds of desertion and mental cruelty.

Gardiner charged in his suit filed April 6 that he and the famed skater had only two weeks together in more than six years of marriage. Sonja's mother was with them the rest of the time, he said.

* * *

Mrs. Gardiner in a counter suit denied all the allegations. They were married in December 1949.

Court Upholds Rule on Liquor Sale Sites

LANSING (AP)—Regardless of the attitude of church or school officials involved, a liquor sales establishment in Michigan can not be located closer than within 500 feet of a church or school.

* * *

The legislature's restriction in this area is "absolute," the Michigan Supreme Court ruled Monday.

The high court affirmed dismissal in Wayne County Circuit Court of an injunction suit to prevent the State Liquor Control Commission from revoking an SDM license issued in error to Big Bear Markets of Michigan, Inc.

After the license was issued, it was discovered the Big Bear place of business was only about 100 feet from the Bethlehem Finnish Lutheran Church in Detroit.

Words and music for the war song, "Tramp, Tramp, Tramp," were written by Dr. George F. Rott, who wrote many Civil War songs.

3 Boys Drown in Wading Pond in Pennsylvania

CHILDS, Pa. (AP)—Three boys drowned yesterday in a pond near Fife's Dam. The two older boys lost their lives attempting to help the youngest.

* * *

The bodies of Thomas Cibula, 13, Jerry Clark, 10, and Daniel Linsenbilger, 8, were recovered from eight feet of water about 10 feet from shore.

Several other youngsters told Police Chief Patrick Muia that Linsenbilger had gone wading for relief from the sultry heat and soon after entering the water began calling for assistance.

* * *

The other boys entered the water to help him but soon were floundering. The spectators ran to Muia's home about a mile away but by the time he arrived the victims had disappeared.

New Trial Ordered in 1951 Libel Suit

The State Supreme Court yesterday ordered a new trial of the libel suit brought by former Southfield Township Supervisor Dudley P. Frame against publishers of the weekly Four Corners Press in 1951.

Frame had sued for $200,000, charging the paper "falsely and maliciously" published an open letter signed by township clerk Fannie Adams which he claims injured his reputation.

At the first hearing on the suit before Oakland County Circuit Judge Frank L. Doty, Judge Doty ruled a mistrial after a juror expressed a prejudicial opinion.

The second trial, held in the County Supervisors' room to accommodate the large number of spectators, was before Judge H. Russel Holland and was dismissed when the jury found no cause for action.

Frame argued Judge Holland improperly sustained defense objections to testimony he sought to introduce as evidence of his good character. The Supreme Court accepted this contention.

Africa Calling!

NEW YORK (AP)—Hubert Ponter, president of the Federation of Rhodesian Industries, says he is seeking 3,000 to 4,000 young American couples to settle in the Central African Federation. He is starting a tour of college campuses in his effort to recruit emigrants for the new country.

George Joins Ike

WASHINGTON (AP) Retiring Sen. George (D-Ga) has agreed to represent President Eisenhower in talks aimed at broadening the North Atlantic Treaty Organization in nonmilitary fields.

AP Wirephoto

STARTS PRISON TERM — Gambler Frank Costello waves to newsmen in New York after surrendering yesterday to start serving a five-year prison term for income tax evasion. Costello, who is 65, tried to avoid serving the sentence by claiming he is suffering from a new outbreak of cancer. He also offered to deport himself voluntarily but was turned down. He was convicted in 1954 of evading $28,532 in income taxes for 1948 and 1949.

Rhee Seen Winning Again

Koreans Flock to Polls

SEOUL, South Korea (AP)—A big turnout of some nine million South Koreans voted today for a president and vice president. President Syngman Rhee, opposed by an ex-Communist and a dead man, appeared certain to win a third four-year term.

* * *

Only scattered minor violence was reported across the country, in contrast to hectic pre-election riots and fights which killed at least one demonstrator and sent Rhee's living opponent into hiding.

The polls closed at 5 p.m. and first returns were not expected until early tomorrow. The outcome should be definite within two days.

ONLY PRESIDENT

Rhee, 81, and the only president Korea has ever had, voted with his Austrian-born wife as soon as the polls opened at 7 a.m.

Although a Rhee landslide appeared in the offing, it was expected a sizable sympathy vote would be cast for the late P. H. Shinicky. The Democratic party's candidate and the only man given an outside chance against Rhee, Shinicky died May 5 of a cerebral hemorrhage. His name remained on the ballot, but votes for him were invalid.

* * *

With Shinicky's death, interest generally shifted to the vice presidential race. Rhee's advanced age raised the strong possibility that the winner of the No. 2 post would end up in the President's chair.

Red Army Cut Greeted Coolly

Washington Believes It Would Be Dangerous for U.S. to Copy

WASHINGTON (INS) — U. S. political and military leaders declared today it would be dangerous — if not foolhardy — for America to follow the Russians in drastically reducing its armed forces.

* * *

The White House said there would be more significance to the Soviet announcement that 1,200,000 men will be cut from the Russian armed forces by next May, if the Kremlin also agreed to an effective inspection system to police disarmament.

On Capitol Hill Sen. Walter F. George (D-Ga), chairman of the Foreign Relations Committee and President Eisenhower's choice as ambassador to NATO, welcomed the Russian announcement. He said it should not be shrugged off as mere propaganda.

But George added he did not think it wise for the U. S. to reduce its armed forces or military aid to friends merely on the basis of the announcement.

* * *

The Pentagon pointed out that America has slashed its military forces since the end of the Korean War. Authorized strength has gone down from 3,507,000 in June 1953 to 2,850,000 at present.

Actually, U. S. military forces are now below authorized strength, with 2,819,994 men under arms, but they are scheduled to climb back to 2,864,000 by June 1957.

Pontiac Deaths

Mrs. James Mason

Mrs. James (Hannah) Mason, 66, of 179 Beach St. died early this morning in St. Joseph Mercy Hospital. She had been ill for a year.

She was the daughter of Patrick and Bridget O'Hara McKenna and born in Glasgow, Scotland June 3, 1889. The Masons were married May 19, 1915 in Winnipeg, Canada.

Mrs. Mason had been a resident of Pontiac 35 years, coming here from Winnipeg. She was a member of St. Michael's Catholic Church, the League of Catholic Women and the Altar Society of her church.

Besides her husband, she leaves four children, William J., John R. and Victor K. Mason, Mrs. Paul Gardner, and 13 grandchildren, all of Pontiac.

Other survivors include four sisters, Mrs. William Vaillancourt of Orangegrove, Calif., Mrs. Daisy Dion, Mrs. Agnes Hartman and Mrs. Jay Ford, all of Pontiac.

The Rosary will be recited at 8 o'clock Wednesday evening in the Voorhees-Siple Funeral Home. The funeral will be at 10 a.m. Thursday from St. Michael's Catholic Church with burial in Mt. Hope Cemetery.

Harry Lee Parker

Harry Lee Parker, 62, of 4023 Lotus Dr. died yesterday in Veteran Hospital, Grand Rapids after a three weeks illness.

He was born in Pontiac Nov. 9, 1893, the son of William I. and Abigail Watson.

His entire life had been spent in the Pontiac area. An employe of Fisher Body Division, he had served in World War I in the Red Arrow Division and was a member of VFW of Keego Harbor.

Mr. Parker is survived by a sister, Mrs. Rosanna Persinger of Lotus Lake; three brothers, Ralph of Ypsilanti, Charles and Avery, both of Pontiac.

Service will be at 1:30 p.m. Thursday from the Huntoon Funeral Home. The Rev. Lyal H. Howison of the First Free Methodist Church will officiate with burial in Perry Mt. Park Cemetery.

Frederick J. Pherrien

Frederick J. Pherrien, 59, of 82 Hamilton St. was dead on arrival at St. Joseph Mercy Hospital early this morning. A heart attack was the cause of his death.

Born in Canada Nov. 4, 1896, he was the son of John B. and Maria Louise Pherrien. On June 18, 1946, he was married here to the former Margaret Smith Bumstead.

Mr. Pherrien had lived here 30 years and was employed as a maintenance welder at Pontiac Motor Division. He was a member of the Joslyn avenue United Presbyterian Church.

Surviving besides his wife are two stepchildren, Ronald of Pontiac, Mrs. Ramona J. Cabbad of Idlih, Syria and four grandchildren.

Also surviving are two sisters, Mrs. Dorena Hunt and Mrs. Viola Hebert, both of Sault St. Marie, Ont. Canada.

Friends may call at the Sparks-Griffin Funeral Home after 7 o'clock this evening. Arrangements will be announced later.

Supreme Court Agrees to OK Election Petitions

LANSING (AP)—The Michigan Supreme Court has agreed to require state election officials to approve in advance petitions for putting a constitutional question on the state election ballot.

The Day in Birmingham

Commission Tables Plan to Fluoridate City Water

BIRMINGHAM — City commissioners, after hearing local dentists support fluoridation of water supplies and a Detroit allergy specialist criticize it, tabled a proposal to add fluoride to the city's water.

A spokesman for fluoridation, Dr. Melvin A. Noonan of Birmingham, said introduction of minute quantities of fluoride into drinking water is absolutely safe. He estimated it would cut tooth decay as much as 70 per cent.

Two other local dentists threw their support behind fluoridation, explaining reasons in brief talks during the hour-long public hearing.

On the other hand, reading a 12-minute prepared talk, Dr. George L. Wolbott, Detroit allergy specialist, argued that his studies have shown "all kinds of medical disorders can occur when sodium fluoride is put in the water supply."

Another two hours were devoted by commissioners to hearings on paving and assessments.

The light oil for roads and its assessments were voted. Several streets were deleted from the 47 slated for the re-work and seal project before its approval.

Southfield street's paving from Lincoln to 14 Mile was tabled for two weeks, on request of several residents. Wakefield street's paving was unnecessary, commissioners voted after hearing resident's objections.

* * *

A "kitchen sink philosopher" from a Flint radio station and a 12-year-old ventriloquist will be **starred at the Birmingham Business Women's Club meeting** Thursday night at the Community House.

Michael Kelly, a Birmingham youth, and his dummy will perform, as will Mrs. Goldie Ackerman from Flint. Members are bringing guests for the program and dinner.

* * *

Marking National Book Week, the library has added 100 new children's books, acerding to Kathleen Burgess, children's librarian. The books will be on display until May 19, and reservations may be placed before they go into regular circulation.

* * *

New officers of the First Congregational Church's Women's Fellowship are Mrs. John Cooper, president; Mrs. William Bush, first vice president; Mrs. Reginald Butler, second vice president; Mrs. Max Morden, recording secretary; Mrs. James Hague, corresponding secretary, and Mrs. Joan Riccardi, treasurer.

* * *

St. Elizabeth Guild's Annual Plant Sale starts at 9 a.m. tomorrow, and will run from 9 to 6 p.m. through Friday. Another St. James Episcopal Church event this week is to be the pet parade at 10 a.m. Saturday. The parade will be at Hill School at 11 a.m.

Supreme Court Backs AAU Ban Against Santee

NEW YORK (AP)—State Supreme Court Justice Water A. Lynch today upheld the lifetime suspension which the Amateur Athletic Union imposed on Wes Santee, premier American miler.

He also criticized some Amateur Athletic union officials.

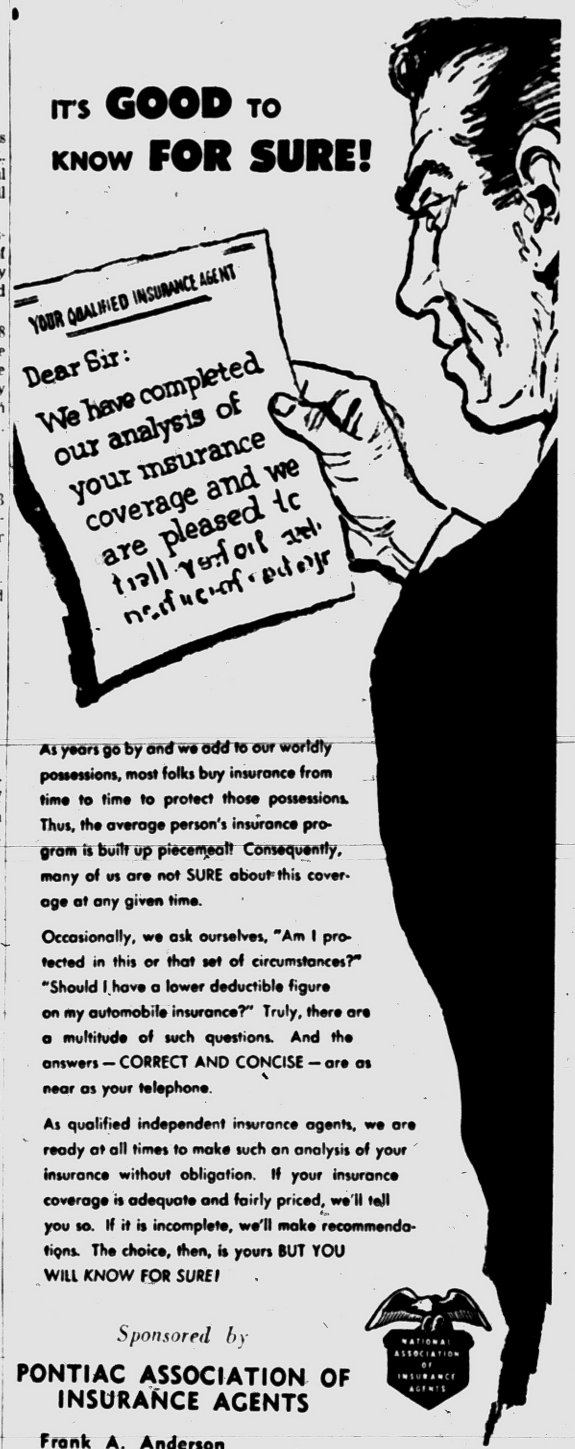

"He (Santee) has eliminated himself as an amateur athlete," the justice said, "but not without an assist from some of the guardians of amateur athletics."

Santee, whose 4:00.5 mile last year was the fastest ever run by a United States athlete, was suspended by the AAU Feb. 19 on charges of professionalism.

Actress, Car Dealer Call Off Engagement

MIAMI, Fla. (AP) — Actress Gloria DeHaven has terminated her romance with Dick Fincher, a Miami motor car dealer.

The two said February they planned to marry in September and honeymoon in Europe. Yesterday, however, Fincher said Miss DeHaven had returned his diamond ring and that their engagement had been called off by mutual consent.

As years go by and we add to our worldly possessions, most folks buy insurance from time to time to protect those possessions. Thus, the average person's insurance program is built up piecemeal! Consequently, many of us are not SURE about this coverage at any given time.

Occasionally, we ask ourselves, "Am I protected in this or that set of circumstances?" "Should I have a lower deductible figure on my automobile insurance?" Truly, there are a multitude of such questions. And the answers — CORRECT AND CONCISE — are as near as your telephone.

As qualified independent insurance agents, we are ready at all times to make such an analysis of your insurance without obligation. If your insurance coverage is adequate and fairly priced, we'll tell you so. If it is incomplete, we'll make recommendations. The choice, then, is yours BUT YOU WILL KNOW FOR SURE!

GM Plants in City Hold Open House on Wednesday

Special displays of products and extensive tours will highlight observances by Pontiac area General Motors plants of the GM Technical Center opening tomorrow.

Each of the divisions, Pontiac Motor, GMC Truck & Coach and Fisher Body, will open up their doors to what are expected to be record crowds of visitors.

The objective of the visitation at Pontiac Motor will be to show the close relationship between division operations and facilities at the Technical Center. The open house, to be conducted between 1 and 9 p.m., will include tours of manufacturing areas and engineering exhibits.

Visitors are expected to number 20,000. Special buses will run to all of the division's plants and refreshments will be served.

Nine commercial and military vehicles will be the main features of the program at GMC Truck & Coach.

Among the vehicles will be the amphibious "Drake," the U.S. Army's "Ontos," the "dream truck" L'Universelle, featuring GMC's air-suspension ride, a T-51 cargo carrier and other military vehicles.

Visiting hours at GMC will be between 9 a.m. and 8 p.m. Refreshments will be served and souvenir folders distributed, according to division spokesmen.

Fisher Body will open its plants to the public at 1 p.m., and will conduct tours until 9 p.m. Highlights of the program will be tours of the fabricating, body assembly and press lines.

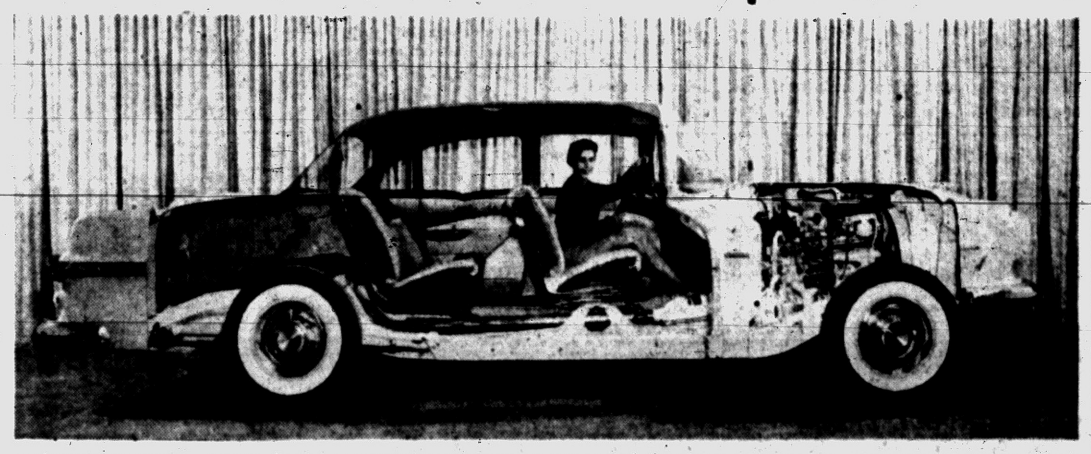

The tour is described by a Fisher Body spokesman as an "unusual opportunity for visitors to see the inside of the plants." He explained that the division does not have conducted tours on a regular schedule except on special occasions such as tomorrow's.

Each division will station guides along the main route of travel throughout the plants to answer questions and guide visitors.

Both Pontiac and GMC have established special first aid facilities and nurseries for guests.

AWESOME 'THING' — Bristling with recoilless rifles, this U. S. Army "Ontos" will be among nine commercial and military vehicles which GMC Truck & Coach Division will exhibit at Wednesday's open house marking the dedication of General Motors' new Technical Center. Powered by a GMC gasoline engine, the deadly weapon gets its name from a Greek word meaning "The Thing."

CUT-AWAY CHIEF — Sliced open to reveal inner construction, this Pontiac Star Chief sedan awaits inspection during tomorrow's open house at the Pontiac Motor Division. A special show stand allows easy inspection of the moving parts in the engine, transmission and differential. At the wheel is Sally Bigelow of the division's circularizing dept.

3 Flint Holdup Men to Begin Jail Terms

FLINT (AP)—Three men who admitted a dozen holdups that netted around $10,000 were under sentences of 15 to 50 years imprisonment today.

* * *

They are: Edgar E. Lane, 28, and Cornelius Winkfield, 33, both of Flint, and Joseph H. Posey, 21, of Detroit. They were convicted of armed robbery.

The three were arrested in April. They were sentenced yesterday by Circuit Judge Stephen J. Roth.

Posey escaped from the Flint jail shortly after his capture, but gave himself up 30 hours later.

Admits Nighttime Breakin of Grocery in Pontiac

Charged with the nighttime breaking and entering of a Pontiac grocery last July 2, Norman Parrish of 1046 Cloverlawn Dr. pleaded guilty yesterday at his circuit court arraignment.

Oakland County Circuit Judge Frank L. Doty, who set May 28 for Parrish's sentence, continued his pessonal bond of $100.

The first man made earth satellite is expected to circle the earth about once every 90 minutes.

The Escorial is the burial place of nearly all the kings and queens of Spain.

Set Prayer Luncheon

A Gideon Auxiliary Prayer luncheon will be held at noon Wednesday at Ted's Restaurant. After the luncheon the members will go the the home of Mrs. William Spence, 1034 Canterbury Dr. for their meeting.

About one-seventeenth of U. S. gross national product is produced on farms.

It is estimated that Central America will double its population in the next 30 years.

One pound of uranium can produce the heat equivalent of 2½ million pounds of coal.

Assessed Valuations on Utilities Increase

LANSING (AP)—The State Board of Assessors announced today that valuations for tax purposes placed on public utility properties assessed by the board will be up 6.2 per cent this year over 1955.

* * *

The assessment total is $598,982,900, or $35,095,200 above last year.

The biggest share of the rise was accounted for by a $25,700,000 increase in the assessment of the properties of Michigan Bell Telephone Co., which now are valued for tax purposes at $305,800,000.

* * *

The board has fixed an average tax rate of $32.13 per thousand dollars of assessed value as compared with $29.69 in 1955. Applied to the higher valuations, the rate will produce a tax levy of $19,243,549 for this year, an increase of $2,500,977.

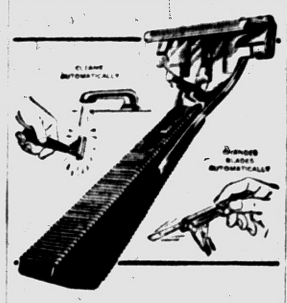

Runs Over His Dad

IRON RIVER (AP) — Ernest Rometti accidentally ran over his 81-year-old father, Pio, sending him to a hospital with painful bruises. The elder Rometti was seated on the rear bumper of his son's panel truck when Ernest came ou tto move the vehicle and failed to see his father.

Mass Cancer Tests for Detroit

Women to Be Examined in Survey by National Institute Staff

NEW YORK (INS)—The Director of the National Cancer Institute has revealed in Look Magazine that mass cancer tests will be conducted among Detroit women this year.

* * *

Dr. John R. Heller disclosed in an article "What We Know About Cancer" that a similar mass study conducted in Memphis revealed that more cases of uterine cancer can be cured if discovered in the very early, still unsuspected stage.

Detroit will be one of six cities in which mass testing will be carried out this year. The others are San Diego, Calif.; Louisville, Ky.; Columbus, Ohio; Madison, Wis., and Washington, D. C.

Wayne University college of medicine will handle the screening program in cooperation with local hospitals and physicians in private practice.

SMEAR TEST

With a grant of $55,000 from the National Cancer Institute to cover the first year of operation, the project hopes to test 25,000 to 30,000 women a year.

Cancer of the cervix, the neck of the womb, is detected by a cell examination test which involves taking a smear from the vagina and examining the cells under the microscope. This examination will detect early cell changes indicative of beginning cancer.

Dr. Heller notes:

"Such early forms of cancer of the cervix—long before the patient has any symptoms—are believed to be nearly 100 per cent curable."

Dr. Heller reported that 108,000 women out of the entire Memphis female population of 185,000 had been screened.

Serving 15-Day Term for Theft of Gasoline

Howard G. Mersino, 22, of 117 W. Longfellow, serving a 15-day sentence in Oakland County Jail for simple larceny after failing to pay fine and costs of $40 when arraigned Satuday.

He pleaded guilty in a hearing held by Ovford Township Justice Friday night arrest by Oakland County deputies.

Mensino admitted he stole 10 gallons of gasoline from a gas pump at a farm at Hurd and Granger Roads, Oxford Township.

Soviet Tourist Agency Inks 50 Foreign Pacts

LONDON (AP) — Intourist, the official Soviet travel agency, has signed contracts for exchange of tourists with more than 50 foreign travel agencies, Radio Moscow said today.

The broadcast said that this summer and fall Soviet tourists will go to China, France, Italy, Belgium and India, among other countries.

Reject 4-Year Term

BOSTON (AP)—The Massachusetts Legislature has rejected proposals for four-year terms for the governor and other state officials and for a graduated state income tax. The rejections came in marathon joint session which started at 3 p.m. yesterday and ran until 3:15 a.m. today.

Retirement for enlisted members of the U.S. Army first was authorized in 1885.

Bob Considine Says:

Officer Attends A-Tests, Never Sees 'Em

ABOARD USS MOUNT McKINLEY, ENIWETOK PROVING GOUND (INS)—The chief engineer of this ship, Lt. Comdr. Layton Young, has been present at most of the Pacific tests of the A and the H-bomb. But he has never seen one except in the newsreels. He has always been at his station in the bowels of the ship.

"The boys get pretty tense down there when one of the big fellows is about to go off," he was telling us.

"All those pipes around them and the turbines working and the boilers going make it a little tough when you have to substitute imagination for the real thing the topside boy can see.

"That underwater test off California some time back felt like the biggest depth charge anybody ever let loose."

At which he put aside his cup of coffee and nonchalantly descended into his domain to prepare for another test.

The eerily equipped command bunker on Enyu Island, 20 miles from the bullseye on Little Namu, had a kind of small irrigation ditch running past it at the time of the last H-bomb test in '54.

When the bomb went off (it was a surface shot that dug a huge watery crater in Bikini atoll) the tremendously strong control bunker "moved around" as one man who was present described it the other day.

"But that wasn't what shook us," he laughed. "What gave us the shakes for a time was that water started to pour under the door. The question was, 'Who's going to open the door to see if we're still on an island or in the Pacific?'

"Turned out to be our irrigation ditch, coming indoors out of the storm, I suppose."

An old Chicago police beat reporter, now an atomic authority, cast an admiring eye on the AEC camera that can take a picture in one three-millionths of a second.

"What a gadget for the old badger game!" he enthused.

SHIP ADVENTURES

If ships could talk, this one could tell quite a yarn. She's been in the thick of interesting events since she slid down her ways at Wilmington, N. C., in 1943 as the SS Cyclone.

As the McKinley, she served in five amphibious operationns—Leyte, Palau, Lingayen Gulf, San Narcisco and Kerama Retto. She took part in the Japanese surrender, the landing of occupation forces, and first went into atomic work in 1946 at Bikini.

The McKinley carried the first calvary division to Korea in July '50 and she was Gen. MacArthur's command ship for the historic Inchon landings.

She helped with the great redeployment from Hungnam after the Chinese Reds hit us near the Yalu. Since then she's been around the world and weathered at least two H-bombs, maybe more. Still sound as a dollar, an old style dollar.

Darwin, himself, was the first to discern why these atolls out here are necklace shaped. Seems that these once were mountains that slipped lower and lower into the sea.

The coral along the mountain plateaus wasn't as well fed as along the edges of the sea. That coral grew taller, now sticks up and is called an atoll. See?

STRINGS ATTACHED — Carl Becker Sr., left, a violin expert, examines what he believes is a rare violin. Becker said the violin has marks indicating it was made by Joseph Guarnerius about 1732 in Cremona, Italy, and is possibly worth between $15,000 and $75,000.

PURE'S Challenging 1,000 Mile Offer!

BURN LESS GAS USE LESS OIL... or both!

(whether you use regular or premium gasoline)

Try PURE'S HIGH-HORSEPOWER COMBINATION of gasoline and motor oil

Use High HP Purelube Motor Oil and PURE Gasoline (Premium or regular, whichever you normally use) for 1,000 miles. If you have been using a 10-W, 20, or 30 grade oil, you will burn less gasoline... use less oil, or both... or we will give you any oil which may have to be added in a 1,000-mile oil change period. Offer good until July 31, 1956. Ask your Pure Oil dealer for details.

Why we make this offer

We want to help our regular customers and make a lot of new friends. We figure the best way to do this is to let you prove to yourself that you can save on gas, oil, or both, by using High HP Purelube in your crankcase and PURE gasoline in your gas tank.

How the High-Horsepower Combination works

High HP Purelube, with its special combination of high-cleansing additives, cleans up your engine.

PURE'S two great gasolines burn clean because they are made clean by careful processing and refining.

Used together, High HP Purelube and PURE gasoline clean up your engine and keep it clean. They maintain your car's High-Horsepower performance and economy. Prove it in your car.

SPECIAL OCTANE BONUS for High-Horsepower Engines

If your car is a 1953 to 1956 model, it has a "high-compression" engine—designed to deliver high horsepower. After the "break-in" period, these modern engines tend to develop a thirst for more octane in the gasoline they burn. Unless they get it, they tend to knock and lose power.

PURE'S High-Horsepower Combination keeps your engine clean, actually reduces the deposits which cause this octane thirst.

The result: Your engine gets a special bonus in knock-free power—the equivalent of up to 4 octane numbers. New cars *keep* their showroom power, older cars regain it.

This special OCTANE BONUS is yours when you use High HP Purelube motor oil *and* either of two great PURE gasolines. Why not give it a try, starting today?

There's always something new and better at your Pure Oil dealer's!

Be sure with Pure

PURE SURE USE LESS GAS or OIL ask here! PURE

For the first time...

Soekarno of Indonesia Is an Avid Anti-Colonialist

By OLEN CLEMENTS

JAKARTA, Indonesia (AP) — Had Achmed S. Soekarno been born under different circumstances and at a different time, he might have been an artist, although maybe not a very good one.

* * *

But destiny had other plans for this quiet little man who likes to dabble with paints, reads Western philosophy, loves music and, through Moslem law, has two wives.

To Soekarno fell the role of leading Indonesia out from under Dutch colonial rule which had lasted 350 years. It was a fight which lasted 27 years, during which Soekarno spent 12 years in prison and another period, during World War II, as a Japanese puppet.

TWO WEEK VISIT

Because of this background the man who tomorrow begins a two-week visit to the United States as a guest of President Eisenhower has rarely been separated from controversy.

No one here denies Soekarno's leadership in achieving independence for 82 million Indonesians, most of them illiterate, scattered in an island chain as long as the distance from Seattle to Miami.

* * *

But after that, the disputes around the Republic of Indonesia's first and, so far, only president become heated and confused.

"He likes to play with politics and government leadership, but he doesn't have the vision and caliber for the job," says Mochtar Lubis, editor of the independent daily newspaper "Indonesia Raya."

ANGERS QUICKLY

A close friend of Soekarno describes him as "sincerely devoted to what he sees as the Indonesian cause."

Soekarno angers quickly when anyone brings up the subject of communism versus the West. He is equally infuriated by any insinuation that he might be Communist influenced.

* * *

"He is not a Communist," commented an American who knows him well. "He may be somewhat leftist in his philosophy, but he is above all an Indonesian."

There can be no doubt that this intense revolutionary has always distrusted the white man's world which spawned colonialism. But to some extent it is a distrust created in a vacuum. He has never before traveled west of Cairo.

"That is why he has very little sense of international relations except in a broad sense," says a close associate.

MOMENTOUS EVENT

American officials here view the tip as a momentous event in Indonesia's improving relations with the United States.

The President's current knowledge of the world was gained largely by reading books during 12 years of imprisonment and exile for speaking out against the Dutch. But this year he will get a look at both communism and democracy in action. In addition to his American tour, he plans to visit Russia and Communist China this fall.

* * *

Where does Soekarno really stand in the ideological struggle between Russia and the West? There is no clearcut answer.

Some of his stoutest admirers are disturbed by his casual attitude toward a thriving Indonesian Communist party which last year polled six million votes—about 20 per cent of the total.

HISTORY STUDENT

On the other hand, he is known to be a student of American history, and last year opened the Asian-African conference at Bandung by calling the 29 nations together "in the spirit of Paul Revere."

* * *

But Soekarno rarely ventures into international discussions except on one subject—colonialism. And on this subject he has been a fanatic for at least 27 years.

Actor Argues Divorce Was Unknown by Him

LOS ANGELES (AP)— Superior court has set aside a default divorce decree obtained last March 14 by the wife of actor Keefe Braselle.

Braselle, 32, told the court yesterday that his wife Norma, 29, got the decree without his knowledge. Judge Leon T. David gave the actor five days in which to file an answer and cross-complaint to her suit.

A property settlement which gave Mrs. Braselle custody of the couple's daughter Erin, 12, and $770 a month alimony and support will also be subject to review.

Assumes Korea Command

TOKYO (AP)—Brig. Gen. Thomas J. Gent Jr., a native of Oil City, Pa., today assumed command of the 314th Air Division in Korea. He replces Col. Thomas L. Mosley, who is returning to the United States for reassignment. Gent was vice commander of the Pacific Air Force in Hawaii before coming to the Far East.

Credit Survey Set

WASHINGTON (AP)—The Federal Reserve Board has set early 1957 as target date for completion of a study of consumer installment credit. The survey may help to determine whether standby credit controls are needed.

Why Suffer Bleeding Piles Any Longer

Medical research has developed a miracle medicine called RECTORAL. It does away with the continual use of old-fashioned ointments, suppositories, injections, etc. that give little if any even temporary relief. RECTORAL has a tendency to shrink the piles and usually in a few days the bleeding, soreness, irritation and pain start to disappear and in a few days more are completely gone. Thousands of sufferers have used this remarkable medicine and have never had any further trouble, even years afterwards. Many of these people had been advised that only an expensive and painful operation would help them. Why suffer any longer? Get relief NOW! Stay well! Get a bottle of RECTORAL today at

Kinsel's, Simms, Thrifty, J-V, Hallman Drug, Dunseith, Cole's, Furtney, Rule, Quality, Loy's Drug, Keego Drug, Keego Harbor, Arls, Drayton Plains.

Victims React Bravely in Tornado-born Crises

Once again the people of Michigan have compelling reasons for admiring and helping their neighbors.

By neighbors we mean those who saw their homes battered or destroyed in what weatherwise was the most violent weekend in State history. The tornadoes' victims were magnificent in the way they reacted to disaster.

This was true at Allen Park, Lincoln Park and elsewhere. It was especially true at Flint which was battered by three of the weekend's 20 tornades. Within a few hours they were clearing away debris.

★ ★ ★

Flint's experience in the 1953 tornado is credited by officials with holding down casualties to three dead and 76 injured. With the first warnings, householders quickly sought safe shelter. As a result most of the 200 houses damaged or destroyed were empty when the twisters struck.

Also deserving commendation are the Sheriff and Police officers, Red Cross workers and civilian volunteers. They were on the job aiding the stricken city within a half hour after the storm.

★ ★ ★

Official help was equally prompt and heartening. Gov. Williams and the Small Business Administration have taken steps to insure that victims will be able to obtain disaster loans.

One of the major problems of the stricken areas, besides the gigantic task of clearing the debris and rebuilding, is caused by sightseers. The tornado victims desperately need and are getting expert help. One of the best ways the rest of us can aid, is by staying away from the scenes of destruction.

Expansion of NATO

It has been suggested in informed quarters that lack of enthusiasm over plans to expand NATO stems from a similar effort four years ago.

At that time a committee reported a plan to the Lisbon conference to reconcile NATO's military goals with the economic capabilities of member nations. Although the plan was approved, the impetus didn't extend to efforts to give new life to the "peace" clause or Article II of the NATO treaty.

★ ★ ★

So far the Ministerial Council hasn't come forward with a definite plan for broadening NATO. But, as suggested by Secretary Dulles, it has chosen a committee of three distinguished foreign ministers to study that proposal. They are Lester Pearson of Canada, Gaetano Martino of Italy and Halvard Lange of Norway.

★ ★ ★

All three, of course, are well qualified to serve on this committee. Mr. Pearson and Mr. Martino have the additional advantage of being long time advocates of a new and wider direction for the alliance.

There is every reason to hope for important results from this excellent committee next fall. The need for western unity in the politico-economic field is as clear as in military matters.

PHS Singers Triumph

Credit for one of the year's finest musical events belongs to the 800 vocal students of Pontiac High School.

Their three performances of the 21st annual spring concert were completely satisfying both as educational results and as musical achievements. They also proved to be entertainment of such high quality that the audiences were delighted.

It seems to us a wonderful thing to get fine tonal effects and precision from such large groups of youthful singers. That is what Director George Putnam and his aides, Doreen Voltmann and Merlin Asplin, have accomplished.

★ ★ ★

Groups participating included the Girls' and Boys' Glee Clubs, the A Capella Choir, Junior and Senior Girls' Ensembles, Senior Boys' Quartet and the Teentoppers. Without exception the various groups made noteworthy contributions to the programs. So also did the soloists who deserved in full measure the enthusiastic applause they got from the audiences.

We congratulate students and teachers alike on these splendid musical programs. Their unusual success reflects great credit on all who took part.

Another gaping hole has been gnawed in the foundation of our freedoms. An Indiana man was jailed for habitual laziness. Anybody knows that a person has the constitutional right to be habitually lazy and even lazier than that if he can manage to do so.

An Australian woman charged her husband with putting his signature in chalk on the soles of her shoes before he left for work to make sure she stayed at home all day." —Press report. This sort of thing could easily lead to forgery.

The Man About Town

They Still Survive

Remember Worst Cyclone in Oakland County History

Vacation: On which many books will tell you where to go, the most reliable of which is your check book.

A cyclone was responsible for the largest loss of life in a single day in the history of Oakland County. The sixtieth anniversary of that tragic event will be in a few days.

It was early in the evening of May 25, 1896, that this storm swept through the northern part of the county, killing 43, and several others died later of injuries. Most of the casualties were in Groveland and Brandon Townships.

In response to a request made in this column a few weeks ago, several people who went through that ordeal and still survive after 60 years have reported to us. Among them are:

Mrs. Arno L. Hulet of Pontiac; Mrs. R. M. Corbit, Mrs. Emma Cowdin, Mrs. Jennie Doherty, William Laidlaw, Mrs. Florence L. Hickmott, Mrs. Mattie Flint, Mrs. Ethel Addis, Howard Gibson and Frank Gibson, all of Oxford;

Bert Davidson and J. D. Mitchell of Flint; Mrs. Zene Knight and Mrs. Albert Gaylor of Imlay City; Mrs. Mae Perry of Lapeer; Mr. and Mrs. Charles Fifield of Hadley; Claude Johnson of Fenton; Mrs. Lorena Clegg of Detroit, and Herbert Adams of Lake City, Minn.

A post card rolls in from our old friend:

Ormond E. Hunt,

former executive vice president of General Motors, who is currently touring in distant climes. "If you believe all you hear about Madrid," says he, "the old time Caliphs cut a lot of high jinks in their off moments — and most of their moments were off."

Word comes that the annual "Nurses' Night" of the

Patients' Benefit Association

will be held Thursday evening at the Oakland County Tuberculosis Sanatorium at eight o'clock. All former patients are invited. This gives them an opportunity to show their appreciation for regaining their health there.

Twin tulips are too numerous to be news, but

Mrs. Phil Peterman

of Birmingham has six blossoms growing from one bulb, and

Mrs. Lewis Hutchinson

of Davisburg reports four blooms on one stem. An unusual tulip twin is that of

Mrs. Randall Moseman

of Huron Gardens: red and yellow blossoms from the same bulb.

Verbal Orchids to—

Mrs. Julia Baumgartner

of 16 South Paddock St.; eighty-seventh birthday

Frank J. Maruna

of Waterford, ninetieth birthday.

Mrs. L. D. Ward

of Oxford; eighty-sixth birthday

Mr. and Mrs. Michael Petoskey,

of Millington; golden wedding.

Back to the Kitchen

David Lawrence Says:

Internal Murmuring for Consumer Goods Spurs Soviet Move for Reducing Armies

WASHINGTON—When the Soviet Union announces a "cut" of 1,200,000 men in her army, which in all totals at least 5,000,000, it's the same thing as saying that henceforth a "reserve" of men wearing civilian clothes will go on duty in forced labor camps and in other projects of the government.

* * *

Visitors from Russia say it is difficult to tell where the army begins and ends—there are so many persons under the direct discipline of the government in the work camps and in the factories. The Soviets maintain quasi-military armies of "civilians" on duty throughout the country from the Baltic to the Pacific.

But it would be a mistake to assume the Kremlin was actuated merely by a desire to deceive the Allies. There is probably a much more vital reason for the announcement, and that's internal. The unpopularity of military service in Russia is well known. The "cut" could be a move to placate sentiment internally, where the burdens of armament are beginning to cause concern. The Soviet people know they could have more consumer goods if so much money and labor were not required for arms and munitions.

The official reaction here is puzzlement. It is asserted that, if the "cut" were sincere, it should have been possible for the London "disarmament" talks to have made progress and that more interest in the plan for aerial inspection would have been shown.

MANY ECHO REDS

The Soviet move has propaganda value. The Communist line is to picture Soviet Russia as desirous of peace, while the Allies place emphasis on "military alliances." It is odd how many Americans have echoed the Communist criticism.

It is significant that the secretary of defense, and chairman of the joint chiefs of staff, must emphasize the military in foreign aid. There isn't any enthusiasm in Congress for foreign-aid expenditures not related to the defense.

In testifying before a Senate committee that $3 billion of the $4.9 billion program is for military aid to nations which furnish military defense to this country, Secretary Wilson said:

"To cut military assistance materially at this time would present serious risks to the defense of the United States and the free world and would require a complete reevaluation of our international position and of our military budgets."

BLUNT TALK

The defense secretary pointed out that America now is helping to support 200 divisions in Allied armies, which is a force "several times the strength of our own army."

Admiral Radford supported this argument saying it is better to help Allied nations maintain their armed forces through military assistance than to attempt "to provide U.S. soldiers in the absence of those forces."

This is the first time high officials have talked so bluntly about the reasons for the foreign-aid program. Many a boy not being drafted would be in uniform today were it not for Allied divisions supported by the foreign-aid program. The increased cost to the federal budget would be several times the present $4.9 billion for foreign aid.

There is a tendency to rely less on conventional forces with emphasis on nuclear weapons. But the danger is that, if a ban on atomic bombs is ever made the Soviets would be stronger in ground operations in Europe.

It is suggested by Secretary Wilson that perhaps the Russians are cutting their armies because they want to divert more money to the nuclear side and that the United States cannot afford to change its programs just because Moscow makes a propaganda move.

Only when there is a free government in the Kremlin and when armed forces are withdrawn from the satellite states and their independence restored, can there really be any trust that an era of peace has arrived in Europe.

Joint Disabilities Caused by Nutritional Deficiencies

By WILLIAM BRADY, M. D.

Excluding as utterly as I can prejudicial circumstances, I must say frankly that I don't know whether calcium and D deficiency predisposes or contributes to the development of bursitis.

At the same time, I should make clear that few real doctors as yet share my opinion that insidiously developing joint disability is a manifestation of nutritional deficiency, moderate but over a long period, a deficiency especially of calcium, vitamin D, iodin, and vitamin B complex.

While I sincerely believe that in most cases of so-called chronic arthritis the diagnosis is wrong, for there is no evidence of inflammation, there is no doubt that inflammation is the characteristic process in a minority of cases of chronic joint disability, which may therefore be properly labeled arthritis. Such, for instance, as pneumococcal, brucellotic, gonorrheal, tuberculous and streptococcic arthritis in youth and young adults.

Middle-aged and elderly persons seldom have arthritis, despite the glib way the trick specialist applies the label and starts the victim on the latest outrageously expensive wonder drug. What they really have, I believe, is physical degeneration of joint tissues, due to lifelong nutritional deficiency as indicated above. For this familiar joint disability I propose the name "rheumatiz."

Aside from sedatives, narcotics, analgesics, pain-killers, which assuage pain or discomfort from any cause, a remedy or treatment which might help arthritis would probably not help the rheumatiz, and vice versa.

The cost of the latest miracle medicine for prolonged or progressive joint disability (whatever you choose to call it) is extremely high because the market is ephemeral. The producer must get his money out of it while the drug is still more effective and freer from untoward effects than last year's wonder drug, being ever mindful the probability that the present drug will prove to be a little less effective than early promotion promised and also to have certain hitherto unrecognized untoward effects.

I doubt whether any regimen of remedy that is good for rheumatiz would help arthritis. And aside from the sedative, analgesic or pain-killing effects of aspirin and the ever growing list of "wonder drugs," none of the medicines, the very costly medicines, at present in vogue for arthritis—such as gold salts, cortisone and ACTH, phenylbutazone and prednisone has any actual remedial or curative effect on any kind of joint disability.

Signed letters, not more than one page or 100 words long pertaining to personal health and hygiene, not to disease, diagnosis, or treatment, will be answered by Dr. William Brady, if a stamped self-addressed envelope is sent to The Pontiac Press, Pontiac, Michigan.

Voice of the People

Pontiac Attorney Urges Abolition of Prejudices

Letters will be condensed when necessary because of lack of space. Full name, address and telephone number of the writer must accompany letters but these will not be published if the writer so requests unless the letter is critical in its nature.

We find in all races, colors and creeds, men who are powerful and greedy enough that they believe that they can take over the management of the world, become dictators and run everything as they think it should be run.

The rest of us resent this and build up a dislike or hate for everyone of that man's particular race, creed or religion. This is wrong, for probably most of the members of any particular race or creed are good law abiding and honest people, and want to be on friendly terms with every other person if given a chance.

This particular hatred that we allow to grow in us may not do the other fellow any harm, but it surely does make us miserable and unhappy. Multiply your case by millions and millions of others doing the same thing and you have created a worldwide situation that plays into the dictator's hands.

I know of only one cure for this trouble and that is get down on our knees and pray to God that he assist us in forgetting prejudices and help us to become a true brother to our neighbor. When enough of us do this we can create a great brotherhood of man for good and the world will be a much better place in which to live.

Hal Boyle Says:

Martha Wants to Be Bad — Dramatically Speaking

NEW YORK (AP) — True angels may never become weary in paradise.

But actresses who play angelic roles do sometimes get good and sick of them. One of them right now is Martha Scott, who is suffering from a bad case of too much sweetness and light.

Martha has been wearing wings on stage and screen for some years now, and she'd like to shed them for a while.

I have known Miss Scott from the time she was a schoolgirl studying biology in Kansas City—book biology, that is. When I met her for lunch the other day I told her, "Martha, you're still just as pretty as the girl next door."

* * *

Well, I meant it as a compliment, and a true one. Martha has a fragile beauty that never fades. But my remark had the same effect on her as if I had stepped on her small toes with my big size 10 shoes.

JUST AS BAD

"You're as bad as all the others," she said reproachfully, her hazel-green-green-blue eyes clouding.

"What do you mean?"

* * *

"I mean that little-girl-next-door business," she said. "I've had about all I can take of being the little girl next door. I want to try playing that mean but fascinating lady who lives in the penthouse."

Martha, who actually does hail originally from a small Missouri town with the unlikely name of Gee's Creek, started her radio career as "a 10-buck scream" in a ghost story starring Orson Welles.

Earlier, as a member of a Shakespearean repertory at the Chicago World's Fair, she had enjoyed blackening her teeth to play one of the witches in "Macbeth."

* * *

The sweetness-and-light blight descended on her when she first starred on Broadway as Emily Webb, the sweet doomed young heroine of Thornton Wilder's play, "Our Town."

It deepened when Hollywood starred her in "Miss Bishop," a sugary vehicle in which she played an old maid schoolteacher who turned her back on love, forsaking a birds-and-bees adventure for a life of service among the ABCs. Strangers who meet her still often exclaim in pleased surprise, "Why, it's Miss Bishop."

This makes Martha want to say a bad word.

"How would you like it, if everytime you stepped in a taxi, the driver called you Miss Bishop?" she asked.

Frankly, the thought never had occurred to me.

Many performers don't mind being typed at all. They can enjoy a lazy, financially secure life playing variants of the same role over and over.

Not Miss Scott, who is a skilled and talented craftsman.

"Money isn't security," she said. "You have to figure out what you really want to do with your few hours on earth, and it does come down to a matter of hours—even minutes."

BAD WOMAN

In a recent Robert Montgomery TV show she strayed even further from her own real life character. She portrayed the self-centered, possessive, oversexed wife of a plantation owner, who destroyed the lives of all those around her.

"I never had more fun," said Martha, smiling.

* * *

The results were satisfying, too. Startled producers flooded her with three big TV bids, a Broadway play offer, and two invitations to do movies. She feels that at last she's on the way to getting rid of the "goody-goody" label roles.

If you should bump into Martha accidentally, she won't mind at all if you mistake her for either Marilyn Monroe or Mother Machree.

But, please, don't call her Miss Bishop. Martha doesn't live there any more.

Case Records of a Psychologist:

Did Someone Send You Crane Booklet? Be Grateful but Don't Ask Who It Was

Freda's curiosity is aroused, for somebody sent her one of the marriage booklets offered through this modern newspaper. She wonders who did it. But this is a non-profit educational service, so we can't afford to spend extra time rummaging through thousands of old letters to dig out past correspondence. Please don't ask us to do so.

By DR. GEORGE W. CRANE

Case R-356: Frieda D., aged 29, is a wife who also has a career.

"Dr. Crane, I want you to take my name and address," she informed me after a recent lecture I had delivered in Indianapolis.

"For somebody sent me your marriage tests, but I never ordered them. So could you have your secretary try to look through the files and find out to whom I am indebted for this courtesy.

"My husband vows he didn't do it, so I am puzzled."

NEWSPAPER AIDS

These educational booklets are a counselling service which your editor makes available as a by-product of this column.

The booklets require 20 cents and a stamped, return envelope, but they are a non-profit educational service like college education nowadays.

* * *

But we cannot keep simple requests for booklets on file and then afford to have secretaries dig through thousands of past letters just to find who ordered a booklet on "Dieting" or "Sex Problems in Marriage," etc.

Instead, we aren't quite breaking even on this mail service as it is, without spending additional money and time on tabulation and filing.

So please don't expect us to do such library work for you. Just be grateful if somebody furnished the 20 cents and asks that you receive a helpful booklet.

Many mothers thus will request that booklets be sent to their sons in military service. Others have us forward such educational aids to their daughters in college.

SANTA CLAUS

Many times I have received letters from mothers-in-law who realized that something was wrong in the marriages of their offspring, so discreetly asked us to mail the sex and marriage booklets to the family in question.

