Roundabout closed for repaving May 18-July 10

The roadway at the main entrance at University Drive and the traffic circle (roundabout) is scheduled to be repaved. This will close access to the University at the intersection of University Drive and Squirrel. In addition, north and south bound Meadow Brook Road traffic through the circle will be