Parishioners often ask that such

booklets be sent to their priests and clergymen, sometimes with their compliments and sometimes anonymously.

* * *

Recently a cultured woman asked me to mail six booklets, including the one on "Public Speaking" to her son-in-law who was a highly educated young clergyman but an abominable public speaker.

"Dr. Crane, he is a wonderful young man but he puts his congregation to sleep within 10 minutes and is emptying his church."

"So please send him some booklets which will help him deliver dynamic sermons that attract people, instead of driving them away."

Sometimes such dilemmas are so delicate the donor wishes to remain anonymous to avoid ill will.

MEDICAL AIDS

In recent years a great many physicians simply prescribe such aids as the booklet "Sex Problems in Marriage" or "How to Prevent Impotence."

They write the names of these booklets on their medical prescription blanks and hand them to patients, who are then to send via their local newspaper for the appropriate booklet.

"Dr. Crane," a famous Texas doctor recently informed me," I haven't time to give personal tutoring to every patient who needs sexual counsel on marriage problems.

"And if I did, I'd be compelled to charge them $25 for my time. So I prescribe some of your booklets for that saves my time and also saves the patient the $25. You don't mind if I refer them to your booklets, do you?"

* * *

No, indeed. These booklets are a vast non-profit educational service to help stop divorces and delinquency. That's why your newspaper sponsors them.

And many lawyers, dentists and other professional men order them in quantity to pass along to patients or clients.

Father Rudolph Hodik, the "Family Rosary Priest" of Wisconsin, gets them in big quantities to give to newlyweds and so do thousands of other clergymen.

So take full advantage of this educational by-product of your modern newspaper.

Always write to Dr. George W. Crane in care of The Pontiac Press, Pontiac, Michigan, enclosing a long 3c stamped, self-addressed envelope and 20c to cover typing and printing costs when you send for his psychological charts and pamphlets.

Eden's Stature Seen Increasing

Commons Upholds His Refusal to Tell Facts About Frogman

LONDON (AP) — Prime Minister Eden's firm refusal to tell Parliament all the facts about Britain's missing frogman today appeared to have increased his stature as Britain's leader.

A full-scale House of Commons debate on the case ended last night with the Labor opposition defeated 316-229 in a technical move to censure Eden. He indicated clearly Britain's relations with the Kremlin might be damaged if he told more about the disappearance of retired naval Cmdr. Lionel (Buster) Crabb.

NEAR CRUISER

Crabb was last seen skindiving in Portsmouth, near the Soviet cruiser which brought Premier Bulganin and Nikita Khrushchev to Britain. The British press and public — and the Russians — generally believe he was on a spying mission that went wrong. Eden has said only that his mission was "without authorization" and that none of the Cabinet knew about it.

The 87-vote majority with which the Conservatives beat back the Labor censure motion was one indication that Eden's stock had risen. Normally Conservatives command only about a 60-vote majority.

Louisiana Contests Sale of Offshore Utility Leases

WASHINGTON (AP) — The Interior Department today postponed the sale of federal oil and gas leases in the Gulf of Mexico which had been scheduled at New Orleans this afternoon.

Fred G. Aandahl, assistant secretary, announced the postponement.

The state of Louisiana went to court last Friday to try to prevent the federal sale.

Louisiana claims the offshore lands 10½ miles out into the Gulf.

INJUNCTIONS ISSUED

State Dist. Judge Mark C. Pickrel granted temporary injunctions against 25 oil companies to prevent them from bidding for leases, and against federal officials to prevent them from opening the bids.

Yesterday U. S. Dist. Judge Edwin F. Hunter opened the way for the oil companies to bid on the leases but withheld power from the federal government to open the bids.

Interior Solicitor J. Reuel Armstrong said today's sale was being postponed to permit the completion of appropriate legal action to clear the way for receiving bids on all tracts offered in the department's announcement of the sale.

The announcement covered 161 tracts of submerged lands off the coast of Texas and Louisiana totaling 511,726 acres.

Coast Guard Probes West Coast Crash

SAN FRANCISCO (AP)—The Coast Guard opens an official inquiry here tomorrow into the collision of two freighters near Monterey. One sank with the loss of four lives.

The southbound Marine Leopard, a 10,662-ton cargo ship under charter to the Luckenbach line, was en route from San Francisco to East Coast ports with a heavy load. The Howard Olson, a 2,477-ton coastwise lumber schooner out of San Pedro, was northbound in ballast for Coos Bay, Ore.

Delta Wing Fighter on View at Air Base

MT. CLEMENS (AP)—The delta-wing jet interceptor Corvair F102 will make its first public appearance in the Midwest May 19-20 during the combined Armed Forces Day air and ground show at Selfridge Air Force Base.

The eight-engined jet B52 bomber, an H-bomb carrier, will also be making its first public appearance in the Detroit area. Marine and Army units will demonstrate latest tanks and other weapons.

Ship Strike May Grow

MONTREAL (AP)—Company and union representatives entered their fifth round of negotiations here today under the threat that, unless a wage dispute is resolved, some 130 vessels will join the 90 Canadian Great Lakes ships that have tied up since last Thursday.

Johnson to Get Checkup

WASHINGTON (AP)—Sen. Lyndon B. Johnson of Texas, Senate Democratic leader, said he hopes to visit the Mayo Clinic in Rochester, Minn., next week for a checkup on his recovery from a heart attack last July.

Nebraska Votes in Primary Today

Rural Ballots May Show Distrust in Eisenhower if Democrats Gain

OMAHA (AP) — Nebraska voters marked primary election ballots headed by the names of President Eisenhower and Sen. Estes Kefauver (D-Tenn) today but nobody was sure just what the presidential preference balloting in this predominantly Republican state might prove.

* * *

Neither the Republican president nor the Tennessee Democrat was opposed. Write-ins were allowed but no organized effort to encourage them had been sighted.

PARTY LINES CROSS

Party lines could be crossed only in the smaller cities and rural areas. In the 13 cities of 7,000 or more—embracing about two fifths of the state's population—advance registration by party was required and no switching was allowed at the polls.

* * *

Nebraska was being watched for any signs of dissatisfaction with administration farm policies.

* * *

If a rural rebellion existed, it could show itself in a switch from Republican to Democratic ballots where voters had a free choice. But even state Democratic leaders said they expected no such a display.

* * *

The government of New York state earns one dollar every second on the money it has invested.

Five Are Believed Killed in Indiana Plane Smashup

JEFFERSONVILLE, Ind. (AP) — State Police said a transport plane crashed four miles east of here this morning, killing several persons. No other details were available immediately.

* * *

Jeffersonville is on the Ohio River across from Louisville, Ky.

A police radio report from the scene indicated at least five persons were killed.

The plane, believed to be a commercial transport, crashed on the Clark Dellinger farm.

NO SURVIVORS

Police said there were no survivors of the crash. Troopers said the plane appeared to be a 12- or 15-place Lockheed Ventura. Wreckage was scattered over a wide area.

* * *

John Vissing, living near the crash scene, had notified police a few minutes earlier that a plane appeared to be in trouble. Shortly afterward Mrs. Dellinger reported the crash.

There was rain but no storm at the time of the accident.

Mrs. Dellinger said she counted four bodies.

The crash scene is rolling land about a mile north of the Ohio River.

Vissing, a pilot, told police he was in the yard of his home when he heard a plane's motors accelerate suddenly and then become silent.

Marihuana Possession Admitted in Court

Harold Howze Jr., of 593 Franklin Rd., pleaded guilty yesterday at his arraignment in Oakland County Circuit Court on charges that he had in his possession a marihuana cigarette April 30.

Judge Frank L. Doty, who will sentence Howze May 28, returned him to Oakland County Jail under bond of $2,500.

South's Oldest Soldier Marks 110th Birthday

FT. BLACKMORE, Va (AP)—The tiny southwest Virginia town basked once more today in the reflected glory of an old, old man.

It was the 110th birthday of John B. Salling, one of four remaining Civil War survivors.

Given good weather, the genial, black-haired old soldier expected to don his Confederate uniform, clamp a cigar in his mouth and go to the front porch in his wheel chair to greet the friends and well-wishers who usually drop around on his birthday.

HE'LL WEAR HAT

And there was one thing you could bet on. He'd be wearing a hat.

Salling attributes his jet black hair to wearing a hat and never washing his hair.

The "General," as he's known to his friends, still has good eyesight, but his hearing is poor.

He can't get around by himself any more, but he retains a hearty laugh, still smokes two or three cigars a day and eats well.

DUG SALTPETER

The presents for Salling today included a Confederate shirt to go with his uniform and a 10-gallon hat. The uniform was given to him several years ago. The shirt is a gift of Virginia Gov. Thomas B. Stanley; the hat was sent by the Texas Rangers.

* * *

Salling's Civil War service was limited to digging saltpeter, which was used in the manufacture of gunpowder.

However, nobody dares belittle his service. The old Rebel asserts that he was in a company commanded by Capt. Lon Collins, and that he dug saltpeter for Gen. Robert E. Lee himself.

Judge Enters Plea for Jack W. Rivers

Charged with stealing an automobile in Pontiac April 7, Jack W. Rivers of 1004 Boston St. stood mute yesterday at his arraignment in Oakland County Circuit Court.

Judge Frank L. Doty, who entered a plea of innocent for Rivers, continued his bond of $100.

Stands Mute on Charge of Selling Marihuana

Charged with selling a marihuana cigarette, Lawrence T. Hicks of 1073 Holcott Ln., Royal Oak Township, stood mute yes- Oakland County Circuit Court.

Judge Frank L. Doty, who entered a plea of innocent for Hicks, returned him to Oakland County Jail under bond of $5,000.

Admits Theft of $100 From Pontiac Market

Charged with stealing $100 from a market in Pontiac, Donald Jewell of 4401 Baywood Dr., pleaded guilty yesterday at his arraignment in Oakland County Circuit Court.

Judge Frank L. Doty, who will sentence Jewell May 28, continued his bond of $500.

Great Lakes Ore Hauls Reach 'a Normal Pace'

CLEVELAND (AP) — Great Lakes ore vessels hauled 2,839,273 tons during the week ended yesterday in attaining a normal pace for the first time this season, the Lake Superior Iron Ore Assn. reported.

Husbands! Wives!

Get Pep, Vim; Feel Younger

Thousands of couples are weak, worn-out, exhausted just because body lacks iron. For new younger feeling after 40, try Ostrex Tonic Tablets. Contain iron for pep; supplement does vitamins B_1 and B_2. In a single day, Ostrex supplies as much iron as 16 dozen raw oysters, 4 lbs. of liver or 16 lbs. of beef. 7-day "get-acquainted" size costs little. Or get Economy size and save $1.45. At all druggists.

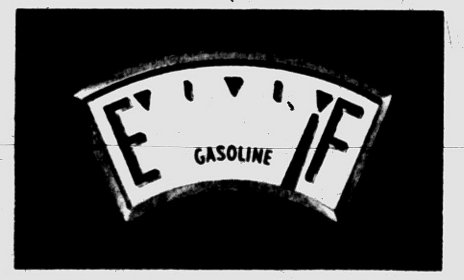

Here's an entirely new grade of gasoline-at regular price-so good it will give smooth, top performance to millions of cars that have been using premium fuel!

Mobilgas

NEW GRADE

Mobilgas R

Now you get Even More Miles per Gallon because Mobilgas R contains **MC_4** *and higher-than-ever octane!*

Now . . . watch your gas needle move more slowly.

Looking for top mileage economy—smooth, full-powered performance? Try *New Mobilgas R*—an entirely new grade of gasoline at *regular* price—designed for all but the highest compression cars.

Its octane is equal to the *premium* gasolines of only a few years ago. It is *so good*—it will satisfy the anti-knock requirements of millions of cars that have been using *premium-priced* fuel—can put new pep in many cars using "regular" gas!

New Mobilgas R also contains **MC_4**—most effective combination of additives ever put in gasoline to correct common engine ills. **MC_4** saves gasoline *four* ways . . .

1. Cleans carburetor interiors—keeps them clean.
2. Extends spark plug life.
3. Controls harmful pre-ignition.
4. Reduces stalling in all kinds of weather.

See your friendly Mobilgas dealer for New Mobilgas R—*get even more miles per gallon!*

DRIVING A HIGH-COMPRESSION CAR?

You need the *highest octane* gasoline to prevent harmful engine knock. That's why we make *another grade* of gasoline—*New Super-Compression Mobilgas Special*. Specially refined to meet the peak power demands of today's highest-compression cars. Further improved with new, gas-saving **MC_4** to give you even *more* power even *more* miles per gallon! Try it today!

Mobilgas—the famous Economy Gasoline!

Gas Firm Reports Income

DETROIT (AP) — Michigan Consolidated Gas Co. reports net income of $9,503,849 for the 12-month period ended last March 31. The figure compares with $7,384,044 during the previous 12 months.

Heart Massage Attempts Fail

Baby Dies of Injuries Despite 3 Hour Battle by Seven Doctors

GRAND RAPIDS (AP) — A team of seven doctors worked continuously for nearly 3½ hours last night massaging the heart of a 22-month-old girl in a futile attempt to save her life after an automobile accident.

* * *

The child, Beth Anne VanOtteren of Grand Rapids, was pinned between a door and a seat when a car driven by her grandmother, Mrs. Glenn F. VanOtteren, 47, also of Grand Rapids, collided with another vehicle and overturned. The VanOtteren car rolled on its side hooking a fire hydrant through its left front window.

Beth Anne was pinned almost a half hour until police could chop her free with axes. The grandmother suffered minor injuries. The girls' mother, Mrs. Gay VanOtteren, a passenger, escaped injury.

The driver of the other car, Mrs. Charles W. Uzarski, 29, and her 4-year-old son, Carl, of Grand Rapids, suffered minor injuries.

* * *

Butterworth Hospital officials said the girl's heart was not beating when she was brought in. The team of doctors wept into immediate action in an effort to help keep her alive.

'Brute of Korea' Beats Conviction

Army Review Board Upsets Court Martial Life Sentence

WASHINGTON (AP) — An Army review board has thrown out the court-martial conviction of Sgt. James C. Gallagher on charges of killing two fellow U.S. soldiers in a Communist prison camp in Korea.

* * *

The three-man board's action is subject to review by the U.S. Court of Military Appeals, which may approve its findings or reinstate the original life sentence.

POW INCIDENT

Gallagher, 24, of Brooklyn, N.Y., is confined at Ft. Leavenworth, Kan. He was sentenced Aug. 19, 1955, to life imprisonment after being convicted of throwing two fellow prisoners of war out of a hut and leaving them to die in subzero weather.

The prisoners were Cpl. John W. Jones of Detroit and Cpl. Donald T. Baxter of Waukon, Iowa.

* * *

The review board held that the court-martial lacked jurisdiction. It said Gallagher was discharged after his enlistment expired Oct. 27, 1953, and that he re-enlisted the following day. The board, citing a 1949 Supreme Court decision, said this constituted a break in his service which precluded bringing charges against him based on events in his previous enlistment.

Pontiac Press Photo

NAMED COMMANDERS — Mr. and Mrs. Ray S. Jewell of Waterford have been elected as commanders of Disabled American Veterans Post 16, and its auxiliary.

Disabled Veterans Name Husband and Wife Team

Husband and wife were named commanders of Disabled American Veterans No. 16 and its auxiliary in a recent election.

Mr. and Mrs. Ray S. Jewell, 4692 Rockcroft, Waterford, will be installed at a special meeting this Saturday night at the chapter home, 199 Auburn Ave.

Elected DAV officers include Robert Copeman, senior vice commander; J. J. Keys, junior vice commander; John Bardon, chaplain; LeRoy Bressler, treasurer; Bob Smith, adjutant and Robert Baker, assistant adjutant.

Auxiliary officers named in addition to Mrs. Jewell include Mrs. Lloyd J. Sparks, senior vice commander; Mrs. Robert Copeman, junior vice commander; Mrs. Joe Hicks, treasurer and Mrs. John Tuson, chaplain.

DAV members and auxiliary will gather for a cooperative dinner preceding the installation. Past National Commander Gordon Forrell, Mount Clemens, will install the new officers. Other state officers will be present at the dinner meeting.

Dies of Crash Injury

MUSKEGON (AP) — Mrs. Leona Huizenya, 25, of Rothbury, died in a Muskegon Hospital last night. She was injured Friday in an automobile accident on U.S. 31 at the Oceana-Muskegon County line.

Oldest of the mints of the United States was established at Philadelphia in 1792.

Rain Dodgers Felled

MEXICO CITY (AP) — A sudden downpour sent passersby scurrying into a city market. As the rain continued, many of those sheltering began to patronize eating stalls. Later ambulances took 20 persons to an emergency center to be treated for food poisoning. Contaminated meat was blamed. Police were searching for the sellers.

Pomona Starts Vacation —School Burned Down

POMONA, Calif. (AP) — Some 1,500 students are beginning their summer vacation a month early because fire destroyed this city's only high school.

The student body left the 35-year old structure quickly and without any injury yesterday when flames swept through its rooms, causing a loss estimated by school officials at $500,000.

Two months ago voters approved a 7½-million-dollar bond issue, including two million dollars for a new high school in West Pomona.

MICHIGAN BELL TELEPHONE COMPANY

Beta Theta Phi to Sponsor Spring Dance Friday

Pontiac Press Photo

Taking time out for a cup of coffee during a committee planning meeting are members of Beta Theta Phi sorority. Mrs. M. C. Worster of Wenonah drive, president of Beta Chapter, checks details with Mrs. Ralph Bergemann of Lincolnshire drive, publicity chairman, and Mrs. George Zannoth of Watkins Lake road, dance chairman. The annual party will be held Friday at Elks Temple. Guests will dance to the music of a popular out-of-town orchestra from 9:30 p.m. until 1:30 a.m.

Mrs. Ward A. Cummings of Preston avenue keeps busy checking tickets for the Beta Theta Phi dance being held Friday at Elks Temple. Proceeds from the party will go to the Pontiac Foundation for the civic auditorium fund. Music for the 9:30 p.m. until 1 a.m. affair will be furnished by an out-of-town orchestra.

Decorations for the Friday evening dance of Beta Theta Phi sorority are the responsibility of Mrs. Robert Tedcastle (seated) of Old Orchard drive, chairman, and Mrs. Donald Kaiser of Berwick boulevard, committee member. The members were caught by the photographer as they scanned publications for ideas to complete their decorative theme.

Elks Temple to Be Scene of Festivities

Numerous Parties to Be Given Before Annual Ball

On Friday evening members and guests of Beta Theta Phi sorority will gather at the Elks Temple for the annual spring dance sponsored by the sorority.

The ballroom will be transformed into a starlight terrace for the affair, with the sorority's colors of blue and gold used predominately.

Proceeds from the party will be given to the Pontiac Foundation to be used for a civic auditorium.

Mrs. George Zannoth is general chairman of the affair and is being assisted by Mrs. Duane Hamilton and Mrs. Walter Terry, place; Mrs. John Sinclair and Mrs. Lucille White, orchestra, and Mrs. Ward Cummings, Mrs. Kenneth Madsen and Mrs. Norman Mack, tickets.

Mrs. Robert Tedcastle is serving as chairman of the decorations committee.

* * *

Several pre-dance parties have been planned for the evening. Mr. and Mrs. John Sinclair of Rutherford road are expecting Mr. and Mrs. Charles Bender, Mr. and Mrs. Arthur Randall, Mr. and Mrs. Lorne O'Neil, the Clinton Millers, the Merton Gravelines and Mr. and Mrs. Maurice Brown of Detroit.

OTHER HOSTS

Gathering at the Donald V. White residence on LaSalle avenue will be Francine Brown and Glen Gidcumb, Barbara Frasier and Charles Peters, Mr. and Mrs. Paul Colton, Mr. and Mrs. Richard Harroun, Mr. and Mrs. J. Allen Brown and Mr. and Mrs. Donald Ostrander.

* * *

Mr. and Mrs. George Zannoth will entertain Mr. and Mrs. Charles Frick, Mr. and Mrs. Clare Wilson, the Al Grays, the Charles Campbells, the Gerald Neinstiedts, the William Potters and Mr. and Mrs. Palmer G. Bundy at their home on Watkins Lake road.

Mr. and Mrs. Ralph Bergemann of Lincolnshire drive have invited Mr. and Mrs. Jasper Warden, Mr. and Mrs. Richard Acre, Mr. and Mrs. Raymond L. Cole and Mr. and Mrs. Bud Reichert.

The Walter Terrys of Linden road will be hosts to Mr. and Mrs. Kenzie Smith, Mr. and Mrs. Terrence Freeman, Mr. and Mrs. William Andrews, Mr. and Mrs. James Simoniau, the Robert Burkes, the Robert Davises, the Paul Davises, the Thomas O'Malleys, the John Kochs, Mr. and Mrs. Arthur Linney, Mr. and Mrs. Orville Proksch and Mr. and Mrs. Norman Schram.

* * *

At the home of Mr. and Mrs. Norman Mack of Woodbine drive, guests will include Mr. and Mrs. Frank Eaton, Mr. and Mrs. Raymond Morgan, Dr. and Mrs. Robert Kimmins, Mr. and Mrs. Jack Ross and Mr. and Mrs. L. James Eaton.

ALSO ENTERTAINING

Mr. and Mrs. William Kaiser, Mr. and Mrs. Cornelius Babba, Mr. and Mrs. William Roach and Mr. and Mrs. Jack Tynan will gather at the home of Mr. and Mrs. Donald Kaiser on Berwick boulevard.

* * *

At a party in the home of Mr. and Mrs. James Zuehlke of Williams Lake road, guests will include Mr. and Mrs. David Green, Mr. and Mrs. Charles Shotwell and Mr. and Mrs. Glen Fries.

Mayor and Mrs. William Donaldson, Mr. and Mrs. Merle Petrie, Mr. and Mrs. Raymond Selinski, Mr. and Mrs. Felix Ballard and Mr. and Mrs. James Barling will attend the gathering at the Ward Ross home on North Berkshire road.

Mr. and Mrs. Ward Cummings have asked as their guests Mr. and Mrs. Dan Murphy, Mr. and Mrs. H. Delos Nicholie, Mr. and Mrs. Dean Peterson, Mr. and Mrs. Glen Hickson and Mr. and Mrs. Milo Struble.

* * *

Another group gathering at the home of the Robert Tedcasties on Old Orchard drive will include the Dexter Kennedys, the Fred Ziems, the Farrell Roberts, the Robert Millers, the Lloyd Huntleys, Mr. and Mrs. Calvin Rhodes, Yvonne McKinney and Fred Davidson.

Mr. and Mrs. William Lang, Mr. and Mrs. Leonard Becker of Royal Oak, Mr. and Mrs. Walter Denison and Mr. and Mrs. George Taylor of Birmingham are also invited to the Tedcastle home.

Others in their party will include Jack Anderson and Sue Houghton, Charles Hauser and Pat Pangan, Joe Kosik and Elaine Hamilton and Mr. and Mrs. Emery Butler.

Also hosting parties will be Mr. and Mrs. Duane Hamilton of Illinois avenue, Mr. and Mrs. John Allen and Mr. and Mrs. William Hutchinson of Owego drive.

Oliva Viola Speaks Marriage Vows in Detroit Church Ceremony Saturday

A reception at the Whittier Hotel followed the wedding of Oliva Viola and William Halford Thomas Saturday in St. Margaret Mary Church, Detroit.

Oliva is the daughter of Angelo Viola of Detroit and the late Mrs. Viola, and William's parents are Mr. and Mrs. Edward E. Thomas of Holly.

As she approached the altar, Oliva was wearing a gown of white peau de soie with the traditional fitted bodice and full, flaring skirt. The elegance of the gown was accented with a tiny tiara which held a fingertip veil.

The bridal bouquet was formed of stephanotis, shattered white carnations and ivy.

* * *

Preceding the bride to the altar were Mrs. Matthew Boehmer of Detroit as matron of honor; Mrs. Bruce Mitchell of Holly, sister of the bridegroom, and Dolores Viola of Detroit, the bride's sister, as honor attendants.

GOWNED IN GREEN

Their gowns were of pale green silk and they wore white daisy crowns matching their daisy bouquets.

Joseph Sfair of Detroit performed the duties of best man while Gina Viola, the bride's brother, served as groomsman and Bruce Mitchell, Robert Thomas and John Thomas, both brothers of the bridegroom, were ushers.

For receiving guests in the Jefferson Room of the Whittier, Mrs. Thomas wore a rose lace dress and beige accessories.

The 200 guests gathered to bid the newlyweds a farewell when they left for a three-week honeymoon in New Orleans.

For the trip the new Mrs. Thomas chose a costume dress of beige linen lined with light green polished cotton. The sheath dress matched the coat's lining. Her accessories were in beige and green.

* * *

When they return the Thomases will reside in Franklin.

MR. and MRS. WILLIAM HALFORD THOMAS

Married Saturday in St. Margaret Mary Church, Detroit, were Oliva Viola of Monroe street and William Halford Thomas of Holly. Oliva is the daughter of Angelo Viola of Detroit, and William's parents are Mr. and Mrs. Edward E. Thomas of Holly.

Daughters and Mothers Are Feted

Meeting Conducted by Junior Women on Monday

Mothers and daughters of members of the Junior Pontiac Women's Club were their guests at the Monday meeting held in the Civic Room of the Pontiac Federal Savings and Loan Building. The meeting was conducted by Mrs. Claire J. Hinckly.

* * *

Plans for the annual dinner and installation of officers were made. The event is scheduled for May 28 at Ted's and will mark the closing of activities of the club's silver anniversary year.

Mrs. Frank Anderson, program chairman, introduced Mrs. John H. Baer who presented a program on "Wardrobe Magic," showing how accessories can make different costumes.

Adeline Hook served as social chairman.

* * *

Her committee members were Mrs. Lloyd B. Smith, Mrs. Frank Moreau, Mrs. Leland Martin, Mrs. E. A. Wiley, Mrs. Jack Brannack, Mrs. Edward Eickmeier and Mrs. Charles Galloway.

Shower Honors Judy Robinson

Judy Robinson was the honoree at a bridal shower given Friday evening by Mrs. John L. Killeran and Jeanne Killoran in their home on North Berkshire avenue.

Guests were Mrs. Alfred Robinson, Mrs. Joseph Hughes, Suzanne Robinson, Mrs. Jack Applewhite, Mrs. C. R. Hetherington, Mrs. Stuart Hutchinsn, Mrs. Fred Voelker, Mrs. Charles Welden, Turry Welden and Mrs. V. L. Newcomb.

International Officer to Visit Local Zonta

Announcement that Mrs. Audra Francis of Saginaw, second vice president of Zonta International, will visit the Pontiac Zonta Club at the luncheon meeting Thursday at Hotel Waldron was made at the recent meeting held in China City Restaurant.

* * *

Mrs. Francis is chairman of international relations committee of Zonta International and a civic leader in Saginaw.

An invitation was received from the Royal Oak-Ferndale Zonta Club to attend a dinner marking its fifth anniversary May 28, when Edna Nairn of Windsor, Ont., Lieutenant governor of District Five, will speak.

* * *

The annual breakfast honoring new members will be held June 3 at Rotunda Inn with Mrs. S. B. T. Wattles and Mrs. Charles Wait as cochairmen of the program.

Flora Shelly Group Marks Birthdays

The annual birthday dinner of the Flora Shelly Group of First Presbyterian Church was held at the Carrie Lee Tearoom in Birmingham Friday evening. Hostesses were Isabel Goodson and Ethel St. Clair.

Mrs. C. A. Harris was a guest of the group and Mrs. Earl Clark was welcomed as a new member. "Current American Indian Legislation" was discussed by Mrs. Wayne Reaves. The June meeting will be held at the Union Lake home of Laura and Mary Cobb.

School Tour Scheduled

A Visitation Night program will be held Thursday at 7 o'clock for sixth grade students who will enter to classrooms. Parents of the current Eastern Junior High School next fall and their parents. An opening assembly will be given in the Eastern auditorium.

* * *

The purpose of this meeting is to provide incoming seventh graders and their parents with an opportunity to become acquainted with Eastern teachers, the school and the program of studies.

A tour of classrooms is planned as if it were a regular school day. Seventh grade teachers will greet the group and present the course of study briefly.

Building facilities, such as the printshop, the cooking, sewing and drafting rooms, will be open to visitors. New students must be accompanied by at least one parent or guardian.

Refreshments will be served in the cafeteria following the visits PTSA will serve as hosts and hostesses. Several seventh grade students will be guides.

Girl Scout Council Will Meet Tonight

Mrs. George S. Dunham, national Senior Roundup chairman, will be guest speaker of the Northern Oakland County Council of Girl Scouts this evening at 8 in the Waterford CAI Building.

Also on the program will be the patrol of girls from this council who will participate in the round-up. They will present a Flag ceremony, dance the American Girl Polka and give a choral reading.

All adults in Girl Scouting are invited to attend.

Le Baron PTA Has Discussion About America

"What America Means To Me" was the program topic of the recent meeting of LeBaron PTA, with the viewpoints of a father, mother, teacher and pupil given by LaVerne Cox, Mrs. Louis Tebeau, Mrs. Eskil Carlson and Pamela Pritchard.

* * *

Mrs. Welton G. Sherman, principal of LeBaron, was presented with a life membership in the National Congress of PTA. Mrs. Sherman, who will leave LeBaron this year, has spent 40 years in the teaching profession. She has been at LeBaron 20 years.

Announcement was made of a farewell open house for Mrs. Sherman June 1 at the school from 7 to 9 p.m. The public is invited.

* * *

The PTA also presented gifts to Mrs. Elmer Huntley, retiring second grade teacher, and to Mrs. Cecil Burder, secretary, who also leaves LeBaron this year.

Mayflower Group Meets at Luncheon

Mrs. Herbert Hotchkiss entertained 29 members and guests of the Mayflower Group of the First Congregational Church at a luncheon at Hotel Waldron Friday.

* * *

Guests attending were Mrs. Cecil A. Bondurant, Mrs. Elwood R. Bigler, Mrs. Stanley E. Kipp, Mrs. F. R. Conner, Mrs. Leon Putnam, Mrs. G. W. Gaches, Mrs. Frank D. Cobb and Mrs. James Chapman.

* * *

Devotions were given by Mrs. G. H. Hendrick, and Mrs. Kipp read the Indian version of the 23rd Psalm. A play telling about the American Indians on a reservation in North Dakota was presented by Mrs. Robert Sanford, Mrs. Kipp, Mrs. Conner, Mrs. Gaches and Mrs. Putnam.

Women's Section

TUESDAY, MAY 15, 1956 — PAGES 9-11

To Be Held June 7

Willis Slates Kindergarten Tea

The annual Kindergarten Tea is tops on the list of plans for members of Willis School PTA. Final arrangements were made when the PTA met at the school. The meeting was also the occasion for the naming of committee chairmen for the 1956-57 school year.

June 7 was announced as the date for the Kindergarten Tea and the enrollment of kindergarten youngsters for next fall. June 14 is the date of the luncheon to honor teachers. Mrs. Robert Cartier is chairman of arrangements.

Mrs. John Adomitis announced her committee chairmen for the 1956-57 school year. Mrs. Roy Hardy is chairman of adult education; Mrs. Eugene Williamson, budget and finance; Mrs. Truman Jewell, good cheer; Mrs. Lester Avis, hospitality; Mrs. Cartier, juvenile protection, and Mrs. Lewrence Ferman, membership.

* * *

Mrs. Floyd Parker is mother librian, Mrs. Clarence Kloka, parliamentarian; Mrs. Fred Feekart, program chairman; Mrs. Clarance Huemiller, publicity; Mrs. Dennis Burtch, room mother; Mrs. William Hilderly, safety; Mrs. Bert Hillock, scholarship, and Mrs. Lloyd Stechow, Student Council representative.

Transportation chairman is Mrs. Howard Barnes, and Mrs. Thomas Hensen is ways and means chairman.

During the program, representatives from student organizations explained their aims and goals.

The three groups within the school, Willis Student Council, Safety Patrol and Girls' Service Squad, were part of an informal panel. The council, with Mrs. Carroll Porritt as sponsor, was represented by DiAnne Call and Corolyn Cudnohufsky.

Carolyn also represented the Service Squad, along with Janet Foster. The sponsor is Geraldine Brown. The Safety Patrol, sponsored by Mrs. Hasen Reynolds, had Perry Tison and LaVerne Rudd as representatives.

Three extra-curricular groups participating were the Cub Scouts, with Mrs. Dennis Burtch as den mother; the Blue Birds, with Mrs. Hilderly as leader, and Camp Fire Girls, with Mrs. Bert Winters and Mrs. Orville Foster as leaders.

Refreshments were served by Mrs. Rex Cobb, Mrs. Harold Neff, Mrs. Hensen, Mrs. Jean Harsch and Mrs. James Davis.

ROSE MARIE SCRUGGS

Mr. and Mrs. Edwin Richard Scruggs of Morven, Ga., are announcing the engagement of their daughter, Rose Marie, to Lt. Frank Stanford Weyer. He is the son of Mr. and Mrs. Stanford James Weyer of West Fairmount avenue. The wedding will take place June 17 at Morven Baptist Church.

Rose Marie attended Valdosta State College and Lt. Weyer is serving with the U.S. Air Force at Moody Air Force Base in Valdosta, Ga.

Mrs. Robert Young Honored at Shower

Mrs. Roger Hoyt of East Lansing entertained at a pink and blue shower honoring Mrs. Robert Young. The Saturday evening affair was held at the home of Mrs. Ernest Hoyt on Silver Circle drive.

* * *

Guests attending were Mrs. George Irwin, Mrs. William Palace, Kathy Young, Mrs. Douglas Austin, Mrs. Stanley Jones, Mrs. Paul Valentino, Mrs. Henry Grace and Mrs. Robert Angel.

* * *

Mrs. Richard Kistner, Mrs. David Eastham, Mrs. Charles Warman and Mrs. Hoyt completed the guest list.

Class Has Meeting

Twenty-four members of the Fellowship Class of Baldwin Avenue Evangelical United Brethren Church met at the church Friday evening. Mr. and Mrs. Ray Ritter were hosts assisted by Mr. and Mrs. Paul Jones.

Now we even have waterproof lipstick. This will keep the line of your lips clear and the color stable, whether you dive into the water or sip iced tea.

New Cosmetics Insure Comfort in Summer

By JOSEPHINE LOWMAN

Today women have so many beauty aids. For instance, waterproof mascara has only been available for a comparatively short time. Before that a woman had to chance black streaks down her cheeks should she run into a sudden rain or burst into tears.

* * *

When she went swimming she could not use eye makeup and therefore felt somewhat, and looked somewhat, like a shorn swan.

Now we even have waterproof lipstick. This will keep the line of your lips clear, and the color stable, whether you dive into the water or sip iced tea. There is also a waterproof makeup. It looks as though there are going to be lots of pretty mermaids this summer!

I mention these waterproof cosmetics at this time because the swimming season is just about to begin in earnest. However, they are very helpful in hot weather even if you do not swim. We have all had the experience of having our mascara smudge because of perspiration.

* * *

To continue some of our beauty first aids: There are creams which hold the moisture in dry skins. There are deep pore cleansers; spill-proof nail polish bottles; a cream which lightens shadows; heel, hand and elbow mitts; nail polishes which do no spread pinkness over surrounding skin when removing polish from our nails; disappearing creams (or those which leave no grease); hair sprays, which are of great use in hot, wilting weather; all kinds of deodorants (one you just roll on without ever touching your hands to it); superfluous hair removers, even for the face, and eyelash curlers. The list goes on and on.

ALSO COLOGNES

We should also remember that colognes are refreshing and cooling. They make us feel better, and because of the alcoholic content, cool as they evaporate.

* * *

We really should take advantage of the wonderful things which have been dreamed up for us after much experimentation and research.

If you would like to have my leaflet about makeup tricks send a stamped, self-addressed envelope with your request for leaflet No. 50 to Josephine Lowman in care of The Pontiac Press.

While a busy person cannot do all, she or he would like to do I sometimes think that fatigue often comes from the frustration of not doing what we want to do.

Therefore it seems wise to abandon those activities which are unnecessary, many of which we just have been caught up in because of inertia or the pressure of what others expect of us.

BUSY SOPRANO

Thinking along these lines I was most interested in what the opera and concert soprano Lilly Windsor had to say. Miss Windsor was abroad at Christmastime.

* * *

In fact she was on a whirling concert tour, averaging five concerts a week, covering England, France, Germany, Switzerland and Holland, is just six short weeks. I wondered how in the world she ever found time to send Christmas cards to her friends.

When she was queried about this she replied, "I, like everyone else, have plenty of time to do the things I really want to do. I wanted to send cards and so I addressed them on planes, under dryers, at lunch in hotel dining rooms, while sitting in my slip waiting for the valet to bring back the suit I had sent to be pressed."

Lilly Windsor's point of view, boiled down, comes to this. It is a mistake to think that you must have special periods of time, for instance, to write, to learn to play the piano, to paint or to study a foreign language. If you really want to do any of these things or a dozen like them, you have the time—anyone does if the wish is strong enough.

* * *

Robert Ruark's best seller, "Something of Value," was written in the midst of a busy newspaper career. Mary Ellen Chase, a busy housewife and mother, wrote the hit play, "Harvery," between chores.

Frances Field, the artist, painted the pictures in her one-man show in New York between midnight and morning; life as the wife of a pianist who seemed to be practicing or giving lessons all the time was too tumultuous to her work in peace and quiet during the daytime.

TAKE THE TIME

These are extreme examples but many women during their everyday lives enjoy some hobby and many men indulge in cabinet making, become experts at barbecue cookery or study photography. If you have been holding back with the vague ideea that "someday I will write," "Someday I will paint," "Someday I will study," and so forth, just take time and you will have it.

* * *

Lilly Windsor seems to have lived up to her philosophy always. When she is at home in Chappaqua, N. Y., she divides her time among practicing, thrice weekly trips to New York for lessons, and managing the delicatessen which has furnished the family finances for as long as she can remember.

She really manages it, too, waiting on customers, making the potato salad herself, buying provisions, even in a crisis delivering orders, all without losing an iota of her good looks and good nature.

Probably always "having plenty of time" for the gracious or friendly gesture helped sell out her recent Town Hall recital in New York.

* * *

Tomorrow: "Appearance, Homemaking Count in 'America' Contest."

Pontiac Press Photo

Adding last-minute touches to the centerpiece that decorated the speakers' table at the annual May Breakfast held Friday in the ballroom of Casa del Rey is Mrs. Harold B. Euler (left) of Ottawa drive. Mrs. D. R. Wilson (center) of Oneida road served as general chairman of the affair for the Colonial Group of First Congregational Church. Assisting with arrangements was Mrs. Mac T. Whitfield (right) of West Iroquois road.

News From Bloomfield

Jo Anne Wellman Selects June 23 as Wedding Day

By RUTH SAUNDERS

BLOOMFIELD HILLS — JoAnne Wellman, daughter of Mr. and Mrs. Joseph E. Wellman of Falmouth drive, has chosen June 23 as the day of her marriage to James Nels Nelson of Topeka, Kan. He is the son of Mr. and Mrs. Melvin N. Nelson of Topeka.

The wedding will take place in Christ Church Cranbrook.

Mrs. Clyde E. Thompson, the former Nan Moseby of Henderson, Ky., will be matron of honor. Bridesmaids will include Caroline Averill of Portland, Ore., Ann Lundberg of Fort Lauderdale, Fla., and Alice Kitts of Birmingham.

One of the first parties for JoAnne will be a luncheon which Mrs. Malcolm Welty will give June 2. Mr. and Mrs. William C. Sproull will entertain at a dinner for the couple June 7.

Both young people are graduates of the University of Kansas where Mr. Nelson is now attending Medical School.

PLAN LUNCHEON

Among hostesses at the bridge luncheon at Bloomfield Hills Country Club May 23 will be Mrs. Otto Kern and Mrs. M. M. Burgess.

Hostesses for the day will include Mrs. William D. Downey, Mrs. A. D. Freydl, Mrs. Theodore Yntema and Mrs. George T. Trumbull.

Mr. and Mrs. Otto Kern are occupying the home of Mrs. Harry W. Taylor on West Long Lake road during Mrs. Taylor's stay in Europe.

Mrs. Robert Lee Graham is planning to sail for Europe June 16 on the "Liberte." She will attend several meetings of the International Museum Committee in Switzerland and will also travel through France before returning home late in July.

Some petunia seeds sell at $350 an ounce.

Arm Tired? Use a Mixer for This One

Mrs. Barger Says Frosting Guaranteed to Stay Soft, Moist

By JANET ODELL
Pontiac Press Home Editor

Yesterday we promised you a good white frosting recipe for that Black Walnut Banana Cake. Here it is, as given to us by Mrs. Corbit Barger.

Mrs. Barger says this frosting is always successful, stays moist and is never sticky. She's used the recipe for years.

At this time of the year Mrs. Barger spends as many hours as possible in her quarter-acre garden. Later on, she'll be busy canning the produce. She likes to sew and to do home decorating. For fun she's learning to use a cake decorator.

BOILED FROSTING
By Mrs. Corbit Barger

2 cups sugar
⅓ cup water
1 tablespoon white vinegar
2 egg whites
1 teaspoon flavoring

Boil first three ingredients until mixture spins a thread. Add to stiffly beaten egg whites. Keep beating until frosting is of spreading consistency.

It will be marshmallowy in appearance and will stay soft. This amount will frost one cake.

Colonial Group Presents May Breakfast at Church

One hundred members and guests attended the annual May Breakfast of the Colonial Group of the First Congregational Church Friday morning.

Following greetings by Mrs. Fred Voelker, Mrs. J. W. Wingnall, soloist, presented "Thank God for a Garden" by Del Riego, "Spring Dropped a Song Into My Heart" by Senner and "Go 'Way From My Window" by John Jacob Niles. Charles A. Wilson accompanied the soloist at the piano.

A book, "Spring Nosegay," was the subject chosen by Mrs. Edward Williams of Rochester. The speaker selected this book as her topic because "it is designed to interest listeners in books written for the very young as well as those written for adults."

"There is a book for everyone. Real reading is a wonderful experience learned at the mother's knee," she remarked.

* * *

As evidence of the interest created by the stories, the speaker read Harry Behn's "All Kinds of Time," written for the very young, and excerpts from the enchanting story, "The Secret River" by Marjorie Rawlings.

Mrs. Williams concluded with a character sketch from "The Blue Fox" by Ronald Duncan.

Assisting Mrs. D. R. Wilson, general chairman of the annual affair, were Mrs. Robert A. Armstrong, Mrs. Conrad N. Church, Mrs. James C. Clarke, Mrs. Harold Euler, Mrs. F. C. Cassell, Mrs. Mac Whitfield, Mrs. Earl Treadwell, Mrs. George Sutton and Mrs. Donald Strauss.

Mrs. C. Henry Purdy arranged the program, with Mrs. Oscar Lundbeck handling tickets and Mrs. F. C. Russell, publicity.

* * *

Decorations were arranged by Mrs. Phillip Vierieck with the assistance of Mrs. Wilson.

MRS. STANLEY SLABINSKI

Sorority Chapter Chooses Officers

Elected to head Beta Alpha Chapter of Sigma Beta sorority was Mrs. Stanley Slabinski. Other officers for the coming year are Jackie Downer, vice president; Mrs. Ronald Weaver, treasurer; Grace Campbell, corresponding secretary, and Mrs. Paul Beith, recording secretary.

Mrs. William Thomas is editor, Margarite Windiate is parliamentarian and Mrs. Stanley Fisher will serve as charity chairman. Officers were elected at a recent meeting in the home of Miss Downer of South Sanford street. Installation will be held June 13.

Mrs. Slabinski will open her home on South Avery road for the May 23 meeting.

Art Society Hears Talk by Pastor

Dr. A. A. Siagris of St. George Greek Orthodox Church spoke on "The Importance of Art in Religion" and showed several of his paintings to members of the Pontiac Society of Artists Friday evening at the home of Mrs. L. L. Sterling on Lorraine court.

* * *

Dr. Siagris, a graduate of Columbia University, has had two exhibits of his work at the university. He was welcomed as a new member of the society. Other new members are Mrs. Alice Roos, Mrs. Adell Paine, Marjorie Holcrow and Mrs. C. K. Nauman.

Mrs. Chadd Mellinger, general chairman of the annual exhibit May 27 at Adah Shelly Library, has announced committees for the event.

Mrs. L. Jerome Fink is table decorations chairman. Mrs. Robert Glenn, Mrs. Paul Meredith and Mrs. Harcourt Patterson, Mrs. Sterling, Mrs. Ralph Kuenzel, Arthur Hays, Mrs. Paul Davison, Mrs. Byrrh Rombough and Guy Saunders are on the reception committee.

* * *

John Allshouse is chairman of the judges committee and Mrs. Michael Godoshian is handling publicity assisted by Mrs. Herman Schwarze, Mrs. Walter Lakkari, Mrs. Rombough and Mrs. Sterling.

The Jordan River flows 200 miles to travel the 65-mile distance between the Sea of Galilee and the Dead Sea.

Two Welcomed by Newcomers

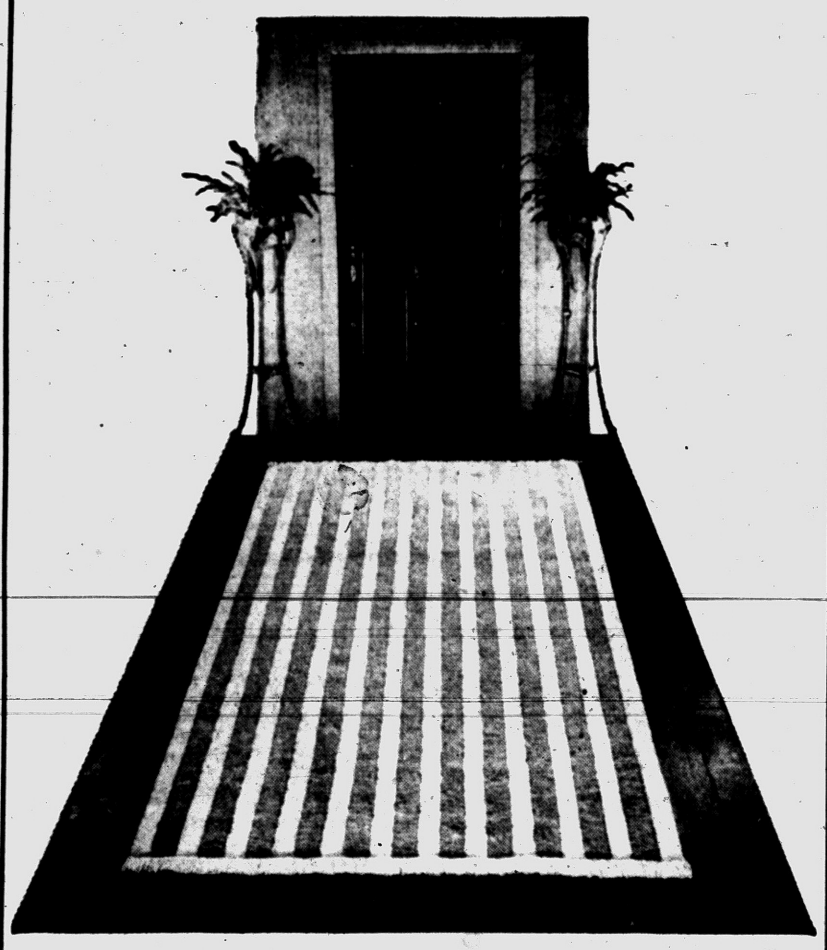

Mrs. James Donehy and Mrs. Harry Mehorg were welcomed as members of the Newcomers Club at the recent meeting held at the Adolph Magnus home on Brookside drive, Bloomfield Hills.

The budget committee will meet Wednesday at the Peter Dunn home at Lake Angelus. Plans were discussed for the club's annual closing dinner at Rotunda Inn May 23.

Janice Antona and three of her pupils told of the work being done for the new citizens of Pontiac.

Refreshments were served by Mrs. Magnus assisted by Mrs. Ericson Lewis and Mrs. Clarence Saunders.

Pontiac Farm and Garden Club Plans Dessert Bridge on Wednesday

Pontiac Press Photo

Admiring one of the flowering crab trees planted by the Pontiac Branch of the Women's National Farm and Garden Association last year were (left to right) Mrs. Russell Galbraith of Cherokee road, Mrs. Arthur Young of Shoreview drive and Mrs. Clifford T. Ekelund of Ottawa drive. They are members of the Pontiac Branch which is sponsoring a dessert bridge Wednesday in various members' homes. Prizes will be flowering crab trees which will be planted in various spots in and about Pontiac.

Her Failure to Call Up Irks Friend

More Thoughtful to Give Notice About Changed Plans

BY EMILY POST

A reader tells me: "The other evening while talking to a friend on the telephone I said that I would stop by to see her on a certain day if she was going to be at home. She said she had no plans and would be in all that day.

"On the particular day I had planned to see her something unexpected turned up and I couldn't get out. When I saw this friend several days later I told her I was sorry I wasn't able to go to see her, and explained why.

"She said rather sharply, 'You might have at least called.' I didn't think it was necessary as she said she was going to be home anyway. Will you please tell me if it was necessary to call under the circumstances?"

Answer: I think it would have been more thoughtful to have called her. Although she said she was going to be at home anyway, it is quite possible that having said she would be home she then felt obliged to be there.

"Dear Mrs. Post: My husband and I have been invited to a silver wedding anniversary. The anniversary couple are neighbors of ours whom we have known for many years. They have just about everything and it is very difficult to know what to give them. I was wondering if it would be proper to give them 25 silver dollars (one for each year)? What do you think of this idea?"

Answer: If they are your most intimate friends I think the silver dollar idea would be very nice, but you would have to know them extremely well in order to make this acceptable.

"Dear Mrs. Post: When a man and woman are dining in a restaurant, should the woman give her order first to the waiter, or should the man order for both?"

Answer: She tells the man what she would like, and he gives the order.

MRS. CHARLES J. LAWSON

Mr. and Mrs. Charles J. Lawson were married Saturday at St. Vincent de Paul Church. The bride, the former Dorothy Elizabeth Williams, is the daughter of Mr. and Mrs. Tonking Williams of East Tennyson avenue. Charles is the son of Mrs. Emma McLean of Walled Lake.

Guild 11 Gathers

Mrs. Vernon Abbott of Illinois avenue entertained 16 members of Guild 11, All Saints Episcopal Church, at a luncheon Friday. Mrs. C. R. Gatley, Mrs. Charles Sanft and Mrs. Theodore Vanderstempel were cohostesses. An afternoon of bridge was enjoyed following the luncheon.

Janet Marshall Feted at Shower

Janet Marshall, bride-elect of James Cuthrell, was honored at a miscellaneous shower recently. Cohostesses for the affair held at the Alfred Cuthrell residence on Avon drive were Mrs. George Hooper, Carolynn Marshall and Mrs. Cuthrell.

The bride-elect is the daughter of Mrs. Thelma Turnbull of Parkway street and Fred Marshall of Drayton Plains. James is the son of Mr. and Mrs. Alpha F. Cuthrell of Lake Orion.

Refreshments were served from a lace-covered table with pink and white floral arrangements used in the matching epergnes.

Saybrook Group Holds 'School' at Ladd Home

"School" was in session Friday afternoon when the Saybrook Group of the First Congregational Church met at the home of Mrs. James R. Ladd on Sylvan Shores drive.

Mrs. William Miller acted as teacher, with Mrs. Dora Dawson, Mrs. Robert Gaff, Mrs. Roy Bennett and Mrs. Howard McIntyre as her "pupils." As her lesson Mrs. Dawson gave sketches on seven famous women missionaries of the Congregational Church.

Mrs. Gaff spoke on the practices of the early Sunday School, and Mrs. McIntyre discussed the disciplines of the church a century or more ago.

A guest for the meeting, Mrs. Bennett told of young people's activities in the church 50 years ago. Mrs. Bennett has been a member of the Congregational Church for over 50 years.

* * *

Mrs. George Vincett gave devotions. The hostess committee for the day included Mrs. Ladd, Mrs. Albert Games, Mrs. Helen Teitgen and Mrs. Dawson.

PTA Activities

McCarroll PTA will meet Wednesday at 1:45 p.m. at the school. Officers for the 1956-57 school year will be installed. The executive board will meet at 12:30 p.m.

Jefferson Junior High School PTA will meet Wednesday at 8 p.m. in the school gym for installation of officers and a program honoring past presidents.

Owen PTA will meet Wednesday at 2:30 p.m. in the Multi-Purpose Room for installation of officers. The school band and the school chorus will present several numbers.

E. R. Webster PTA will meet Wednesday at 7:30 p.m. with an executive meeting at 7 p.m. Thomas Dodson of the recreation department will speak on the new elementary recreation program. A speaker from Michigan Bell will attend and explain the extended service effective in July with a question and answer period.

Wisner PTA will meet Thursday at 1:30 p.m. in the first floor hall.

Get Volunteer Job That Suits You

BY ANNE HEYWOOD

Most people on a diet have occasional lapses, times when they succumb to the hot fudge sundae with an emphatic: "This one time won't count!"

But of course it does count. And after a while, if they're smart, they come to realize that every time counts.

It's the same with talents, or perhaps I should say, with your whole self-expression. Most of us have things we do well and happily—and other things we do badly and grudgingly.

Things in the first category contribute to our self-development, our charm, our usefulness and our happiness. Things in the second category tear us down.

* * *

The ordinary life, the ordinary day's work, has a little of each in it, and that is perhaps as it should be, since we all need a certain amount of discipline.

VOLUNTEER WORK

But when it comes to volunteer work, to things we take on of our own accord, we have to make sure that they contribute to our development, instead of tearing us down.

We have, to be sure, in other words, that our volunteer work is along the lines of our talents. For each job we do really counts in the over-all picture.

There's Mrs. J., an introvert, who prefers working slowly and methodically. She is excellent at keeping books and handling clerical details, and she loves doing it.

But when I met her, she was in a state. Her church was having an every-member canvass, and they had asked that she ring doorbells and try to get people to sign pledges.

She hated it. She was tense and upset and unhappy, and therefore, of course, un-charming.

* * *

KEEPING RECORDS

We talked it over, and I suggested that Mrs. J. talk to the church people and insist that she be taken off doorbell-ringing and put to the job of keeping records of pledges signed.

"But they might not want me to," she said hesitantly, "and I'd be afraid to insist."

Well, I explained to her that she was doing the church no good, and herself no good. We each have certain talents to give, and if we do not give them, we give nothing.

Mrs. J. had a talk with the church fathers and it turned out fine. She is one of the best record-keepers they ever had, and she is a new — and more attractive — woman.

Just as our bodies are made up of what we eat — and every time counts — so our minds and souls are made up of the works we do, and every time counts.

MAKE IT EASY

When you select a volunteer job, bear that in mind. In fact, many organizations will make it easy for you.

Organizations like the American Cancer Society have well-defined and well-described volunteer jobs, and they will help you exercise your own talents.

They know it is not only better for you, but better for the organization, too.

If you will send me a stamped, self-addressed envelope I'll send you my pamphlet, Pointers to the Right Volunteer Job. Meantime, remember, in anything you do, every time counts!

8371
34-48

Be ready for compliments when you appear in this feminine two piecer that fits so smoothly. Collarless and short sleeves.

No. 8371 with Patt-O-Rama included is in sizes 34, 36, 38, 40, 42, 44, 46, 48. Size 36, 5½ yards of 35-inch.

For this pattern, send 35c in coins, your name, address, size desired, and the pattern number to Sue Burnett, Pontiac Press, 372 W. Quincy St., Chicago 6, Ill.

Don't miss the spring and summer issue of Basic Fashion, our pattern catalog that contains a variety of attractive, up to the minute styles for all size ranges. Send 25c now.

Orchard Women Sailors Plan Season's Activities

Women Sailors of Orchard Lake Country Club have laid plans for the season's activities.

* * *

Arrangements were made at a meeting held recently at the home of Mrs. Edward S. Reid on Clifton road.

Mrs. Reid was named chairman for the year. The first luncheon of the year will be held May 23 at the clubhouse.

Mrs. Nancy Sommer and Mrs. W. K. Ginman are cochairmen of Junior Girls' Sailors, and Mrs. Rudolph Eberstadt Jr. is chairman of the rules committee assisted by Mrs. George D. Miller and Mrs. Lawrence W. Shaffner.

* * *

Mrs. John K. Bagby and Mrs. Douglas A. Holmes will have charge of skippers and crews. The social committee is headed by Mrs. Basil E. Brown, and Mrs. Sidney Oldberg will organize hospitality for the regatta held in connection with the Pontiac Yacht Club.

Mrs. Graham John Graham and Mrs John W. Fitzgerald will arrange prizes for the event.

The first summer series will be arranged by Mrs. George H. Crane and Mrs. Shaffner.

* * *

Mrs. Howard B. Green and Mrs. Paul L. Penfield will be in charge of the sailing for the month of July.

Championship series will be headed by Mrs. Benjamin H. Micou and Mrs. George H. Russel.

On May 27, the waterfront committee headed by William J. Bird will give a breakfast at the club for men and women sailors.

Moose Group Holds Banquet

Fifteen girls from the Oakland County Children's Home were guests at the mother and daughter banquet held by Women of the Moose Tuesday evening.

Mrs. Robert Godfrey gave the invocation and was later presented with an orchid for being the oldest mother present. Mrs. Howard McCandless welcomed the guests and Karen Sue Blahut gave the response.

General chairman of the annual affair was Mrs. Godfrey. Serving with her were Mrs. Clarence Cavalier, Mrs. John Denihan, Mrs. Lloyd LaBarge, Mrs. Clifford Lynch and Mrs. Ferman Huston.

Coming Events

Ladies Auxiliary to Metropolitan Club Spirit Six will meet tonight at 8 at the American Legion Hall on Auburn Ave.

Anna Gordon WCTU will meet Thursday for a noon box luncheon with Mrs Ernal Lloyd, 46 Summit St.

Group Four, OES will meet Thursday at 12:30 with Mrs Myrtle Pruitt, 19 Haddrill Ct.

Dorcas Class of Oakland Avenue United Presbyterian Church will meet tonight at 7:30 with Mrs Clarence Failing, 2466 Voorhels Rd.

Group Three OES will meet with Mrs. Ernest Taylor, 47 Delaware Dr. Wednesday for a noon cooperative luncheon.

Ohioan Routs Pigeons From Roosts

By PHYLLIS BATTELLE

DAYTON, Ohio (INS) — Walter Simmons, tall and distinguished and every inch a genteel man, is a pigeon-proofer.

This means that he professionally proofs people's places against pigeons.

"I like pigeons all right," says Simmons tolerantly, "but not when they are roosting overhead. Then they can be very annoying, you know what I mean?"

Consequently, he is dedicating his life at the moment to making life uncomfortable for the birds on the upper levels of some buildings in town. He is giving pigeons a chemical hot foot.

"Right now," says Simmons, grinning under his handlebar mustache, "I am pigeon-proofing the old county courthouse here in Dayton. It has been inhabited by pigeons for generations.

"The present pigeons and their pappies and their grandpappies have all 'homed' on the lee side of this courthouse for many years, causing no end of misery — also cleaning bills — to Dayton citizens who have passed through these busy portals."

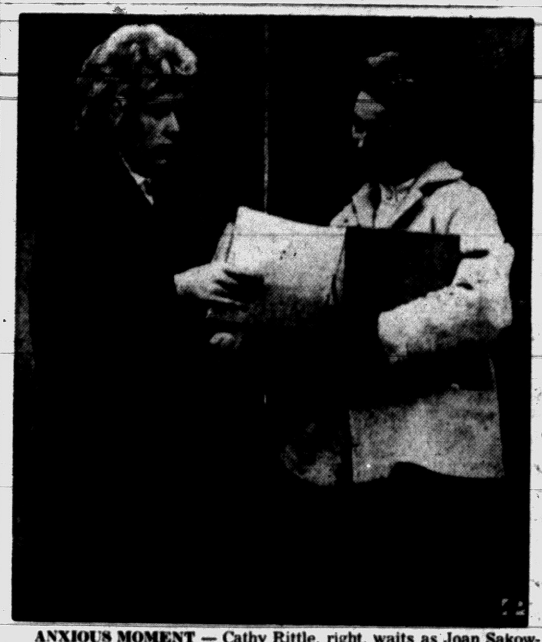

SPREADING GOO

Simmons' staff of men employes is spreading a jelly-like substance (it looks like yellow toothpaste) over the most popular roosting places, to discourage the birds from setting up housekeeping atop the courthouse.

"Now when a pigeon lands in this goo," he explains, "he finds it most unpleasant. It sort of stings his little tootsies, and he quickly flies off again.

"The word gets around the pigeon crowd that the courthouse is no longer a safe landing field, and within a couple of weeks, the place is completely fool — that is, pigeon — proof."

An animal lover from way back, Simmons insists that he has nothing against our feathered friends who waddle in gutters and give so much character to public squares, circles and parks.

ANXIOUS MOMENT — Cathy Rittle, right, waits as Joan Sakowski advises on a loan by Teenage Confidence Fund in cooperation with Miners National Bank, Shenandoah, Pa. Fund is bank's contribution to battle against juvenile delinquency.

They are cute enough little devils when they're on the ground, he says, and he has not been above feeding them a peanut or two upon occasion.

But when they get overhead they are a public nuisance, and it is also known for a fact that an occasional pigeon is a carrier of a serious disease called psittacosis (pigeon fever).

"For many decades, people have used all manner of devices to frighten pigeons away from their stoops. They used sharp spikes around the ledges of buildings — but pigeons cleverly landed between and behind them. They put up aluminum owls — but pigeons know fakes from the real thing.

"Some people have even tried putting live snakes in their rain spouts, but when you come right down to it, a snake is not a great improvement over a pigeon, is it?"

Simmons' jelly does not physically injure birds, but it makes life "doggone unpleasant" for them. Unpleasant enough that they'll take their homing instincts elsewhere.

Doesn't he feel a slight touch of guilt at chasing the homing pigeons from their homes?

"Nonsense!" snaps Simmons. "I'm just trying to send them back to the country where all decent, clean-living birds belong."

GM's Technical Center Challenge for Future

General Motors Technical Center is a challenge to the future, both inside and out.

Design and architecture of the 25-building center on Mound Road just north of Twelve Mile, southeast of Pontiac, symbolizes the dedication of its more than 4,000 employes to a better tomorrow through a bold look today.

Set on a 320-acre site, in an overall area of more than 900 acres, the buildings are grouped around a 22-acre artificial lake.

The three-story buildings have "window walls" and make extensive use of color glazed brick end walls in hues of red, orange, yellow, royal blue, gray and black.

The non-brick wall area is porcelain enamel metal panels. Only two inches thick, they have the insulating quality of 14 inches of masonry. This type of construction is another GM first.

• • •

The buildings are in five clusters, each group with its own color scheme and design, but at the same time conforming to an overall theme.

Each building group — research staff, engineering staff, styling, process development and service section — has its own personality which expresses itself first in the lobbies of each.

The unique yet practical construction so captured the imagination of the architectural world that the engineering staff building group and the central restaurant building won top awards of the American Institute of Architects before the project was completed.

Aside from sheer industrial beauty and efficiency, one of the primary purposes was to provide an environment lending itself to creative thinking and independent development.

• • •

INVESTMENT IN TOMORROW

As General Motors President Harlow H. Curtice expressed it:

"There are no 'todays' at the Technical Center. This is our investment in tomorrows."

Architects for the center were Eero Saarinen and Associates of Bloomfield Hills.

Setting off the project are a gleaming 132-foot stainless steel clad water tower and a 65-foot aluminum sheathed dome with a 188-foot span—the styling auditorium — which captures the Michigan sun like a colossal bubble.

Each building can change to meet day-to-day requirements of industrial research, engineering or shop work where the answer requires space variations.

In most buildings, for example, every office partition is movable and in one building most have been moved at least once since the structure opened.

The key to this flexibility is borrowed from GM's success in automobiles — standardization with precision. One part fits where another has been.

Typical of this borrowing from the assembly line was the development of neoprene gasket weather seals that hold the fixed glass and porcelain enamel metal panels to their aluminum frames.

The result: Glass and panels "zipped" into place and sealed against weather with a filler of neoprene.

• • •

The application of colors to give unity — yet individuality — to the vast project doesn't stop at the doors. Each building has its own color key and its own particular color accent. Even long corridors in styling's studio building present a varied panorama of color spectra.

• • •

In both styling and research staff buildings a new ceiling treatment with luminous plastic "pans" beneath fluorescent tubes provide shadowless lighting for stylists, designers, office workers and laboratory technicians.

• • •

This type of ceiling is considered a future conventional treatment for home and office lighting.

• • •

Each major administration or office building at Technical Center is individualized by its staircase, and most spectacular are those of research staff and styling.

WATER FOR ACCENT

Water is also used with spectacular effect outside. Rising up from the artificial lake are two fountains. One, just beyond the main gate, sends up a wall of water 115 feet long and 50 feet high. Six-thousand gallons of water a minute rush through the jets. All the water is recirculated.

The other lake fountain is a "mobile" of water, created by the internationally famous American sculptor, Alexander Calder.

Located at the northwest end of the lake in front of the Research Administration building, the 21 jets shooting 40 feet high are a ballet of water, rising, crossing, falling with different pressures, speed and sound.

• • •

A third fountain is a flower-like spray of water 24 feet in the small reflecting pool in front of the Styling Section Administration building.

All of the fountains, many of the trees and buildings are lighted after dark to give an Arabian nights effect.

THIS WAS THE START — With blueprints, an earthmover and a spade, these men broke ground for the GM Technical Center, Oct. 23, 1945. Charles F. Kettering (left) was then GM vice president in charge of research and Charles L. McCuen (right), now retired, was GM vice president in charge of engineering. He succeeded Mr. Kettering in 1947 as head of research. The late William J. Davidson (center) was Technical Center executive engineer.

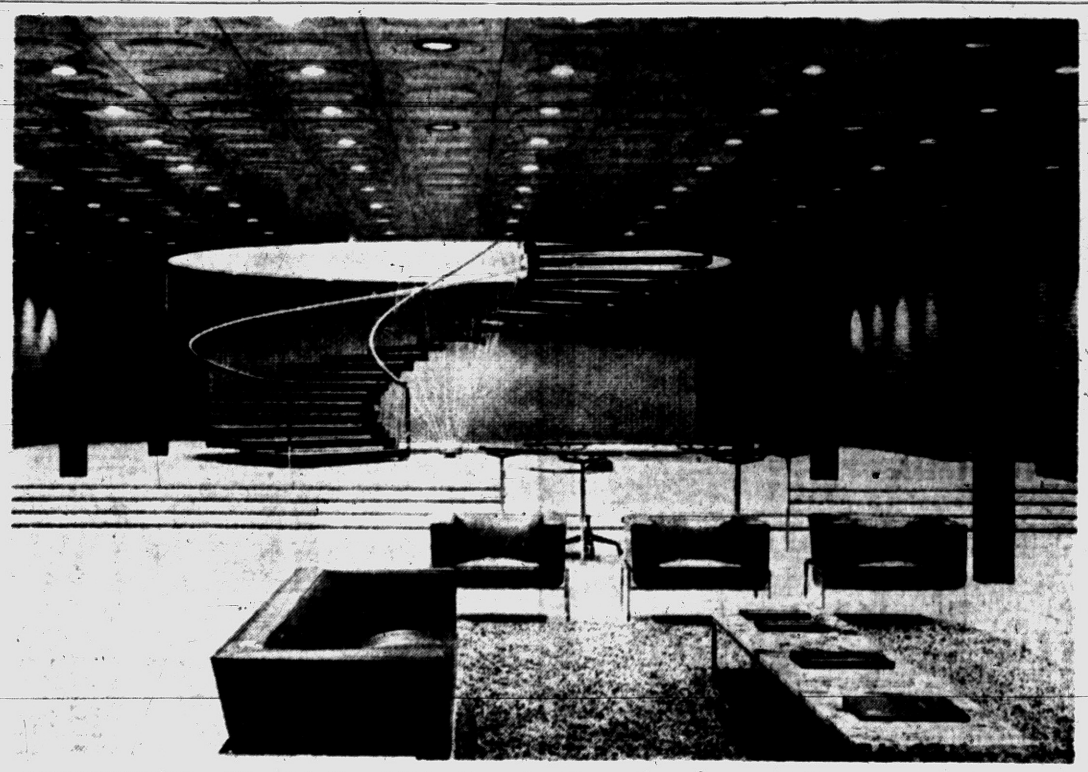

SYMPHONY IN STEEL — Silhouetted against glazed brick is this spectacular staircase in General Motors Styling lobby at GM Technical Center. It runs above a travertine pool and its 3-foot 4-inch wide treads of white travertine slabs are suspended from pencil thin stainless steel rods. The handrail is teak.

MAN-MADE MUSHROOM — Dominating the landscape of General Motors Technical Center is this 132-foot stainless steel clad water tower with a 250,000 gallon capacity. At the rear is the aluminum sheathed GM Styling Auditorium. A 115-foot water curtain along the west side of an artificial lake partially screens the auditorium dome.

ALUMINUM-SHEATHED DOME — For special showings of both production and "dream" cars, this is General Motors Styling Auditorium at the southwest corner of the 320-acre GM Technical Center site. The aluminum-sheathed dome is 65 feet high with 188-foot span. The auditorium structure is contained within a 9½-foot gray glazed brick wall that also surrounds an outdoor display yard.

RESEARCH LOBBY — Entrance to General Motors Research Staff administration building is this spacious lobby with a graceful spiral staircase at the rear. Steps of this unique staircase are emerald pearl Norwegian granite held by thin stainless steel suspension rods that converge in a cone at top and bottom of the structure.

Dome Spans 188 Feet

At the southwest end of the General Motors Technical Center site is the styling auditorium with an aluminum sheathed steel dome. It is 65 feet high and has a span of 188 feet. The steel plates of which it is constructed are 3/8ths of an inch thick or as thin in relation to their area as 1-30 of an eggshell would be to its area.

Fuel Blend Building

In the Fuel Blend building of General Motors Research Staff at the GM Technical Center is a "switchboard" for routing proper fuel to engine test cells in the nearby Engineering Research building, where automotive, diesel and other engines are running on dynamometers.

Press Salutes General Motors Technical Center

The Pontiac Press presents on this and following pages a preview of the 320-acre General Motors Technical Center, at Mound and Twelve Mile roads, which will be officially dedicated tomorrow.

Housed in the 25 modern, colorful buildings is the finest scientific research equipment that industry has ever known. From the work of several thousands of engineers and scientists comes priceless know-how that is continually changing the American economy.

The record of past research that has built the automotive industry to its present level, and the story of an endless search for new ways to build better products is a thrilling saga of a free America at work.

New Technical Center Designed to Serve All GM's Divisions

4 Major Groups Operate There

Long Range Problems Are Handled for All Corporation Units

The Technical Center is the home of four general staff organizations in General Motors' industrial structure—Research, Styling, Engineering and Process Development Section.

The concept of separate staffs serving all GM "line outfits"— the manufacturing and producing divisions—probably dates back to 1911.

In that year GM's annual report revealed the appointment of a "director of production."

The relatively youthful General Motors Company began "to create a general staff of mechanical engineers, gasolene engine engineers, designers, production experts and other experts not attached to any particular factory, but whose advice and services would always be available to the necessarily more limited staff of each individual factory."

Moreover, an engineering consulting firm was engaged to help set up a central testing laboratory.

"This laboratory," the annual report pointed out, "serves as an additional protection against costly factory mistakes and gives the purchaser of every one of our machines an additional guarantee not merely for his comfort, but to assure his safety."

These two moves were prompted by several engineering and economic facts of life.

First, the epitaphs of many good automotive producers were written by "costly factory mistakes," honest, unwitting errors no one could anticipate. At that time test procedures were primitive and often unreliable. Instrumentation was crude and basic knowledge of motorcar materials was sparse.

Second, the industry's production men, by and large, had to concentrate on next year's models, as well as the manufacture of current model runs. This was a specialty in itself—as it is today—and production men needed help of metallurgists, chemists, physicists and other engineering experts to work on problems that ordinarily were bypassed at the factory level.

GUIDEPOSTS TO FUTURE

Third, GM management men realized their contemporary knowledge wasn't enough. They wanted research and engineering guideposts for their planning, information and facts on which to base decisions affecting the industry's future. They believed forward planning could be organized and coordinated.

Fourth, although automobile manufacturing was a mass production enterprise, the industry had few engineering, production or manufacturing standards in the sense that it has today. Lack of these often resulted in parts failures, breakdowns and other service headaches.

One of the early assignments of GM's new central testing laboratory, for instance, was a microscopic study of automotive steels. Today this is a science in itself, metallography.

Fifth, in view of the industry's engineering and research demands, it was obvious some type of central staff organization would be the most economical tool for the job. Its costs and benefits could be shared by GM's various production and manufacturing units.

Whereas today each GM division has its own engineering and research facilities its own staff of experts and specialists, its major efforts are concentrated on product.

• • •

A division can turn to any of the general staff groups for technical facilities and services, inasmuch as the organizations now based at the Technical Center are a rich storehouse of data and information.

Or, it can contract for special projects which a general staff group will undertake specifically for the division's benefit.

UNITS ON THEIR OWN

Meanwhile, general staff units are "on their own," so to speak, in the research, engineering, styling and process development fields. They have a management mandate to explore the future, develop and try out new ideas, new techniques and processes. If any of these show promise, divisions can adopt them.

In brief, the general staff groups advise, consult, counsel, guide, service and provide special equipment for the divisions. They also aid in shaping overall policy.

At the same time—and this is important—they have no direct product responsibility. Likewise, they have no powers that in a governmental sense would be comparable to the right to rule, enforce or police.

Any new development by a staff group must be "sold" to a division on its own merits, just as any developments by a supplier outside the GM organization must be sold. The division decides ultimately whether it wishes to be convinced.

Overall, the Technical Center functions flexibly according to the GM policy of "decentralized operations and responsibilities with coordinated control."

A Dynamic Philosophy

Always Seeking to Make and to Do Things Better

General Motors Technical Center epitomizes the dynamic business philosophy of Harlow H. Curtice.

A single sentence in one of his recent statements sums up better than anything else the Technical Center's purpose: "We are always seeking ways to make things better and do things better."

No one has a greater appreciation of the importance of technological progress than Harlow Curtice.

"It is the keystone of our modern society," he says. "It is the foundation upon which our prosperity and our increasing standard of living rests."

HARLOW H. CURTICE
President, General Motors

Technological progress, he believes, is particularly important in the automotive field because it is largely through such progress that the annual model change is made possible.

And Curtice considers the annual model change, acting as a stimulant to demand, as "perhaps the most important single factor responsible for the growth of our industry."

According to Curtice, General Motors has been a leader in the field of technological progress because it has for so long cultivated what he refers to as "the inquiring mind approach."

• • •

This approach is applied to all areas of the business and at all levels of management but most importantly perhaps in the area of technology. And certainly the Technical Center offers concrete evidence that the Corporation does not merely render lip service to this philosophy.

Curtice has spearheaded the development of the Technical Center ever since he became executive vice president in September, 1948.

Among the Central Staff activities that came under his jurisdiction at that time were those now housed at the Center — Research, Advanced Engineering, Styling and Process Development.

• • •

He was quick to realize how important it was to have these activities given an environment that would encourage and stimulate "the inquiring mind approach."

KEEPING TOOLS SHARP

According to an engineer who has known Curtice many years, the General Motors president believes in "keeping a tool sharp." By this phrase Mr. Curtice expresses solid faith in up-to-date equipment, facilities, engineering and technology.

• • •

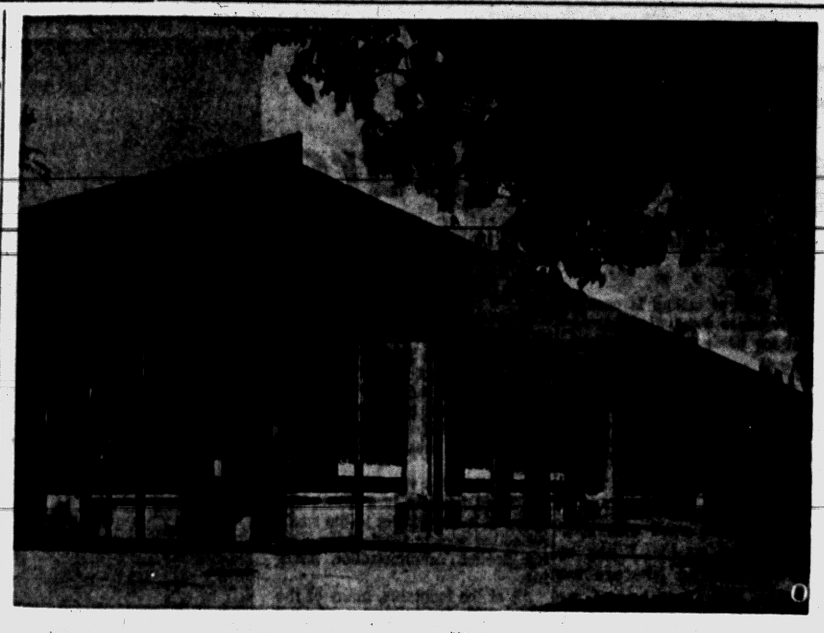

In this connection, speaking of the Technical Center and the GM people working there, Curtice has commented:

"These new facilities will create for them an atmosphere in which their inquiring minds will uncover new concepts and ideas that will benefit not only users of our products, but also will contribute importantly to the general fund of technical knowledge.

Indeed, the same confidence that marks the Curtice approach to business and economic problems likewise permeates his attitude toward General Motors' support of technical, engineering and research operations.

• • •

Establishment of the General Motors Technical Center is as much an expression of the Curtice faith in the future as it is an example of General Motors' determination to continue its pioneering in a technical world.

RESTAURANT — Designed as a change of pace from work areas at General Motors Technical Center is this central restaurant with its raised dining area and glass walls shielded by double fish-net curtains. It provides employes with a relaxed environment. Also, it is the food service headquarters for three other cafeterias on the site.

Restaurant Designed for Relaxation

Directly across the lake from the great 115-foot water-wall fountain is a court whose east end is closed by the Central Restaurant Building and whose sides are flanked by the Administration Buildings of Engineering Staff and Process Development.

In contrast with the "automotive scale" of the rest of the project, this court, with its grassy lawn and large trees, has been designed especially for the pedestrian.

In the restaurant, also, the effort was to achieve an especially human and relaxed environment, which would suggest a change of pace from work areas.

In harmony with the other buildings at the Technical Center, the restaurant still asserts its own individuality.

Only one story high, it has a metal deck roof with a wide overhang. On the facade, the glass, set in aluminum frames between the black structural steel framework, goes from ground to roof. There are no strong exterior colors. The glazed brick, which is used toward the rear and service areas of the building, is black and dark-olive green.

The dining area is raised to allow diners a better view out across the tree-studded court to the lake and the distant fountain. The big glass walls are shielded by double natural-color fish-net curtains, that diffuse the light but do not interfere with the view.

The whole interior color scheme is carefully controlled, ranging between light tones or rich dark tones.

The floor at the entrance level is pale tan Roman travertine; at the dining level it is black terrazzo. The ceiling is white, mineral, acoustic tile. The Brazilian wood panels on the east, or back wall, are a rich brown, streaked with black. Tables are a very pale cream colored formica with a delicate design of a lighter tone. Chairs are covered in black plastic.

• • •

The only color accents are the parade of low green plants in the 32-foot long planting box which edges the long side of the raised dining area and the yellow curtains in the executives dining room at the south end, which can be seen through the dividing glass walls.

A decorative screen, 36 feet long and 10 feet high, by sculptor Harry Bertoia separates the entrance from the raised dining area above it. This golden-glinting sculpture is made up of plaques, mostly about 5 inches wide by 10 inches high and about ⅛ inch thick.

• • •

They consist of enameling steel coated with metals applied in the molten state. Occasionally there are clusters of much smaller squares for variation. The plaques are supported on a system of horizontal and vertical webs of rods. They are arranged in two vertical planes.

The screen makes a decorative, abstract checkerboard pattern in depth, allowing the diners to see the view through it. Both in its materials and in the syncopated rhythm of its design, it is wholly of the 20th century.

The serving area, gleaming in stainless steel, is centrally located.

The basement contains space for an additional banquet room, mechanical equipment, additional kitchen facilities, lavatories, locker rooms and an underground tunnel connecting with other buildings.

Food service for three other cafeterias at the Center is undertaken in this building.

• • •

The restaurant is 162 feet long by 94 feet and 6 inches wide. The dining area seats 380 people.

Studies Air Speed

A 100-mile-an-hour airstream can be whipped up in the Research Staff Wind Tunnel building at General Motors Technical Center. The tunnel is built for full-size vehicles and is used to study effects of air velocity and temperature on the operation of automobiles and medium size trucks and automotive components, such as carburetors, air cleaners or air conditioning systems.

MOTOR DIVISION

OPEN HOUSE

WEDNESDAY, MAY 16 — 1:00 P.M. TO 9:00 P.M.

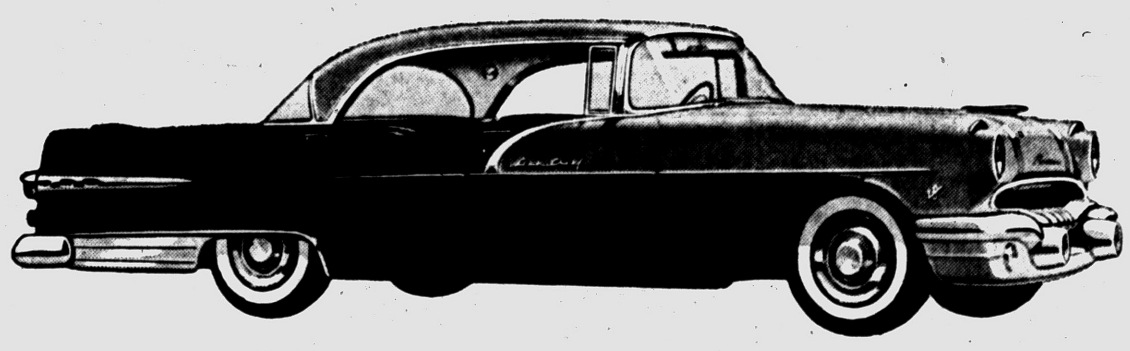

Circle May 16, 1956, on your calendar! It's an important day for Pontiac . . . General Motors . . . and *you!* For on a 320-acre plot of ground in Warren Township, just north of Detroit, a ceremony will take place that will mark the beginning of a new era in automotive research, design and production. 5,000 distinguished guests will be on hand for the dedication of the huge General Motors Technical Center and will view the most modern facilities of their kind in the world . . . facilities that promise you and Pontiac Motor a brighter, more fruitful future.

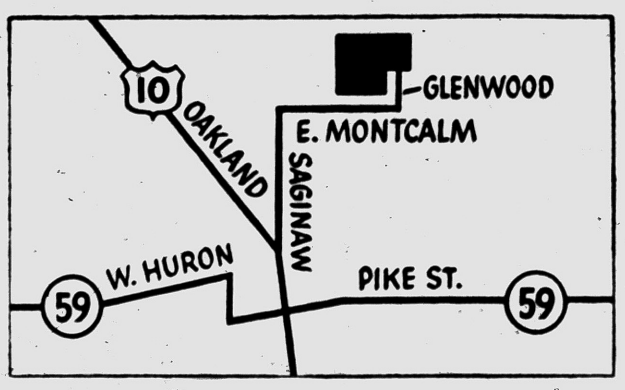

What will happen at the General Motors Technical Center in the years to come will affect you vitally, for from within its walls will come many new things . . . new ideas . . . better ways of doing everyday jobs.

Pontiac is proud to be associated with the GM Technical Center . . . has and will take full advantage of the vast research facilities in a determined effort to build even finer automobiles.

To help celebrate this important dedication, Pontiac Motor sincerely invites you, your family and friends to a gala open house. Come visit our plant on May 16 and see the *greatest go on wheels* being built! See the exciting new Pontiac Strato-Streak V-8 as it goes through its various assembly and testing phases. See a fabulous new 1956 Pontiac take shape right before your very eyes. See why Pontiac is America's finest automotive value!

COME SEE THE GENERAL MOTORS MASTERPIECE BEING BUILT!

PONTIAC MOTOR DIVISION

OF GENERAL MOTORS CORPORATION

Fisher Body Came to Pontiac in '22

Beaudette Plant First Home Here

Baldwin Avenue Site Was Taken Over the Following Year

Fisher Body first began operations in Pontiac in 1922.

Body by Fisher and the Napoleonic Coach emblem, then a tradition of 14 years, was already the world's best known automobile body trademark when Fisher Body occupied the old Beaudette plant at Wessen and Walnut Streets.

In 1923, Fisher Body built the present plant at 900 Baldwin Avenue and operated both plants until 1929 when the older plant was razed.

The Baldwin Avenue plant has a total floor area of 1,300,000 square feet.

The Body by Fisher plant in Pontiac includes both fabricating and body assembly operations.

In the fabricating part of the plant are more than 200 presses stamping out body components. The assembly area has over three miles of conveyors and is capable of assembling several hundred bodies a day.

The plant has railroad facilities for handling 50 freight cars.

During World War II the plant made guns for the Navy.

In an average year, the plant's expenditures in the Pontiac area for payroll, transportation and local purchases exceeds $28,000,000. More than 50 local suppliers serve the plant in its daily needs.

• • •

The story of Body by Fisher is a story of technical progress. Founded by men who had a heritage of craftsmanship in carriage-building, they dreamed and planned and built the foundations of the world's largest automobile-body engineering organization in the world.

FOUNDED IN 1908

The original Fisher Body Company was founded in 1908 and its first volume order for 150 bodies, placed by Cadillac, was supplied by a small plant located in Detroit containing about 167,000 square feet of floor space.

Today, to meet the body demands of Chevrolet, Pontiac, Oldsmobile, Buick and Cadillac, the Fisher Body Division of General Motors operates eleven stamping plants, sixteen assembly plants and six plants engaged in tooling, engineering and research work.

Two more plants are devoted to the fabrication of upholstery trim sets and some of the assembly plants include this in their operations.

Fisher Body also supplies seven additional General Motors assembly plants in this country and 23 foreign plants. These Fisher Body plants contain more than 25,000,000 square feet of floor space.

Fisher Body's central administration, engineering and research activities are located in a 1,300,000 square foot facility at the General Motors Technical Center in Detroit.

• • •

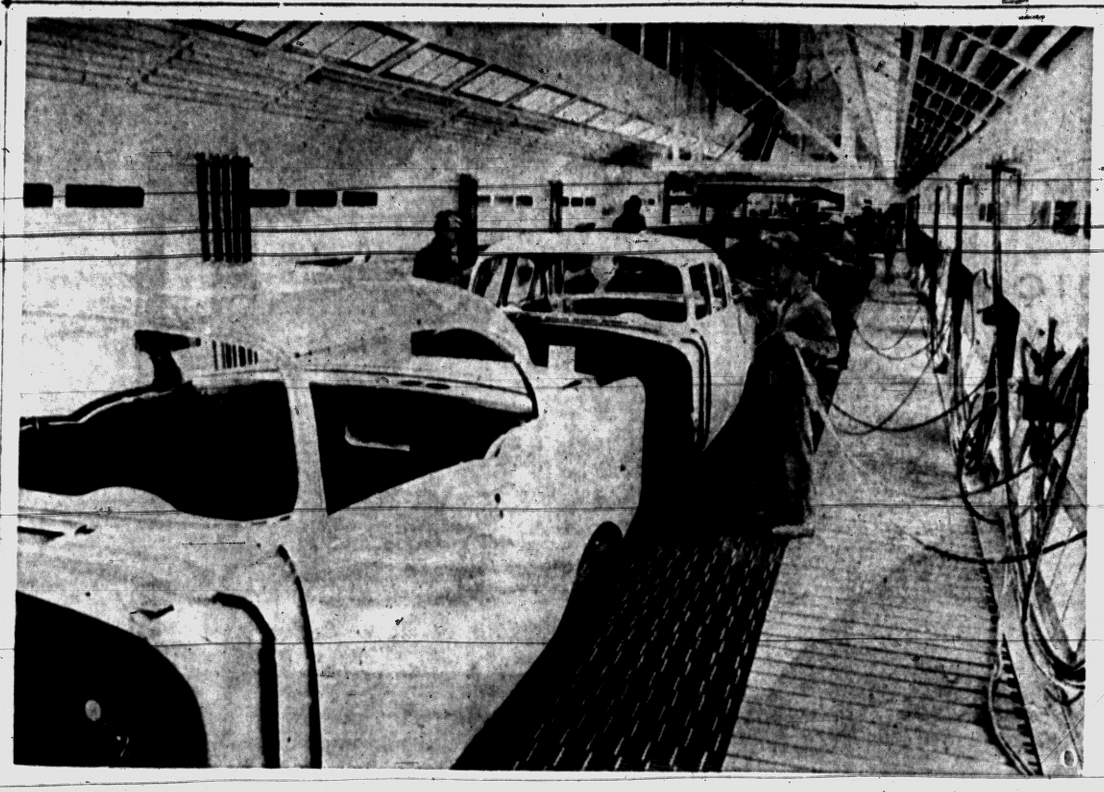

At the end of 1955, Fisher Body had built bodies for 44,000,000 automobiles—and as many as 4,000,000 bodies in a single year.

In the beginning, the automobile body business was in the hands of carriage makers. Fisher Body was founded in the belief that new engineering knowledge backed by scientific testing and analysis was needed in the development of bodies for power-driven vehicles.

WORLD'S LARGEST

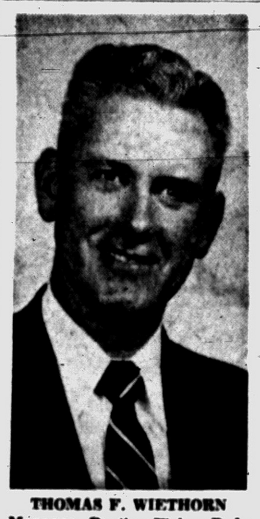

Today it has the largest body engineering organization in the world.

In addition to design and product engineering staffs, Fisher Body maintains large engineering groups devoted to experimental and development work, textiles, plastics, process development, dies and tools, plant engineering and layout, manufacturing, material handling and research.

SPRAYING TECHNIQUE — The brilliant, durable finish on your automobile is the result of extensive research at the General Motors Technical Center. Here shown are Bodies by Fisher passing through a paint spray booth. Research-tested spraying techniques give cars greater lacquer thickness with fewer surface coats. Technological advances developed at the Technical Center are responsible, too, for increased gloss and corrosion resistance.

The power house at the General Motors Technical Center is capable of producing 320,000 pounds of steam pressure per hour.

THOMAS F. WIETHORN
Manager, Pontiac Fisher Body Division Plant

U.S. Has Engineers Doing Other Work

LOS ANGELES (AP)—The lamented shortage of engineers in this country is more apparent than real, a Standard Oil Co. of California executive contends.

• • •

W. L. Collins told the opening session of the West Coast Engineering Management Conference yesterday that the shortage is not in the number of engineers but in the number actually working at engineering.

• • •

Statistics show, he said, that 20 years after graduation, half of those trained for engineering are working in administration and management.

Police Patrol the Roads —Even From the Sky

INGLEWOOD, Calif. (AP)—A 17-year-old youth was so busy knocking over traffic cones with his car that he failed to notice a helicopter hovering overhead.

• • •

Riding in the copter was Police Capt. William J. Kennedy, making a traffic survey. He spotted the youth's game and radioed the nearest Inglewood police officer. Officer A. E. Smith sped to the scene and issued a citation. When the baffled young man asked how Smith learned of the violation, the officer pointed heavenward.

Safety Helps for Car Drivers

Obeying These Rules Can Lower Memorial Day Death Toll

DETROIT (INS)—With the Memorial Day in mind, Jeanne Smith, Dodge safety consultant, has come up with a brand new list of do's and dont's for motorists.

The suggestions are:

1. Double your driving guard at dawn and duck—two times of the day when driving is doubly dangerous.

2. Emerging from a parked car on the traffic side is suicide. Always leave your vehicle by thee urb-side door.

3. Never cross a solid double lane to pass another car. It might be the last move you ever make.

4. Slowpoke driving can be dangerous. Keep up with the normal flow of traffic.

5. Before backing out of a garage, get out of your car and check for children in or near the driveway. Never trust a child's life to a rear-view mirror.

6. Never drive a car if you are sleepy, fatigued or emotionally upset.

7. More serious accidents occur in rural areas than in cities. Country driving calls for added caution.

8. Drive slowly when passengers —especially children—are in your back seat. Violent stops or high speed turns can seriously injure them.

9. Drinking is socially acceptable but driving after drinking isn't. If you drink—don't drive . . . unless you'd kill for a drink.

10. Driving safely is a full time job. Don't sacrifice your life for a day dream. When you're behind the wheel, concentrate on driving.

Army Study Center Slated for Frankfurt

WASHINGTON (INS) — The Army has announced it is establishing a research center at Frankfurt, Germany, to carry out scientific programs in foreign universities.

The announcement said the purpose is to "engage scientific specialties that are further advanced, unique or otherwise not available from American sources."

Goodman Lauds Technical Aid

Many Advances Thought Impossible Earlier, Says Fisher Head

"The research, styling and engineering studies performed at the General Motors Technical Center are the well-springs from which have poured many of the most important developments in automobile body-engineering," James E. Goodman, vice president of GM and general manager of its Fisher Body Division, said today.

"New reservoirs of creativity, resourcefulness, ingenuity and skill have been discovered. We are doing things today in designing, engineering, toolmaking, fabricating and assembly that a few short years ago were judged impossible.

"Motoring convenience and comfort have advanced. New and improved automatic and mechanical features have become commonplace. Styling dreams have become practical and possible realities.

"The growing fund of test data is a main factor in making us more flexible in meeting the demands of a critical and demanding market.

"Technological developments are coming out of the GM Technical Center that are giving us greater mastery of materials and methods.

"Because of the work being done at Tech Center, new ideas in styling, in design, in riding comfort, in interior and exterior luxury and in automatic motoring convenience will emerge much faster than most people now realize."

Shake, Rattle and Roll for Better Bodies

To help in the development of bodies that are free of shake and vibration, Fisher Body engineers make use of an elaborate gadget called a "bump roll" facility.

Much of the original research work of the bump roll was accomplished by the vehicle development section at the General Motors Technical Center.

The bump roll is placed in a pit so that one set of wheels of the test car can rest and operate on top of the rolls. It is then operated through all the normal range of car speeds.

Cam plates, attached to the rolls, produce a shake in vehicle and under these controlled conditions the structure of the body can be studied and designed so that there will be a minimum reaction in the body to road excitation.

A NEW INVESTMENT IN TOMORROW BY GENERAL MOTORS

This week at Warren, Michigan, General Motors is dedicating a magnificent new Technical Center. In a sense, it is being dedicated to a higher standard of living for America and the world. For the advances made here will be felt around the earth.

We at National Steel heartily congratulate General Motors on this new forward step. The Center will provide a great new proving ground for the talent, ingenuity, and industry of people who devote their lives to making life easier, more pleasant and more productive for all of us.

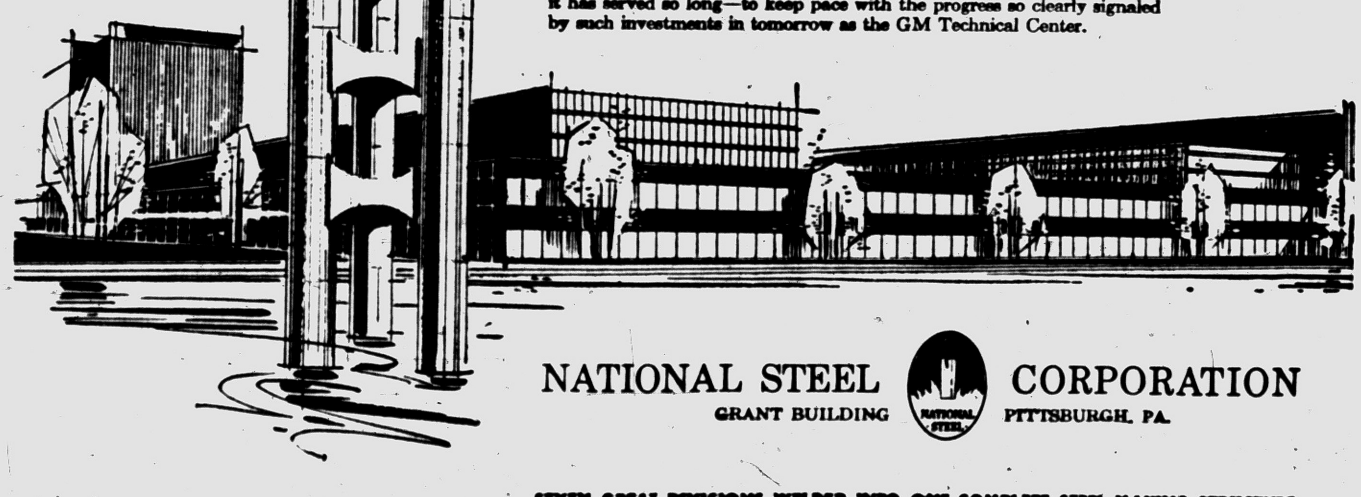

Progress comes through vision and courage. Vision to see ahead and know that today's methods and products by no means represent the end of progress. Courage to explore, test and apply the new and untried. These qualities are part of this nation's fiber. Today's achievements are never enough. Tomorrow must mean still better things and better ways of doing things.

The American record presents no finer example of productive imagination courageously and vigorously applied than General Motors and the great industry of which it is part . . . and no better demonstration of the benefits to an entire people.

At National Steel we have been privileged to observe and share in the outstanding progress of the automobile industry. For many years National has been an important supplier of steel and iron through three of its major divisions—Great Lakes Steel Corporation, Weirton Steel Company, and The Hanna Furnace Corporation.

We have worked consistently to produce the higher quality steels required by automotive developments. We have expanded steel production facilities to meet the demand for more and more steel— a 54% increase since World War II, a current program to raise steelmaking capacity from 6,000,000 to 7,000,000 tons, and further ambitious plans for the future.

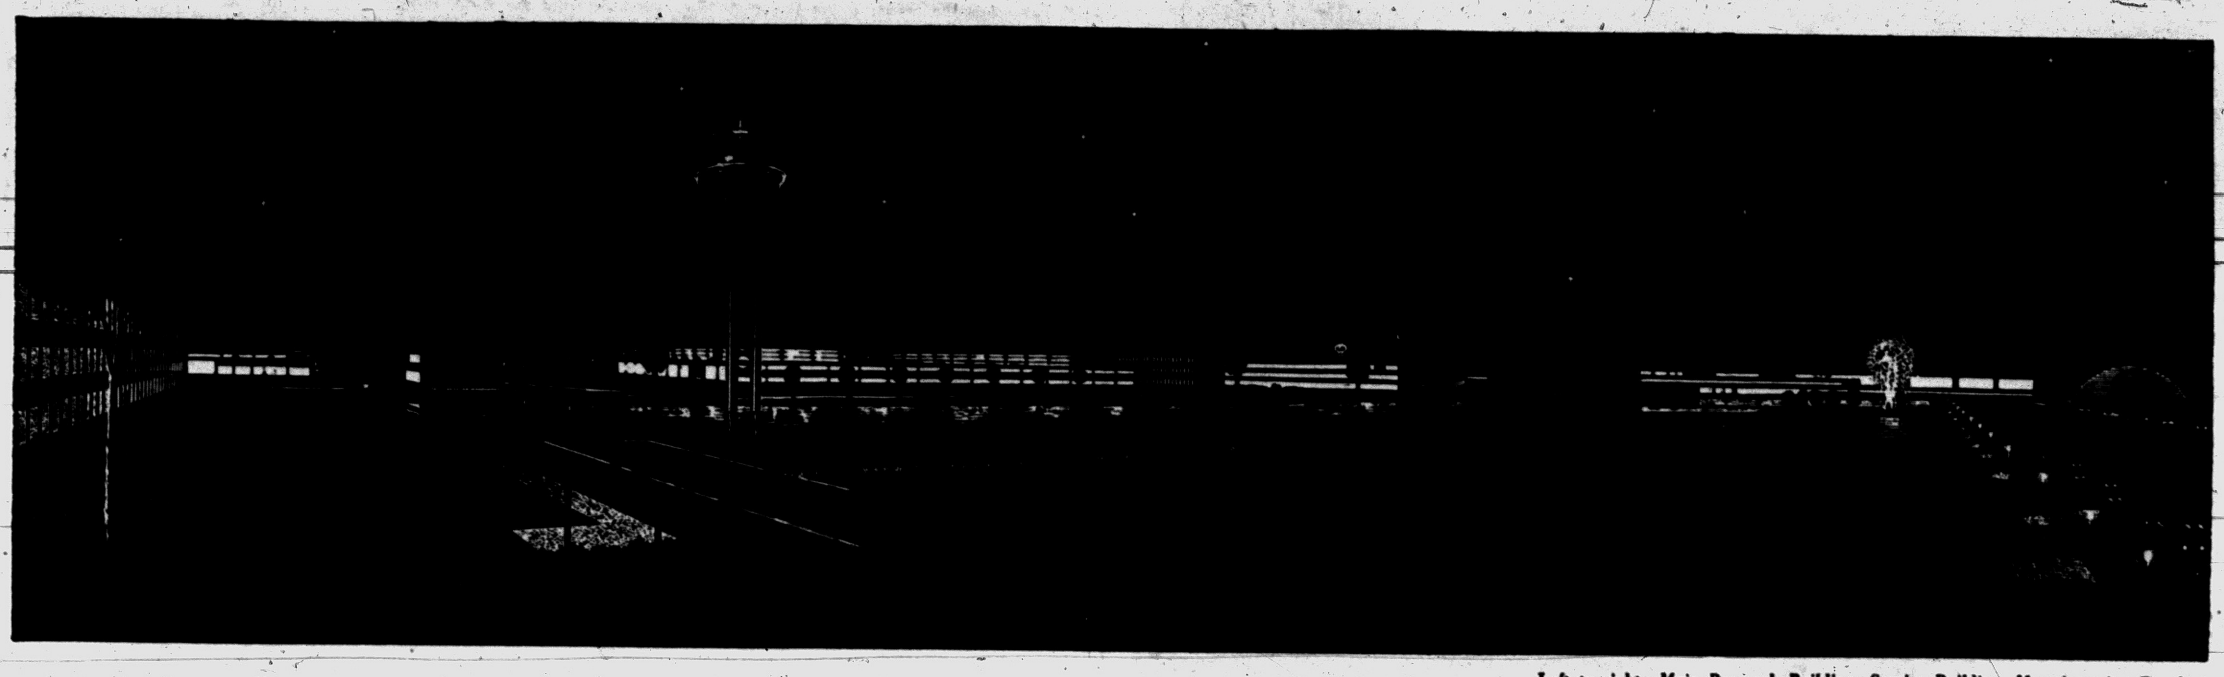

National Steel may be depended upon by its customers in the automotive field—and in the many other industries it has served so long—to keep pace with the progress so clearly signaled by such investments in tomorrow as the GM Technical Center.

We welcome the challenge of the future

at this new Technical Center

THIS week one of the most far-reaching technological enterprises ever undertaken by an American business is being formally dedicated.

It is the vast new General Motors Technical Center situated on the outskirts of Detroit.

On its 330 acres of beautifully landscaped campus stand twenty-five superb air-conditioned buildings, replete with all the new wonder instruments of modern science.

Within its walls of gleaming glass and brilliant masonry more than four thousand scientists, engineers, stylists and technicians are now at work—making it the world's largest institution devoted to progress in the industrial arts and sciences.

As such, through Research, Engineering and Styling it helps make next year's automobiles, home appliances, Diesel engines and our other products better than this year's models.

Beyond that, at the Technical Center men of inquiring minds are delving into the unknown in search of new materials, new forces, new techniques that will maintain America's technological leadership for generations to come.

TODAY WE STAND ON THE THRESHOLD OF A NEW WORLD — a world of electronics, supersonic speed and atomic power—a world in which science is creating new techniques, new materials to develop and increase the world's natural resources.

Upon our nation's ability to excel in the technological applications of these new discoveries to the benefit of man depends not only the future prosperity of our country, but its very freedom.

This is the challenge of the future.

President

Here scientists are rearranging molecules and repatterning alloys to produce sturdier metals, more efficient lubricants, more powerful fuels.

Here engineers are experimenting with ways and means of adapting these discoveries to the production of more useful things for the public.

Here stylists are plotting new designs that will insure greater beauty, comfort and convenience in the shape of things to come.

One result of all this—seen by millions at our recent Motoramas—is GM's latest dream car Firebird II. Built of gleaming titanium, powered by a gas turbine engine and styled like a jet aircraft, it may foreshadow the motorcar of tomorrow.

But the horizons of the Technical Center stretch far beyond the motor vehicle. It has already developed the first successful mechanical heart, the new Centri-Filmer for purifying vaccines, and is engaged in many important humanitarian projects.

It is engaged, too, in finding new uses for radioactive isotopes, in developing new propellants, new engines for our nation's defense today that may revolutionize industry tomorrow.

And we hope, too, that these splendid facilities will attract more and more young people to technical careers.

Thus equipped, General Motors welcomes the challenge of the future. We hope to open new fields of knowledge that will help to build an even more dynamic and prosperous national economy—and to keep America strong.

in technical progress

GENERAL MOTORS

leads the way

See the GM Technical Center on TV—NBC—Sunday afternoon, May 20

COLOR IS KING — The variety of color choices from which General Motors customers may select is determined in this fascinating color studio which GM Styling maintains at Technical Center. This glass enclosed studio enables stylists and designers to view thousands of color "chips" and fabrics in natural lighting.

Color Revolution Brings Change in Auto Industry

An elaborate color and interior design studio located in a landscaped area on the roof of the General Motors Styling garage at the Technical Center is the product of a color "revolution" in the field of automotive design.

This special studio also is testimony to the foresight of GM stylists who, nearly 20 years ago, saw the handwriting on the wall—in color.

• • •

The exterior colors and interior colors and fabrics of all General Motors cars are decided upon in this studio and the research for Frigidaire's colored appliances also was carried on there.

The use of color throughout GM to make more attractive, more desirable, more salable products for the market springs from this studio.

A total of some 75 designers, color stylists, fabrics and plastics experts, clay modelers, engineers and other craftsmen make up the personnel of Styling's color and interior design studio.

Included in this group are five women designers, eminently qualified as automotive interior stylists. These women stylists, each assigned to an automotive interior studio, are playing an increasingly important part in the GM styling picture.

• • •

The color story of GM Styling is an interesting and important one. Development of this extensive color program began in the late 1930's. Harley J. Earl, GM vice-president in charge of styling, learned through GM dealerships and his own departmental research that in order more easily to clear their showrooms of old models just before new-model announcement time, many dealers were painting their new cars.

Only three or four basic color choices were available to the public at that time and these were conservatively somber.

World War II and the switch from automoblie to defense production delayed the development of the color program.

In the meantime, paint manufacturers were improving production methods and were developing paints with brightness and gaiety without sacrificing quality and durability. Improved fabrics also were developed.

• • •

Another factor which played an important part in GM's leadership in color styling was the realization that the women's influence on the automobile market was becoming increasingly important.

Engineering progress — power steering, brakes and accessories, as well as automatic transmissions —were making it easier for women to drive automobiles. Resultant styling advances made cars easier to get into and out of and more comfortable to drive.

A FIRST FOR PONTIAC

In 1949, the Pontiac Catalina reached the market with the interior fabrics and trim color-keyed to the exterior of the car. This was an industry "first" and was immediately followed by most other makes of cars.

The color "revolution" in the industry had been touched off. In the next five years, color became the automobile stylists' most important aid. In 1954, Oldsmobile and Buick came out with brilliant two-tone color treatments, along with the revolutionary Panoramic windshield and swept the industry. The following year, brilliant two-tone paint jobs were featured on almost every make of car. Some even delved into three-tone color jobs.

• • •

During the past two years, the use of color, both inside and outside the cars, has reached a peak which less than a decade ago could hardly have been imagined.

Meanwhile, Earl and his top aides had developed one of the most extensive color studios in the auto industry, if not in the industrial world.

The Technical Center, nearing completion during those years, was the chosen home of this studio. Into its design went all the plans which were calculated to mean continued GM leadership in color design.

Just what GM stylists have in mind for the future use of color in the products they style is known only to them. Whatever they have in mind, however, they have the studio, the facilities, the personnel and the experience to maintain the color leadership they have won in the industry.

Adrian Starts Dorms

ADRIAN (AP) — Adrian College today breaks ground for two dormitories, one for men students and another for coeds. The women's dormitory, a $225,000 structure, will be of colonial architecture and will house 150 students. The men's dormitory, of contemporary architecture, will have facilities for 104 students. Both buildings are scheduled for use by February 1957.

Women's Clubs Convene

KANSAS CITY (AP) — The General Federation of Women's Clubs opened its 65th annual convention today and before the 1,500 delegates was an urgent plea to take action strongly supporting the North Atlantic Treaty Organization and the Crusade for Freedom.

More than one-half the members of the first regiment of the Arizona national guard were Indians.

DREAM CARS — In one of the General Motors Engineering Staff shops at GM Technical Center, hand built models of "dream cars" take shape. Above craftsmen work on a model for the Motorama. Car in the foreground became the Cadillac El Dorado.

Chief of Styling for GM Was a Pioneer in Design

Eye appeal, to say the least, is a most marketable item, as General Motors has proved and proved again.

An acknowledged pioneer in industrial design — Harley J. Earl, General Motors vice president in charge of styling — joined GM in 1927 as head of a newly formed art and color section. Up to that time he had worked mainly in the limited area reserved for stylists.

• • •

He had designed and built custom bodies for a west coast clientele. A function such as his was confined almost exclusively to luxury or limited production vehicles.

Beneath that particular price class no one had any visible notions of styling automobiles in the sense they are designed today.

Indeed, automobiles were fashioned mainly by men with somewhat austere engineering and mechanical backgrounds. These men had enough problems with production and engineering techniques. Styling was an afterthought.

• • •

Before joining GM as a full-time staff director, Mr. Earl had served Cadillac Motor Car Division as a consultant in designing the 1927 LaSalle. This car had an appearance smartness distinguishing it from its contemporaries.

It was a milestone in the making not only for GM but for the motorcar industry as well. The '27 LaSalle was one of the first United States production cars completely designed by a stylist.

The results were impressive enough to alert GM management to a need for styling and in May 1927 the art and color department was established.

The new group consisted of approximately 10 men, who qualified in various ways as designers, plus some 40 others serving as clerical help, shop workers and administrative assistants. It was one of the first specialized design departments in motorcar history.

HARLEY J. EARL

• • •

General Motors Styling has evolved and expanded until today Earl heads a staff of more than 1,000, including artists, color experts, engineers, clay molders, wood and metalworkers, draftsmen and other artisans and technical specialists — the largest organization of its kind in modern industry.

Asks Diplomatic Break

WASHINGTON (AP)—Sen. Jenner (R-Ind) has asked the Senate to demand a break in U.S. diplomatic relations with Romania and Hungary, and their expulsion from the United Nations, unless Soviet troops are withdrawn from their borders. He says the troops make both nations "occupied provinces of the Soviet Union."

First neutrality proclamation on the part of the U.S. government was issued by George Washington in 1793.

Creative Research Helps Build Better Trucks, Buses

Ideas Influence Future Designs

Local Division Draws Upon a Vast Reserve of Scientific Data

A vast new scientific hub staffed by creative experts in all branches of motor vehicle research is playing an important part in aiding GMC Truck and Coach Division's vigorous product development program.

The institution, the General Motors Technical Center, stands on a 330-acre site less than 20 miles southeast of GMC's manufacturing plant in Pontiac.

• • •

From this vast storehouse of creative talent and scientific skills flow fresh ideas and new developments that will exert a tremendous influence on motor truck transport in the future.

Efforts of the engineers, researchers, stylists and technicians who make up the Center's scientific team have already been felt in GMC's product development program.

In GMC's modern trucks, for instance, the Center's Styling Staff has embodied an entirely new concept in commercial vehicle styling.

Unencumbered by the artificial restrictions imposed by tradition, the Styling Staff was charged with the responsibility of developing a truck styling that would keep pace with modern design yet not overstep the bounds of practicality.

MODERN AND EFFICIENT

The result was a truck styling in GMC vehicles that blends modern low silhouette with functional ruggedness. It boasts such advanced features as wraparound windshield, concealed running boards, and wider and lower cabs with more headroom.

• • •

This new styling approach has also paid off in shaping the lines of the Greyhound Scenicruiser built by GMC's coach division, and L'Universelle, the GMC "dream" truck that created a sensation in nation-wide public showings.

Besides giving GMC styling support unrivaled in the commercial vehicle industry, the Technical Center also provides GMC with valuable assistance in the fields of engineering, research and manufacturing.

Although GMC has one of the most modernly equipped and best staffed engineering departments in the commercial vehicle industry, it is using the Technical Center facilities to supplement its own operations.

• • •

The Process Development Section has aided GMC's manufacturing program by investigating electrostatic painting of parts and developing various tool room grinding equipment.

PHILIP J. MONAGHAN
GM Vice President and General Manager of GMC Truck and Coach Division.

Another example of how the Center's industrial specialists spur GMC's development program is provided by the Research Staff's computer service.

USE ELECTRONIC BRAIN

Many calculations that have a bearing on truck development but normally wouldn't be attempted due to time limitations are computed swiftly and accurately on the electronic "brain" in the Data Processing Laboratory.

Central Engineering Staff is another resource that is often tapped by GMC's own engineers to further the division's product programs.

• • •

Providing GMC's engineering staff with specialized scientific facilities is still another one of the Center's main contributions to GMC engineering and research.

Use of these facilities has aided in the successful development of such advances as GMC's unique road shock dampers and kudu stabilizers. The Center's bump and shake rigs played major roles in both projects.

As the Technical Center's research often parallels that of GMC, there is an increasing important interchange of ideas and advice between the two engineering branches, a healthy factor in product improvement and development.

GMC engineers also have access to specialized data and technical information that accumulates at the Technical Center to further its research programs.

Largest for Isotopes

The Isotope Research Laboratory at General Motors Technical Center has working space for 30 people. It is one of the country's largest privately owned laboratories for exploring potential uses of radioisotopes in industrial research.

Military Vehicles Play Important Role at GMTC

Engineering development for military vehicles has always been accorded highest priority in the GMC Truck & Coach Division and the results have gained world-wide attention.

A group of such vehicles embodying latest engineering ideas, headed by the fabulous 8-ton "Drake," are being shown at the GMC Truck & Coach plant during an "Open House" commemorating the dedication of the General Motors Technical Center.

In GMC's exhibit is the "Drake, and the "Super-duck," both of which were designed and built by GMC Truck & Coach engineers at the direction of the Army Ordnance Tank-Automotive Command in Detroit, the M-59 personnel carrier, the experimental T-51 cargo carrier, and the M-50 "Ontos," one of the deadliest weapons in the world.

GMC's interest in the M-59 is in providing the engines and transmissions, which are two 302 cubic inch, 145 horsepower engines with Hydra-Matic transmissions.

A "mobile fox-hole" for 11 combat-ready men, the M-59 has half-inch to one-inch armor, can negotiate cross-country with remarkable ability and has a top-speed of 32 miles per hour. It is manufactured by the Food Machinery Corporation.

• • •

The experimental T-51, a 2½ ton cargo carrier with six, individually sprung wheels (all torsion bar), was designed and built first by General Motors Research Division.

Then GMC Truck and Coach made further refinements on the vehicle and built three of the models.

No contracts for volume production ever have been made by Ordnance.

GMC Truck also provides the power for the "Ontos," (Greek for "The Thing") which is a lightweight tracked vehicle capable of using tremendous firepower in hit-and-run attacks against enemy tanks.

• • •

It bristles with six 106-millimeter recoilless rifles, four 50-caliber rifles and a 30-caliber machine gun. Its GMC 302 cubic inch engine develops 145 horsepower and drives it up to 40 miles per hour. It is to be built by Allis Chalmers.

166 Bathtubs a Minute

A water curtain on the west side of the artificial lake at the General Motors Technical Center is 115 feet wide and 50 feet high. It requires 6,000 gallons of water per minute (about 166 bathtubs full). The water ballet fountain at the northwest end of the lake, designed by Alexander Calder, has 21 jets which shoot water 50 feet high. They pump 3,600 gallons per minute.

Motor Coaches Vital Factor in Transportation

Ridiculed as an impractical fad by hackney drivers early in the century, motor coaches have merged as the dominant form of mass transportation in the United States in less than 50 years.

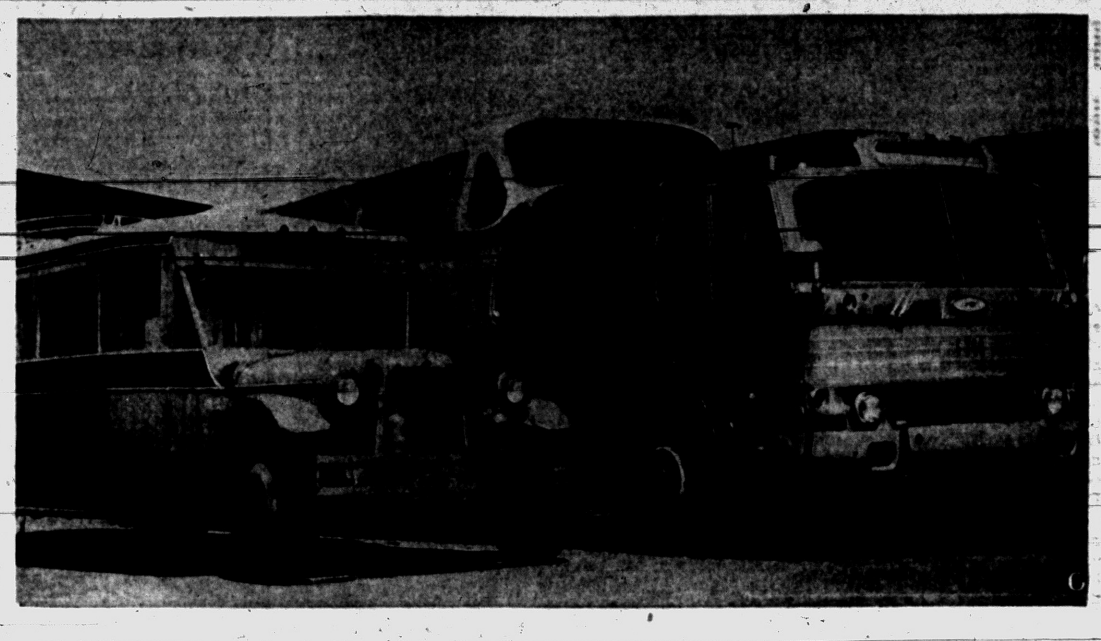

Their evolution from a couple of box-like vehicles wheezing down the streets of Chicago in 1908 has been so rapid that today buses carry a staggering load of more than 5½-billion riders.

This rise of buses to the top spot in the nation's transportation industry was spurred by far-sighted men such as John Hertz who envisioned a growing need for vehicles that would carry many people without being confined to fixed routes of travel.

Hertz was so confident he was right that in 1920 in Chicago he founded the Yellow Cab Manufacturing Co., the forerunner of today's coach manufacturing operation of GMC Truck and Coach Division.

His theory received further confirmation five years later when his firm became part of General Motors and started mass producing motor coaches.

Twelve U.S. officials have been the subjects of impeachment proceedings.

OLD AND NEW — In marked contrast to an ultra-modern Greyhound Scenicruiser is this early inter-city bus. Produced by Yellow Coach Manufacturing Co., of Chicago, forerunner of today's coach manufacturing operation of GMC Truck & Coach Division, in Pontiac, the old-timer made its debut in 1925 and was one of the first buses with a 6-cylinder engine and four-wheel brakes.

Built in Nourishment

A wide planting box in the lobby of the Manufacturing Development building at General Motors Technical Center contains a miniature grove of blooming orange trees in a bank of philodendren. The grove is nourished by a built-in water system and sun from a skylight above the lobby.

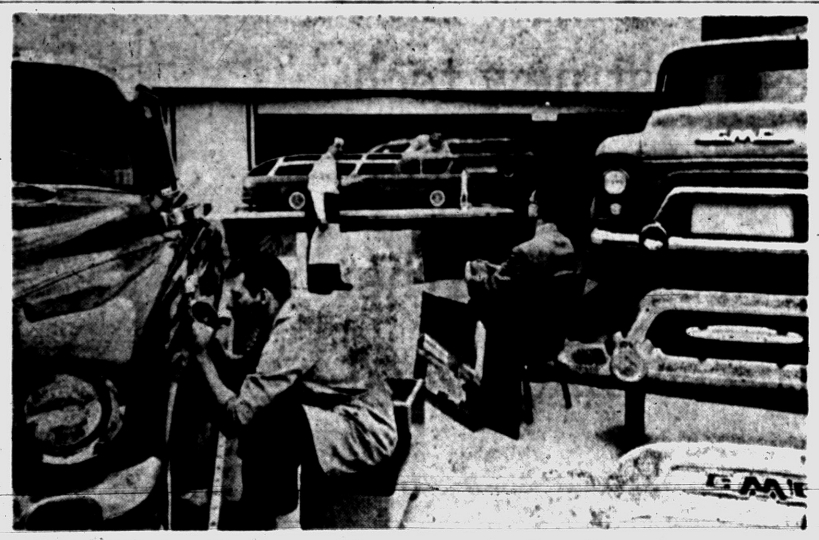

Report Living Cells Found in Mummies

HONG KONG (INS) — The Chinese Communist new China news agency claims that scientists had found some seemingly alive nerve and muscular cells in the flesh of mummified bodies buried 400 years ago.

The agency said that the professors of the North Kiangsu Medical College were preparing to transplant the cells to animal bodies "to test if they have any life and vigor."

The mummified bodies were unearthed recently at Nantung.

Six presidents of the United States were national guardsmen in their lifetimes.

TRUCK STYLING — The same meticulous styling effort that General Motors concentrates on its automobiles also is spent on trucks and coaches, as indicated by this view of GMC Truck & Coach studio at GM Technical Center. At the right is the mockup of a truck, while in the center is a scale model of a coach, sculptured in clay.

Congratulations
TO
GENERAL MOTORS

World's most popular
POWER STEERING?

Buick ROADMASTER 6-Passenger 4-Door Riviera

Right this way!

EVERY YEAR, more and more of the new cars sold are equipped with Power Steering. Many a man has bought it "for the wife"—then wondered how *he* ever got along without it.

And if *you* have in mind a new car with this increasingly popular feature, you ought to consider this fact:

Since the beginning of last year, *Buick has sold far more new cars equipped with Power Steering** than any other car—over 20,000 more in 1955 alone.

That's the record—and the reasons for it are just as impressive.

Buick brings you In-Line Safety Power Steering. In addition to the one-finger ease of turning common to all such systems in varying degree, it has several distinct advantages.

It gives you surer, steadier, *safer* control at highway speeds—because it retains that good natural "feel" of the road. (That's something you really should compare.)

On the other hand, it gives you *more* power assist when you need it most—at crawl speeds and at full stop. For parking and other tight maneuvering, Buick's Power Steering makes wheel turning nearly twice as easy as other types of systems. (And that's by engineering computation.)

Add another plus: this Buick feature works through the new *Buick* front end—where a unique new geometry and steering linkage bring a sweet new response and a wonderfully easy handling and a surer "sense of direction" even to new Buicks not equipped with the power system.

So there you are—and here we are, waiting to prove it all to you.

Waiting, also, to let you try the new thrills to be had in Buick's advanced new Variable Pitch Dynaflow†—where getaway response and gas mileage both step up even *before* you switch the pitch.

And waiting to show you how the highest power yet, the sweetest ride yet and the boldest styling yet—all help to make this bright new beauty the Best Buick Yet.

Today is fine with us. How about you?

*Buick's In-Line Safety Power Steering is standard on Roadmaster and Super, optional at moderate extra cost on other Series.
†New Advanced Variable Pitch Dynaflow is the only Dynaflow Buick builds today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.

Pooling of Research Facilities Pays Off in Finer Cars

Pontiac Boasts Famous 'Firsts'

Many Direct Result of Cooperation With GM Technical Staff

"The pooling of technical and engineering facilities and knowledge by the Pontiac Motor Division and the General Motors Engineering, Research, Styling and Process Development staffs, now located at the GM Technical Center, pays off in increasingly finer cars with more value per dollar for our customers," said G. A. Delaney, chief engineer at Pontiac.

"For over a quarter of a century, Pontiac has been a leader in the automotive field, introducing year after year, famous Pontiac 'firsts'.

"Many of these 'firsts' have grown out of direct cooperation with the men of the General Motors Research and Engineering staffs now located at the Technical Center and these 'firsts' invariably mean a saving to Pontiac owners."

• • •

"Some of the better known Pontiac 'firsts' which grew from this partnership were the introduction of "Duco" enamel, which revolutionized the automobile industry;

"The introduction of the mechanical fuel pump which has saved the American car owner millions of dollars over the years in greater fuel economy;

"The harmonic balancer which led the way to smoother engine performance; Pontiac's leadership in the adoption of 10W and 20 W oils, and,

"More recently the introduction of the Aldip Process which evolved into the aluminizing of valves in our most recent engines."

"DUCO" AND "LUCITE"

When Pontiac introduced "Lucite" lacquer of selected colors at the beginning of its 1958 model year, it took another giant step forward in the development of car finishes.

• • •

The remarkably durable new lacquer promises to have as far reaching effect on car color treatment as did the introduction of "Duco" nitrocellulose lacquer by Pontiac in 1923.

"Lucite" acrylic lacquer, chemically akin to the transparent Du Pont plastic, was developed after years of coordinated research between Pontiac, GM Research and the paint manufacturer.

Test cars, finished in "Lucite" have been on the highway as long as four years. The new finish has shown strong resistance to dulling and chalking on exposure and freedom from staining by oil and grease. The test cars held their color and gloss as much as three times longer than present lacquers.

• • •

Starting a car in the winter months back in 1934 and before was pretty much a sometime thing. More often than not Mr. Motorist walked to work. Villain in this melodrama was ultra thick engine oils.

FINE FOR THE DESERT

These oils had originally been classified for body (viscosity) at 130 degrees. This worked great if you happened to be driving across the desert on a hot summer's day, but it was literally murder on those unfortunate cars which made their homes where winter brought blizzards and low temperatures.

Pontiac engineers got together with a group from General Motors Research Laboratories and the GM Proving Grounds and vowed they would find an oil that would work.

After two freezing winters spent in the frozen climate of Regina, Canada, a team of engineers had eliminated all oils being used at that time as unfit and set up their own specifications for an engine oil. The oils were mainly classified for body (viscosity) at 0 degrees rather than the torrid 130 degrees. They were named 10W and 20W oils.

Such an oil was developed and it worked in both the freezing north and the engine heating south.

• • •

If your memory stretches that far back, perhaps you can remember some forty years ago when you had to get out of the car to fill it with gas because the attendant had to lift the front seat in order to reach the gas tank. The reason for this was that such things as mechanical fuel pumps were unheaard of, and that the gas from the tank had to flow downward to the carburetor with the help of gravity.

AC Spark Plug Division came up with a unit incorporating the best features of previous mechanical and electrical pump proposals which they turned over to Pontiac Motor Division to test.

Pontiac ran this pump through rigorous trials both in its engineering laboratory and on the roads of the GM Proving Grounds, and decided it was the one they wanted.

Its success was instantaneous and within a matter of a few years every automobile company in the country had adopted similar units.

PONTIAC'S EXCITING DREAM CAR — Pontiac's exciting "Dream Car," the Club de Mer is the latest in a famous line of experimental cars to grow from the combined creative genius of the GM Styling Studios and the Pontiac Motor Division. Although only on display since the first of the year, the Club de Mer has already been hailed as one of the most exciting sports cars ever built in the United States.

Dream Cars Give Preview of Styling for Tomorrow

Judging from the evolution of "dream car" wishful thinking into production line reality during the past several years, it is not tea-leaves but experimental cars that foretell the future of Pontiac's styling and mechanical innovations.

These Pontiac "dream cars" result from the joint efforts of Pontiac engineering and GM styling, one of the facilities located in the new General Motors Technical Center.

Since 1953, when Pontiac introduced the ultra-sophisticated La Parisienne, landau styled town car, Pontiac has sent up "trial balloons" in car design each year at the GM Motorama. Millions of people see the "dream car" as it tours the country in the Motorama and later at dealer automobile shows. Their reactions to the radically new body designs are carefully analyzed by customer research.

As soon as possible, those "dream car" features, meeting widest approval from show visitors, are incorporated into production model styling. Features the public does not like are discarded.

Mechanical innovations in the experimental cars are also checked for public approval. However, many of the radically changed mechanical features are not apparent to the casual observer and much less comment is received on them.

Looking back at the Pontiac "dream cars" of yesteryear, it is easy to pick out features that were approved by the public simply by tracing their re-incarnation on the Pontiac production line.

As an example the Pontiac Strato-Streak was built in 1954 when the four-door "hardtop" was a dream. Today it is rapidly becoming America's favorite body style.

And in the racy lines of the Pontiac Club de Mer, built only this year, you may see the features of tomorrow's family car if enough people approve its styling.

Critchfield Pays Tribute to New Center Facilities

"The fabulous new General Motors Technical Center dramatically testifies to the importance of technological progress in the automotive industry," R. M. Critchfield, Pontiac General Manager said today in paying tribute to the dedication of the new center.

Critchfield said Pontiac's association with GM Research Laboratories, Styling, Engineering and Process Development, the four staff organizations occupying the new project, contribute greatly to the success of the Pontiac automobile.

"Close liaison between Pontiac's engineering staff as well as its manufacturing staff and the Technical Center staffs allows us to draw upon a vast store of practical and experimental information. Much of it is available to us only through Technical Center services. It would not be economically feasible to have available some of the more complex data if we had to conduct all research independently.

It is Critchfield's feeling that the American car buyers have a right to continue demanding advanced technological features in their new cars.

"Through the years, Pontiac has introduced many safety and performance improvements. These improvements, which have contributed new beauty, safety, comfort and economy to Pontiacs and in notable cases to automobiles throughout the industry, resulted from constant research, experimentation and aggressive search for better products.

"In Pontiac's successful efforts to keep ahead in technological and styling progress that comes more important each year to automobile owners, the services of the Technical Center are invaluable," Critchfield concluded.

ROBERT M. CRITCHFIELD

Stone tools found in the Yukon form a cultural link between ancient tribes of Siberia and the Indians of the American southwest.

Mechanical Whiz Kid Knows the Answers

Most of us in our everyday lives have to measure volumes — Mom in the kitchen with cups or teaspoons, or Dad with quart cans when he's mixing paint.

The smallest unit Mother uses is probably the rather general "dash of this" or a "pinch of that." Dad might have to use only a couple of "drops" at best.

In automotive engineering, however, it's an entirely different story. For instance, recently the engineers at Pontiac Motor Division wanted to measure the volume in the combustion chamber of one of their new engines. Nothing too difficult in this.

However, they were interested in knowing the combined volume of the chamber and cylinder bore as the piston moved upwards.

They were intent on finding out what the volume change was every time the piston moved one hundred thousandth of an inch.

They knew that if they could get this information they could plot a curve of volume change which would, paradoxically enough, help them in studying how hot the fuel mixture would get as it was compressed.

Here is the problem they faced. If the piston moves about 3 and a quarter inches and they needed a volume figure for every one-hundred thousandths of an inch, it would mean someone would have to make three hundred and twenty-five thousand computations.

Figuring a red hot mathematician with a well oiled calculator could do one of these problems in a minute it would take him three hundred and twenty-five thousand minutes to get the information.

That's 5,415 hours, or 225 days, or a little over 7 months. Of course, if our harassed calculator operator wanted to eat, sleep and occasionally have a chance to go home and see his family, it might take three times as long or 21 months. Even if he had a helper working full time eight hours a day it would take them almost a year.

• • •

Center th ehere, called an IBM-701 Electronic Data Processing Machine, or as many laymen like to call it, a "mechanical brain." The machine had been recently installed at General Motors Technical Center in Detroit. For reasons of brevity, let's call it the "701".

Now the "701" can't actually think, but if the right questions are fed into it in the right places, it can throw out answers at a perfectly astounding rate. The people at Pontiac asked the technicians at the Tech Center if the machine could possibly handle those three and a quarter million computations without having a complete nervous or electrical breakdown.

It turned out it was more than up to the task. As a matter of fact, the "701" could whip off a project like that without even breathing hard, as sort of a warm-up before really getting down to the "tough" assignments.

It seems this mechanical whiz kid can grind out answers to problems of this type at the stupifying rate of 3,000 an hour.

The Pontiac men rushed the questions over to the Technical Center and in a matter of just four days the information they wanted was theirs.

Weeks Cut to Hours in Testing Rubber

The General Motors Technical Center has a very active program in ozone testing employing a quite sensitive apparatus for simulating weather conditions.

Technical Center engineers have assisted Fisher Body in establishing standards for testing and evaluating rubber and similar materials for suncracking resistance.

Formerly, only real weather itself could furnish the necessary statistical information. Using the Technical Center method Fisher Body has been able to reduce testing time from weeks to hours.

378 Miles of Wire

The entire General Motors Technical Center project required 378 miles of wiring and more than 12 miles of underfloor ducts in its buildings. Also, more than 56 miles of fluorescent tubing is used in the lighting system.

OUR

Congratulations!

at all plants coast to coast

GENERAL MOTORS

is holding

Open House

to celebrate the dedication of

GM Technical Center

TOMORROW we invite you to join us in celebrating one of the most important events in General Motors' history.

It is the dedication of our vast new 330-acre Technical Center in Detroit—and we are holding open house in General Motors plants to show our friends how they contribute to industrial progress and prosperity in their communities.

For the General Motors Technical Center is no ordinary manufacturer's laboratory. It is the largest institution in the world devoted to far-ahead research in the industrial arts and sciences, employing more than four thousand engineers, scientists and stylists.

Tomorrow you will see what this great technological institution—a-building since the end of the war—has already contributed to industrial progress in our local operations.

We think you will be amazed at some of the new materials, new skills and new techniques we are using right here—as a result of new technical discoveries.

So plan to come early and spend plenty of time to see how GM scientists, engineers and stylists are making tomorrow come true—*today!*

We are joining General Motors plants from coast to coast

in the nationwide *Open House*

PONTIAC MOTOR DIVISION
Glenwood & Kennett
OPEN HOUSE
1:00 P.M. TO 9:00 P.M.

FISHER BODY DIVISION
900 Baldwin Avenue
OPEN HOUSE
1:00 P.M. TO 9:00 P.M.

GMC TRUCK and COACH DIVISION
660 South Boulevard
OPEN HOUSE
9:00 A.M. to 8:00 P.M.

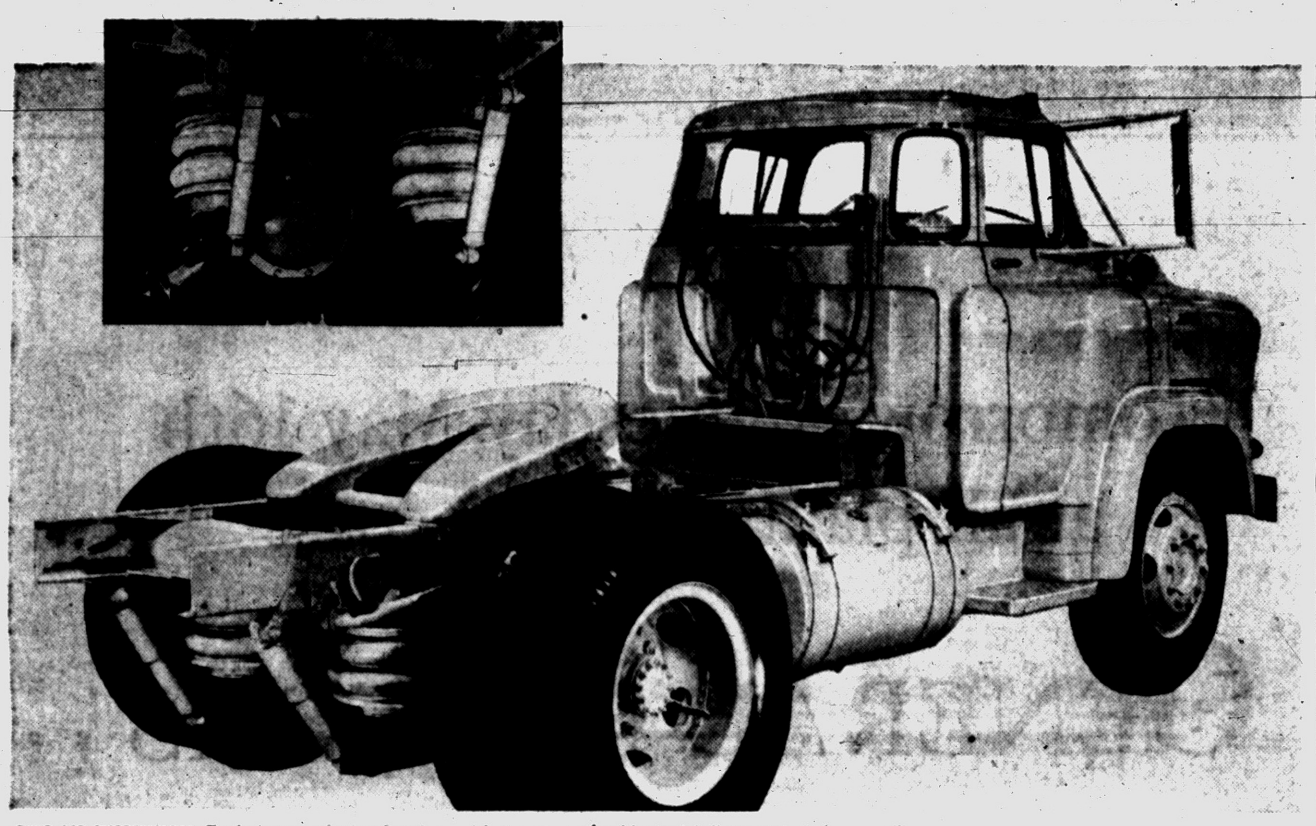

Join the celebration at

Tomorrow
May 16 – from 9:00 A.M.
to 8:00 P.M.

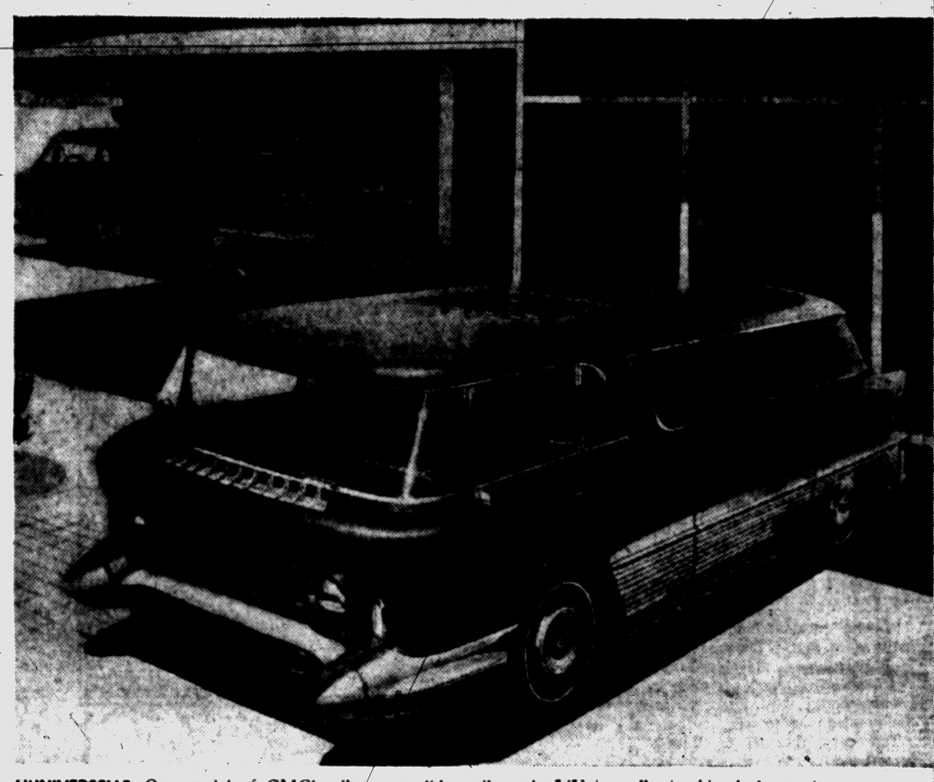

OPEN

See these great new automotive developments

on display for the first time at GMC Truck & Coach

GMC AIR SUSPENSION. Replacing conventional springs with a system of rubberized bellows and air beams, this revolutionary suspension design for trucks, tractors and trailers absorbs road shocks and vibrations which, in ordinary vehicles, are transmitted to the body and cargo. Not only does this result in reduced cargo breakage, it gives the driver a smoother ride and easier handling characteristics. An important advantage of GMC Air Suspension is the increased payload capacity resulting from lowering of the vehicle frame height.

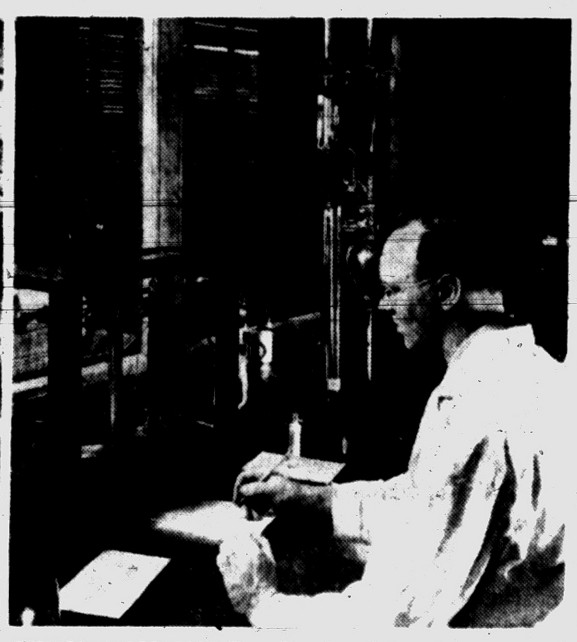

L'UNIVERSELLE. One model of GMC's all-purpose "dream" truck, L'Universelle, is this sleek panel delivery equipped with front-wheel drive, high-powered V8 engine, Hydra-Matic Transmission, torsion-bar suspension, panoramic windshield and two-way radio. Although L'Universelle is 10 inches lower and 10 inches shorter than conventional models, its floor is lowered to only 13 inches from the ground providing greater cubic capacity than current models.

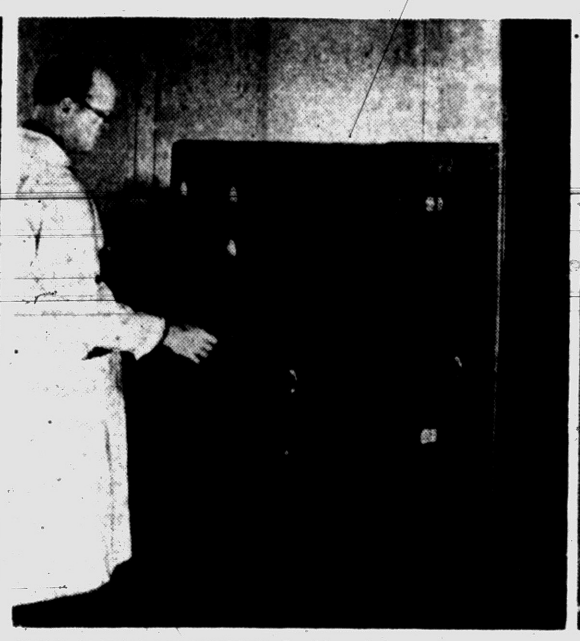

See also these modern engineering facilities *where ou*

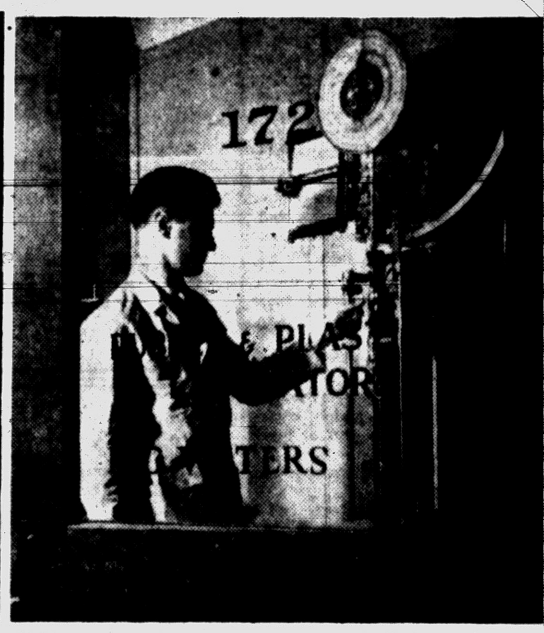

PRODUCT DESIGN. Here, at these drawing boards, GMC engineers conceive many of the parts and components used in the manufacture of our products. These engineers will adapt many of the forthcoming developments of the GM Technical Center to the trucks, coaches and other vehicles of the future.

CHEMICAL LABORATORY. Everything from fuels and lubricants to rust on bumpers is analyzed in the Chemical Laboratory. Results of these tests predict the performance of vehicles in actual service under a wide variety of conditions, thus insuring long trouble-free service for our owners.

SPECTROSCOPIC LABORATORY. In this emission-type spectrometer, materials are ignited and burned at temperatures as high as 10,000 degrees Fahrenheit—nearly the temperature of the sun. The results shown on a special photograph called a spectrograph, indicate the presence of nearly every known material in quantities as small as one half of one hundredth of one per cent.

RUBBER & PLASTICS LABORATORY. In the Rubber & Plastics Laboratory is tested every type of rubber and plastic material suitable for use on vehicles. Special tests simulate severe conditions of temperature, load, stress, vibration and many others, to warn our engineers of trouble or to assure them of the necessary margin of safety.

GMC TRUCK & COACH—

GMC Truck & Coach HOUSE!

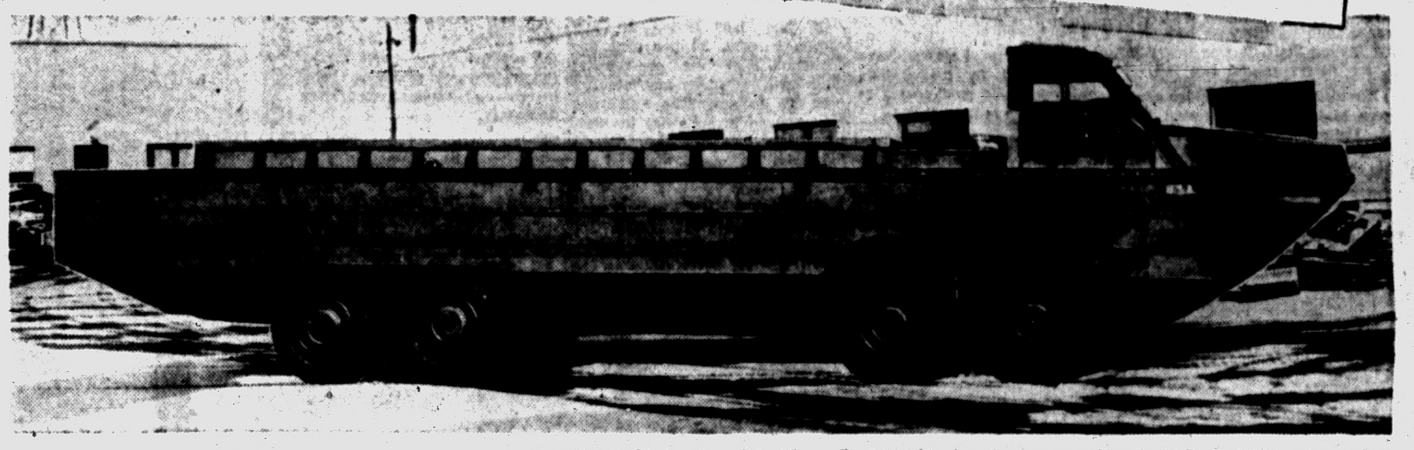

WE INVITE YOU to join us tomorrow, May 16, in celebrating one of the most significant events in the history of the automotive industry—dedication of the vast new General Motors Technical Center.

We celebrate not only because this great monument to science is the largest and most modern of its type in the world, but more in anticipation of its tremendous significance to the advancement of transportation technology. We of GMC Truck & Coach Division are proud to be "Partners in Progress" with the 4,000 scientists, engineers and stylists of the new General Motors Technical Center whose contributions to science will help us to provide more and better things for more people.

These and other interesting exhibits including the world's largest portable photographic transparency, made by GMC Photographic Department, will be on display all day tomorrow in the Administration Building Garage.

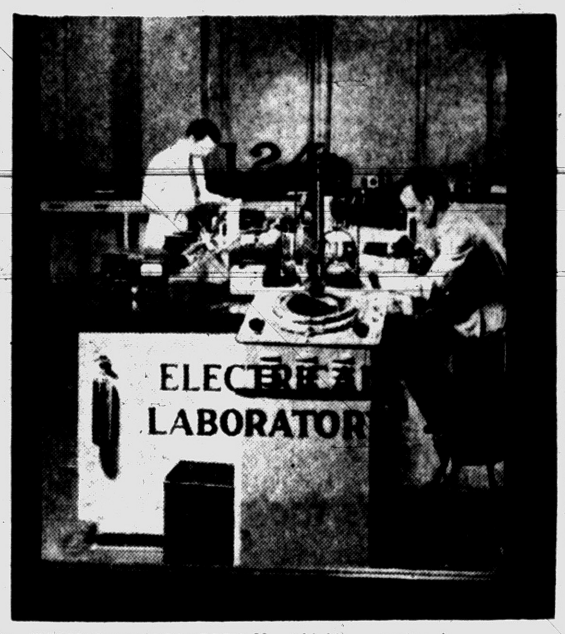

THE SUPER DUCK. Designed by GMC Truck & Coach engineers for the U. S. Army is this enlarged and greatly improved "Super Duck." With a 4-ton capacity, compared to the 2½-ton capacity of its famed World War II predecessor, the "Super Duck" is 32 feet in length, 9½ feet wide and is equipped with a 145-horsepower GMC truck engine and Hydra-Matic Transmission. A central tire inflation system permits the driver to change tire inflation pressure to meet a variety of traction requirements from soft mud to super highway.

THE DRAKE. Big brother of the "Super Duck" is this giant 8 x 8, retractable-wheel "Drake." Measuring 42 feet in length and 10 feet in width, this 8-ton-capacity amphibious giant has an all-aluminum hull, air suspension, automatic tire inflation system, and two 160-horsepower GMC truck engines each equipped with Hydra-Matic Transmission. Using both sets of front wheels for steering, the "Drake" exhibits unusual maneuverability on the road. Afloat it is steered by a novel system which allows either of its two propellers to be pointed in the desired direction.

r engineers adapt the latest technology to their advanced designs in commercial transportation

ELECTRICAL LABORATORY. Here, highly trained technicians design, develop and service special electrical and electronic equipment and tests for our product development engineers. These men, through continual study and application of advanced techniques, help us keep pace with fast-moving developments in materials and methods.

METALLURGICAL LABORATORY. Standard samples of metal are put into the jaws of this giant tensometer and stretched, like taffy, to insure that every batch meets rigid specifications. Here, other precision equipment such as a special high-powered microscope and X-ray equipment are used to insure dependable performance and rugged durability to owners of GMC vehicles.

BENCH TEST ACTIVITY. This dynamic spring deflection tester, above left, is one of a wide variety of special tests, most of them designed and built right here, which reveal the endurance and performance of the hundreds of components used on GMC vehicles from light bulbs to gas tanks.

DYNAMOMETER LABORATORY. In the Dynamometer Laboratory extensive development and endurance tests give our engineers the means of thoroughly proof-testing their advanced designs. In the Cold Room pictured above, engines are subjected to temperatures as low as –40 degrees Fahrenheit to insure satisfactory starting and performance under the most extreme weather conditions.

See these and many more examples of Technology in Transportation at GMC Truck & Coach Open House tomorrow—May 16—from 9:00 A.M. to 8:00 P.M.

A General Motors Division

South Boulevard Pontiac, Michigan

Proving Grounds Give Workout to Products of Research Staff

General Motors Proving Grounds, oldest, largest and best equipped automotive test facilities in the world, comprise an invaluable tool for testing automotive advancements developed at the GM Technical Center.

GM has three proving grounds: its main ground near Milford, established in 1924 and today covering 3,873 acres; its Desert Proving Ground near Mesa, Ariz., 2,280 acres, and its Pike's Peak Engineering Test Headquarters, from which tests are conducted on the Pike's Peak Highway, Manitou Springs, Colo., one acre. Total acreage is 6,154.

• • •

A fairly recent and excellent example of teamwork between the Technical Center and the Proving Ground is the cast malleable iron crankshafts recently adopted by GM's Pontiac Motor Division for its entire production needs.

Crankshafts traditionally have been forged from steel.

GM's Research Staff developed an alloy of two parts of bismuth in 10,000 parts of malleable iron, and four parts of boron in 100,000 parts of iron.

The Research staff recommended this alloy casting for crankshafts, pointing out that it would make possible substantial manufacturing economies over forged cranks. It also stated that the cast cranks would stand up as well as forgings.

TESTED BY PONTIAC

Pontiac Motor Division expressed interest. It installed a number of the cast cranks in experimental cars, and put them through the most exhaustive tests they could conceive at the Milford Proving Ground.

The cranks came through with marked success. Today, foundry authorities express the belief that the future of cast cranks is very bright.

• • •

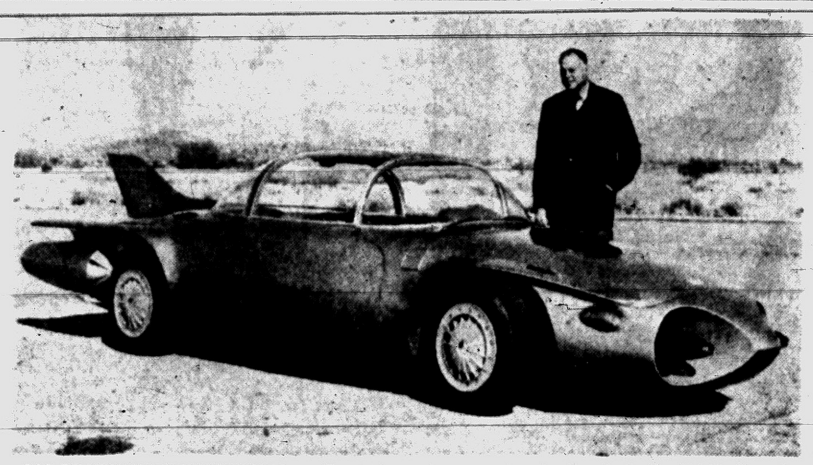

Firebird II, gas turbine powered car succeeding Firebird I, is a Technical Center product, with an assist from GM's Desert Proving Ground. Its gas turbine engine and chassis were designed by GM Research, and its titanium body by GM Styling Staff. It was test run on the desert ground last fall.

Firebird I, first gas turbine car ever to be built and tested in the United States, made its test runs at the Milford ground, as did Turbocruiser, world's first gas turbine powered bus.

Both vehicles were engineered by GM Research, with GM Styling designing the body of the first Firebird.

Each of the three GM proving ground facilities carries on from time to time experimental work which, because of its nature, cannot be publicly announced. For example, many of the ideas and developments which come out of the Central Engineering Staff are tested at one or more of the grounds.

These ideas are roughly in the fields of advanced engine design, improved automatic transmissions, better suspension, etc. They are ideas which may be incorporated in production cars a year or more in the future.

GAS TURBINE EXPERIMENTAL — The GM experimental Fireball II, a gas turbine passenger car specifically designed for highway use, is a product of the General Motors Technical Center. Its engine and chassis were designed by GM Research, with cooperative help of several GM divisions; its titanium body by GM Styling. It is shown here on the GM Desert Proving Ground near Mesa, Ariz., where it made engineering test runs. With it is Harley J. Earl, GM vice president in charge of styling.

Accent on Youth Sparks Fisher Craftsman's Guild

Where today meets tomorrow is a phrase that not only describes the General Motors Technical Center it is also the philosophy behind such accent-on-youth programs as the Fisher Body Craftsman's Guild.

Its aim is not only to enthuse boys in developing craftsmanship and creative ability but to inform them as well with a look into tomorrow.

How well the Fisher Body youth program has succeeded in this goal is demonstrated in some interesting statistics.

Approximately 4,000,000 boys have enrolled in the Guild's membership and participated in some measure in its activities.

A recent survey made by Fisher Body among former competitors in the Guild program indicates that both winners and non-winners feel they gained something very important from the experience of designing, building and entering a model in the Guild competition.

Over 500 replies have been received by the Guild from former winners polled to find out what kind of careers they have built for themselves and how much their Guild experience aided them in training for their careers.

Among the group already heard from, 54 per cent are either still in school (62 per cent of them in college) or in the U. S. Armed Forces.

Of those now active in their chosen careers, 22 per cent are engineers, 10 per cent are running their own businesses and four per cent are doctors. The remainder are engaged in activities too varied to tabulate but they include industrial designers, tool and die designers, salesmen, farmers, draftsmen, bankers, educators, newspapermen, and one member of the FBI.

Research Extends Life of Costly Dies

The vital contribution of the General Motors Technical Center to the engineering activities of the Fisher Body Division is amply illustrated in some case histories provided by Fisher Body's process development activities.

One investigation conducted jointly by the Process Development Group at the Technical Center and Fisher Body engineers has resulted in a longer and more efficient life of the huge, cast iron dies used to shape metal into the various parts of an automobile body.

In past years, many of these dies failed to last throughout the production run called for by the model year's schedule. Costly inserts and replacements were necessary.

Metallurgists and foundry consultants from the Technical Center were able to improve the casting technique of foundries involved as well as the metallurgical and physical properties of the dies.

On the 320-acre site of the General Motors Technical Center are more than 13,000 trees. Of these more than 600 are from 25 to 60 feet high. Also part of the landscaping are 55,941 ground cover plants and 3,180 shrubs.

CONGRATULATIONS!

Engineering Staff Has Big Assignment

On General Motors' organization chart is a cluster of special organizations under the "general staff" label. They are decentralized, relatively autonomous units that generate much valuable technical information, offer advice in policy matters and exert no authority over GM divisions.

They may guide, coordinate, advise or suggest, but they may not rule.

One of these special units is the General Motors Engineering Staff, headed by Vice President Charles A. Chayne. Engineering Staff works on forward engineering policies and coordinates the product programs of divisions.

Of primary importance, Engineering Staff carries out engineering studies and development of new products which are beyond the basic research stage.

In addition to its extensive activity and new product development, it supplies engineering services and facilities to any desiring General Motors division.

The development phase of its activity is conducted by four specialized development groups — Power Development, Transmission Development, Vehicle Development and Structure and Suspension Development.

The most important among its service activities are the General Motors Proving Grounds, Patent Section, New Devices Section, GM Photographic, Engineering Standards Section, Technical Data, Vehicle Safety and Canadian Operations.

Primary function of all these groups is to assist the divisions and to contribute to the overall engineering program of General Motors.

* * *

Another of Chayne's responsibilities is coordination of divisional engineering efforts, an important phase of GM's philosophy of "coordinated control."

As a part of "general staff," Engineering Staff was created in 1931 with O. E. Hunt (retired) in charge. At the start it consisted of several units already in GM's Central Office organization—Photographic, Proving Grounds, Patent Section, New Devices Section and Foreign Engineering Liaison Section.

STAFF EXCEEDS 2,400

Overall, Engineering Staff has more than 2,400 employes, and more than 825 of them are headquartered at the Technical Center.

Today's Engineering Staff's organization chart embraces many new units that developed over the years as the staff's duties, responsibilities and facilities expanded.

* * *

The work of this staff doesn't fall into an easy, simple, definition. It includes many branches of engineering directly related to automobiles. But it also includes household appliances, ordnance vehicles, parts fabrication, parts standardization and vehicle safety, engineering standards, test facilities and equipment affecting both motorcars and other GM products.

In the business of new developments—of benefit to GM generally or certain divisions specifically — teams of specialists are needed. Variety and scope of their work would not fit into any individual division's engineering or development pattern.

GM has found such teams function best as independent groups concentrating on special assignments, liberated from ties with divisional product problems or pressures of upcoming models.

DEVELOP FUTURE ATTRACTIONS

Thus, development groups are assigned to investigate, evaluate and develop devices that may be future attractions for divisions — an automatic transmission, a new type of body structure, a different type of suspension (springing) system or an improved auto engine. These groups pace themselves for tomorrow.

So far as facilities and services are concerned, GM divisions have may of their own. But outside immediate needs of their particular product testing and development, divisions cannot launch into too highly specialized programs for the hardheaded reason that they might become financial burdens.

* * *

Basically, each GM division is individually responsible for its own engineering within the realm of its own chief engineer. But a division's main effort must be concentrated on its own product. It may call on Engineering Staff for advice, consultation or use of facilities that would be financially and technically unfeasible for any single division to maintain.

Thus, for example, Engineering Staff is landlord of GM Proving Grounds and each division in effect is a tenant at Milford, Mesa, Ariz., or Pikes Peak, Colo.

At the same time, Proving Grounds engineers run countless tests on both GM and competitive vehicles, in the manner of an independent laboratory or testing service. As subscribers, divisional chief engineers are entitled to these data.

At the Technical Center, Engineering Staff has various types of special equipment virtually on fulltime rental as a central facility. It would be only a part time luxury to an individual division.

OCCUPIES NO-MAN'S LAND

In a sense, Engineering Staff is assigned to operate in an engineering no-man's land too costly for any individual division to take over and occupy.

More important, meanwhile, is that in addition to facilities and services, Engineering Staff has the plus value of making available to divisions a steady flow of new ideas, devices and developments that will become tomorrow's automotive or other product sales features.

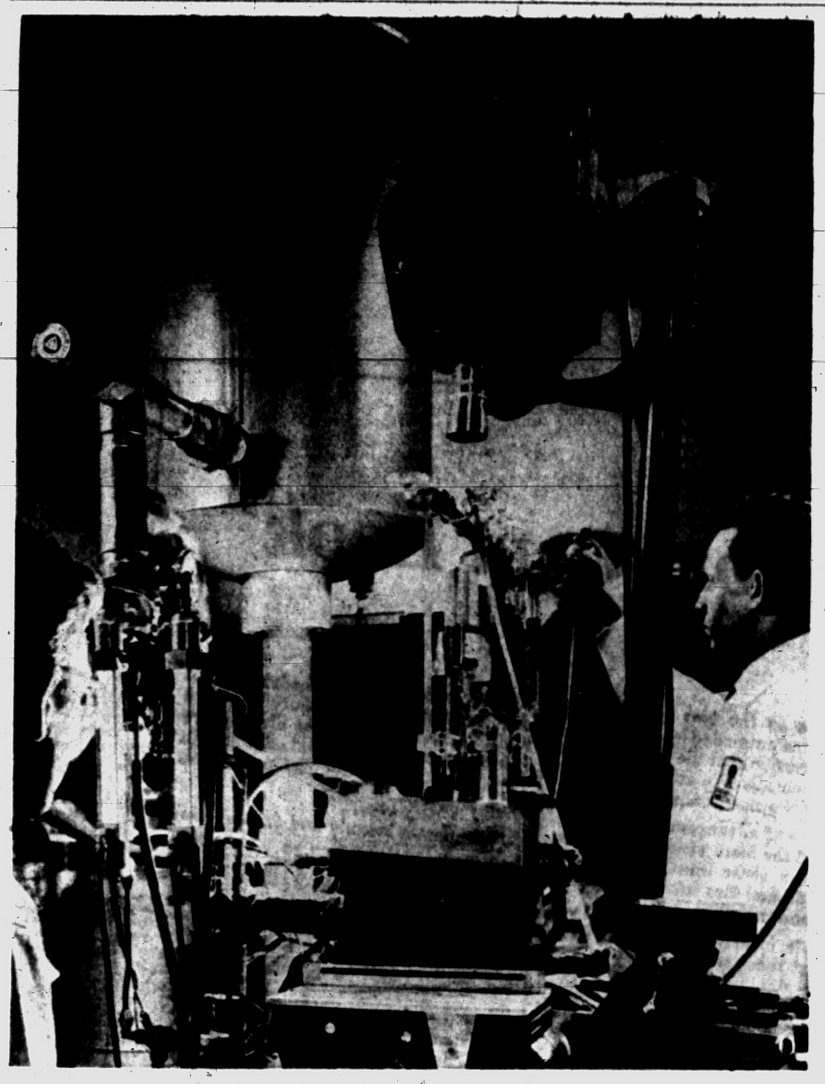

In other words, Engineering Staff has both creative and economic functions.

* * *

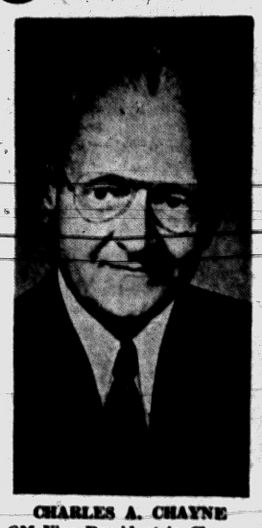

Chayne's group was first to occupy its Technical Center housing. Its priority to site locations was based on the uncomfortable fact that its offices and equipment were scattered through the General Motors Building, crammed into alley shops, garages and several GM plants.

Because need for a new home was most urgent, Engineering Staff had a Technical Center mailing address by late summer 1950, months before its buildings were completed.

The building group was press previewed in early September 1951.

HIGH SPEED PHOTOGRAPHY — An important tool in studying the automotive engine's combustion process is high speed photography. In this General Motors Research Staff dynamometer room engineers are preparing to run a test in which the combustion can be photographed — more than 1,000 pictures per second —through a "window" in the top of a single cylinder test engine.

CHARLES A. CHAYNE
GM Vice President in Charge of Engineering Staff.

Population Experts Will Meet at UM

ANN ARBOR (INS)—The annual meeting of the Population Association of America will be held this Saturday and Sunday at the University of Michigan in Ann Arbor.

The UM department of sociology will be host to the meeting.

An open house at 4:30 p.m. Friday, at the UM institute for social research will precede the 2-day meeting.

Registration for the conference will begin at 9 a.m. Saturday in the Rackham lobby, to be followed at 9:30 by welcoming remarks from President Harlan Hatcher of the university.

Speech and Hearing Unit Slates Spring Workshop

The Michigan Speech and Hearing Assn. will hold its spring workshop conference at East Lansing Friday and Saturday. Miriam G. Pauls, Ph. D., audiologist, Hearing and Speech Center, assistant professor of otolaryngology and environmental medicine, the Johns Hopkins Institutions, will be keynote speaker. Her topic: "Deafness Is Deceptive."

Among others to be on the program is Mrs. Lucille Kirchoff, principal of Coolidge School, Ferndale.

Targonski May Get Circuit Court Chair

DETROIT (AP)—A Detroit paper said today that it had received reports that if Gov. G. Mennen Williams elevates Circuit Judge George Edwards to the State Supreme Court he will name Attorney General Victor A. Targonski to succeed Edwards.

* * *

Targonski, while stepping down in rank, would step up from $12,500 a year to $24,000. Edwards, on the other hand, would take a $5,500 annual loss in advancing to the Supreme Court.

* * *

The newspaper said Gov. Williams declined comment on reports he was considering Targonski as an Edwards successor.

* * *

At the same time it pointed out the Governor has not indicated Edwards would be advanced to the high court, but the paper said, the Detroit Judge remained Williams' likely choice to succeed the late Justice Neil E. Reid of Mount Clemens.

Targonski, 42, is a native of Wyandotte.

Research Staff Largest of Four Main Groups at Center

The early part of General Motors Research Staff history is a tale of two cities, both famous in the engineering world, Detroit and Dayton.

Oldest organization of its kind, Research Staff is the largest of four major general staff groups at General Motors Technical Center.

Informally and unofficially its origins go back to 1909 or thereabouts when Charles F. Kettering set up Dayton Engineering Laboratories Company (Delco) for developing a battery ignition system.

Several automotive companies adopted the system. Through licensing arrangements its manufacture was farmed out to another company. Thereupon Kettering's "barn loft" gang of engineers and mechanics undertook a new job—development of the first successful electric self-starter for automobiles.

In 1911 the self-starter passed its tests and Cadillac accepted it for the 1912 model. Because of certain construction features, Kettering's company had to take over its manufacture and assembly.

CENTRAL LABORATORY

Meanwhile, at Detroit in 1911 General Motors formed a central testing laboratory and recruited engineers to serve as general staffers. These men were attached to no particular GM factory but were assigned to aid various plant and factory engineers with special problems in production, manufacturing and engineering.

The Detroit group and Delco at that time had no official connection, but in later years the two organizations they engendered were merged at Detroit.

Officially Kettering's research group was attached to General Motors in 1918 when United Motors became part of GM. United Motors was a miniature GM of the parts and accessories business.

It included Delco, Remy Electric, Klaxon, Harrison Radiator, Jaxon Steel Products, Hyatt Roller Bearing, New Departure and United Motors Service.

By 1920 Mr. Kettering's researchers were established as General Motors Research Corporation at Moraine City, near Dayton. Five years later they were lodged in the General Motors Building Annex, now occupied by Chevrolet Motor Division's Central Office.

As research activities expanded, the annex was outgrown and in 1929 the laboratories moved across the street into a new building at Milwaukee and Second behind General Motors Building. By 1938 the organization was given divisional status—General Motors Research Laboratories Division—but it remained a general staff unit.

The division began moving to the Technical Center in 1952 and completed its migration to the new center by early 1955. Later that year its designation was changed to General Motors Research Staff.

Kettering headed research until his 1947 retirement, when Charles L. McCuen succeeded him. McCuen had served previously as general manager of Oldsmobile Division and General Motors vice president in charge of engineering staff. He held the latter post mainly during the World War II years, heading GM's tremendous engineering efforts in developing ordnance vehicles.

McCuen guided Research Staff through one of its greatest expansions, from a 1947 roster of 576 employes to more than 1250 in 1955.

He retired in 1955 and was succeeded by Dr. Lawrence R. Hafstad, one of the country's leading physicists in the nuclear energy field. He previously had headed the Applied Physics Laboratory of Johns Hopkins and the Johns Hopkins Institute for Cooperative Research.

Later Dr. Hafstad was named the first director of the U. S. Atomic Energy Commission's Reactor Development Division and at the time of his General Motors appointment he was director of the Chase Manhattan Bank's Atomic Energy Division.

IT STARTED HERE — In the loft of this barn on Central Avenue, Dayton, Ohio, the history of General Motors Research Staff began as Dayton Engineering Laboratories Company (Delco), July 22, 1909. Here Charles F. Kettering and his "barn loft gang" of engineers and mechanics developed the first automotive electric self-starter which appeared on the 1912 Cadillac.

AND GREW TO THIS — At the north end of the 22-acre artificial lake at Technical Center stands a group of eight buildings, new headquarters of GM Research Staff. Its personnel now numbers approximately 1,400, and the variety of its projects is fabulous when compared with operations of the Delco "barn loft gang" in the early 1900s at Dayton.

CHARLES F. KETTERING
He pioneered in automotive research.

DR. LAWRENCE HAFSTAD
GM Vice President in charge of research staff.

Manufacturing Starts Where Design Ends

Generally speaking, manufacturing begins where product design ends. Manufacturing is a field demanding services of more and more engineers, as witnessed by the growth of Process Development.

Its personnel has increased approximately fourfold until today the staff numbers 380 engineers, designers and technicians, and its list of projects has expanded at an even greater rate.

* * *

Rodger J. Emmert, executive in charge of Manufacturing Staff's Facilities and Processes, points out that "development of better manufacturing methods is largely an engineering problem."

"To search for and develop ways of accomplishing desirable and practical manufacturing methods," he says, "requires such facilities as are found in the best research laboratories."

This, in substance, is a relatively new trend, the enlistment of trained engineering and research brains in more than platoon strength, so to speak, to specialize in various manufacturing and processing techniques.

* * *

PDS translates this trend into an impressive array of equipment, modern laboratories for chemistry and physics, metallurgy and spectography, electrical engineering and electronics.

Process Development's experimental foundry, in fact, ranks as one of the most complete of any in the world.

An artificial lake on the General Motors Technical Center site is 1,780 feet long by 560 feet wide or 22 acres. Depth is 7 feet.

Failures Often Pave Way for Success in Research

In a sense, industrial research is akin to petroleum wildcatting. A petroleum engineer has to test drill many beguiling rock formations before he brings in a gusher from an underground oil pool. Or he may bring in many small producers before a gusher erupts.

Similarly, an industrial researcher may fail more often than he succeeds. Frequently, while working with new ideas or new applications of old concepts, he is beset by a "factor of ignorance." He finds himself at a point of no return where knowledge and data leave off and faith begins.

Even so, a research failure can be just as profitable as a spectacular success. Some research failures have warned GM management what not to do. Such wisdom has an inestimable price.

Also, a number of laboratory flops inadvertently revealed clues that contributed to the success of a new product, process or development.

One of Charles F. Kettering's early requisites was independence. He wanted researchers to research without immediate regard for production or product problems.

Thus, Research Staff's authority even today is confined mainly to its own operations. For the most part it is responsible to itself and top management in plotting its studies, projects and programs.

* * *

One of its major missions is to search for new basic information in areas that may appear academic or abstruse, for what may turn up in these areas will have sometime, somewhere or somehow an application to GM operations. In other words, "Pure science writes the alphabet of engineering."

Organizationally, Research Staff has 11 departments continuously working on science research, engineering development or miscellaneous large and small service problems.

Departments listed under the heading of applied sciences are Industrial Hygiene, Physics and Instrumentation, Chemistry, Electro-Chemistry and Fuels and Lubricants.

In the category of engineering research are the following departments: Engineering Mechanics, Metallurgical Engineering, Automotive Engines and Garage, Mechanical Development, Special Problems and Gas Turbines.

Each department operates flexibly in that it can call on another department or departments in the care and feeding of a project. As one veteran administrator remarks: "We're always taking in each other's washing."

Center Parking Areas Lit by 300 Street Lights

For parking lots and surrounding areas at the General Motors Technical Center, 300 street lights on high lamp posts are used. They require 47 miles of wiring.

Around the central court of the project the road lighting is accomplished by a series of mushroom shaped fixtures four feet high, specially developed and designed. Each of the colored glazed brick endwalls of buildings are flood lighted by night. Also, 280 of the trees on the site are lighted by mercury vapor lamps recessed in the ground.

Foreign Makes, Too

Production designs for three foreign makes of General Motors automobiles are worked out at the General Motors Technical Center GM Engineering Staff's Vehicle Development group, cooperating with GM Overseas Operations, has built production prototypes of the Opel Kapitan (German), the Vauxhall (British) and the Holden (Australian).

Condensed and reprinted by permission of Automotive News, from the issue of December 26th, 1955.

Super Auto Finishes Developed . . .

A Lasting 'Showroom Look'

By John T. Benedict
Engineering Editor

PAINT industry developments are moving at such a rapid rate that neither the present-day car owner nor the old-time paint chemist would recognize the vastly improved finishes which are likely to emerge from current research programs.

If transported into the not-too-distant future, the car owner would find that the peak popularity of extremely bright colors had subsided.

He would find the industry in a cyclical trend dominated by "grayed-down" or subdued tones. The "rainbow on wheels" still will be seen on the streets, but solid colors probably will enjoy greater favor than they do today.

Included in the expanded array of colors offered the new-car buyer, will be a number of entirely new shades which may be seen now only in the paint laboratories, or occasionally on special nonproduction "show" cars. Among the new tones to appear will be a wider range of metallic colors — extending the available iridescent effects to light shades now considered impractical.

AFTER reveling in his wider latitude of choice and virtually unlimited freedom to express an individual color preference, the future buyer has another pleasant surprise in store as he notes retention of the showroom appearance throughout the normal car life.

Out of today's test tubes will come tomorrow's more durable finishes, with greatly improved weathering resistance.

Colors will retain their initial intensity and hue over a longer life span. Luster retention will be phenomenal by today's standards.

By 1958, it is anticipated that paint suppliers will have facilities for manufacturing them in sufficient quantities to take care of the auto industry's entire output.

The ultimate goal is to provide a finish that will remain glossy and fresh-looking for the life of the car without any polish or wax application. This target now is in sight. Original appearance of the finish will be restored merely by a thorough washing.

Industry at Crossroads, Paint Experts Believe

DESPITE widely differing opinions concerning the relative merits of lacquers and enamels — and the possibility that such arguments may become meaningless as the two terms themselves become outmoded—there's a universal impression that the paint makers now find themselves in an industry that truly is "at the crossroads."

The pace of advancement is quickening, and the more visionary leaders already can sense imminent victory over traditional foes such as sunlight, oxygen and moisture.

Signposts clearly point the way to mastery of these traditional enemies—but it is significant that the arrows which for nearly 25 years have guided researchers along a course of gradual improvements of familiar pigments, resins and solvents have radically altered their direction.

The new direction for the mainstream of research and development is toward entirely new inorganic materials . . . and the path is marked by arrows painted with substances that would be unrecognizable to paint chemists of the recent past, or those familiar only with the long-known "traditional" formulations.

All through the industry, there is a feeling that "great changes are in the making"—an impression that the great paint industry seemingly is on the threshold of a spectacular breakthrough that inevitably will be marked by sweeping changes in the fundamental nature of the product, as well as noteworthy advances in its qualities.

The general feeling akin to keen anticipation of an accelerated tempo for basic, far-reaching changes—shared by authoritative pace-setters in both the paint and automobile industries—is perfectly reflected in the views of Frederick G. Weed, president, Rinshed-Mason Co.

IN A statement that accurately keynotes this writer's interpretation of prevailing high-level thinking, Weed says: "The past 20 years has seen an amazing progress in the paint industry in both paint application techniques and paint formulation. But within the next one or two years, we will undoubtedly see in paint technology, the greatest single stride of the whole period.

F. G. Weed

"The 'super-finish' embodying great durability and lasting beauty will be a reality. The super finishes already are appearing on experimental cars and, in some cases, on the regular production cars.

"The names lacquer and enamel soon will be lost," according to Weed, "because these super finishes resemble neither lacquer nor enamel, as we think of them today. At the present time, Rinshed-Mason actually is manufacturing production-size batches of super finishes that we have designated as Alpha finish and Beta finish."

The Rinshed-Mason executive said the Alpha finish is produced from chemical polymers that heretofore never have been considered for automotive paints. And, chemically, the new Beta finish is similar to the appliance-type finishes currently used for household washers and refrigerators. These new polymers reportedly are producing "fantastic durability results" in Florida exposure tests.

"Super hardness, excellent adhesion, outstanding gloss retention and ultra durability" are the words used by Weed to describe these new finishes. He said that polishing and waxing will be a thing of the past.

In addition, brighter, "more glamorous" colors than have been obtainable with conventional lacquers and enamels now are said to be possible with the new super finishes Alpha and Beta.

From the standpoint of the automobile manufacturer, the new paints are said to have outstanding advantages in application. Because of their great surface hardness, production damage may be reduced, with a lesser requirement for touch-up or repaint jobs. Their inherently high gloss allegedly will make attaining of the final lustrous appearance "an insignificant problem."

* * *

New Paint Products Readied for Introduction

THIS Rinshed-Mason statement and recitation of product claims is significant not only in itself—but because Weed's brief description of the new finishes more or less typifies general objectives sought by all paint makers in their current development programs.

Process Development Section Latest of Staff Units

Research Ideas Are Different

Engineers Work at Any New Problem Dumped on Their Desks

Newest of all General Motors Staff units at Technical Center is Process Development Section.

As part of GM manufacturing staff under Vice President John J. Cronin, its 1946 birth coincided with the original Technical Center plans.

For awhile the section operated at Cadillac Motor Car division until its offices, laboratories and shops were ready in 1954 on the east isde of the 22-acre artificial lake at the new GM facility.

Process Development Section or PDS fits into an engineering and research zone not covered by any other staff unit — the manufacturing zone which needs special engineering and research techniques of its own.

Over all PDS policy follows the same general line of both GM Engineering Staff and GM Research Staff. Its facilities, like theirs, are available to GM divisions for new developments, services, technical aid, advice, consultation.

All GM divisions have their own manufacturing and processing staffs handling day-to-day problems, but when they need outside help they can go to PDS for it.

OTHERS TOO BUSY

According to Mr. Cronin, "The men on our manufacturing team in our plants and divisions are burdened with the cares and the heat of today's problems and too often find themselves lacking in thinking time to develop an idea or lick a tough problem.

"We say, 'Bring them to us and let us see what we can do.'"

At the same time, PDS projects are beamed toward the future. PDS engineers, traveling the GM technological circuit, have in the short history of the section collected an imposing background of manufacturing and processing knowhow and practical experience.

• • •

This is applied to ideas and techniques PDS works out on its own, ideas anticipating what GM divisions may be looking for in future production or manufacturing plans.

New developments in electronics, metallurgy, chemistry, physics — how can they be applied to manufacturing methods? PDS engineers are alerted always to answer such questions.

PUTS OUT REPORTS

Every six months GM divisional and plant managers get a report of Process Development projects completed or under way so they can determine whether anything in PDS applies to their situation.

Also, a plant contact group always is scouting GM divisions, not only offering Process Development's assistance but also bringing back to Technical Center headquarters information as to how PDS can be of further assistance to divisions and plants.

Process Development also conducts test programs on special products of common interest or wide usage in divisions — resins for foundry core sand, core oils, fire resistant hydraulic fluids, hydraulic fittings or limit switches.

• • •

In cooperation with manufacturing staff's Work Standards and Methods Engineering Section, PDS answers plant and divisional requests for studies of production methods.

• • •

This is done by special survey teams aiming at improved working conditions, product quality, work in process inventories and reduction of manufacturing costs.

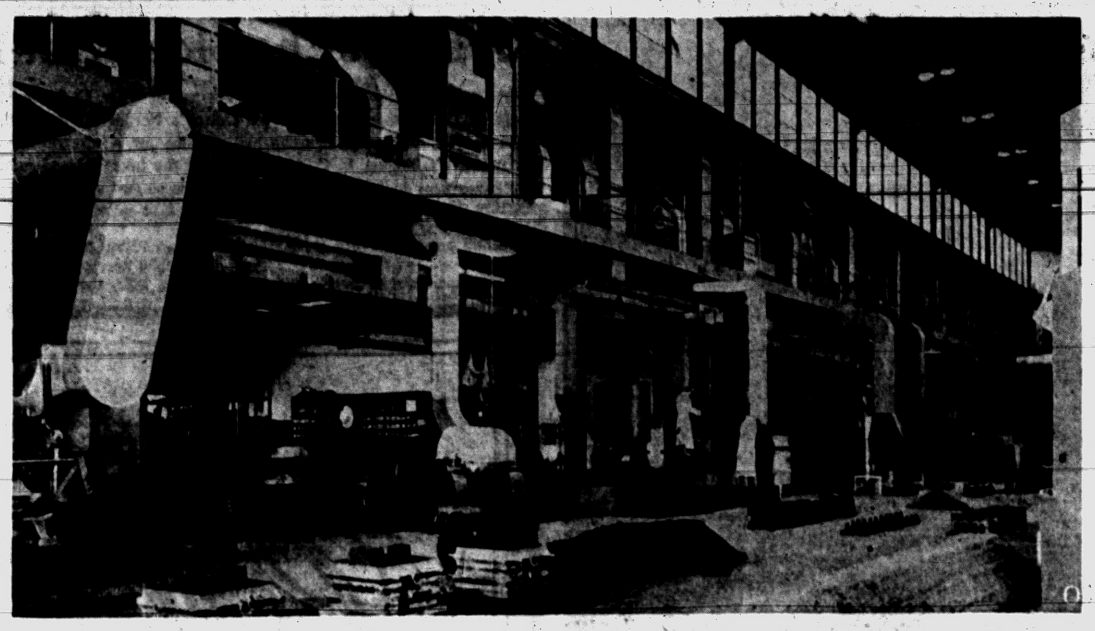

OFFER DIFFERENT VIEWPOINT

Obviously, each local plant management does the same thing in its own particular plant, but experience has shown that a prudent mixture of local and non-local viewpoints gets best results. Manufacturing Staff men going into a particular plant are uninfluenced at the plant.

They offer instead a viewpoint based on experience with situations in a number of GM plants which can be put to local use.

155 Acres of Lawn

One hundred fifty-five acres of the 320-acre General Motors Technical Center site consists of lawns. They require 15½ tons of grass seed and 58 tons of fertilizer.

FOR EXPERIMENTAL WORK—Equipped for virtually all types of experimental melts is this foundry operated by Metallurgical Engineering Department of General Motors Research Staff at GM Technical Center. Like other special purpose areas at Technical center, it features maximum flexibility.

GM's PDs Given Work Too Costly for Tool Men

In fact, as of today, few divisions in GM have not at one time or another been in contact with the Process Development Section. Moreover, PDS machines or processes can be seen in production lines of virtually all manfacturing plants.

• • •

Also, this section was designed to bridge a gap between other Technical Center units — Research Staff, Engineering Staff and Styling —and manufacturing. Ideas originating in any or all of these other units must at some time progress from "working sample" to production, manufacturing or processing.

EXAMPLE GIVEN

For example: Research Staff recently developed a plating technique. Process Development set up a pilot production line and over a two-year period new GM Research-developed plating solutions were evaluated by PDS on a production basis.

Later, when a GM manufacturing division adapted the process for one of its engine components, much knowhow had been gained and many production problems were solved for the Division in advance.

Process Development Section had served as a chemical engineering proving ground.

Another: For polishing decorative parts of an automobile prior to plating, Process Development devised a technique known as gyrofinishing.

This basic idea of plowing parts through an abrasive mixture was tried experimentally with a drum mounted on a drill press.

An experimental full-size machine next was designed and built, adaptable for polishing a variety of decorative parts or automotive hardware.

The process proved both economical and practical, and today a whole family of gyrofinishing machines is at work in GM divisions. Many of these machines are elaborate offsprings of the original drum and drill press on which the project was started.

Zeeland Man Picked

ZEELAND (AP)—The United States Department of State announces that Willard A. DePree of Zeeland has been appointed a career foreign service officer by President Eisenhower. The appointment makes DePree a vice consul and secretary in the diplomatic service.

That's the Spirit!

ALLEN PARK (INS) — A sign tacked on the only remaining wall of a drive-in restaurant recently demolished by tornadoes here read:

"Closed temporarily for alterations."

Phinny Quits Race

FREMONT (AP)—Robert H. Phinny has withdrawn his name as a candidate for the Republican nomination to Congress in the Ninth Congressional District—the post now held by Rep. Ruth Thompson. He said the action was "due to personal reasons." Attorney Robert P. Griffin of Traverse City remains a candidate for the nomination.

At an average speed of 30 miles an hour it would take a car more than 11 years to travel over America's 3,012,520 miles of rural roads.

Penal Man to Talk

GRAND RAPIDS (AP)—S. Jerome Roach, Grand Rapids field supervisor of probations for the state corrections department, will address the 83rd annual forum of the national conference of social work in St. Louis, Mo., May 24. More than 8,000 persons are expected at the forum which opens May 20.

There are 80,000 more people employed now in Northern Ireland than before the war, said Brian Faulkner, Member of Parliament, in Belfast, but many more jobs are needed.

PD Section Bridges Gap Between All Center Units

Process Development Section is interested in design, development or experimental work ordinarily too difficult, risky or expensive for machine tool companies to undertake.

• • •

This means PDS maintains facilities, laboratories and testing equipment that few, if any, outside machine builders maintain. Dividends from these accrue directly to an outside company's advantage, as well as to GM's.

ENGINEERS COLLABORATE

For example: PDS engineers and Detroit Transmission Division collaborated in developing a so-called torus assembly machine for production of Hydra-Matic transmissions.

The torus assembly of a Hydra-Matic resembles half a grapefruit, bowlshaped with vanes radiating from its center, about 12 inches in diameter.

The project had a number of potential pitfalls. Not only was a torus assembly relatively complicated in itself, but also it was larger than any assembly previously assembled by automatic means.

Beyond that was the question of whether it would be economical to assemble a torus semi-automatically.

PROJECT IS COSTLY

It goes virtually without saying that on a project like this must be lavished much expensive engineering and development work.

The problem was broken down into small elements and each was painstakingly worked out.

The machine was put together in Process Development's shop, "debugged" and delivered to Detroit Transmission Division.

Since one machine wasn't sufficient to satisfy production requirements, an additional one was needed. Process Development called in an outside machine builder to duplicate its work, but on a three-month-late schedule. Thus, PDS experience in building the first machine provided readymade knowhow for the vendor building the second.

100 Naya Paisa Equal One Rupee

NEW DELHI, India (AP)—India is adopting the decimal system of coinage used in America.

• • •

India's standard unit will continue to be the rupee, tied to the British sterling bloc and still worth about 21 cents. But the sponsors of the new system—which takes effect next April 1, think it will be much easier for buyers and sellers to make change.

Under the new system the rupee will be divided into 100 naya paisa (new pie) units, with new coins in the denominations of 1, 2, 5, 10, 25 and 50 naya paisas.

• • •

Previously the rupee has been worth 192 pies or 16 annas.

Congratulations

OVER 175 HORSEPOWER IN RESERVE!

... when you're cruising at everyday speeds!

"88" HOLIDAY SEDAN

THE ROCKET'S EXTRA MARGIN OF POWER MEANS AN EXTRA MARGIN OF SAFETY!

HIGH HORSEPOWER . . . high torque . . . high compression. It takes all three to describe Oldsmobile's Rocket!

But there's still another important side to the picture. You'll probably notice it the first time you drive an Olds. You'll certainly appreciate it every time you ask for an extra spurt of power.

It's reserve power—in abundance! In fact, at normal cruising speeds the Rocket still has *more than 175 horsepower left* . . . over and above what it takes to propel the car! It's this reserve that whips you through a passing situation and back into your own lane so quickly, so effortlessly.

That means economy, too! The Rocket just eases along, when lesser engines are straining. You can see the result in Oldsmobile's *double victory in the 1956 Mobilgas Economy Run!*

Bottom curve shows power needed to propel the car. Top curve shows Rocket Engine horsepower available when you need it, when you want it!

All this starts with basic engineering — engine design aimed right at the rear wheels. The Rocket's modern "big bore, short stroke" design cuts friction and power loss. It was the Rocket that made high compression practical . . . and today's Rocket hits a spectacular high 9.25 to 1 compression ratio!

For the most vivid proof of what this means to you, come take the wheel of a Rocket Engine Oldsmobile. We are confident you will feel a distinct difference in performance, in riding and handling qualities . . . just as you'll see a glamorous difference in Oldsmobile's styling leadership. We'll be looking for you *soon!*

THERE'S A POWERFUL DIFFERENCE BETWEEN AN OLDSMOBILE ...AND THE OTHER LOWER-PRICE CARS!

Oldsmobile salutes the dedication of a great new "world's capital of progress." It's General Motors' new Technical Center, where more than 4000 scientists and technicians will shape the future for a higher standard of living.

...WHERE TODAY MEETS TOMORROW

OLDSMOBILE

A QUALITY PRODUCT brought to you by AN OLDSMOBILE QUALITY DEALER!

CHECK YOUR CAR—CHECK ACCIDENTS! CAN YOU SEE, STEER, STOP SAFELY!

Engineering Research Teams Provide New Medical Tools

Men of General Motors Research Staff have contributed to technical enrichment of medicine by using engineering knowhow on medical problems.

From these cooperative efforts with surgeons and medical researchers have come such developments as:

1. The Centri-Filmer, a mechanical device that spins liquid vaccines into a microscopically thin film for sterilization by ultraviolet light.

2. The Electro Stethograph, a sensitive pickup that detects the heart's faint, low frequency sounds, too faint for the human ear or a physician's stethoscope to detect.

3. The Dodrill-GMR Mechanical Heart, a pump that substitutes for the human heart while a patient undergoes heart surgery.

4. The Photoelectric Oxyhemograph, which monitors the blood oxygen count of a surgery patient and gives the anesthetist an instant reading of the patient's anesthetic condition.

Each of these developments followed a request to solve some problem—primarily engineering—that had stymied medical men. Either by using something already "on the shelf" or contributing their various engineering aptitudes, GM Research Staff men did the job.

* * *

The Electro Stethograph, for example, was developed by mating the pickup stylus of an industrial instrument, the Surfagage, with the diaphragm head of a physician's stethoscope.

Dale Groom, M. D., assistant professor of medicine at the Medical College of South Carolina, had experimented with various pickup devices, when Charles F. Kettering, GM research consultant, suggested he see whether a Surfagage pickup would work.

The Surfagage had been produced by Research Staff's Mechanical Development department to measure surface finish of machined parts in millionths of an inch. It was an industrial tool for maintaining quality control of such engine parts as bearings, cylinder liners, wrist pins, valve stems, etc.

When combined with part of the stethoscope, it enabled doctors to amplify low frequency heart sounds so they could be reproduced visually.

Long range effects of this new medical research tool remains to be assessed, because medical men need years to gather more information about the heart's behavior as reflected in its inaudible vibrations.

At any rate, it is already producing new medical knowledge.

FIRST USE — Medical history was made July 3, 1952, when the Dodrill-GMR mechanical heart was used in the first successful substitution of a human heart during surgery on a 41-year-old man. This mechanical pump was developed cooperatively by Detroit Harper Hospital surgeons and engineers of General Motors Research Staff, and the original model today is a permanent exhibit at the Smithsonian Institution, Washington, D. C. In special cases of heart surgery, the pump is still used at Harper Hospital.

First Mechanical Heart Now in Smithsonian

First model of the Dodrill-GMR Mechanical Heart today is a permanent exhibit at the Smithsonian Institution, Washington, D. C. Since 1952 subsequent models have successfully substituted for the human heart, enabling doctors to make life-saving surgical repairs of heart defects.

This unique project began with the suggestion of Dr. F. D. Dodrill of Detroit's Harper Hospital, who had an idea for a mechanism to take over the heart's blood-pumping function so that surgeons could operate in a so-called "dryfield."

* * *

GM Research Staff undertook the job as a public service.

On July 3, 1952, the pump was used for the first successful substitution of a human heart.

* * *

It marked a goal medical men had been striving toward for centuries, a temporary substitute for the human heart.

* * *

In 1952 the National Association of Science Writers listed it as one of the ten top scientific developments of that year.

The following year the American Medical Association awarded Dr. Dodrill the Hektoen bronze medal, symbolic of an outstanding contribution to basic heart research.

The device continues in service today at Harper Hospital for use in special cases of heart surgery.

Whirling Cup Spins Liquid to Allow Ultraviolet Bath to Kill Bacteria

In October 1948 Michael Reese Research Foundation (in Chicago) asked GM's assistance in designing an apparatus for sterilizing whole blood or blood plasma with ultra-violet radiation.

The liquid had to be "spun" into a microscopically thin but unbroken film so that ultraviolet light would destroy harmful bacteria.

This problem was assigned to Research Staff because it closely paralleled previous experience in designing and building precision balancing machines.

For seven years engineers and medical researchers designed, built, tested and modified the device until they were ready to announce their preliminary results in late 1955.

The Centri-Filmer is a 15-inch vase-like cup that is spun by an accurately controlled electric motor drive. The cup spins the vaccine, plasma or other special liquid into a film about one ten-thousandth of an inch thick or one twentieth the thickness of a human hair.

Inside the cup are tubular quarts lamps that irraidate the film or give bacteria an ultraviolet "bath." The film rises along the walls of the cup until it is drawn off at the top by a specially designed collector.

Dr. Franz Oppenheimer of Michael Reese Foundation reported that the Centri-Filmer has been used to purify more than a half million pints of blood plasma.

Also, it has been used to purify ACTH, used in treatment or rheumatic arthritis and many allergic eye and skin conditions; to sterilize serum that wiped out hoof and month disease among Mexican cattle, and to purify a rabies vaccine of greater potency that had ever been available.

Moreover, Parke Davis & Company now uses Centri-Filmer units in purification of a new polio vaccine.

Parking Lots — 85 Acres

The General Motors Technical Center has 11 miles of roads and 1.1 miles of underground tunnels. Eighty-five acres are devoted to parking lots for more than 2,900 automobiles.

2,250,000 Square Feet

The General Motors Technical Center occupies a 320-acre site or one-half a square mile in an area of more than 900 acres. The total square feet of building is 2,250,000.

Detroit, automobile capital of the world, is one of the few cities in the United States that still has a mounted police force.

Measure Oxygen in Blood With New Amplifier

Amplification of extremely minute electrical signals less than one millionth as strong as voltage for lighting a small flashlight—opened the way for another medical recording device, a reliable oxyhemograph.

This device is used to measure oxygen content of blood, extremely important to a patient under anesthetic during surgery.

Any sharp decline in the blood's oxygen content actually endangers a patient's life, and an anesthetist must always be ready during surgery to administer oxygen.

Ordinarily, an anesthetist depends on a patent's pulse, respiration or blod pressude to gauge whether oxygen is insufficient, but such indications usually are hampered by a time lag.

About 10 years ago GM Research Staff men developed a so-called contact-modulated amplifier. It strengthened weak electrical signals more than a million times.

It not only helped research engineers in their own studies, but also offered new possibilities when applied to an oxyhemograph.

In cooperation with medical researchers at Henry Ford hospital, GM engineers applied their signal amplifier in such a way that a pen-and-ink recorder draws a continuous chart of a surgery patient's oxygenation.

A mere glance at the chart gave the anesthetist information he needed to determine a patient's immediate condition under anesthetic.

Potter Asks Setup of State Radar Sites

GRAND RAPIDS (AP) — Sen. Charles E. Potter (R-Mich) says that he has urged the United States Weather Bureau to step up installation of Michigan radar storm detector stations.

* * *

He said he especially emphasized radar equipment planned for the Muskegon weather station.

The Muskegon project, estimated at $10,000, is to be developed from surplus Navy equipment and expected to be operative by May, 1957. It is planned to cover a section along Lake Michigan's shoreline which cannot be scanned by the Air Force radar stations operating in Leelanau County and at Battle Creek.

* * *

Sen. Potter revealed storm detection radar is being considered for the Bay City-Midland area and a powerful, $100,000 detector is planned for the Detroit area.

Biggest Boon Since Soap Appeared

Cleaning With Sound Waves New Trick

Cleaning with sound waves you can't hear gives promise of being the biggest step forward in cleaning methods since the invention of soap.

Engineers at General Motors' Technical Center, where extensive studies of ultrasonic cleaning are being conducted, predict a rapid increase in this type cleaning, both in the home and in industry.

Ultrasonic cleaning has found its widest application so far in industrial cleaning but GM has an experimental "sound" dishwasher that cleans dried egg off plates in 20 seconds.

• • •

How do sound waves do it? In the first place, they do not replace the soap or cleaning agents. They merely make the cleaning agents more efficient, just as the paddle in a washing machine makes the soap more efficient.

The sound waves cause "cavitation" or "cold boiling" in the cleaning liquid. An infinite number of tiny bubbles, invisible to the human eye, form and collapse against the article being cleaned. This "bubble bursting" is believed to provide the main scrubbing action that ultrasonic cavitation produces.

NO MOVING PARTS

The sound waves are transmitted in the liquid by a transducer. The latter is a device which transforms electrical energy into sound waves. It has no moving parts. When subjected to an electrical charge it begins to vibrate at a high frequency, transmitting sound waves.

The vibrations of the transducer are so minute, however, there is no sensation of motion to the touch, only a vague "oily" feeling. When placed in a cleaning vat, it causes a boiling action although the liquid may be cold or below its boiling point. To the eye the liquid appears to be simmering.

Ultrasonic cleaning has many advantages in industrial cleaning. It is faster, usually more efficient, more economical, and it can clean the insides of things that can't be reached handily by brush scrubbin.

• • •

The Saginaw Steering Gear Division of GM makes extensive use of ultrasonic cleaning. Their hydraulic power steering units require maximum cleanliness. Conventional "dip washing" was slow and inefficient. Now automatic ultrasonic cleaners cleanse the units and experience in the field shows unit failure reduced to a minimum.

Ultrasonic cleaning is flexible. Engineers at the Technical Center have cleaned everything from a huge Diesel engine block to the tiny apertures in a Hydra-Matic transmission casting.

Cleaning requires only a matter of seconds as against the tedious, time-consuming "dip and rinse" method.

An almost unlimited field for ultrasonic cleaning was opened up when transducers (the sound wave maker) were developed, which could operate in liquids which conduct electricity—water, for example. Heretofore their use was limited to non-conductive liquids.

Their use in water made possible the development by Process Development Section of the household dishwasher displayed in the current GM Motorama.

AIA Picks Designers

On two occasions the American Institute of Architects has awarded its top prize to Eero Saarinen & Associates, designers of General Motors Technical Center. The awards were made for the three-building GM Engineering Staff group and the Technical Center Central Restaurant building.

Self-Washing Floods, Dustless Homes Goals for the Future

Is a housewife dreaming when she fancies a floor that washes itself or a home that no dust or germs can invade?

Perhaps not. At least questions such as these are being considered by research teams at General Motors Technical Center.

Working closely with Frigidaire and other divisions of GM, the Household Central Engineering Staff is busy looking for new products for the home that will do old jobs easier and better.

Roger M. Kyes, vice president in charge of GM's Dayton, Household Appliance and GMC Truck Group, sees an unlimited future in household research.

"It is my opinion," he said, "that we have hardly begun to explore the possibilities for making the American home truly a good place to live in, and a good place for our housewives to manage."

"I am certain that a generation hence people will no more understand how the housewife today got along with all the drudgery she had to endure, than we today understand how our grandmothers managed with a woodburning stove and a washboard."

"Why not," asked Mr. Kyes, "a house that is 100 per cent climate controlled, providing a home environment of always agreeable temperature and moisture content, with dust, dirt, undesirable odors and even germs entirely banished?"

"Why not central refrigeration, including a fur storage closet, a refrigerated cabinet for cosmetics and perishable medicines?"

"Why not laundry equipment that will convey, sort, clean, iron and fold the laundry?"

"What do you suppose our housewives would give for a system that would wash the kitchen floor, rinse and dry it, all automatically, in minutes?"

Mr. Kyes said the day would come when dialing your home telephone will close the windows when a shower threatens. Or sensitized closers will close them automatically with the first drop of rain.

Heavy Steps, Indeed

Each step in the "floating" spiral staircase in the lobby of the Research Staff administration building at General Motors Technical Center weighs 1,500 pounds. The entire structure with 23 steps and a large stone top landing weighs more than 20 tons.

250,000 Gallons in Tower

The stainless steel clad water tower at the northeast end of the artificial lake at the General Motors Technical Center is 132 feet high or approximately the height of a 12-story building. It holds 250,000 gallons of water.

RETAIL MERCHANTS DIVISION

Group Develops Special Engines

Long-Range Projects Add Basic Data for Power Plants

As its name implies, the power development group of Engineering Staff at General Motors Technical Center is involved primarily in long-range development of basic engines, controls and accessories for commercial and military use.

First assignment of this group in 1940 was to study and obtain basic information for high compression gasoline engines. But six months later the group was shifted to Allison Division to cooperate in development of the theory and system for aircraft high altitude lubrication and cooling.

Both theory and system are universally used today.

During World War II power development group designed and developed all types of reciprocating and jet engine controls used by Allison Division.

Another major contribution of the group was development of controls for a proposed Navy turbo-prop engine, now a major Allison development for military and civilian aircraft. The project included basic calculation and design of a test compressor, turbine, burner and automatic controls.

By the end of the war power development group was reestablished on earth, so to speak, to redirect its activities toward automotive work. It has built experimental V-8 and V-6 engines and air-cooled multi-cylinder and single-cylinder engines for the Army.

Coincident with its experimental engine assignments, power development group has devised new techniques in the casting of engine blocks, which two General Motors divisions have assimilated in their engine production.

For automotive air conditioning, power development group has contributed a new type of axial compressor, a compact, efficient, lightweight unit specially designed for automotive use.

The strong, stiff bristles of the wild boar are used to make paint brushes.

DISPLAY ROOM — Beneath the aluminum sheathed dome of General Motors Styling Auditorium at the GM Technical Center is this inner, indirectly lighted sky dome. Lighting can be raised from darkness to 140 foot candles over the entire floor level. Near the dome's center are four openings for "cannon spots" of 3,000 watts each which diplicate sunlight. To rear is a stage that opens into an outdoor display area.

TECHNICAL LIBRARY — A 24,000 volume technical library, 130 by 60 feet, is on the third floor west end of General Motors Research Staff administration building with a serene color scheme of various shades of gray. On the right are rows of open stacks. Reading tables are lined up beyond the central lounging area in the foreground.

Effects 'True Color'

Special lights in the Styling building of General Motors Technical Center are used in the Interior and Color Studio to give stylists absolutely true color, an important factor in matching and selecting color combinations for both interior trim and exterior finish of General Motors automobiles.

Balancing Act Is Special Job

Machines Handle Small Gears Up to Six-Ton Locomotives

Specially built machines that balance everything from automotive timing gears to 6-ton locomotive armatures are manufactured at Technical Center by General Motors Research Staff's special problems department.

For the most part this is a unique business, conducted without public advertising or sales staff. About 40 per cent of the department's production is for companies outside GM, principally aircraft but also for GM's automotive competitors.

These balancers not only measure amount of unbalance in rotating parts but also locate it with automatic sensing devices. And usually they are equipped to remove unbalanced forced automatically.

The faster a gear, propeller shaft, crankshaft, tire and wheel assembly or transmission fluid coupling rotates, the more "unbalanced" it becomes because of centrifugal force, if it is imperfectly balanced.

For example, an unbalanced auto wheel and tire assembly is not noticed at slow speeds but when it rolls along at higher speeds it begins to "thump" and shake the car's steering mechanism. Similarly, an unbalanced engine has a tendency to roar or vibrate at certain speeds.

Since 1925 GM Research Staff's special problems department has concentrated a group of engineers exclusively on balance problems. In the early days they were concerned primarily with crankshaft and flywheel balancing so GM engines would operate smoothly.

Nowadays more than 70 automotive rotating parts are so close to perfect balance as it is possible for highly sensitive automatic machines to make them.

In no small measure this accounts for the smooth, vibrationless operation of the modern motorcar, the complete absence of "power roar."

G. M. TECHNICAL CENTER

DEDICATION OF THE NEW G-M TECHNICAL CENTER PROMISES NEW AND BETTER PRODUCTS AND METHODS

The new Technical Center dramatically demonstrates GM's policy of continuing search for new ideas, better products and improved methods of manufacture. Here the best available facilities will aid GM scientists, engineers, designers and technicians in developing more and better products for more people. Occupying a 330-acre site south of Pontiac, the Technical Center will attract international attention as the world's largest institution devoted to progress in industry, arts and science.

Attend the GM OPEN HOUSE in your area May 16

As a special salute to the new Technical Center, all General Motors Plants throughout the country will hold open-house on May 16. These open-house programs will coincide with the official dedication ceremony and open-house of the Technical Center. Here is an opportunity to see how GM facilities contribute to industrial progress and prosperity in your area.

CONSUMERS JOINS THE PEOPLE OF MICHIGAN IN CONGRATULATING GENERAL MOTORS ON THEIR NEW TECHNICAL CENTER

CONSUMERS POWER COMPANY

Maintenance Force of 600 Keep Technical Center Running Smoothly

General Motors Technical Center is as self-sufficient as a small city, and a staff of more than 600 men and women maintain it.

There are fire and plant protection departments. A medical center is equipped like a miniature hospital. A pumping station assures adequate water and a sewage disposal plant disposes of wastes.

There are restaurants and libraries, street cleaning crews and gardeners, pipefitters and steam engineers, janitors and sign painters—all busy keeping 25 buildings and the grounds shipshape.

A power plant generates 320,000 pounds of steam an hour, enough to heat a city of 15,000.

One million gallons of fuel oil are consumed a month by five furnaces during peak cold periods.

During summer most buildings are air conditioned. Each group of buildings has its own high velocity system. The air is changed six to 15 times an hour in the various buildings.

Both in summer and winter, the heating and air conditioning systems create a slightly higher air pressure inside the buildings to provide a natural flow of air and keep out dirt and dust.

In addition to the two elevated water storage tanks, there is a 1,500,000 gallon underground storage area.

* * *

Two sewage treatment plants are capable of treating 2,000,000 gallons of waste in a 10-hour day. The effluent water goes into open drains on which daily laboratory checks are made to certify its purification.

There is a fire department, complete with fire marshal, two trucks and "fire brigade" organized from maintenance employes. It responds like a village volunteer fire department.

Hauling refuse from the huge site keeps 34 men busy. They dispose of 120,000 pounds of refuse a day, excluding salvageable metal scrap.

* * *

Electricians in each group of buildings care for more than 56 miles of fluorescent tubing. There are more than 387 miles of wiring in the whole project and more than 12 miles of underfloor ducts.

With 5½ acres of glass to be washed, ten men are busy winter and summer at Technical Center. They complete their circuit at least three times a year.

Groundskeeping is a tremendous job with 155 acres of lawn, 50,000 bushes and shrubs, 11 miles of paved streets and 32 acres of artificial lake and reflecting pool water.

Thirty-six men do the hand mowing, watering, fertilizing and minor repair work. In addition, 19 equipment operators handle the gang mowers, lawn airtiers, snow plows, street sweepers, etc.

* * *

For security reasons, each building group handles its own interior janitor work. Janitors have more than 2,000,000 square feet of floor space to clean and wax or carpet sweep. In addition, Technical Center has more than a mile of connecting underground tunnels to maintain.

This overall task is handled by Technical Center Service Section, directed by Elmer Bailey.

The immediate housekeeping job, excluding interiors other than service buildings, is managed by Plant Engineer Fred H. Couts, who commutes from Bay City, Michigan.

He lives in an apartment, he says, "for obvious reasons."

Research Key to Better Cars

Chevrolet Groups Many Engineering Units at Technical Center

A "golden decade" of automotive engineering achievement is represented in the 10-year period since the introduction of postwar Chevrolet car and truck models.

Today's passenger and commercial vehicles bear testimony to technological advances which, though great, may even be surpassed in the next decade through the availability of Chevrolet's expanded experimental facilities at the General Motors Tech Center.

* * *

In the last 10 years research and development have added to the company's products such notable features as the steel body station wagon, foam rubber upholstery, automatic transmission, hardtop body styling, improved automatic choke, power steering, power brakes, new V8 engine, sweepsight windshield, tubeless tires, and numerous engine, chassis and frame refinements.

This modern trend began in 1946 as engineering and productive energies—dedicated for five years to winning World War II—were rechanneled to the civilian field.

* * *

As cars and trucks become more comfortable, more efficient and easier to drive, the job of automotive engineering becomes more complex.

For Chevrolet, these complexities have been lessened to some degree with the concentration of the various engineering branches under one roof in the new Engineering Building at the Technical Center.

The need continues for an increasingly larger force of trained engineers and shop craftsmen and a greater degree of specialization because, in today's highly competitive market, changes in car models from year to year are more intricate and are made many times faster than heretofore.

* * *

An example of this trend is the automatic transmission, one of the outstanding modern developments in the automobile. At Chevrolet today, there are more engineers at work designing, developing and testing automatic transmissions than were at work on the entire car just a few years ago.

In the pre-war era extensive model changes were made less frequently and fewer new features were offered in cars from year to year.

Today, significant advances are made almost annually.

Further demands are brought on by greater numbers of paint options, interiors, power assists, engine options and other so-called extras.

Machine Shop Shines With Precision Tools

The Process Development Section's tool room and machine shop are outfitted with the latest precision jig borers, jig grinders and machine tools of all kinds.

* * *

Shops and working space are arranged so that special projects may be set up as complete pilot production lines.

Thus, all details of a newly developed process or manufacturing technique can be evaluated conclusively before it ever moves from Technical Center to final installation in a General Motors production plant.

Many of these projects begin as simple "breadboard" ideas, just as they do in most research laboratories. At this stage a principle or technique is proved. Then the problem is to apply it directly to GM operations.

"In our work," says Mr. Cronin, "we assure our divisions that we will be competitive with any similar service that they can find on the outside.

"For example, if after consultation with the divisions in the solution of a problem it is decided that they want us to design a special machine, we will design the machinery, write the specifications and quote a cost to the divisions.

* * *

"They are free to take those specifications out into the field and ask for bids against the price we quote them. They are free to use our services or not to use them."

In 1850 U.S. farms produced one-third of the gross national product compared with one-seventeenth today.

Seen only on higher priced cars *and Chevrolet*

BODY BY FISHER

The meaningful emblem of Body by Fisher

When you see "sterling" on silver you know what it means—solid silver, all the way through.

And when you see the medallion "Body by Fisher" on an automobile it means much the same thing—quality all the way through, in things *unseen* as well as on the visible, gleaming surface.

The significance of this emblem cannot be tested on the showroom floor. Its meaning was not built up in a day but only after long years in which buyers learned that "Body by Fisher" was a veritable symbol of solid, enduring satisfaction in automobile ownership.

Only one who has owned a Chevrolet for several years can fully know the deep sense of satisfaction this emblem pledges. It is the maker's warranty of an inner soundness that your eye or your touch cannot test. And only Chevrolet in the low-price field is entitled to wear the small, proud plaque that proclaims "Body by Fisher."

AIR CONDITIONING—TEMPERATURES MADE TO ORDER—AT NEW LOW COST. LET US DEMONSTRATE.

Drive with care : : . EVERYWHERE!

TESTING TURBINE BLADES — One thousand gallons of water a minute swirls over this large flow table in General Motors Engineering Staff's hydraulics laboratory at GM Technical Center. It courses through "straightening vanes," which can be seen in the foreground, and flows around oversize wooden turbine blades. From studies of flow patterns on this testing device, engineers of Engineering Staff's Transmission Development group can determine the best shapes for turbine blade designs in automatic transmissions and torque converters for automobiles, trucks and buses.

Four GM Vice Presidents Staff Heads at New Center

The four vice presidents heading staffs at the Technical Center have a total General Motors service record of approximately 95 years.

Only one, John J. Cronin, vice president in charge of Manufacturing Staff—is a native Detroiter. He has been a GM employe 38 years.

Harley J. Earl, vice president in charge of Styling, is a native of Los Angeles, Calif., and has been with GM 29 years.

Charles A. Chayne, who was born at Harrisburg, Pa., joined GM more than 26 years ago. He is vice president in charge of Engineering Staff.

The vice president in charge of Research Staff, Dr. Lawrence R. Hafstad, became a member of GM's top management about nine months ago. He is a Minnesotan, born at Minneapolis.

In a sense, Cronin is both landlord and tenant at the Technical Center. His staff includes Technical Center Service Section which operates and maintains utility systems, communications, medical facilities, restaurants, plant protection, roads and landscaping of the center as a whole—the landlord's job.

Other Manufacturing Staff functions include: Facilities and Processes, Process Development Section, Production Engineering, Power Section and Works Standards and Methods Engineering Section. All of these are housed in the Process Development Section building group at the Center.

Cronin joined GM's Fisher Body Division on June 1, 1918, upon completing his World War I Army enlistment. His first job with Fisher Body was in the material department. He advanced to the cost department as a cost clerk and to the engineering department as a production engineer. Later he became supervisor of production standards.

JOHN J. CRONIN

On June 15, 1934 he was appointed assistant general factory manager in charge of assembly plants, and in March 1941 he was named general factory manager.

Cronin became director of industrial relations in April 1941 and advanced to general industrial relations director in September 1944. In December 1945 he was named general manufacturing manager.

He was appointed vice president of General Motors and general manager of Fisher Body Division on September 14, 1948, and on May 1, 1952, he moved to GM Central Office as vice president in charge of Manufacturing Staff.

73 Drown in Java Sea

JAKARTA, Indonesia (AP) — Police today announced an overloaded motor launch had capsized in the Java Sea and 73 persons, including many women and children, were drowned. It occurred last weekend off Tegal. The boat was carrying 91 persons on a holiday excursion. Police said they were holding the skipper of the launch and two crewmen for questioning.

Because of their poorly-developed voices, giraffes communicate with each other mainly by switching their tails.

Harriman Joins Ike Detractors

Inactive Dem Candidate Tells Montana He Will Be Placed on Ballot

BUTTE, Mont. (AP)—New York Gov. Averell Harriman, spraying a steady stream of criticism at President Eisenhower, urged Montana Democrats today to "go forward" in the tradition of Franklin Roosevelt and Harry Truman.

A self-described "inactive" candidate for the 1956 Democratic presidential nomination, Harriman said in a speech prepared for a Butte luncheon:

"The middle of the road is Eisenhower's trademark. Let him keep it. It's a front for inaction."

In earlier speeches in Montana and Wyoming, Harriman invited support of delegates from both states at the Democratic National Convention. And at Cody, Wyo., he said the New York delegation will place his name in nomination —and not as a favorite son.

He said President Eisenhower has shown "lack of vision in building a better life for the families of America. . . . He has given us small objectives where we need great objectives."

The Butte appearance was Harriman's last stop in Montana before flying to Spokane and Pullman, Wash.; Idaho Falls, Idaho; Reno, Nev.; and Salt Lake City.

Little Niagara Falls Aids in Testing Turbine Blades

A "little Niagara Falls" is part of Engineering Staff's new hydraulics laboratory at General Motors Technical Center.

The flow rate is as high as 2,500 gallons a minute, enough to fill 50 oil drums every 60 seconds.

Unique in the automotive industry, this carefully controlled miniature Niagara gives engineers valuable research data on how to design better automatic transmissions and torque converters for automobiles, trucks and buses.

The 40-foot high structure in the east end of Engineering Staff's Dynamometer Building is operated by Transmission Development group and devoted to hydraulics — the study of forces exerted by moving water.

Importance of water's behavior at flow rates of more than 2,000 gallons a minute is indicated by the fact that transmission fluid in an automobile's torque converter flows at rates as high as 3,700 gallons per minute.

The new laboratory has four working levels. In the sub-basement is a supply reservoir 6 feet deep, 30 feet long and 10 feet wide with 7,500 gallon capacity.

On the second floor is a supply tank 6 feet high and 14 feet in diameter. When filled to its 3700-gallon brim it weighs 35,000 pounds. When a test is under way, water from this tank falls straight downward 25 feet into the main test area.

In the main test area engineers can measure this tremendous downrush through a nozzle outfitted with various shaped blades.

As water flows over the blades, they can determine turbulence, eddies and other flow characteristics, indicating whether the blades are designed for top efficiency in an automotive torque converter.

Another interesting test device is a large flow table, a shallow rectangular tank 8 feet wide, 8 feet long and 4 feet high.

Engineers standing around it can watch water flowing from one side to the other at a rate of 1000 gallons a minute.

As it flows like a miniature river at a depth of from 6 to 12 inches, it courses through a series of "straightening blades" and swirls around oversize wooden turbine blades.

These are 10 times the size of blades actually used in a standard automobile torque converter. Dye is injected into the water so that the flow pattern can be seen in color.

By shifting the angle of the oversize wooden blades, engineers can determine the efficiency of various blade shapes — something they need to know in designing automatic transmissions and torque converters.

Explorer Scouts Give Assistance During Campout

Tornadoes Saturday night turned a routine outing by explorer scouts of the Clinton Valley Council into a mission which tested their motto "Be Prepared".

Post 46 of Waterford and Troop 137 of Lake Orion at Selfridge Air Force Base were aroused at 2 a.m. to help load trucks with emergency supplies for victims in the Flint disaster.

They had been waiting the night out in shelters because of the tornado alert, following a day-long tour of the base.

Pontiac Post 64 and explorers of troops 4 and 8 missed out on the excitement. They had elected to go home following supper.

The explorers' visit began at 8 a.m., and included tours of the flight line, fire station, operations office and weather station.

A one-hour orientation flight was followed by visits to the radar approach control station, base shops, link trainer and crash boats.

Leaders in charge were Kenneth Jones, Frank Vargo and Kenneth Valzy, all of Waterford; Stuart Williams, Lake Orion; and Norton Graham, Lester Axford and John Walsh, all of Pontiac.

Electric Starter Boon to Women

Introduction in 1912 Made Cars Available to Both Sexes

Woman's suffrage—the right to vote — did not come to the polls until 1920, some eight years after the automobile was available to female use.

This automotive liberation was geared to the installation of the first electric self-starter in an automobile by the Cadillac Motor Car Division in 1912.

The new device was developed in 1911 by Charles F. Kettering, a young Dayton inventor destined to guide General Motors to many more engineering firsts.

Prior to this time the lack of a self-starting system had practically excluded women from the automobile world. The unwielding crank or whirling iron, as it was sometimes called, did not lend itself to femininity.

The new electric starting system described by Cadillac as being "Ideal for Milady in her social and shopping excursions about town," removed the last remaining barrier from what had been a man's world, and opened the way for the more than 20 million women drivers now in the United States.

The introduction of the electric self-starter, electric lighting and ignition, in 1912 won Cadillac the coveted Dewar Trophy for the second time, an event never before or since duplicated.

Cadillac First to Introduce V-8 Power Plant

The first production V-type 8 cylinder engine was developed by Cadillac Motor Car Division engineers and incorporated in their 1914 automobile.

The industry-wide acceptance of this type of power plant is an indication that the Cadillac engineers of that early date had hit upon something of lasting value. It was the first major move in the development of today's high speed, high compression engines.

It was a natural step for Cadillac engineer to come forth with the first V-8 because just nine years prior, 1905, they developed and introduced the first four cylinder engine.

By 1914, consumer acceptance of the 4-cylinder Cadillac had grown so that car production was seven times greater than in 1908.

Cadillac engineers were bent on creating the finest, most advanced engine possible. The immediate and lasting success of the V-8 proved them right and the engine has remained Cadillac's basic power plant to this day.

Largest Design Center

General Motors Styling, occupying three major buildings at the south end of the GM Technical Center, employs more than 1,000 people and is considered the largest design center in the world.

Approximately 1,500,000 fur seals jam the lonely dots of land in the Pribilofs during their breeding season.

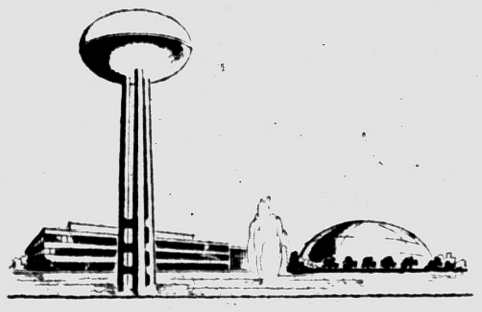

Your Cadillac Dealer

Proudly Joins in Celebrating the Dedication of the

GENERAL MOTORS TECHNICAL CENTER

The 1956 Cadillac Coupe de Ville in the dramatically beautiful lobby of the new Styling Section at the General Motors Technical Center

The opening of the fabulous new General Motors Technical Center in suburban Detroit heralds a new era of automotive advancement and development. No ordinary manufacturer's laboratory, the new Technical Center is the world's largest establishment devoted to research in the industrial arts and sciences. More than ten years in the building, it occupies over 330 acres and employs four thousand engineers, scientists, researchers and stylists.

We hope you will visit our showroom sometime this week to help us celebrate this historic opening . . . and to see, inspect and drive one of the most brilliant examples of General Motors progress in styling and engineering—the magnificent 1956 Cadillac.

In beauty . . . in luxury . . . in performance . . . in everything that makes a motor car a joy to own and to utilize . . . this latest Cadillac creation stands uniquely alone. It is unmistakably the "car of cars".

We will be happy to see you at any time—to give you the keys for a personal demonstration drive—and to acquaint you with some news about cost and delivery that we think you will find difficult to resist.

We'll be looking forward to seeing you!

We cordially invite you to visit our showroom this week to celebrate the formal opening of this great institution—and to see and drive the magnificent 1956 Cadillac.

JEROME MOTOR SALES CO.

280 S. Saginaw St., Pontiac, Michigan Phone FE 4-3566

CHECK YOUR CAR—CHECK ACCIDENTS

ZEBRA STRIPES — Zebra-like stripes help inspectors spot metal flaws on finished automobiles as they move along final lines of General Motors Buick-Oldsmobile-Pontiac Assembly Division plants. Light and shadow patterns are interrupted by surface flaws which can't be seen easily with overall shadowless lighting. Process Development Section engineers at GM Technical Center worked out the technique in cooperation with BOP engineers.

Cyprus Powder Keg Can Cast Spark Into Boiling Middle East Controversy

By WILLIAM L. RYAN
AP Foreign News Analyst

Events in Cyprus can lead to more trouble in the Arab world, more ferment around the Baghdad Pact and a general weakening of the British and the Western position in the Middle East.

One slogan dominates Cyprus today: "Enosis and only Enosis." Enosis is a Greek word signifying a desire for union with Greece. The claim is based on racial ties and emotion fanned by the Cypriot branch of the Greek Orthodox Church.

* * *

Cyprus, a crossroads of ancient civilization, has not been in Greek hands since long before the beginning of the Christian era. Not long ago the Greek government itself looked coolly on the idea of annexing Cyprus. Now it would be political suicide for any Greek politician to oppose it.

The strong Cypriot Communist party has adopted Enosis as its own objective. This is a matter of strategy. The Communists admit they hate the Greek government.

The Cypriot Greeks stand to lose eventually by Enosis, but no Cypriot of Greek extraction could speak against it without being labeled a traitor.

* * *

Britain has been spending at the rate of two to four million pounds ($5,600,000 to $11,200,000) a year on construction work in Cyprus, excluding pay for soldiers and their dependents whose money also has poured into the Cyprus economy. Many a Cypriot depends on the British for his job and his livelihood. They know Greece could hardly support them in the manner to which they have become accustomed. They probably would regret the loss, but they still cry for Enosis.

Cyprus is not a British base, but is operational headquarters for the entire Middle East. If the British were driven out, their prestige would plummet even more in the Middle East, and the effect on Turkey, eastern link of NATO and keystone of the Baghda d Pact, would be profound.

The British would consider loss of Cyprus a catastrophe. It is the key to their whole Middle East position and their network of alliances with Iraq, Jordan, Turkey and NATO. They consider it vital to the protection of their oil interests in the Persian Gulf area as well. With the loss of the Suez Canal zone base in Egypt, Cyprus became the center for administrative and operational control for an area extending from the Mediterranean to East Africa. With its big airdromes existing and under construction, Cyprus is considered important to Western defenses in the Mediterranean.

Children's Fund $300 Better Off, Chairman Says

Mrs. Robert F. Kohr of Birmingham, chairman of Junior Red Cross for Oakland County Chapter, American Red Cross, announces that $300 has been contributed by the Oakland County junior members to the American Red Cross Children's Fund.

* * *

The purpose of the fund is to provide libraries for rural schools, and craft and play materials for hospitalized and home-bound children in this county.

At the present time, three new projects are being started in Korea, Africa and Germany for the overseas program.

Zebra Stripes Spotting Flaws

Bands of Light, Dark Show Up Metal Marks in Quick Order

Zebra-like stripes of light are helping inspectors spot hard-to-find metal flaws on car bodies as a result of engineering research at General Motors' Technical Center.

These batteries of light "detectives" accentuate file and grinder marks and other surface flaws so they can be remedied before the body reaches final assembly. With fewer defects being missed, considerable time and rework costs are eliminated.

The new inspection lights were engineered by process development section for BOP plants which assemble Buick, Oldsmobile and Pontiac automobiles. Car bodies pass through a "tunnel" of evenly spaced light bands which almost circle the conveyor line.

These alternating light and dark bands literally "comb" bodies for faults as they move down the line. Inspectors see the faults more readily because the flaws alter or interrupt the uniform light and shadow patterns reflected on the metal.

Under the conventional system, bodies were bathed in almost uniform light. But after exhaustive tests, it was proven the light bands not only reduced the number of unnoticed flaws but also improved inspectors' efficiency by reducing glare and consequent tiring of the eyes.

To conduct their tests, Process Development engineers put a body with known defects in a room with no "outside" or extraneous lighting.

Then began months of trial and error testing to determine which type, color and intensity of light together with angle of reflection did the best job of highlighting flaws.

The engineers found that too much light actually tended to "hide" flaws and resulted in eye fatigue. Also, the greater the angle of reflection the more noticeable flaws become. They found, too, that defects could be seen best when the edge of a beam of light fell on them.

This latter discovery prompted the use of alternating light and dark bands of light. In effect, this provided a continuous group of "light edges" to comb bodies for faults.

Ask Slower Speeds on Lagoons of Cass

The Oakland County Sheriff's Department has issued a request to motor boat operators to take every precaution in traveling on Cass Lake due to high waters endangering camps along seven miles of lagoons.

Boats passing through at high rates of speed has caused water to overflow into the cottages on numerous occasions this season. There has been considerable minor damage in recent weeks.

Many observers consider the present water line the highest ever seen around the lake. It is said to be right to the camps in many sectors which results in the cottages being drenched by big swells caused by speeding boats or any other disturbances.

Electronic Computer Compresses Years Into Hours in Designing and Testing

An electronic computor at General Motors Technical Center "builds" a gas turbine engine in a matter of minutes.

The engine is mathematical and may never power an automobile, but engineers can determine how it would operate if actually fabricated of metal.

The computer, sometimes called a "brain," makes as many as 14,000 computations per second, saving untold years of pencil and paper or slide rule calculations. It is on full-time duty not only for Technical Center but also for any GM division that asks for its services.

It frees hundred of engineers from a necessary evil of research and engineering—infinite calculations and evaluations—and permits them to tackle problems no one would have dreamed of attempting a few years ago.

For instance, GM Research Staff mathematicians have estimated that nearly three years would be required to solve a certain problem by hand, using a desk calculator. The electronic computer would solve the same problem in two hours.

* * *

Applied to building a gas turbine engine, the computer helped this way:

In 1954 GM Research Staff's Gas Turbines Department produced two engines, the GT-300 for a transit bus and the GT-302 for Firebird I, first gas turbine automobile built and tested in the United States.

Approximately three years were spent in designing and building these prototypes. They were tested and endless data were collected and fed to the computer for evaluation. This covered a period of approximately nine months.

Next assignment of Gas Turbines Department was to build a third engine, GT-304, for Firebird II, another gas turbine automobile introduced at the 1956 Motorama.

* * *

Before specifications of this new engine ever reached the shop, more than 60 different engine designs were "built" mathematically on the computer. Although months of work went into preparation or programming the design problems, each problem was run off by the computer in a matter of minutes. From the results engineers could select the best design combinations for the Firebird II engine.

NO GUESS WORK

Months before this engine ever appeared "in the flesh," engineers knew how it would perform. Without the computer's help, they would have built several experimental engines, a major project in itself, and assigned fresh squads of engineers to countless weeks of dreary calculations.

The computer's quick acting "brain" saved infinite hours and dollars.

"Moreover," said a GM Research engineer, "we made many analyses we never would have attempted otherwise. We got a lot of useful information, not just interesting academic data."

Gas turbine problems are only a few of the hundreds that glide electronically through the computer's fabulous memory circuits which are contained in enough metal cabinets to fill a three-bedroom house.

In testing any engine, turbine, or piston, data accumulate. They must be plotted and analyzed, and this takes time. But nowadays they can quickly be punched out on cards, fed to the computer and be ready for evaluation in many hours less time than used to be required before full results were in.

Speeders Face Heavy Penalties

Michigan Begins All-Out Campaign to Rid Roads of Bad Motorists

LANSING (AP)—Michigan has begun an all-out campaign to rid bad drivers from its roads.

State Police, local police and sheriff's officers are citing speeders and reckless drivers for license re-examination, a step that in many cases will be followed by suspension or revocation of licenses.

The crackdown, ordered by the State Safety Commission, is aimed at halting the rise of traffic fatalities recorded during the first three months of the year.

Law officers were equipped with special forms on which they will cite speeders, reckless drivers and motorists whom they consider physically or mentally unable to drive.

The commission made use of the forms mandatory with State Police. Unable to order their use by local officers, it sent out telegrams urging cooperation of local authorities in the campaign.

* * *

The forms will be sent to the office of Secy. of State James M. Hare, where they will be reviewed. Hare said in most cases drivers will be called in for examinations by his office.

Many of the drivers, he said will lose their licenses for 30-day periods.

Hare said his office can examine a maximum of 37,000 drivers in one year, about 10 per cent of the registered drivers.

He plans to bolster his force of 21 driver examiners with employes working in other branches. If this proves inadequate, he said, he may ask Gov. Williams to seek emergency funds from the "Little Legislature" to hire more help.

* * *

The "Little Legislature" consists of the House Appropriations Committee and the Senate Finance Committee.

Hare said a similar program in connection had reduced traffic fatalities 11 per cent.

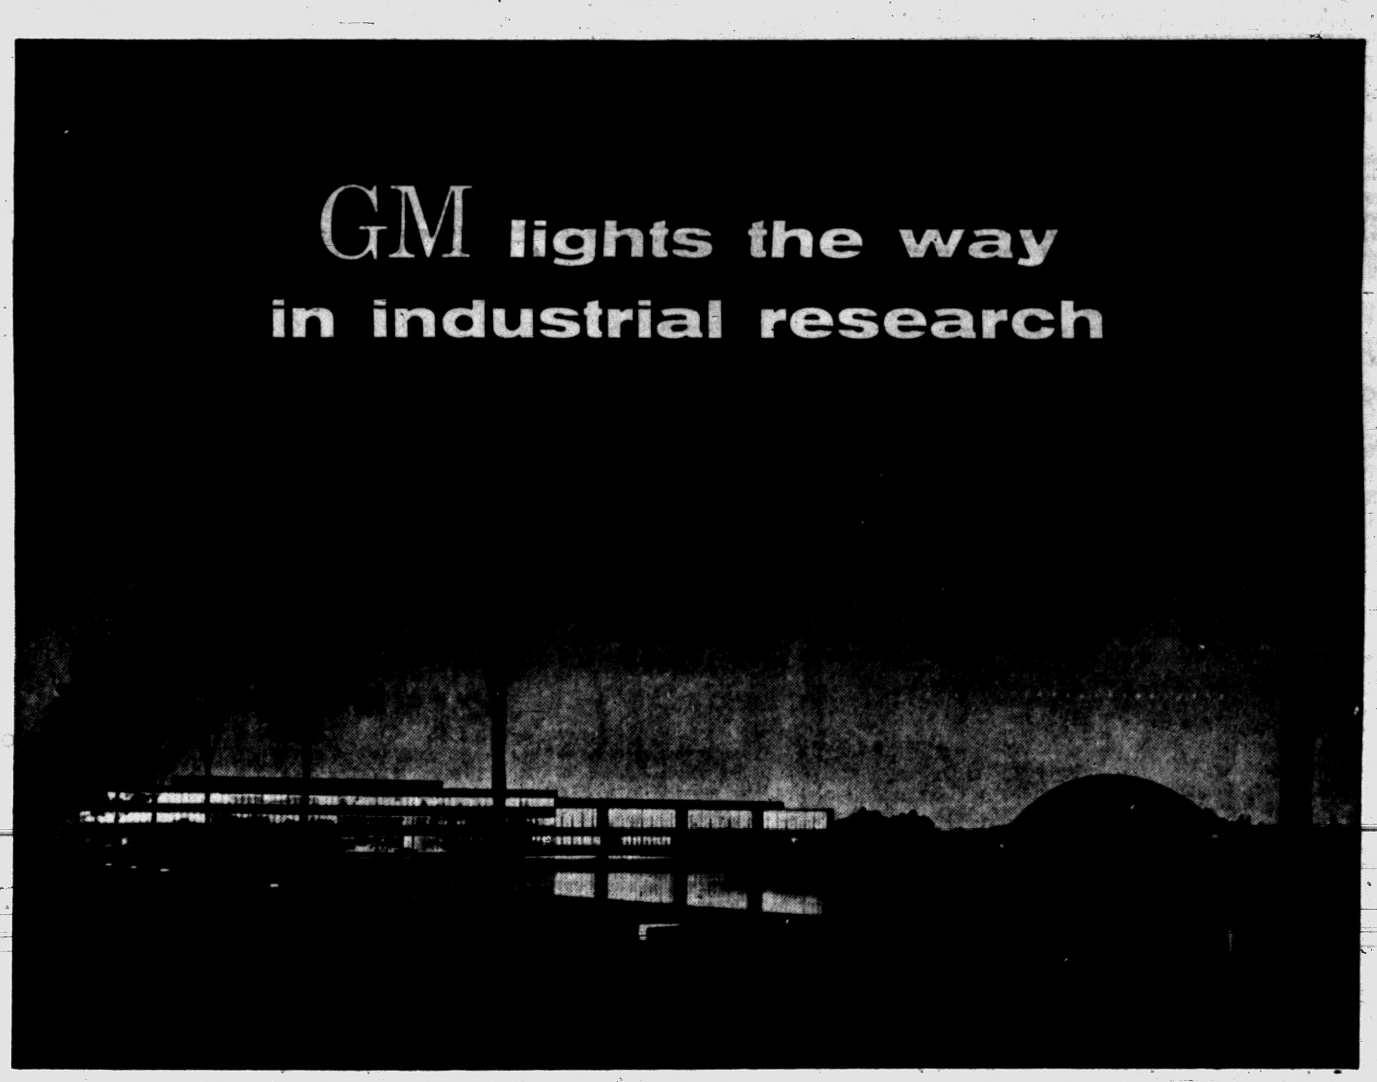

Communists Triple Propaganda Waves

WASHINGTON (INS) — The U.S. Information Agency discloses that the Communists have more than tripled their international propaganda broadcasts since 1948.

On the basis of a careful study, USIA said Radio Moscow and other Communist radio stations stepped up their international broadcasting to 1,673 hours a week in 1955. This compared with 1,522 hours in 1954 and only 528 hours in 1948.

The chief target has been Western Europe where 44 per cent of the Communist broadcast output was beamed.

Average normal mortality rate in the U.S. Army is 2.2 per thousand.

New General Motors Technical Center
—Officially Dedicated on May 16

"This is our investment in tomorrow," stated Harlow H. Curtice, president of General Motors, in describing the new GM engineering and research headquarters on the outskirts of Detroit.

And what an impressive investment in the future it is—320 beautifully landscaped acres—25 ultra modern laboratories, offices and shop buildings—each of them designed and constructed to keep General Motors in business for years and years to come.

Typical of this area's dramatic architectural features are the stainless steel-clad water tower and the domed aluminum-panelled Styling Auditorium.

The Technical Center as a whole is a workshop of more than 4,000 engineers, researchers, stylists, designers, mechanics, machinists and other automotive specialists. Their principal objective is to produce, through the use of science and technology, improved values for their customers.

We of the Detroit Edison Company wish to take this opportunity to congratulate the General Motors Corporation for their excellent display of confidence in the future—and for choosing Southeastern Michigan as the place in which to locate this gigantic technological enterprise.

The Detroit Edison Company

Troy Offers Aid in Flood Problem

THANKS A LOT! — The Village of Rochester was happy to receive a gift of 23 acres of land from the Higbie Manufacturing Co. yesterday. Above, left to right, Village Manager Robert A. Slone looks on as Carlton M. Higbie Jr., president of the firm, hands over a deed to the property to Village President Clarence M. Burr. At the far right, Roscoe Martin, village attorney, stands ready to help with legal details. The land, on South street in Avon Township next to the village's sewage disposal plant, may be used for a sanitary land fill if Avon Township permission can be procured.

Rochester Gets Gift of 23 Acres

Higbie Mfg. Company Donates Land Adjacent to Sewage Plant

ROCHESTER — The Village of Rochester has received a gift of 23 acres of land in Avon Township from the Higbie Manufacturing Co.

Deed to the property, located on South street adjacent to the present village sewage disposal plant, was presented yesterday by Carlton Hitbie Jr. on behalf of the firm.

Village President Clarence M. Burr accepted the deed on behalf of the village. Also present were Village Manager Robert A. Slone and Village Attorney Roscoe Martin.

In making the presentation, Higbie offered a letter from his firm which said:

"We, of the Higbie Manufacturing Co. feel honored to be a part of this fine growing community and hope this land gift may be of some aid to the future progress of Rochester—a good place to live and work."

Village officials said the land might be of "great value" in the event of future expansion of the present disposal plant. Meanwhile, at a council meeting last night, the village passed a resolution to ask Avon Township to permit use of the land for a sanitary land fill.

Walled Lake Ballot to Be Topic of Talk at Novi

NOVI—The Novi Civic Assn. will hold a general meeting at 8 p.m. Thursday, at the Novi Community Building.

The speaker for the evening is Mrs. Norma Popek the Twin Beach housewife, whose campaign against an increase of taxes in the Walled Lake School District has attracted the attention of many taxpayers in the area. Mrs. Popek has been active in PTA work and will discuss particularly the proposed tax question that is being placed on the June 11 ballot by the Walled Lake School Board.

All Novi residents of the Walled Lake School District, whether members of the association or not, are urged to attend.

A film on soil-cement roads and driveways will also be shown. Local officials may find the film interesting, and they will be invited.

Your PTA Is Planning:

'Song Fest,' Installation at Hudson Covert School

WATERFORD TOWNSHIP — Mrs. Lois Tiffany, supervisor of music for Waterford Township, will lead a "Song Fest" at 7:30 p.m. Thursday in the last meeting of the school year of the Hudson Covert PTA.

George Tramontin, the new Hudson Covert principal will be introduced, and a formal farewell will be given the present principal, Mrs. Frances Dawson, who will be at the new Leggett School next year.

The following officers will be installed: President, Mrs. Robert Sickles; vice president, Mrs. Ralph Irish; teacher vice president, Mrs. Eloise Schultz; father vice president, Merton Warner; secretary, Mrs. Paul Graves; treasurer, Clare Wilson and historian, Mrs. Arthur Zampol.

There will be refreshments. A nursery will be provided for children over three years of age.

Avondale

Eight Stiles PTA mothers signed up at a recent meeting as summer playground supervisors in a tiny tot program for the school.

The plan was carried out on the suggestion of Douglas Stringer of the Avon Youth Service and Recreation Assn.

Almont

In the last meeting of the school year here, new officers were installed by Mrs. Eva Paton.

They are Mrs. Melvin Fiebelkorn, president; George Juhl, father vice president; mother, Mrs. Viola Braidwood; teacher, Mrs. Olak Vicklund; secretary, Mrs. Currey Millikin, and treasurer, Mrs. Eugene Nikkari.

Elmwood to Enroll Kindergarten Tots

AVON TOWNSHIP — The Elmwood School Kindergarten Roundup will be held from 10 a.m. to 12 noon Wednesday.

All parents with children who will reach the age of 5 before Dec. 1 are asked to register them at the Wednesday session. Birth certificates are necessary. Refreshments will be served by the Elmwood School PTA, which is sponsoring the roundup.

The PTA will also take all Elmwood Safety Patrol children to the Detroit Tigers baseball game Friday. The youngsters will go by chartered bus.

The annual school picnic, also sponsored by the PTA, will be held June 6 at the school. School will dismiss for summer vacation on June 8.

Seymour Lake Church Rummage Sale Slated

SEYMOUR LAKE—The Belle Sherwood Circle will sponsor a rummage sale in the basement of the Seymour Lake Methodist Church, Friday and Saturday. On Friday the hours are from 9 a. m? to 9 p. m. and Saturday from 9 a. m. to 6 p. m. There will also be a bake sale.

LORETTA SCHEELE

Mr. and Mrs. Eugene Scheele of 2620 Culbertson St., Rochester, announce the engagement of their daughter, Loretta Jean, to Edward D. Arner, son of Mr. and Mrs. Edward Arner Sr. of Coaldale, Pa.

Mr. Arner is presently serving with the U. S. Coast Guard at Glouster, N. J. aboard the C. G. Cutter Lilac. He will complete his four year enlistment in November No date has been set for the wedding.

Attica Couple Wed in Rites at Imlay City

IMLAY CITY—Some 200 guests were present to see Rosemary Schlaud and Wayne Johnson, both of Attica, married in a recent morning ceremony at Sacred Heart Catholic Church here.

The bride, daughter of Mrs. Anthony Schlaud and the late Mr. Schlaud wore a floor-length gown of white nylon lace and net. Her fingertip veil was of nylon net.

She was attended by nieces Marilyn Schlaud of Grand Blanc, the maid of honor, and Rosemarie Eder of Flint and Angela Sweeney of Lapeer, bridesmaids.

The bridegroom, son of the late Mr. and Mrs. A. T. Johnson of Lapeer, had Kenneth Schlaud, brother of the bride, for his best man. Ushers were Arthur Spanke and Ernest Fansler of Lapeer.

A wedding breakfast followed the ceremony and a reception in the evening was held at Hunters Creek Hall.

Following a trip to Virginia, the couple will live on Lake Pleasant road, Attica.

8 Take School Census in Lake Orion Area

LAKE ORION—Names of those who started taking census for the Lake Orion Schools this week are Mrs. Harvey Campbell, Mrs. Odes Case, Mrs. Harold Gingell, Mrs. Franklin Hebner, Mrs. Sam Leach, Mrs. Ray Longpre, Mrs. Marvin Middleton and Mrs. Ellis Storey.

The census is to be completed by June 1.

County Births

Almont

Mr. and Mrs. John Howe of Almont are parents of a new daughter, Jacqueline.

Romeo

A daughter Theresa Jane has been born to Mr and Mrs. William Martin of Romeo.

Lapeer

Mr. and Mrs. Rollin Truax of Lapeer have announced the birth of a daughter, Janice Marie.

Imlay City

Parents of a newborn son, Danny, are Mr. and Mrs. Sylvester Costello of Imlay City.

Milford Council to Meet Weekly

Turns Thumbs Down on Commercial Zoning in 2 Residential Areas

MILFORD — This village has such major "growing pains" that Council members have voted to meet weekly instead of bi-monthly to settle problems.

At last night's meeting two proposals to rezone residential property to commercial were turned down by the Council. The group also voted against a proposed gravel pit operation by the Compass Real Estate development on the south side of Milford.

A representative of the Clarita Builders requested rezoning to commercial of a stretch of land 400 feet along Summit to Commerce road. The company is in the process of building 200 brick homes in the Bonnie Highland Subdivision adjoining the proposed commercially zoned property, and would like to develop a new shopping center there.

Councilman Ed Nealer read the names of of a petition signed by residents in the area for the rezoning of the land, but Council members voted against the proposal, 4-3.

• • •

Herbert Hoffman asked the Council to rezone from residential to commercial a stretch of land on Mt. Eagle and Garden Rds. running north to the Huron River. Council members voted against the proposal.

Vern Baur, representing the volunteer firemen, asked the Council for a sum of money to help pay for an additional piece of fire-fighting equipment, and received $300 toward its purchase.

Appeals Board Meets Tonight

Troy Group Studies Plans for Building Five Businesses

TROY — Plans for a small factory on Stevenson Highway, a dry cleaning plant, a used car lot, and a mushroom house will be studied tonight by the Troy oBard of Appeals.

The special cases all must win Appeals Board approval, rather than the routine Planning Commission approval.

Request of Chester F. Mally, of Ferndale, asks that the two-acre minimum site limitation for industrial zoning be reduced. His factory site is on Stevenson south of 15 Mile road.

Maney L. Elrod's request for zoning to allow a used car lot at Rochester and 19 Mile Roads will draw consideration of whether the special policing required by such a business will be possible.

Fire protection will gain attention when Walter W. Barel's plan for a dry cleaning plant is considered. He will buy a site if the board of appeals voted favorably.

The five acres, now a farm, on Daly, just east of Big Beaver, owned by William Baker, is to be the site of a mushroom house if Baker's request is granted tonight.

A three-play construciton using No. 3 grade of lumber will be considered by Appeals Board members tonight. The new method, using thec heaper, knotty lumber, is suggested by the John Barling Construction Company of Waterford. No specific location of future homes has been mentioned.

F. B. Visner is asking to straighten the front of his tool shop. Zoning does not allow increase in size in non-conforming buildings, btu he contends it will be only a small size increase. His shop is on Hartwick just off Rochester.

Slate Mrs. McCully to Talk at Metamora

METAMORA—Mrs. Marilou McCully, missionary, whose husband, Edward McCully, was slain by Anca Indians in Ecuador last Jan. 8, will be guest speaker in Metamora Sunday.

Mrs. McCully will speak at 8 p.m. Sunday in Pilgrim Congergational Church, at a combined service of the Pilgrim Church and Thornville Community Church. Along with the talk, she will show slides of missionary work in Ecuador.

The general public is invited to attend.

LOIS L. HOLLIDAY

Mr. and Mrs. David Holliday announce the engagement of their daughter, Lois Leola, to Gareld Bates, son of Mrs. Rhoda Blakslee of Bedford, Ind. Lois will be graduated from Hurley Hospital, Flint School of Nursihg May 25.

A September 1 wedding is being planned.

Women's Club to Make Gifts for Children

ROCHESTER — The Rochester Junior Woman's Club will meet at 12:30 p.m. Friday at the home of Mrs. David Herkless, 6156 Blue Beech Rd.

Members will work on scrapbooks for the mentally retarded children and children in hospital wards. They also are asked to bring used books and phonograph records for the Book Mart to be held by the club June 7, 8 and 9 at Oberg Appliances.

Mrs. George Goble, president announced that effective April 3, 1956, the club became affiliated with the Michigan State Federation of Women's Clubs and the Michigan State Federation of Junior Women's Clubs.

Oxford OES to Honor Past Matrons, Patrons

OXFORD — Past matrons and past patrons of Oxford Chapter 266, OES, will be honored at 8 p.m. Thursday at Oxford Masonic Temple.

A program and social evening is planned. All members of the chapter are invited.

First Pastor Came on Horse

Historic Dryden Church Marks 100 Year Service

By GLADYS HARRINGTON
Dryden Correspondent

DRYDEN — The Methodist Church here will celebrate its 100th year Sunday.

In honor of the occasion, the Rev. William Wager of Flint, a former pastor, will speak and the Methodist Youth Fellowship Choir will present musical numbers.

Following the morning service there will be a cooperative dinner in the social rooms, with a social hour before the afternoon service.

Bishop Michael B Reed of Detroit will bring the message during the afternoon service.

The First Methodist Episcopal Church of Dryden, a wooden structure, was built and painted white in 1856. First pastor was Abel Warren of Washington, who came on horseback to fulfil his pastoral duties. This church was moved to a lot near the Grand Trunk Railroad when the present church was built.

The old structure was used for a storage shed for years, and was torn down several years ago. The present church was built in 1891.

The brick veneer structure with main auditorium 36 by 52 feet, was designed by Joseph Darwood at a cost of $3,925. This included furnishings.

The auditorium is finished off with ornamental exposed rafters. The choir loft is lighted at the front by a half-circle of lights and a cross with nine lights.

In 1927 an addition was built on the rear of the church to provide for a large social room and kitchen.

In 1940 a rededication service was held, at which time all indebtedness was cleared and the mortgage burned. In 1954, new Sunday School rooms were provided by excavating beneath the kitchen and social rooms. This serves as the worship center for MYF and other classes.

The bell, which still calls the congregation to worship, was bought in 1885 for the old white church and then hung in the present building.

Hundreds have received comfort and inspiration within the walls of the church on the hill in the past 64 years.

• • •

During the past months, members and their pastor, the Rev. Stephen Chapko have been busy with paint and brushes, getting all in readiness for the big day—the day marking 100 years of service to Dryden and the surrounding community.

Troy Schoolchildren Slate Two Concerts

TROY—Concerts are slated tonight and tomorrow night at the Troy High School.

Tonight's performance will be by selected students from Troy No. 2 and Smith Schools.

Tomorrow night, close to the auditorium's capacity of 1,000 persons is expected for the high school band and chorus "spring festival."

Keego-Cass Women Install at Banquet

WEST BLOOMFIELD — The Keego Cass Women's Club installed officers in its annual President's Day Banquet held recently in Rotunda Inn.

Mrs. Jennie Leonard officiated and the following took office: Mrs. Harold Stickley, president; Mrs. Royal Pazik, vice president; Mrs. Wright Madill, recording secretary; Mrs. Randall Wilson, corresponding secretary; Mrs. Wallace Morgan, treasurer; Mrs. Julius Kindel, auditor, and Mrs. John Bechill, parliamentarian.

Three File for Posts on Romeo School Board

ROMEO — Nominating petitions for three area residents were filed by the deadline Saturday for the two positions open on the Romeo Community Schools Board of Education.

The three whose names will appear on the ballot in the June 11 election are Charles A. Myers, Orval Mellen and incumbent Allen Rush.

Plan Scavenger Hunt

FOUR TOWNS—The Cub Scout Pack 67 is meeting at the Four Towns Methodist Church Wednesday evening. From 6:30 to 7:30 p. m. there will be a scavenger hunt, followed by the regular business meeting. Awards will be presented.

Emergency Plan to Rush Drains

Will Install Storm Pipes if Residents Advance Money for Project

TROY — Drains to alleviate flooding of basements and ground-level floors may be installed now if residents are willing to advance the funds, Troy City Commissioners decided last night.

It would take several months to have the county create assessment districts for such drains, commissioners pointed out to the 70 residents, most of whom were objecting to bad drainage in their home areas.

The city will try to help those in older subdivisions, officials said, estimating that if the money is advanced, work can start at once.

In the new Wendover subdivision, where a few homes are already occupied, and the other new Thornwood Subdivision where all homes are being lived in, the contractor, Frank Glover, is being looked to for drainage arrangements.

Hopes that Glover can make the installations rather than wait for the county were aired at the commission meeting.

Most of the residents attending expressed dissatisfaction with the long delays in going through the "proper channels" in a county drain project. Many described flooded conditions in their homes over the recent storm period.

At the meeting, bids were received from contractors wishing to install taps on the city's water line for future homes here. The city engineer is studying bids before the commission votes acceptance.

Poppleton Unit to Meet

TROY—The Cancer Group of Poppleton Women's Club will meet at 7:30 p.m. tonight at the home of Mrs. David Robertson, 3411 Crooks Road. Refreshments will be served following sewing of cancer pads.

Luncheon at Leonard

LEONARD—Leonard Womans' Club will meet for a 1 p.m. luncheon Thursday at the home of Mrs. Hoard.

Waterford Student Orator Vieing for National Honors

WATERFORD TOWNSHIP — Sheldon Smith, the Waterford Township High School senior whose original speech on "John Adams" has won local, area, state and midwest titles in the Hearst Tournament of Orators, is now in Boston to compete for national honors.

The midwest contest was held last Friday in Chicago where Sheldon was placed first by four out of the five judges.

With his coach, Patty Looman, speech department director of WTHS, he received an all expense paid trip to Chicago plus a sight-seeing tour.

In Boston, where the 17-year old orator will compete with winners from the central, east and far west zones tomorrow, another sight-seeing tour is taking place.

• • •

Accompanied by Miss Looman and Harry Taylor, Hearst Publications representative, Sheldon will visit the home of John Adams and the statesman's birthplace in Quincy, Mass. Boston Commons is included in his itinerary as is the site of the historical Boston Tea Party.

The national oratorial contest takes place at 2:30 p.m. Wednes-

SHELDON SMITH

day in the Boston Latin School, founded in 1635 and the oldest public school in America. Sheldon's family, Mr. and Mrs. Rolfe Smith and brothe. Craig, of 6450 Maybee road, will be on hand to cheer him on.

Here's to the wide-open track, General Motors!

When the new Technical Center opens on May 16, General Motors for the first time centralizes its business of producing the future!

GM should be proud that the 4200 scientists and engineers and other experts at the new Center will pool their efforts for achievements far beyond the scope of the motor industry.

Already GM laboratories have given us the mechanical heart, the electrostethograph, diesel-electric locomotives and a revolutionary method of sterilizing Salk polio vaccine.

Thus you serve all of us—and we are proud to serve you!

Meet Dr. Tong of Nationalist China

By MICHAEL GAINES

TOKYO (INS) — Nationalist China's newly appointed ambassador to Washington, Dr. Hollington K. Tong, combines a nose for news with a flair for suave diplomacy.

* * *

For nearly twenty-five years, Tong was a reporter, editor and publisher in China. To intimates, he admits that he still prefers writing to any other work.

But the 69-year-old newspaperman turned diplomat has spent nearly as much of his working life in government service as in journalism and with equal success.

Tong has been ambassador to Japan for the last three and a half years. In Washington, he will succeed veteran diplomat Dr. Wellington Koo as Free China's top representative to the United States.

Like Koo, Ambassador Tong is no stranger to American life. He received his journalistic training at the University of Missouri and Columbia University.

INTO PAPER CAREER

Back in China, Tong immediately plunged into a newspaper career. His biggest break came when he stepped into the post of managing director and editor of the influential English daily, China Press, in Shanghai.

But when the Japanese struck in 1937, Generalissimo Chiang Kai-shek asked him to trade in his typewriter for a portfolio and go to work for the government. Tong has remained close to the Chinese leader who seeks his advice on many important policy matters.

Tong's first official post was director of the Shanghai office of the National Military Council. Two years alter, his journalistic background and international education led to his appointment as vice-minister of information in charge of international publicity.

SECOND CAREER

This was the beginning of a second career that was to take him through the war with Japan and later the struggle aginst Communism, as leader of Free China's information front.

Throughout his busy career as a newspaperman and government official, Tong has found time to turn out several books on Chinese affairs. As official biographer of Chiang Kai-shek, he wrote an authoritative and comprehensive volume on the life of the Chinese generalissimo.

It was not until 1952, that the energetic "Holly," as he was known to newspapermen, embarked on what now promises to be a third illustrious career—foreign diplomacy. In that year, he was approved China's first postwar ambassador to Japan.

Mrs. Tong is the envy of many women with husbands who travel extensively. She receives at least one letter a day from him during his absences from his family.

The Tongs have three daughters and three sons, all grown and married.

Dr. Tong's hobbies follow his newspaper background — clipping articles, reading and writing. He also enjoys hiking and mountain-climbing and often leaves younger companions panting behind.

The new ambassador to Washington doesn't drink and smokes very little. His hours are regular but long. Tong usually gets up at daybreak and often works until midnight.

U.S. Red Cross Executive to Address Oakland Unit

Pontiac Motor Division executive dining room will be the setting for the annual dinner meeting of Oakland County Chapter, American Red Cross at 6:30 p.m., May 23.

Fred M. Winfrey, special assistant to the president of the American National Red Cross will speak on "Seventy Years of Service... American National Red Cross celebrates its 75th birthday this year.

Mrs. Mildred E. Bennett, executive director of the chapter, says that any person who has contributed $1 to Red Cross is a member. All members and interested persons are urged to attend. Reservations will be taken at the chapter house, 118 Franklin Blvd., through Wednesday, May 16.

Election and installation of chapter officers and board members will be held. Leonard Lewis of Birmingham is general chairman assisted by Mrs. John Blanchard of Bloomfield Hills.

Speaker Winfrey began his career with Red Cross as a comptroller of the Red Cross Commission to Siberia from 1918 to 1920. From 1927 to 1942 he served as assistant manager and as manager of the Midwestern Area with headquarters in St. Louis, Mo.

He had a major role in relief operations during and after the nation's biggest disasters from 1927 to 1937. In 1934 he became vice president in charge of area officers and chapter services, later becoming senior vice president of the organization.

FRED M. WINFREY

Ford Man Takes Post

LANSING (AP)—Robert Ross, 52, Dearborn, employe services manager of the Ford Motor Co., has been appointed by Gov. Williams as a member of his Blue Cross Study Commission. Ross replaces Robert Conder, Chrysler Corp. vice president, who resigned because of ill health.

Amoy Shelled by Reds

TAIPEI, Formosa (AP)—Communist guns on Amoy Island plastered Nationalist-held Quemoy with 150 shells today in a 15-minute bombardment. A brief official report said the shelling began at 9:20 a.m. but didn't mention whether the Nationalist guns replied.

DISCOVER THE DIFFERENCE IN DODGE!

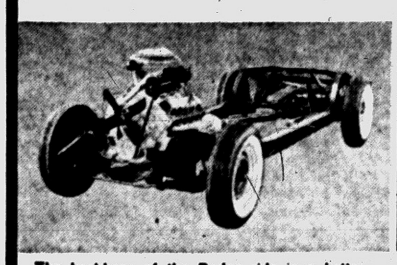

A smoother ride with Oriflow! Dodge fluid-activated shock absorbers give more precise control than spring-loaded valves in other cars.

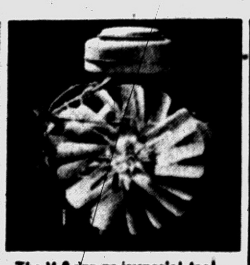

It took "big-car" ride to go 31,000 miles in 14 days! No car that just talked "big" could have withstood the tremendous punishment Dodge did at Bonneville. Dodge went 14 days and nights (31,000 miles) at an average speed of 92.86 mph *without a single breakdown!*

Only a big car can give you big-car ride! And Dodge is bigger all around—inside and out. More legroom front and rear. More hiproom front and rear. More steering wheel clearance.

The backbone of the Dodge ride is a better chassis! It starts with a rugged frame with sturdy box-section side rail construction far superior to common U-channel and I-beam types. Cross members are extra heavy.

The V-8 engine is special, too! The 260-hp. V-8 engine is built on advanced aircraft-design principles to give you real *break-away power.*

Woman Held in Knifing

DETROIT (AP) — Police today held Lena L. Smith, 26, of Detroit, for investigation in the fatal stabbing of Ira Foster, 32, also of Detroit.

Kefauver Needs California Votes

Win Will Be 'Almost Decisive' in Battle for Party Nomination

OAKLAND, Calif. (AP)—Sen. Estes Kefauver says a California primary victory over Adlai Stevenson could be "almost decisive" in his bid for the Democratic presidential nomination.

• • •

His California managers alloted him, therefore, an extra campaigning day in Oregon because of the influence Friday's write-in voting there may have on the California result.

Both also plan concerted wind-up campaigns in California rural areas.

VIE IN OREGON

Kefauver contends with Stevenson in Oregon for 16 national convention votes. The stake in California's June 5 presidential primary is 68 convention votes.

The Tennessee senator flew to Portland last night with an intensive Thursday of campaigning in Multnomah County (Portland) added to his original two-day schedule.

"California is the most important contest we have," Kefauver told an Oakland dinner before flying north.

• • •

"The stakes are big.

"If I can carry California, it will be almost decisive in our favor in the coming convention in August."

Wins Driving Award

FLINT (AP) — One-armed Ralph Fry, 35, a Flint taxi driver for 14 years, has been named winner of a safe driving award, one of 12 given in a nationwide contest in cities of 100,000 to 500,000 population. Fry, who has been handicapped since birth, has driven more than 350,000 miles without a chargeable accident in the last 11 years.

Indians of New Mexico have no written language. Their myths have passed orally from generation to generation.

Truman Plans to Live to Be 130 Years Old

By EARL WILSON

NEW YORK—Are you taking care of yourself?

Harry Truman—at the Four Freedoms Award dinner—told Emil K. Ellis how he keeps so healthy, and full of pep. "If I feel tired even while in a meeting, I excuse myself, go into a nearby room, take off my shoes, and take a nap, if only for five minutes," he said. "The result is, "I'll outlive the men who were in my Cabinet—I'll live to 130!"

MAE

Mae West's dressing room at the Latin Quarter is usually guarded by one of her muscle men. She has some cute business in her act. When one of the huskies, pretending to answer her phone, says, "Mae West's suite." Mae calls out, "Don't brag about me — just answer the phone."

Will you or won't you be glad to see Jackie Gleason's "Honeymooners" on only "once in a while" next season? Jackie's television program will return next fall to the "live," one-hour format that made him rich, famous and the hottest comedian in the country.

"The Loudmouth," "The Bartender," "The Poor Soul," and "Reggie Van Gleason" will be back on the air early in September.

Although Perry Como's rating has topped the half-hour "Honeymooners" only four times this season, "the Battle of Saturday Night" promises to be fiercer next year, since NBC has decided to move Sid Caesar to Saturday . . . and so Jackie's bosses at CBS wanted to strengthen their forces.

★ ★ ★ ★

"It means a fabulous amount of additional money to me," Gleason said, "working an hour instead of half hour—but that's not the big thing. I just think I'll enjoy it more being on 'live.'"

After seeing Grace Kelly in those regal surroundings, MGM's convinced it's going to be difficult to get her back to Hollywood to make pictures for a long time. But they hope to take over the old Rex Ingram studios for her in Nice—half an hour away from Her Serene Highness' palace.

★ ★ ★ ★

Cyd Charisse has watched husband Tony Martin's show maybe a dozen times and will again when they celebrate their eighth anniversary . . . Phil Silvers, Mickey Freeman and "a skeleton cast" will go to France and Italy in June to shoot some foreign backgrounds for Phil's TV show next fall. One of Tony's lines in the show is about Tiajuana: "They don't have any income tax in Tiajuana. In fact they don't have any income."

CYD CHARISSE

When a Kansas beau ran out of gas, his girl nonchalantly opened her purse and pulled out a flask. "Great," said the wolf. "What is it—bourbon or scotch." The gal sweetly replied, "Gas."

THE MIDNIGHT EARL . . .

A new Glenn Miller's band's being formed by his widow, with Ray McKinley leading . . . Wally Cox is on jury duty . . . Lionel Hampton, starting a tour of Israel calls himself "star of stage, screen and Tel Aviv" . . .

EARL'S PEARLS . . . You never realize how quickly the human voice can change till you hear a woman stop quarreling with her husband to answer the phone.

WISH I'D SAID THAT: "Many an attractive dish has ruined a guy's digestion."—Rob't Q. Lewis.

TODAY'S BEST LAUGH: A local wife has figured out a great time-saving device—she attached the can opener to the TV set.

"No matter how far chemistry advances," claims Charlie Jones, "it'll never develop anything more dangerous than a peroxide blonde." **That's earl, brother.**

Stevenson Ends Tour in Oregon

Talks Today at Eugene With Kefauver; Both Vie for 'Pencil' Votes

PORTLAND, Ore. (AP) — Adlai Stevenson, making a final swing before Friday's vote test with Sen. Estes Kefauver, today pointed his campaign for Oregon's "pencil" primary at his supposed weak spot in the state's broad green farm belt.

• • •

Stevenson blasted away at Eisenhower administration farm policies in a tour through the Willamette Valley yesterday.

ON SAME PODIUM

The two rivals for the Democratic presidential nomination, both write-in candidates in the party preferential vote for 16 delegates, are scheduled to wind up on the same platform in Eugene tonight after a day of campaigning in eastern and southern Oregon.

Each will be allotted time at a meeting sponsored by the University of Oregon, with Stevenson speaking first.

• • •

President Eisenhower is unopposed for 18 delegates to the Republican National Committee.

Straits Bridge Strike Ends in Compromise

ST. IGNACE (AP)—Some 300 striking workers on the giant Straits of Mackinac Bridge superstructure were ordered back to work today following a compromise settlement yesterday of a three-day jurisdictional strike.

• • •

The agreement was made between operating engineers and iron workers unions and the American Bridge Division of U. S. Steel Corp..

The company said the agreement provides certain operating engineers will supply personnel in addition to those supplied by the iron workers.

• • •

Although the strike began Friday, bridge officials said only two days work was lost because bad weather prevented "high work" on the 100-million-dollar span between Michigan's Upper and lower Peninsulas.

Cheboygan Celebrates

CHEBOYGAN (AP)—Plans are being made for a giant civic celebration marking sale of the closed Cheboygan paper mill by Charmin Paper Mills of Green Bay, Wis. Purchase of the mill for $600,000 was completed in New York last week. A 24-member Chamber of Commerce committee is sponsoring a celebration to welcome the Charmin Company to Cheboygan.

Penal Official Retires

JACKSON (AP)—Charles T. Lockwood, business manager of Southern Michigan Prison, will retire May 24 after more than 20 years at the prison. Lockwood, 70, started as a clerk in the accounting office in 1935. He has been business manager since 1942.

Hollywood Headlines:

Red Skelton Back on Top in Video and Movies, Too

By BOB THOMAS

HOLLYWOOD (AP) — "The same thing happens to all performers. First you're up, then you're down, then you're up again. It al goes in cycles."

• • •

This was Red Skelton explaining his renaissance in the last year. His Tuesday night TV show, which had been in the doldrums, once again ascended into the top ranks in the audience ratings. Now he's making his first movie in four years—"Public Pigeon No. 1."

LESS FRANTIC

You can see the results in Red's expansive kisser. He's less frantic. He exudes the warm glow of success. But he can be just as hilarious as ever.

• • •

"How can you say I ain't been workin' in pictures?" he demands. "After all, I had a day's work in 'Susan Slept Here' last year. And this year I did a day's work in 'Around the World in 80 Days.'

• • •

"I will admit this is my first big part since I left MGM. Boy, that last one was some picture! It was the only movie in history that hissed the audience for being so stupid as to pay money for it. They were afraid to play it at the Grauman's Chinese—afraid the footprints would walk out."

How does he explain the upswing of his TV show?

'SWELL SPONSORS'

Aside from the fact that stars' careers go in cycles, he cited: "This year we have two swell sponsors that are dignified and that do not interfere with the show. Both those factors mean a lot.

"What ruined me was too much interference. I always had to fit somebody else's idea of what I should be like. They had me playing every skit as Willie Lump-Lump."

CBS has more than passing interest in the picture. The network has a 5 per cent interest in it (Red has 35 per cent), making the closest connection of a network with a theatrical film.

Reel Romance Parts End in Real Marriage

NEW YORK (AP)— A stage romance blossoms into a real-life marriage for Peggy Ann Garner and Albert Salmi next Friday.

Miss Garner, 24-year-old former child movie star, and Salmi, 28, took out a marriage license yesterday.

The two fell in love while she played a honky-tonk singer and he her shy cowboy lover in the comedy "Bus Stop."

Michigan Law to Control Communists Nullified by State Supreme Court Ruling

LANSING (AP)—Surprising no one, the Michigan Supreme Court has thrown out the Trucks Anti-Subversive Act.

• • •

Its decision Monday was a foregone conclusion after the United States Supreme Court last month invalidated a similar enactment by Pennsylvania.

Also known as the Michigan Communist Control Law, the Trucks Act, named for Rep. Kenneth O. Trucks (R-Baldwin), is sponsor, required annual registration of Communist Party members with the State Police.

It also prohibited ballot listing of Communists in state primary and general elections, and defined the terms "Communist," "Communist Party" and "Communist Front Organizations."

• • •

All five sections specifically were held unconstitutional.

COURT OPINION

The opinion, written by Justice Emerson R. Boyles, did not expressly pass on the validity of two other provisions of the law but in the light of what it did do these seemed improbable of enforcement.

One of the two sections makes it a felony to sabotage or attempt to sabotage national defense plants, an area covered by other statutes.

The second would bar from non-elective public jobs in the state and local governments in cases "where reasonable grounds exist that such a person is a 'Communist Party Member' or belongs to a 'front' group."

The test suit was brought by the Michigan Communist Party and some of its officials, including William Albertson and William Allan.

The Washington tribunal found Congress had pre-eempted the field of subversive activities control, in effect fencing it off from the reach of state legislatures.

THE POWERHOUSE

By Jimmy Powers

This department has never gone along with the theory that a man is fair game for ridicule because of his lack of formal education, the bizzare cut of his clothes, or his accent.

It is a pleasure, therefore, to report to you today Rocky Marciano's departing sumup . . . "Jimmy, the more I look back the more grateful I am that I fell into the good care of Al Weill. Suppose I had the misfortune to put myself under the management of certain men we both know who threw their boxer into the pit for all comers."

I had in mind Rex Layne and certain other boxers who were overmatched under the careless, callous or mistaken theory . . . "throw them inot deep water. That's the only way to learn to swim."

★ ★ ★ ★

Rocky continued . . . "I know Al Weill is not perfect. Neither is a single one of his critics. I know he makes mistaken theory . . . "throw them into deep water. That's than most college graduates. He made good matches for all his boxers.

"He made all of them retire with time left for his profit still to run on their contracts. Look at Marty Servo, Lou Ambers and Joey Archibald. Like me, they were small towners or farm boys."

One of Al's shrewdest moves was the $87,000 he got Ambers in the Tournament of Champions at Bronx Coliseum against Pedro Montanez. Al was a skilled financier.

★ ★ ★ ★

He treated each boxer as if he was his son, gave him fatherly advice, stopped him from going haywire or being a spendthrift playboy.

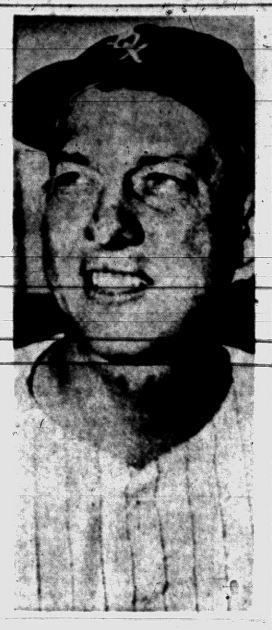

NO GREAT ADJUSTMENT NECESSARY ON RETIRING

"Al always kept our standard of living to a modest level so that when we retired there was no great adjustment necessary. He kept most of his boys in clean but simple boarding houses. We ate simple food, nourishing stuff, but nothing fancy. No showboating with big autos either.

★ ★ ★ ★

"We stayed at YMCAs and places like that. All of us wound up with money. So did Al, of course, but he earned every penny. And what could you pay a man for molding your character, shooing away leeches, keeping you from making a fool of yourself when you are a young kid fighter with a pocket full of money?"

Without Weill's skillful handling, and conceding Rocky has certain boxing flaws and is not smartest man in the world in avoiding punishment, it is entirely possible Rocky might have retired some time ago a battered punching bag who never even reached the top 10.

AP Wirephoto

AS GOES LOLLAR — Catcher Sherm Lollar, above, of the Chicago White Sox caught fire with his bat a few games ago, causing the fans to say "As Lollar goes, so go the White Sox." He has hiked the average from .231 to .367 in five games.

Ray Bluth Tops Masters Field

Budweiser Star Leads 8 Undefeated Bowlers in ABC Eliminations

ROCHESTER, N. Y. (AP) — Ray Bluth, husky star of the national team match game champion Budweiser team from St. Louis, leads the eight undefeated candidates in the double elimination sixth annual American Bowling Congress Masters tournament.

In addition to the eight unbeaten bowlers — representing eight states—there are also 16 bowlers left in the tournament with one defeat each.

Highlight yesterday was the ouster of Bill Lillard of Chicago, current match game champion and leader in three divisions of the ABC. Lillard was upset in his 1st match by Edwih Albert of Miami, Fla., and then lost his 2nd match to Bob Storch of North Canton, Ohio.

Bluth beat his doubles partner, Dick Weber, in one of the best matches of the day as Ray hit 846 while Weber had 841. Previously Bluth had beaten Charles Johnson of Detroit, Mich., by nine pins as he struck out in the 10th frame.

Indians Lead on Lemon's Win

By THE ASSOCIATED PRESS

Last season you had to give odds to bet Bob Lemon wouldn't pitch a complete game. Now the big guy has gone the distance five straight times for the Cleveland Indians and has won 'em all — including two in a row over the suddenly not-so-torrid New York Yankees.

* * *

Lemon, troubled by a bum leg, had only five complete games all last season, although he won 18, and his last was on Memorial Day. This spring, it looked like more of the same when the veteran righthander lasted only seven innings while losing to Chicago 2-1 opening day. It was the 21st consecutive time he had failed to finish.

* * *

He hasn't been shelled—or beaten—since, wrapping up Detroit twice, Baltimore once and then beating the Yanks in the rubber game of a three-game set last Thursday.

Last night, Lemon bamboozled the Yankees again, setting them down on three hits for a 3-2 victory as Al Smith, a persistent Yankee baiter, poked a lead off homer in the ninth to hoist the Indians into the American League lead.

It was the lone game scheduled in the majors Monday and the Tribe made it their sixth triumph in the last seven games to gain a 10-percentage point edge on New York; which has lost four of six. The Injuns haven't had it this good since last Sept. 15, the day before Detroit knocked them from the lead and New York took over to win the pennant.

* *

Lemon made only two mistakes last night, and they came on consecutive pitches as Gil McDougald and Mickey Mantle powered back-to-back home runs for a short-lived 2-1 Yankee lead in the fourth. The only other hit off the 35-year-old Lemon, who struck out five and walked three, was a fifth-inning single by Elston Howard.

* * *

Lemon had retired 10 men in order before McDougald belted his No. 2 homer of the season. Mantle's homer was his 12th.

The victory, his 186th (only team mates Bob Feller and Early Wynn have more among active major league pitchers), gave Lemon an edge on the Yankees for the first time since 1949. He now is 26-25 lifetime (11 years) against the Bombers—the only team he didn't have a winning record against at season's start.

Pontiac Press Photo

ONE MORE DAY — With only one more day for entries to be filed for the 5th annual Pontiac Press Prep Invitational golf tourney, May 28, two of the defending champs and their coach take a good look at the big perpetual trophy won last spring. At left (above) is Mike Conroy, who with Tim Baldwin, center, are all that's left of the 1955 top team representing Birmingham. At right is Joe Borovick coach of the Maples, who hopes for his 4th straight championship in the event.

All Interest in Preakness Given to Needles, Fabius

BALTIMORE (AP) — Interest in next Saturday's $100,000 Preakness was centered today on the two classiest performers in the probable starting field, Needles and Fabius, and on what role the physical layout of Pimlico Race Track will play in their return engagement.

* * *

Needles, the Florida entry of Jack Dudley and Bonnie Heath, used his powerful late kick to come frm behind and win the Kentucky Derby by three quarters of a length ahead of Calumet Farm's Fabius last May 5.

* * *

If jockey Dave Erb elects again to utilize Needles' amazing endurance, he'll have considerably less distance to develop the late kick which heretofore has carried the bay son of Ponder to victory. The stretch at Pimlico is only 950 feet in length compared to 1,234½ feet at Churchill Downs where Needles outsped Fabius in the Derby.

* * *

In addition, the final turn at Pimlico appears to be a bit tighter than the comparable curve at Churchill Downs. The form players might also be calculating that item in doping the race. It could make things difficult for a horse starting his big bid at the turn in an effort to make up for the shorter stretch.

* * *

Some horsemen claim Pimlico's track is generally firmer over-all than the Downs. If so, such a factor could also work in favor of Fabius, since he is regarded as more of a speed horse.

* * *

For the time being, Needles is being quoted as an 8-5 or 7-5 favorite, with Fabius calculated to go off at about 4-1.

Meanwhile, the owners of nine other horses have put up their cash to get into the race in the hopes of taking home some of the prize money.

* * *

Mrs. Helen W. Kellogg's Come On Red, who earned only a little more than $8,000 last year, came from sixth place to finish third in the Kentucky Derby. Dino Lozzi has his hopes pinned on Count Chic, who conceded two pounds to Needles in the $100,000 Florida Derby and lost a close decision.

Needles, Rider 'Perfect Fit'

BALTIMORE (AP) — Dave Erb rode race horses for 16 years and about the only prominence he ever won was a reputation among horse folk as an intelligent, well spoken guy. Then he met Needles.

It was a happy union. They have won three $100,000 races, the Flamingo, the Florida Derby, and a few days ago the Kentucky Derby.

* * *

This Saturday, they will go after another in Pimlico's $100,000 Preakness, second trial in the quest for the Triple Crown. They are favored to win it.

* * *

Fame is coming late to the 33-year-old jockey from Belmont Shores, Calif., now in his 17th year of riding. But it is coming with a rush, because Erb and Needles appear to "fit" one another perfectly.

Bengals Seek Trade

DETROIT (AP) — The long-distance telephone lines still hummed at Briggs Stadium today, and Detroit Tiger brass candidly admitted it was looking for any kind of trade "that will get us out of the cellar and on the way up."

President Walter O. (Spike) Briggs, vice president Charlie Gehringer, a Tiger all-time great, and manager Bucky Harris were among those who huddled long and earnestly yesterday.

When they broke up, they said: "We're still waiting on a couple or so calls."

The Tigers, now 30-strong and mired in the basement, must get down to a 25-player limit my midnight Thursday.

Who to swap for whom and who to send where were the big questions?

A Tiger spokesman told newsmen, "We've got a couple of players we know we could peddle without hurting us, but who can we get who would help us for them?"

Tiger cripples, meanwhile, were beginning to come around.

Shortstop Harvey Kuenn, hit on the ankle Sunday by a line drive, suffered only a bruise and should be ready today. The same was true of catcher Frank House, who caught a ball on his shin a couple of games back.

Right fielder Al Kaline and pitcher Ned Garver, however, still are on the ailing list, both with sore arms. Kaline is especially missed, since he was the 1955 champion of major league batsmen.

Harris named Paul Foytack (1-1) to oppose the Boston Red Sox today in the 1st of two Detroit games.

Heavy Impost Given Nashua

CAMDEN, N. J. (INS)—Nashua has been assigned 129 pounds for Saturday's $30,000-added Camden Handicap at Garden State park—the race that could make him the top money-winning thoroughbred of all time.

The impost is a pound more than the four-year-old son of Nasrullah carried to a head victory in his last start, the Grey Lag, and the same he packed for the Gulfstream Park Handicap.

Victory in the mile and one-eighth would assure Nashua of more than the $8,146 he needs to surpass Citation's lifetime race earnings of $1,085,760.

MICHIGAN COLLEGE SPORTS

'Reverse' Shot Gives RO Man His 2nd Ace

On his first time out this season, John Burns of Royal Oak, a good golfer, bagged an ace. Burns got his 2nd hole-in-one over the weekend at Bald Mountain Club, where he aced the No. 17, par 3 hole with a six iron shot. The ace was Bald Mountain's 2nd of the season.

* * *

The ball took strong backspin, bit when it hit and jumped backwards into the cup from three feet away. Burns got his 1st ace in 1946 on Tam O'Shanter's No. 2. No. 17 at Bald Mountain is 170 yards long. He had a 75 for the 18 holes.

"Guess I'll just have to retire now, and fish," says Burns.

* * *

His companions on the round were Jack Davis, Joe Davis and Don Tye, all of Royal Oak.

Union Baseball Drill

The UAW-CIO Local 594 baseball team will practice tonight at Columbia-Joslyn's north diamond starting at 5 p.m. All interested players are invited to attend the workout.

From The PRESS BOX

Les Etter, sports publicity director at the University of Michigan, has taken care of requests for 18 broadcast booths for small radio stations who will carry the Wolverine football games next fall.

Etter pointed out that before television he would get requests for four or five booths. He credits the rise to the number of small town advertisers seeking to sponsor athletic events.

* * *

Sam C. Dinsmore, of Birmingham, was awarded a varsity letter award for fencing at Wayne University.

* * *

In the track meet between Michigan Normal and Miami of Ohio over the weekend, the Hurons trailed 59-58 going into the final event which was the mile relay.

Two local boys, Kerry Keating and Ray Campbell, helped the relay team to victory and gave Normal a 63-59 decision.

* * *

Returning from Bay City where it had played a doubleheader ball game Saturday, PHS nine ran into the heavily damaged tornado area north of Flint. A long detour was necessary to bypass the area, says Coach Ed Heikkinen, "and we saw a lot of destruction."

MONDAY'S STARS

PITCHING

Bob Lemon, Indians—Beat New York 3-2 on a three-hitter, walking three and striking out five, for his 5th straight complete game and fifth straight victory.

HITTING

Al Smith, Indians—Delivered a leadoff homer in the 9th to beat New York 3-2 and lift Cleveland into 1st place in the American League.

2 Drivers Hit Near 150 M.P.H.

Bettenhausen, Hanks in Speedway Trial Runs; Tony Sets Mark

INDIANAPOLIS (INS) — Two men at the Indianapolis Motor Speedway agreed today that "some one will have a 146 mile an hour lap during Saturday's qualifications."

One of them was Tony Bettenhausen, who has been driving racing cars at the 2½ mile track at Indianapolis for the 19th year.

The other was an unidentified old timer who nodded in agreement with Bettenhausen's words and then was heard to mumble:

"Next thing you know, those cars will be flying."

Bettenhausen of Tinley Park, Ill., almost did that yesterday in establishing a track record of 144.951 miles an hour, Just 30 minutes earlier, another veteran, Sam Hanks of Pacific Palisades, Calif., set an unofficial mark with 144.346 mph.

Both speeds were timed electronically and wiped away the previous fastest time of 143.839, set earlier this year by Bob Sweikert, the 1955 winner of the Memorial Day race.

Rory Calhoun Knocks Out Sandy in Opening Round

NEW YORK (AP)—Charley Goldman feels confident he'll have another champion to work with in another year in middleweight Rory Calhoun.

* * *

The tiny trainer of retired heavyweight champion Rocky Marciano believes he has the perfect candidate for new honors in the solidly built, 21-year-old from White Plains, N.Y.

* * *

"Another year ought to do it," said Charley after Rory blasted out reedy Randy Sandy in 2:46 of the first round of a telecast bout at St. Nicholas Arena last night. "Rory's a hard worker and learns fast."

It was the 21st straight victory and 11th knockout for the undefeated youngster, a pro only 20 months.

Getting the proper opponents is the major task for the brain trust of Goldman and manager Frank Bachman.

"We feel he's ready for anyone in the top 10 now," said Bachman. "I'm afraid though that some of those ranking fighters think he's too ready.

Calhoun worked fast in making Sandy his fifth victim of the year. His first punch to the head — a flashing right — caught the 25-year-old New Yorker flush on the jaw and dropped him. He bounced up at two and stood for the mandatory count.

Right-hand blows to the jaw felled Sandy twice more for a total of three knockdowns in the round. After the third, Referee Ray Miller immediately waved his arms, signalizing the technical knockout. Under New York rules, three knockdowns in a round and you're out.

Eaglets Down St. Ben

After a slow, shaky start, Orchard Lake St. Mary's baseball team has come along in impressive fashion.

* * *

The revival has arrived too late for the Eaglets to successfully defend their Suburban Catholic League title, but after dropping their 1st three starts they have shifted to the winning side of the ledger three times since.

* * *

Rev. John Rakoczy's squad, behind the pitching and hitting of Paul Franckowiak, racked up its 3rd straight win Monday by dumping St. Benedict, 4-1, at Orchard Lake.

* * *

Franckowiak hurled a two-hit masterpiece and recorded a dozen strikeouts in addition to driving in two runs with a double and single. St. Ben's only run in the 4th inning was unearned.

Royal Oak St. Mary tallied all of its runs in the 2nd inning to down St. Michael, 9-4, at Royal Oak. Paul Smuts collected two hits for the Irish in the big 2nd stanza.

Tom O'Meara fanned 16 batters as St. Rita handed St. Frederick its 6th straight loss, 2-1, at Hazel Park. Mike Young paced the Vikings at the plate with three hits in three times at bat.

* * *

Detroit Country Day stole 22 bases while defeating Ferndale St. James, 10-3. The afternoon of base pilfering included two double steals and the swiping of home plate three times.

* * *

Clarkston posted its 8th Wayne-Oakland League victory in seven starts with an 11-7 decision over Milford at Clarkston. Dave Gaddis batted in five runs with a single and double and took over the pitching in the 6th inning to save the game for starter Gary Nelson.

Imlay City hung up its 11th consecutive win by blanking Lapeer, 9-0. Duane Maison hurled a three-hit shutout for the Spartans, who tallied five runs in the 1st inning.

Payne Has No Pain

Buddy Payne, North Carolina's star right end, is recovering nicely from a knee operation and figures to be ready for the Tar Heel gridiron campaign next fall. He had the cartilage in his left knee removed.

Clawson Thinclads Win Oakland B League Meet

Clawson took five 1st places and scored in all 13 events to win the Oakland B League track and field championship Monday at Fitzgerald. Clawson amassed 67 points to take its 1st title in history.

Avondale was far behind in 2nd place with 33 points and Fitzgerald was a close 3rd with 32. Lake Orion scored 21 points, Troy 17, Roseville 13½, and Madison ½.

Chuck Mason in the broad jump, Tom Raines in the 100, Dick Allen in the 220, and Larry Dorr in the 880 were individual winners for Clawson and the 880 relay team accounted for the other victory.

Avondale's freshman miler Dick Hutchinson won his specialty in the time of 4:59. Ray Goforth of the Jackets set a new school record in the high jump by clearing the bar at 5 feet 8 inches. Goforth's brother Giles held the previous mark.

Walled Lake's track team scored a 67-42 decision over Southfield in an Inter-Lakes Conference dual meet. The Vikings won eight events and took seven 2nd places. Larry Hughes was the meet's only double winner, capturing both hurdles for Walled Lake.

Counting Base Hits

Moon, Spencer Late Hitters

NEW YORK (AP)—Wally Moon of the St. Louis Cardinals and Daryl Spencer of the New York Giants, turning in a couple of baseball's best clutch performances, are making their base hits count in the late innings.

Moon and Spencer are tied for the Major League lead in game-winning blows, a new statistics category devised and compiled by The Associated Press. Each has three.

* * *

Credit for a game-winning blow is given to each player who drives in the winning run in the sixth, seventh, eighth, ninth or an extra inning.

Moon, one of the foremost contributors toward the Cards' surprisingly good showing has come through with timely singles, twice in the seventh inning and once in the sixth for a pair of victories over Milwaukee and one over Brooklyn.

* * *

Spencer, only a .244 batter, has produced the big hit in three of the Giants' nine triumphs. He had two game-winning blows against Philadelphia, a single in the seventh inning and a home run in the sixth. He also broke up the May 2 marathon against the Chicago Cubs with a sacrifice fly in the 17th frame.

AP Wirephoto

THREE BRIGHT SPOTS — Three members of the Detroit Tigers (l to r) Wayne Belardi, Charley Maxwell, and Harvey Kuenn, have been supplying most of the batting punch for the cellar-dwelling Tigers. Belardi, Brooklyn castoff, is batting .306; Maxwell is hitting .381, and Kuenn .344. Maxwell leads the club in home runs with 7. Kuenn is the only righthanded hitter in the group.

Jewelers, Louie's Win City Openers

Defending Class A champion Shaw's Jewelers took up where they left off and General Motors, Louie's Tavern and the North Side Merchants scored wins as the 1956 City Softball League season got under way Monday night at Beaudette and North Side parks.

The Jewelers opened their campaign with a continuation of their winning ways by defeating Stadium Inn, 5-2, at North Side.

Clell (Mutt) Morse and Percy McConnor combined to toss a five-hitter at the opposition with McConnor receiving credit for the win. Morse departed during Stadium's two-run 5th inning.

Claude McManus hurled for Stadium and enjoyed a 2-1 lead entering the 6th stanza. Singles by Chuck Mason and Mullin and a triple by Vern Keebaugh resulted in three runs to wrap up the decision for the Jewelers.

GMC banged out nine hits and Hall twirled a two-hitter as the Coachers downed Elks No. 810 by a 6-1 count.

* * *

Grant and Bird each collected two safeties to lead the GMC attack as the Coachers scored twice in the 2nd inning and four times in the 4th off the slants of Miller.

Louie's Tavern, last year's Class C champ, scored a 3-1 victory over Select a Drink at Beaudette. Vivian hurled a four-hit chore for the Tavern nine. Louie's sewed up the decision with two runs in the 6th frame, which broke a 1-1 tie.

The North Side Merchants lashed out with 14 hits to post an easy 17-4 win over Franklin Products. The winners scored in every inning except the 2nd. Bantin clouted a three-run homer for the Merchants in the 4th inning.

Four games are on tap tonight. Royal Bar meets Bicmar Inn at 7 p.m. and Walled Lake Market faces Richard's Tavern at 8:30 in games at Beaudette. Lunsford Market tackles Drive-In Cleaners at 7 o'clock and Louie's plays Franklin at 8:30 in contests at North Side.

Shaw's	010 003 1—5 8 4	
Stadium	000 020 0—2 5 0	
GMC	020 400 0—6 8 2	
Elks 810	000 100 0—1 2 0	
Louie's	100 002 0—3 7 2	
Select	100 000 0—1 4 2	
North Side	102 532 4—17 14 4	
Franklin	011 000 2—4 3 7	

Bloomfield and Eaglet Golfers Outshoot Foes

Paced by Bud Badger's medalist effort of 40, Bloomfield Hills edged Clarkston, 191-192, in a dual golf match Monday at Edgewood Country Club. Bob Hall led Clarkston with 44.

Orchard Lake St. Mary's golfers scored a 5-0 victory over St. Benedict in a dual meet at Pontiac Country Club. Bob Fryt of the Eaglets was medalist with 46.

Big Ten Repeater

Ed Brabham, Michigan State sprinter, has been a double winner the last two Big Ten indoor track championships. Last year he won the 60-yard dash and the broad jump. This year he scored again in the 60 and in the 300-yard dash.

Postpone Prep Golf Tourney to June 2

PORT HURON (AP) — Finals in three divisions of the Michigan high school golf tournament have been moved back from the week-end to June 2 because of flood conditions.

The postponement will affect play in the Class A, C and D divisions scheduled for the Black River Country Club.

The B division finals at the St. Clair River Country Club will get started this weekend on schedule.

Hail the President

William Ritner Sr., of Merion, Pa., was elected president of the American Inboard Racing Assn.

Orioles Take Chance on Loes and Schmitz

BALTIMORE (AP)—Manager Paul Richards of the Baltimore Orioles, who sometimes shuffles his playing personnel like a deck of cards may have drawn an inside straight yesterday when he took a chance on two discarded pitchers.

* * *

Richards purchased sore-arm Billy Loes from the Brooklyn club and veteran Johnny Schmitz from the Boston Red Sox.

* * *

Loes, who compiled a 10-4 record with the world champions last year, is only 26. But the eccentric righthander has been sidelined most of this season with a sore shoulder muscle, diagnosed as tendonitis.

In his only appearance, he gave up six runs and five hits to the Pittsburgh Pirates in 1 1-3 innings. In practice since then, observers said he "didn't have a thing." He had a 50-26 record with Brooklyn for five seasons.

* * *

Schmitz presents a different problem. His record shows 93 victories and 111 losses over a 12-year major league career. During the stretch, he has played for seven different teams.

* * *

The 35-year-old lefthander had a 7-10 record for the last-place Washington Senators last season.

Richards, who has gambled many times on trades, bonus players and purchases since he came to the Orioles in 1955, obviously was willing to take the plunge again.

No prices were disclosed, but the Orioles were believed to have paid about $20,000 for Loes and about $15,000 for Schmitz.

Loes represents the biggest gamble because of his shoulder. He says he feels sharp pains when throwing curve balls.

* * *

Richards, in Kansas City with the Orioles on a road trip, said he didn't know too much about Loes but observed:

* * *

"He's never had a losing year since he has been in baseball so I'm willing to gamble on him. I know his arm has been sore, but he's still young enough to recover."

Higgins Plans on Keeping Gernert in Bosox Lineup

DETROIT (AP)—Boston Red Sox Manager Mike Higgins is making plans to keep outfielder-first baseman Dick Gernert in the lineup when Ted Williams returns to action.

* * *

"One thing is sure—I'll keep Gernert in the lineup as long as he keeps up his terrific hitting," Higgins said yesterday as the Sox came here to open a two-game series with Detroit.

Gernert, Boston's regular first baseman for two seasons before being sent down to the minors in 1954, learned how to play the outfield and is the big surprise on the Red Sox team.

* * *

In 19 games since taking over Williams' left-field post after the big slugger suffered an instep injury, Gernert has slammed 8 homers, driven in 20 runs and compiled a .385 batting average to tie Mickey Mantle for the American League lead.

* * *

"When Ted comes back there'll be two places I can play Gernert," Higgins said. "That would be either right field or firse base. He'll probably play first base at home. On the road some of those big right fields would give him trouble so he'd stay at first just so long as he's hitting well."

* * *

Jackie Jensen, who has been in a batting slump, is the regular Red Sox rightfielder, while Mickey Vernon is the No. 1 first baseman.

'Transfusion' Helps Pontiac State Leaguers

A "transfusion" of new baseball blood is expected to help Pontiac's General Motors nine, an entry in the Michigan State Class A League. The league opens its 1956 schedule tonight at 7:30 p.m. on the Memorial Park diamond at Royal Oak.

GMC opposes the Royal Oak entry of the Detroit BB Federation, which won the loop crown in 1955. This year's RO team is a new entry in the circuit, although still carrying much of the Hodges - Dodges roster. Pontiac finished 6th in last year's campaign.

Manager Paul Parks says GMC's roster includes Jim Horner, just back from a tour of army service; Ken Conroy, and Jim Wagner, former RO star. Horner is a catcher and Conroy an infielder. All are new this year.

* * *

Probable batting order for the Pontiac club will be: Jerry Doerr 3b, Les Stone 1b, Terry Thomas cf, Johnny Anreico lf, Wes Roberts c, Dave Kringe 2b, Bob Hamilton, rf, Bob Swindell or Jerry Mofield ss, Herm Bishop or Dick Goldsworthy p.

Toledo Trotter Wins Wolverine's Feature

DETROIT (AP) — Elby Hanover, owned by Saunders Mills Inc., Toledo, won last night's featured 7th race for BB-A trotters at Wolverine Race Track. He paid $28.50.

AP Wirephoto

BILLY'S AN ORIOLE NOW — Billy Loes, Brooklyn Dodgers' problem child, was sold unconditionally Monday to the Baltimore Orioles — lame arm and all — for an estimated $20,000. The Orioles have been informed of the condition of Loes' arm and have decided to gamble on it. The 26-year-old eccentric hurler has compiled a 50-26 won-loss record since he entered the major leagues. He is scheduled to report to the Orioles Thursday in Detroit.

MSU Field Flooded; Play on Irish Lot

EAST LANSING (AP) — Tomorrow's Michigan State-Notre Dame baseball game will be played in South Bend instead of East Lansing as originally scheduled.

The University said heavy rains flooded the diamond and prevented play here.

State will meet Notre Dame here May 21 instead of going to South Bend May 23 as a result of this week's switch.

Spartan Golfers Win

EAST LANSING (AP) — Spartan golfers racked up their 5th win out of seven tries here yesterday, beating Northwestern 14-4.

Leading MSU were Jim Sullivan with 76, Bob Nodus with 77, Ken Rodewalde, 77 and Arlin Dell, 79.

Spartans face Michigan and the University of Detroit in a three-way match in Detroit Saturday.

Eleven NCAA individual titles have been won by Michigan State wrestlers since 1936.

Rigney to Give Giants Shakeup

Bill's Mystified by Sad State of Affairs With His Club

NEW YORK (AP) — Mystified at the sad state of affairs on his team, rookie manager Bill Rigney of the New York Giants ordered a "semi-shakewell" treatment for today's game with the Chicago Cubs.

* * *

Rigney is convinced the Giants are not a sixth-place team. He's equally convinced that Willie Mays is not a .209 hitter.

The shakewell system was popularized by Leo Durocher, Rigney's predecessor. When the club wasn't going well, Durocher pulled all stops and shuffled the players around willy-nilly.

* * *

Rigney doesn't want to go to that extreme, so he is concentrating on the batting order for the moment. Al Dark (0-for-13) is the new leadoff man, and Whitey Lockman (1-for-22) drops to No. 7. Don Mueller is No. 2.

"Maybe Mueller will get on base ahead of Mays," said Rigney, "and Willie will knock him in."

On the subject of Mays, who has just one hit in his last 14 trips to the plate, Rigney is hopeful that he is about to snap out of his slump.

"And if he does what I hope he will, the hits ought to start coming right away," said Rigney. "He's got to start hitting to right field, and I had him take advantage of our day off yesterday by working out. He's been trying to pull everything into the left field seats."

Wayne Edges Toledo

DETROIT (AP) — Taking advantage of five University of Toledo errors, Wayne University won a 6-5 non-conference baseball victory yesterday. Only two of Wayne's runs were earned.

Scoring Leaders

AMERICAN LEAGUE

Batting (based on 50 at bats) — Mantle, New York and Gernert, Boston, .345; Maxwell, Detroit, .381; Boyd, Baltimore, .370; Lollar, Chicago, .367.

Runs — Mantle, New York, 37; Yost, Washington, 21; Berra and Bauer, New York, 19; Lopez, Kansas City, 17.

One-Day Event

Junior Olympics Set for June 6

By H. GUY MOATS

A sharply streamlined and curtailed Junior Olympics will be held June 6 at Wisner Athletic Field. Date was announced today by general chairman Tom Dodson, public schools athletic director, who also announced the colorful schoolboy athletic feature would be completed in one day. Heretofore these Olympics have been spread over several days.

The one-day competition is possible, Dodson says, because for the 1st time since institution of the games, there will be no junior high school division. Only elementary grade youngsters will participate, the chairman stated.

Physical education instructors in the various schools are already at work preparing their youngsters for the meet. Dodson said that he would confer within a week with the cooperating Kiwanis Club officials regarding full plans for the games.

* * *

Other important change in the big event, besides elimination of the junior highs, bars participation of pupils as spectators. "There will be no release of pupils to watch the games, as in the past" the chairman said.

* * *

Present plans call for about the same events as in the past, but all field events will be held same day as the running tests. There will be no changes in age, weight and height classifications.

* * *

A parade about the track, at 1 p. m. will start the games off.

A Master 7 Times

Harvie Ward Jr., 30-year-old U.S. Amateur golf champion, has been in the Masters tournament seven times. His best showing was in 1955 when he finished in eighth place and took low amateur honors.

ONE QUEEN TO ANOTHER — Pretty little Jill Maneck gets a crown from a former Rolladium queen (above). Pressing the 1956 diadem on the locks of Queen Jill is Sue Danner, last year's state roller skating queen and the North American current reigning sovereign, Jill was named in the annual spring contest at Rolladium rink, a few days ago.

Major Leaguers Pare Rosters

By THE ASSOCIATED PRESS

With little more than 48 hours before the Thursday midnight deadline, major league clubs are in the process of paring their rosters to the 25-man limit with veterans like relief pitcher Jim Konstanty and outfielder Wally Westlake among the expendables.

• • •

Konstanty, the most valuable player in the National League with Philadelphia's 1950 pennant winners, was given his out-right release yesterday by the New York Yankees who also sent second baseman Bobby Richardson to their Denver farm in the American Assn. and placed shortstop Billy Hunter on the disabled list.

• • •

The Yanks now are down to their 26-man limit, getting a one-man allowance for returned serviceman Billy Martin.

Westlake was released by the Philadelphia Phillies, two over the limit. The Phils also returned southpaw Bob Ross to Chattanooga of the Southern Assn. while swapping infielder Bobby Morgan for St. Louis Cardinal infielder Solly Hemus as part of last week's five-pitcher deal.

• • •

The biggest deal was the sale of sore-armed righthander Billy Loes to Baltimore by the Brooklyn Dodgers for an estimated $20,000. The Orioles, to make room for Loes and southpaw Johnny Schmitz, purchased from Boston, sold righthander Mel Held to Minneapolis of the American Assn. and optioned Babe Birrer, another pitcher, to San Antonio of the Texas League.

• • •

Cincinnati sent relief pitcher Frank Smith and catcher Matt Batts to Nashville of the Southern Assn. to come within one of the 25-man limit. Cleveland optioned outfielder Dave Pope, exchanged for Hoot Evers from Baltimore Sunday, to Indianapolis of the American Assn. for a 31-man roster.

The Chicago Cubs were deciding where to ship outfielder Gale Wade and catcher Elvin Tappe to get down to the roster limit.

Three Games Open Church Loop Play

With a 10-team roster ready for action, Pontiac's Church Softball League will swing into action Tuesday night, with three games. All games start at 6 p.m. Bob Gavette, Rod Treais and Gordon Hicks will supervise play this year.

• • •

Tuesday's games: Oakland Ave. U. P. vs Church of Brethren at Wever; Marimont vs Columbia Ave. Baptist at Longfellow and Liberty Baptists vs Central Christian at Le Baron field.

Other teams are First Baptist (defending champions), Memorial Baptist, First Presbyterian, and Five Points Community.

'M' Blanks Spartans

ANN ARBOR (AP)—The University of Michigan tennis team today boasted 29 straight triumphs in dual meet competition.

The 29th was one of the sweeter ones. It was a 9-0 shutout of Michigan State yesterday.

Secrets of Better Golf

BY PATTY BERG
23rd of a Series

The all-important part of the putting strokes is, of course, the contact. There should be no doubt in your mind if you have taken the club back low and smoothly along the ground.

However, in this lesson I wish to point out that at the time of impact, the position at the ball is essentially the same as at the address.

The hands and arms are close in toward the body with the right elbow against the right hip. There has been no body action in the shot.

The head and eyes have not varied from their position at the address. The stance and weight distribution remain the same also.

It has been a smooth stroke executed entirely by the hands and wrists with the club acting as a pendulum.

The ball has been sent smoothly on its line to the hole by the rhythmic stroke of the club.

The action is not stopped abruptly after contact but, with the club still acting as a pendulum, it continues on to the follow-through.

As the photograph with this lesson illustrates, do not be quick to raise your head or eyes, but stay down with the shot as in any other part of your game.

Do not stop the action of the putter after contact with the ball. It is essential to your putt to follow-through.

POSITION AT IMPACT
SAME AS AT ADDRESS

Big Inning Wins for Spartans, 7-3

DETROIT (AP)—Triples by Ray Collard and Frank Francfil, a double by Jim Sack and four walks gave Michigan State six runs in the 2nd inning as the Spartans defeated the University of Detroit, 7-3, in a non-conference baseball game yesterday.

• • •

Jim Sullivan tripled behind a walk and scored when shortstop Earl Morrall bobbled the outfield relay to account for two of Detroit's runs, all of which came in the eighth.

• • •

MSU now has a 10-6 overall record, Detroit's is 6-9.

MSU	000 000 001	7	7 1
Detroit	000 000 030	3	8 1

Perranoski, Davis (5), Wenner (7), Meares (8) and Fullerton, Lutz (8); Jungwirth, Crissey (2) and Baumgart.

Tartars Are Nomads

Wayne University's track meet with western reserve last Saturday was the Tartars' first home meet in three years.

Veteran Sportsman Finds Women's Tourneys Tough

NEW YORK (AP) — Jack McAuliffe, who has mixed in sports for 53 years as a caddie, competitor, owner, promoter and fan, is learning that one of his toughest tasks is finding courses for women's golf tournaments.

As a solution, he proposes splitting them into "major and minor league" events.

• • •

Jack is a nephew and namesake of the man he proudly describes as the "only undefeated and unbeaten" boxing champion. Gene Tunney and Rocky Marciano, he explains, retired as undefeated champions but they had been beaten before they won their titles. "Uncle Jack never lost a fight."

• • •

McAuliffe, a sprightly little man of 64, got into golf as an 11-year-old caddie at Brooklyn's Dyker Beach course. He became a good amateur player and still shoots in the 80s. As an associate of Col. T. L. Houston, then part-owner of the Yankees, he once was given the task of getting some publicity for Babe Ruth—as if The Babe needed it.

He's a successful manufacturer and as a sideline owns a few race horses and puts on two golf tournaments a year, the Round Robin for women pros and the National Mixed Foursomes for amateurs. They're both strictly big league.

"The one big problem in golf is finding courses for tournaments," McAuliffe says. "The club members just don't want to give them up for a week or more.

"Its especially true in women's golf, where you have to have a course that's a test but not so hard they can't make good scores. And its worst in Florida because people who go there to play golf in winter want to play every day."

Maple Medley Relay Tankers Rated Highly

Birmingham High School's outstanding medley relay swimming team received All-America recognition by being rated the 8th best team in the country in the selections made by the American Association of High School Swimming coaches.

The Maples, who have won eight straight Eastern Michigan League championships, are coached by Jay Myers.

Members of the relay team include Wayne Geggie, Tom Bechtel, Jay Lewis and Pete Sintz.

Royal Oak's medley relay team also received recognition as 7th best in national prep ranks.

Rolladium Skaters Nearing Final Tests

Last of the season's roller skating races at Rolladium Rink are set for this weekend. Trophies won during the current series will be awarded at this time.

Third eliminations were held Saturday, as follows:

Girls — Class A — Charlene Holdridge; Class B — Patty Reid; Class C — Linda Walter.

Boys — Class A — Raymond Woods; Class B, — Jimmy Ockerman; Class C — Ronnie Charter.

Diaper race — Dennis Dololin and Steven Schultz.

Majors Seek Way to Keep Big Game

NEW YORK (AP) — Ford Frick, commissioner of baseball, said yesterday the Chicago Tribune had decided not to conduct the poll of fans to determine starting teams for the annual All-Star game.

Frick said baseball was anxious to continue selection of the teams by popular vote and plans were under way to set up new machinery for the purpose.

Salas Beats Evans

SAN DIEGO, Calif. (AP)—Lauro Salas, ex-world's lightweight champion from Monterrey, Mexico, used a body attack and then switched to the head to gain a 10-round decision over Billy Evans of Pasadena in the main event at the Coliseum Monday night.

"Don't speed the brew"

Written in the old journal for brewing to the National Bohemian formula are these significant words: "Don't speed the brews."

Today—as the ART of brewing is advanced by modern SCIENCE—these words hold truer than ever. Slowly, patiently, fine ingredients are aged-in.

Only after a long and gentle brewing process do these ingredients give up their subtle flavor characteristics. The result is National Bohemian's distinctive, *satisfying flavor* . . . light and mellow.

It's a flavor you ought to taste. Enjoy National Bohemian today *at local prices!*

NATIONAL BOHEMIAN
Light, mellow. Naturally brewed . . . for satisfying flavor.
The National Brewing Co. Detroit, Mich. Baltimore, Md. Orlando, Fla.

Powell Denies Salary Kickback

Gotham Representative Testifies in Secretary's Tax Dodge Trial

NEW YORK (AP)—Rep. Adam Clayton Powell (D-NY) has denied under oath that he ever took salary kickbacks from his congressional secretary.

Powell made a surprise appearance in federal court yesterday as a defense witness in the income tax evasion trial of his secretary Mrs. Hattie Freeman Dodson.

"Did Hattie Freeman Dodson ever kick back any of her congressional salary to you?" defense attorney Frederick H. Block asked Powell.

"Unqualifiedly no," Powell replied in subdued tones. "Never. Not a penny."

Mrs. Dodson is accused of evading $5,000 in taxes and accepting $2,000 in illegal tax refunds from 1948 to 1952. She is also charged with listing nonexistent dependents on her returns.

• • •

Last week a government witness testified that Mrs. Dodson once told him her congressional salary "belonged to the congressman."

The witness, Joseph F. Ford, was Powell's political manager from 1941 to 1951.

In testimony yesterday, Powell said Ford had the reputation of being a man "who cannot be trusted; a man who indulged in sharp practices."

Earlier, Judge Irving R. Kaufman dismissed the secretary's husband Howard T Dodson, also a Negro, as codefendant in the case and dropped a charge against him of falsely listing dependents on his tax return.

Grand Canyon Draws 900,000 Each Year

FLAGSTAFF, Ariz.—There were 44,000 visitors to Grand Canyon National Park in 1919, the year it was created by Congress. In comparison, nearly 900,000 persons visited the park last year. The rate of increase in visitors since World War II has been 75,000 a year. Automobiles transport 92.4 per cent of the park visitors, while 4.4 per cent go by railroad and 3.2 per cent by bus.

It's a Convertible Now

KNOXVILLE, Tenn. (AP) — The owner of a 1955 automobile had a shock when he arrived to claim it at a parking lot, and found that the top was down. The car wasn't a convertible. In the owner's absence, a wall adjoining the lot had collapsed and the car was smashed flat.

Bolivia's petroleum agency will drill 38 new wells in 1956, La Paz learns.

Market Rallies After Tumbling

NEW YORK (AP) — The stock market suffered a mid-morning sinking spell today, but by early afternoon it had worked up a little from its lows.

Widespread selling was a continuation of the decline that yesterday set the market back substantially.

• • •

Yesterday's drop came as the Russians announced plans for a cut in their military establishment.

The decline continued today at the opening but prices steadied themselves quickly. In the second hour a wave of offerings hit the tape and forced a slight lag for a few minutes until the congestion cleared. Prices at the worst were off 1 to 5 points.

By early afternoon, however, the loss was 1 to 3 points in many major divisions with only a few exceeding that range.

• • •

At noon, the Associated Press average of 60 stocks was down $1.30 at $184.40. Yesterday the average lost $2.20 on the day.

Purse, $80 Stolen From Phone Office

A purse and $80 were reported stolen yesterday from an office at the Bell Telephone Company, 51 E. Huron St., Pontiac police said. Hamilton of Clarkston, said her purse was taken while she was out of the office briefly at 2 p.m.

An unidentified man seen loitering near the office is suspected, police said.

Gives Innocent Plea on Assault Charge

Joseph Gibson, 229 E. Walton Blvd., pleaded innocent yesterday at his arraignment in Oakland County Circuit Court on charges of feloniously assaulting another Pontiac man with a knife April 28 in Waterford Township.

Judge Frank L. Doty continued Gibson's bond of $500.

MARKETS

The constitution of the Irish Free State was adopted on December 11, 1922.

Grains Lower in Active Deals

CHICAGO (AP)—All grains turned lower in moderately active dealings on the Board of Trade today.

For a short time May wheat made a show of resistance to the selling pressure, but it soon gave up that independent effort. Losses ran to more than a cent in most cereals as demand was very limited in all pits.

Major trouble with the market, brokers said, appeared to be the absence of any stimulating news. Export business is dull, the wheat harvest is approaching and soil conditions are excellent for germinating corn and soybeans in the main producing areas.

Wheat near the end of the first hours was ⅛ to ⅝ lower, May $2.26⅛; corn 1 to 1⅜ lower, May $1.49⅝; oats ¼ to ⅜ lower, May 66½; rye 1 to 1¼ lower, May $1.24½; soybeans ⅛ to 3½ lower, May $3.21; lard 13 to 23 cents a hundred pounds lower, May $13.22.

2 Rochester Women Injured in Collision

Two Rochester women were admitted to St. Joseph Mercy Hospital yesterday after their cars collided on Rochester Rd.

Mrs. Mary Illenden, 40, of 133 Walnut St. was listed in fair condition n. Jane Murdock, 40, of 5390 John R. is in good condition, authorities said.

Oakland County Sheriff's deputies said neither woman was able to talk about the accident. It happened at 4:30 p.m. south of Boyken road.

Three Year Probation Given Delwyn Thompson

Delwyn Thompson, 26, extradited from Watertown, South Dakota, to answer charges of non-support of his wife and two children in Hazel Park, was sentenced yesterday by Oakland County Circuit Judge Frank L. Doty.

Thompson, who had pleaded guilty April 30, was placed on probation for three years and ordered to support his family.

Set Sentencing Date for Bobbie Lee Merrell

Charged with the nighttime breaking and entering of a market in Pontiac on Oct. 25, 1954, Bobbie Lee Merrell, whose address is unknown, pleaded guilty to a lesser count of entering without permission yesterday.

Judge Frank L. Doty, who will sentence Merrell May 28, continued his bond of $200.

Glenn C. Goff Mute on Charges of Theft

Charged with stealing a woman's purse and $42 from a car parked in Waterford Township April 14, Glenn C. Goff stood mute yesterday at his circuit court arraignment.

Oakland County Circuit Judge Frank L. Doty, who entered a plea of innocent for Goff, continued his bond of $500.

Alaric the Goth, in 408 A.D., demanded not only gold and silver, but 3,000 pounds of pepper, as part of the ransom of Rome.

Follow These Instructions When a Tornado Strikes

DETROIT (AP)—What can you do in a tornado?

There are certain precautions which may save you life. And these safety measures now are vitally important because tornadoes—once rare in Michigan—may now occur frequently.

This is because of a shift in the jet stream which used to run along the northern rim of the United States but has now moved farther into Canada.

• • •

Weather warning networks are able to give an alarm sometimes hours ahead of a twister.

There is a distinction between a Tornado Alert—meaning conditions may produce a twister—and a Warning, meaning that a tornado actually has been spotted.

When there is an alert, stay outside with a group of neighbors and scan the sky for tornado formations. They are easily identified by their ominous dark color and funnel shape.

SOUTHWEST CORNER

If you see one—no matter how far away—or if there is a warning of a tornado in your area or one moving in the direction of your home—get to shelter immediately.

If you are at home, take shelter in the southwest corner of your basement under a sturdy table to shield yourself from flying debris. If you have no basement, take shelter under a piece of furniture in the southwest corner of the first floor.

If you are driving in the city or the country and you spot a tornado, turn down the first street away from the twister's path. In open country, run or drive from the twister at a 90-degree angle.

DRIVE SOUTH FAST

Tornatoes generally move from Southwest to Northeast so you can usually escape them by running or driving straight south. If you are on foot, take cover in the nearest ditch or depression. Both at home and in public buildings, stay away from windows.

In stores, offices and other public buildings, lie on the floor against an inside wall. When there is danger of a tornado, stay out of theaters, field houses and similar structures. Their high ceilings make them vulnerable to a twister's force.

Experts say damage to homes sometimes is reduced if windows on the north and east sides are open.

And if there is time after a warning, you should shut off gas and electricity at its source.

• • •

John Griffin, acting Michigan Civil Defense director, said it has become urgent that you have a safety plan worked out in case a tornado strikes.

Until 1946, tornadoes were rare in Michigan. Since then several have spread death and destruction throughout the state.

Officials suggest every home have some kind of shelter area, outfitted to keep the family as comfortable as possible during a warning. Keep your radio on so you'll know the latest weather bulletin and when the all clear has sounded.

U.S. Rubber Employes Close Plant

DETROIT (AP) — Approximately 6,000 employes of the U.S. Rubber Co. were idle today because of a labor dispute.

The company closed down its big Detroit plant yesterday.

Roland Lashbrook, president of Local 101 of the United Rubber Workers Union, accused the company of a lockout.

The company said on the other hand that it handed three-day layoff notices to about 60 powerhouse employes who refused to work Sunday night or Monday in a dispute over work assignments. It said the rest of the plant could not operate with the powerhouse shut down.

T. S. Lawton Named to Chrysler Position

T. S. Lawton, comptroller of Chrysler Division since May, has been named an assistant comptroller of Chrysler Corporation.

Lawton joined Chrysler Corporation as an assistant chief auditor in 1950.

Born in Detroit, Lawton was educated in Pontiac public schools, and received an economics degree from the University of Michigan.

John Campbell Placed on Two Year Probation

John Campbell, 24, of 464 Auburn Ave., was placed on two year's probation and ordered to pay $150 court costs yesterday by Oakland County Circuit Judge Frank L. Doty.

Campbell had pleaded guilty April 30 to driving away a car from a local dealer's lot.

Drayton Plains Resident Placed on Probation

Raymond Smith, 17, of 3415 Shaw Drive, Drayton Plains, yesterday was sentenced to three years' probation and payment of $100 court costs by Oakland County Circuit Judge Frank L. Doty.

Smith had pleaded guilty to larceny in a building April 30.

Term in State Prison Given James Donley

James Donley, 41, of 4 S. Saginaw St., was sentenced to spend the next 1½ to 14 years in Jackson State Prison yesterday by Oakland County Circuit Judge Frank L. Doty.

Donley had pleaded guilty April 23 to forging a check for $72.40 March 29 in Waterford Township. Police had charged his bad checks totaled over $300.

Sentence County Man

Harry Seid, 49, of Hazel Park, who pleaded guilty May 2 to buying liquor for a 15-year-old Hazel Park boy last Dec. 31, was sentenced yesterday to payment of $150 court costs by Oakland County Circuit Judge Frank L. Doty.

Gets 1-Year Probation

Jesse Cook, 40, of 410 Wesson St., who pleaded guilty May 3 to possession of a switchblade knife, was sentenced yesterday to a year's probation and payment of $100 court costs by Oakland County Circuit Judge Frank L. Doty.

Mailmen to Meet

BAY CITY (AP) — The men who carry the mail will gather here next weekend for the two-day, 57th annual convention of the Michigan Letter Carriers Assn. Speakers will include Gov. Williams and Reps. Johansen (R-Mich) and Hayworth (D-Mich).

County Deaths

John W. Houck

OAK PARK — Service for John W. Houck, 63, of 12821 Nine Mile Rd., here, will be held in Cumberland, Md., with burial there. Mr. Houck a former Pontiac resident, died Sunday at his home. The body will be at William R. Hamilton Co. Chapel at 3975 Cass Ave., Detroit, until 2 p.m. today.

He is survived by his wife, Marie Billing Houck; a son, Henry; one sister, Mrs. Irwin McDonough, and a brother, Henry Houck, Jr.

John Ross Bartholomew

ROMEO—Service for John Ross Bartholomew, 71, of 234 Tillson St., will be held at 2 p.m. Wednesday at Roth's Home for Funerals, with interment in Romeo Cemetery. He died Sunday.

He leaves his wife, Louise; a son John of Romeo; a daughter, Mrs. Martha Doench of Prescott, Ariz.; a sister, Mrs. Hazel Stone of Detroit; a brother, L. D. Bartholomew of Romeo; and seven grandchildren.

Russell F. McInally

IMLAY CITY — Service for Russell F. McInally, 250 W. Fifth St., was held this afternoon at Lester Smith & Son Funeral Home, with burial in Imlay Township Cemetery. He died suddenly Saturday.

Virgil S. Cummings

GOODRICH — Service for Virgil S. Cummings, 66, of 11119 Green Rd., will be held at 2 p.m. Thursday at the C. F. Sherman Funeral Home, Ortonville, with burial in Goodrich Cemetery.

Mr. Cummings, a supervisor of Atlas Township for the past 14 years, was stricken by a heart attack last night. He died at his home early this morning.

Guilty Plea Entered to Narcotics Charge

Charged with possession of a marihuana cigarette, John Upshaw Jr., whose address is unknown, pleaded guilty yesterday at his arraignment in Oakland County Circuit Court.

Judge Frank L. Doty will sentence Upshaw May 28. Upshaw was returned to Oakland County Jail under bond of $2,500.

Royal Oak Man Mute on Court Arraignment

Charged with driving away another man's car May 7 in Royal Oak, Anthony Prano, 2204 Kenneth Ave., Royal Oak, stood mute at his arraignment yesterday in Oakland County Circuit Court.

Judge Frank L. Doty entered a plea of innocent for Prano, who is in jail awaiting trial under bond of $2,000.

Warren Dewitt Mute on Driving Charge

Warren Dewitt of 169 Mill St., charged with second-offense drunk driving, stood mute yesterday at his arraignment in Oakland County Circuit Court.

Judge Frank L. Doty entered a plea of innocent for Dewitt and continued his bond of $500.

Detroiters Sentenced to 2-Year Probation

Jackson H. Allington, 39, of 13343 Prest Ave., Detroit, was sentenced to two years' probation and payment of $100 court costs yesterday by Oakland County Circuit Judge Frank L. Doty.

Allington had pleaded guilty to indecent exposure April 30.

Jackson Prison Terms Given 4 in Robbery

Four men who had pleaded guilty May 1 to the armed robbery of a Hazel Park woman were sentenced to prison terms of 5-15 years yesterday by Oakland County Circuit Judge Frank L. Doty.

The four, who netted $103 from the woman at the points of two hunting knives and a plastic pistol, are Louis Mallat Jr., 21, of Birmingham, and Frank Mallat, 20, Ronald Gregory, 20, and John R. Panzo, 18, all of Detroit.

Given 2-Year Probation

Robert Russell McCallum, 26, of 640 E. Columbia Ave., who was found guilty by a Circuit Court jury May 2 of assaulting a Pontiac woman with intent to rob her, was sentenced yesterday to two years' probation and payment of $150 court costs by Judge Frank L. Doty.

City Resident Sentenced

Robert L. Carson, 35, of 39 Chapman Ave., who pleaded guilty April 30 to carrying a concealed weapon in his car April 3, was sentenced yesterday to payment of $100 court costs or 90 days in jail by Oakland County Circuit Judge Frank L. Doty.

Bermuda has been under the British flag since its first settlement in 1612.

Automation in the Kitchen May Change Eating Habits

ANN ARBOR (AP)—With automation in the kitchen, Michigan housewives are going to have to be careful with the foods they eat, a University of Michigan publyic health nutritionist said recently.

Many of them haven't changed their eating habits to keep place with changes in their way of living. The caroric requirements for many housewives has been lowered.

Associate Prof. Adelia M. Beeuwkes told the 24th annual Adult Education Institute that the housewife in the pushbutton kitchen is going to get fat unless she reducer her caloric intake.

"Once her children have grown up," Prof. Beeuwkes said, there's very little to keep the housewife active. Yet it's awfully hard for her to give up pies, cakes and goodies once she's grown accustomed to them."

WATCH CALORIC DIET

When she starts reducing her calories, the housewife has to be extra careful to make sure she gets all her vitamin and food needs.

Prof. Beeuwkes said this is especially true with those housewives who use a lot of pre-cooked, enriched and fortified convenience foods which need little kitchen preeparation.

Many of these foods, she said, have a high carbohydrate content to insure long "shelf life" in the grocery.

The other elements of a well-balanced menu must be included, she said. The housewife must not forget adequate milk products, meat, fish, eggs, poultry, fruits and vegetables, iodized salt, whole grain or enriched cereals of butter.

The housewife who's already starting the fight in the battle of the waistline shouldn't give in to food fads and blitz diets, the professor said.

"I nmost cases, fad foods are a waste of money and their use may delay needed medical treatment," she said.

Blitz diets often give the appearance of rapid weight loss by changing the water balance in the body. This is only temporary, Prof. Beeuwkes said.

Four UF Officials Attending Session

Four members of the Pontiac Area United Fund Committee are representing the city at Lansing today at the annual meeting of the Admission and Budget Committee of the Michigan United Fund.

The delegation includes: Mrs. Charles W. Neldrett, 62 Mariva St.; Marshall E. Smith, Waterford Township; W. A. Hedgecock, of Birmingham; and Dick M. Kirby, of 91 N. Edith St.

The four will join representatives from other state communities in deciding on the division of more than $3 million among the 32 health and welfare agencies which are members of the Michigan United Fund.

Also attending the two-day meeting as staff representatives of the Pontiac group are Karl W. Bradley, 66 Bloomfield Terrace, and Simon O'Shea of Mt. Clemens.

Earnings

NEW YORK (INS)—Greyhound Corp. reports for the quarter ended March 31 a net loss of $240,902. This compared with net income of $896,402, equal to eight cents a common share, in the same period last year. Operating revenues increased to $48,360,779 from $47,276,371 in the initial three months of 1955. Arthur S. Genet, president, said the loss in the March quarter reflected increased operating expenses due to higher wages, material costs and depreciation.

NEW YORK (INS)—Bendix Aviation Corp. announced net income for the quarter ended March 31 of $4,274,906, equal to 91 cents a common share. This compared with $6,981,479, or $1.53 a common share, in the same period last year. Sales declined to $144,652,877 from $151,837,685 in the initial quarter of 1955.

NEW YORK (INS)—Texas Gulf Producing Co. reported net income for the quarter ended March 31 of $1,727,493, equal to 48 cents a common share. This compared with $1,854,924, or 51 cents a common share, in the same period last year. Revenues increased to $4,240,490 from $3,953,533 in the initial quarter of 1955. According to Lawrence O. Reed, president, larger dry hole costs accounted for the reduction in earnings.

DETROIT (INS)—The Michigan Consolidated Gas Co. yesterday reported a net income of $9,503,849 for the 12 months ended March 31. This compares with $7,384,044 earned by the firm during the previous 12 months.

DETROIT (INS)—The Detroit Harvester Co. reported yesterday a sales increase of $8,569,161, resulting in more than double the net profits for the six months period ended March 31 as compared to a similar period in 1955.

Card of Thanks 1

I WISH TO EXPRESS MY SINcere thanks and appreciation to my relatives, friends and visiting ministers for plants, flowers, cards, gifts and other acts of kindness while I was in the Lapeer County General Hospital and since I have been at home. All was greatly appreciated. Mrs. Roy Hotchkiss

WE WISH TO THANK OUR MANY friends and neighbors and relatives for their many kind expressions of sympathy during our recent bereavement. Mrs. Mary Wagner.

WE WISH TO THANK OUR friends, neighbors and also our many relatives for their kindness and expressions of sympathy in the loss of our beloved husband and father, Henry Brandon. Special thanks to the ladies of the First Nazarene Church and the Rev. Hutchinson for his comforting words.
Mrs. Affie Brandon, Mrs. Beatrice Watson, Mr. & Mrs. Donald Brandon and Mr. & Mrs. William H. Brandon.

In Memoriam 2

IN MEMORY OF OUR BELOVED husband and Dad, Adnah G. Howes, who passed away May 21st, 1955.
His life was full of kindly deeds,
A helping hand in all our needs.
A pleasant smile and heart of gold.
No finer husband and Dad this world could hold.
Sadly missed by his wife and children, Mrs. Adnah G. Howes and families.

ONLY
DO YOU HAVE A LONG DRIVE INTO DETROIT EACH DAY? WOULD YOU LIKE TO WORK CLOSE TO HOME? HAVE MORE TIME FOR HUNTING AND FISHING, ETC.?
We have permanent positions for qualified leaders and die makers. Consider these points:
1. Stable, well established, but growing company.
2. Well diversified work not dependent on the auto industry.
3. Extremely good advancement opportunities.
4. Employe Benefit program.
5. Good Pay.
6. AND MOST IMPORTANT, we are large enough to have a steady program but small enough to CARE about the INDIVIDUAL and his job.
Please write Box No. 6 at the Pontiac Press giving your name, address, phone number and past work experience. Your present employer will NOT be contacted. Note: If you have friends who are QUALIFIED leaders and die makers, please suggest they contact us. Thank you.

ICE CREAM MANUFACTURING PLANT

With a trade name and product known throughout the entire Flint metropolitan area. Four large retail stores in present chain, including some of the most modern and superbly equipped dairy bar outlets in this part of the country. The retail division is efficiently operating on a 60 per cent gross profit basis, plus the very excellent wholesale manufacturing profit. Established in 1929 this business thrived during the lean years and now enjoys an outstanding volume of sales.
Practically unlimited potential for future promotion. Our industrial plants are expanding and this particular enterprise should reach an all time high. In our opinion this represents the tops in a gilt-edged business investment, $20,000 down to handle, either cash or real estate equities. To see this business in operation phone owner collect Flint CE 4-4323 for appointment

HUGE FARM MACHINERY INventory reducing sale through May 31st, 1956. Everything and anything in stock, new or used will be offered during this period on first come, first served cash and carry basis. Discounts from 20 per cent to 80 per cent from regular prices. Save at least $200 on a thousand dollar purchase. No trade-ins during this period. Practically every farm tool used in this territory is included in this sale, both new and used; thirty-two tractors included. This is no gag, but the rarest opportunity to choose from the largest stock of new and used farm machinery and equipment in Michigan. No reservations except parts in bins and parts for complete machines. Come prepared for the buy of a life time. This sale climaxes twenty-two years of service in the Ortonville community. We expect to continue to serve. DAVIS MACHINERY CO. John Deere and New Idea Dealers Ortonville. Phone 45R2

5:30—(4) Long John Silver.

McGuire Girls Settle Lawsuit

Televiewers May Get Chance to See the Play 'Waiting for Godot'

By JACK O'BRIAN

NEW YORK (INS) — The Gleason fall show will go back to a full hour of variety, CBS has agreed.

The McGuire sisters ducked their $50,000 suit by agent Matty Rosen, settling for $8,000 . . .

Matty's the fella who got them on the Godfrey show and then got lost in the traditional shuffle . . .

The play "Waiting for Godot" has been signed for a Columbia long-play record and may turn up as a TV spectacular. TV viewers could then see one of the great comedy performances of the season — Bert Lahr's . . .

TV's best actor, E. G. Marshall adds his expert best to "Godot's" magnificent gibberish . . .

Lee Ann Merriwether, last year's Miss America, passed her Warners test with flying femininity. (She's Garroway's TV gal every day.) Soon as NBC and Warners get together on which gets Lee when, the deal will be announced.

PEARL TO APPEAR

Pearl Bailey did so well on the last Bob Hope show that she'll be on the next (May 22) . . .

CBS source says Noel Coward will become a TV "consultant" . . .

Jo Stafford signed a $500,000 contract with Columbia records — through May 1961 . . .

Doris Day and Columbia may soon stop haggling and announce a long-termer . . .

Desi Arnaz and Oron Welles decided against their previously publicized plans for an hour TV series.

'SNOOKS' AGAIN

NBC's having its umpteenth try at shaping "Baby Snooks" to TV . .

Ken Murray's and Eddie Fisher's "long-term" pacts are for one year each; options cover renewals.

The Woolworth Hour (CBS radio) was renewed for 52 more Sundays.

Ed Wynn's TV magic show has disappeared from CBS plans.

Jack Carson's brilliantly nasty role as the press agent in "A Star Is Born" wins him a similar stint in an upcoming Playhouse of Stars celluloid . . .

Ozzie and Harriet's ABC-TV pact has three unbustable years to go. It's still one of the warmest, nicest TV chuckklers . . .

Reuther Seeks Contract in Europe Auto Plants

NEW YORK (AP) — Victor Reuther, assistant to President Walter Reuther of the United Auto Workers, left for Paris last night for a meeting of the International Metal Workers Federation.

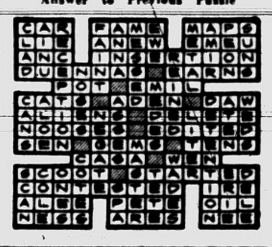

Reuther said the main topic at the meeting would be the adoption of a 40-hour week in overseas Ford and General Motors plants.

He said the federation also would seek "unified conditions" throughout the overseas plants.

McNamara Aide Dies

WASHINGTON (AP) — David P. Connery, administrative assistant to Sen. Patrick McNamara (D-Mich), died of cancer at the National Institute of Health Sunday night.

Answer to Previous Puzzle

Security for You

Facts on Social Security Retirement and Pensions

By RAY HENRY
AP Feature Writer

Most women who work before they're married or during the early years of their marriage don't work long enough to earn Social Security benefits.

* * *

The reason is that, to qualify, such women generally must work at least 10 years and pay into Social Security during the entire time. Most of them don't.

If you were a working gal once and now are a housewife, this doesn't mean that you're treated any differently than men under Social Security. The rules are about the same for everybody. They're just slanted in favor of persons who've worked a long time and who have paid more or less continuously. Most men do this.

Of course, most of you wives who were working girls once yourselves are still eligible for benefits bases on your husband's payments into Social Security. Chances are you're eligible for wives', widows' or mothers' payments. But that's another story.

As a working girl, the benefits you may have earned fall into two catagories: Death benefits and retirement benefits.

* * *

DEATH BENEFITS—These are two types of payments which may be made to your survivors when you die. They are: (1) a lump sum ranging from $90 to $255—the amount depending on how long you paid into Social Security and your average monthly earnings—and (2) monthly payments made to any surviving children, until they reach 18.

These benefits will be paid to your survivors if you worked 18 of the last 36 months before your death and paid into Social Security during that time; or if you worked for a total of 10 years and paid into Social Security during the entire time.

Note that payments are allowed to your children under 18 when you've paid into Social Security for 18 months of the last three years before your death. This results because the Social Security law says a mother is presumed to be contributing to a child's support if she had worked so recently prior to her death.

* * *

Thus, as dependents, the children are eligible for the payments. However, when you've been away from a paying job for three years, you're no longer considered to be helping to support the children and their eligibility to monthly payments is lost.

RETIREMENT BENEFITS — These are monthly payments which may be made to you when you reach 65. Depending on how long you worked and your average monthly earnings, your payments could range from $30 to $108.50 a month.

* * *

To be eligible, you must have: (1) Worked under Social Security for at least 10 years, or, (2) Worked under Social Security at least half the time between Jan. 1, 1951, and the date of your retirement.

* * *

Unless you can meet one of these two tests when you reach 65, no retirement benefits will be due you because you haven't paid into Social Security long enough.

* * *

Even if you can qualify under one of them, the payments will probably be small. Chances are it will pay you to collect only if your husband is entitled to no Social Security retirement benefit or if the payments due him are small. Otherwise, you'll be able to get more as his wife than you'll be eligible to collect on your own work.

(You may write Ray Henry in care of this newspaper about your Social Security or retirement problem. Please enclose a stamped, self-addressed envelope and 25 cents in coin.)

Tax Case Hears 'Wire Tap' Talk

Telephone Call Shows Connolly Used Position to Influence Court

ST. LOUIS (AP)—The government has introduced evidence that Matthew J. Connelly, calling as a White House secretary, informed a high tax official that "we know" Harry I. Schwimmer, attorney for an income tax evader.

• • •

Connelly yesterday was confronted with transcriptions of telephone calls the government said he made to the Internal Revenue Bureau.

The transcriptions were introduced at his trial on a tax-fixing charge.

FRAUD COURT

Accused with Connelly are T. Lamar Caudle, former head of the Justice Department's Tax Division, and Schwimmer, an attorney for Irving Sachs, St. Louis Shoe manufacturer fined $40,000 for tax evasion in 1951.

They are charged with conspiring to defraud the government by fixing the Sachs case.

A transcription of a phone call to Charles Oliphant, then chief counsel of the Internal Revenue Bureau, was introduced to show Connelly had called from the White House Aug. 10, 1948, to say:

"I understand Harry Schwimmer of St. Louis has a conference this afternoon. He asked me to call you and let you know we know him."

• • •

Also introduced was a transcription to show that on Aug. 16, 1949, Schwimmer had asked Oliphant to ask the Justice Department to "hold up" on the Sachs case.

Schwimmer said he had been "laid up," apparently a reference to a heart attack he had.

• • •

The government contends Sachs gave oil leases to Caudle and Connelly for their help in the case.

Happy Is The Day When Backache Goes Away . . . .

Nagging backache, headache, or muscular aches and pains may come on with over-exertion, emotional upsets or day to day stress and strain. And folks who eat and drink unwisely sometimes suffer mild bladder irritation ... with that restless, uncomfortable feeling.

If you are miserable and worn out because of these discomforts, Doan's Pills often help by their pain relieving action, by their soothing effect to ease bladder irritation, and by their mild diuretic action through the kidneys — tending to increase the output of the 15 miles of kidney tubes.

So if nagging backache makes you feel dragged-out, miserable, with restless, sleepless nights, don't wait, try Doan's Pills, get the same happy relief millions have enjoyed for over 60 years. Ask for new, large, economy size and save money. Get Doan's Pills today!

Broken Pacts Litter Road to Peace in Holy Land

UNITED NATIONS, N. Y. (AP) — The road to peace in the Holy Land is littered with broken resolutions and bullet-shattered pacts. It is lighted with a stubborn "let's keep trying" posture in the U. N. Security Council.

Members of that body soon will meet again — after more than 150 sessions on the Palestine problem — to see what can be done to make the latest cease-fire agreements endure.

• • •

The new cease-fire agreements were negotiated by Secretary General Dag Hammarskjold. If the council can make them effective, U. N. diplomats say, the stage could be set for real peace, either on a live-and-let-live basis or by actual treaty.

The "Palestine question" came before the council for the first time Dec. 9, 1947. It was in the form of a General Assembly resolution which prescribed partition for Palestine, setting up an Arab state, a Jewish state and an internationalized Jerusalem under a federated economic union, as soon as the British moved out.

ORIGINAL DISCARDED

The original resolution long since has gone into discard. The Arab countries killed the partition plan by invading the new state of Israel almost simultaneously with its creation. The question of an internationalized Jerusalem under a neutral governor was turned down both by Israel and by Jordan, which hold divided control in the Holy City as a result of the 1949 armistice.

Outstanding among broken resolutions — aside from a whole string of cease-fire orders that followed major clashes — are those dealing with Suez Canal shipping and the Jordan River diversion project.

These figured in Hammarskjold's negotiations. The Israelis wanted, as a condition to their cease-fire pledge, to cinch Egyptian obedience to a council order freeing the canal to all shipping.

Syria, Lebanon and Jordan have implied strongly that Israeli insistence on resuming the diversion of the Jordan River would affect their attitude toward future peace.

SUEZ CANAL INCIDENT

In the Suez matter, Egypt clamped down on Israel-bound ships. It was part of the economic war the Arab countries waged on Israel. Egypt argued in the council that Israeli ships could drop off saboteurs in the heart of Egypt. She argued she was still in a state of war with Israel and self-preservation guided her acts.

The council voted Sept. 1, 1951, to ask Egypt to keep the canal open. The Russians abstained that time. But in March 1954 the Russians vetoed a New Zealand resolution which would have reaffirmed the free seas stand and found Egypt guilty of breaking the council resolution.

The Jordan Valley situation is even more complicated.

• • •

In October 1953, Syria complained that Israel intended to change the bed of the Jordan River and divert its waters from the demilitarized zone into Israel-proper. The demilitarized zone lies entirely on the Israeli side of the Israel-Syria demarcation line. This threatened to cut down on water for irrigation for Syrian farms, and breached the armistice agreement by using demilitarized areas, the Syrians contended.

Israel said most of the proposed canal between the Jordan and the Sea of Galilee would be west of the zone, that its water would power a station in Israel, and that the water would then pour back into the Jordan Valley. Israel denied any military maneuver in the act.

PROJECT SUSPENDED

The Security Council adopted a resolution Oct. 27, 1953, calling unanimously on Israel to suspend its work on the project during an "urgent examination" by the Security Council. The resolution noted with satisfaction that Israel had offered, during the debate, to suspend the work for an investigation.

• • •

The dispute dragged through 25 more council meetings. On Jan. 22, 1954, the council came to a vote on a U.S.-British-French resolution which would have given the truce supervisor, then Danish Maj. Gen. Vagn Bennike, the deciding voice on whether the demilitarized zone could be used for the project, whether the project was valuable for the area, and whether it held the dangers portrayed by Syria, Jordan and Lebanon. Lebanon was then the Arab League member on the council.

• • •

After the United States included a new paragraph saying that the resolution would not change the meaning of the armistice agreement, the resolution was voted 7-2-2. But Lebanon and the Soviet Union voted against it and the Russian vote was a veto. The Russians argued that the resolution gave the truce chief too much authority and did not insist on Syrian agreement to the project.

The Israelis now say that no council mandate exists covering the project because the Russians vetoed it. Therefore, they say, with seven council members in favor of the project, they have every right to resume the project at any time.

Buddy Poppy Drive Planned for 3 Days

The Pontiac Veterans of Foreign Wars Post 1370 will conduct its annual Buddy Poppy campaign May 24, 25, and 26, it was announced today by chairman Leonard Guilds.

• • •

The sale is conducted each year to benefit the area VFW rehabilitation program. A new innovation planned this year by the Buddy Poppy committee will be to contact all industrial and business firms personally.

• • •

Chairman Guilds said that thousands of dollars in tax money are being saved each year by area citizens through this rehabilitation work.

• • •

The chairman warns all citizens to closely check poppies for the official copyrighted VFW steamer labeled "Buddy Poppy" before making any donation.

Now, That's Fast!

OMAHA (AP)—Modern warfare is getting quicker than the eye, says Capt. H. E. Ramsden, optometrist at Strategic Air Command. Two high-speed aircraft, coming out of the clouds half a mile apart, can crash before the pilots can see and recognize the other and turn their planes, he told the Nebraska Optometric Convention.

Some of the world's most famous glaciers are located in Alaska and Switzerland.

Pepper is considered the most valuable spice.

TODAY'S ASSIGNMENT FOR:

JUNIOR EDITORS

STORIES IN THE STARS — 3

Orion the Hunter

Brightest of all the constellations in the sky is Orion the Hunter.

The Greeks admired a fighter, and they imagined Orion striding across the heavens, a club in his upraised right hand, a lion's skin as a shield on his left, a fine belt of stars around his waist and a star studded dagger.

Lepus the Hare, at his feet, is fleeing from him. Following close behind Orion is his big dog, Canis Major. In the dog's head is Sirius, the brightest star in the sky.

Color this picture with crayons, and then paste it on thin cardboard. With a large pin prick out each outlined star until the whole picture to a strong light, and you will see the constellation of Orion is pricked away. Punch small holes in the small stars. Then hold the the Hunter. The three stars of Orion's belt help you locate this constellation in the sky.

You can hang up this picture by putting a string through the holes in the circles at the top, or you can fold back the panels at the lower corners and it will stand.

(This idea was first submitted by Richard Walters, Dayton, Ohio. If you have an idea for Juniors, send it in care of this newspaper and it may be worth $10 to you. Violet Moore Higgins; AP Newsfeatures.)

Tomorrow: The Bears.

Stop Pain of Piles! Stop It Today At Home —or money back!

An amazing new, stainless compound has been developed to treat torture of simple piles at home. It's called stainless Paso®, and brought *instant relief* in doctor's tests: internal and external relief!

No other preparation offers such proof of results. Many who suffered for years now enjoy real comfort. Here's why. Paso combines 6 medically-proved ingredients, including wonderful Triolyte, not contained in any other leading pile preparation. This amazing substance has remarkable *anesthetic* action that stops pain and itching *instantly*... while the medication goes to work reducing the swelling, promoting healing!

Get new stainless Paso®. Won't stain clothes. Modern suppositories or ointment both at druggists!

®Trademark of Grove Laboratories, Inc. Ointment and Suppositories.

Thanks To Trucks, You're Always On The Main Line!

You're looking at the main street of a tiny village up in the Thumb—but from one standpoint it isn't any different from *your* main street, or the general store where *you* shop.

The one thing they have in common is that both depend on motor transport to keep their shelves and counters filled with a wide variety of merchandise.

That's a tractor-trailer you see pulled up in front of that food store and after it makes its delivery of canned goods, vegetables, and other good things to eat, it will move on to another merchant down the road a few miles.

Trucks provide the only freight transportation which reaches *all* of Michigan—bringing merchandise and materials to every Wolverine household, farm and business concern, no matter how far off the beaten path it may be.

Yes, thanks to trucks you can live or do business anywhere you wish in this great state of ours and still be on the main line!
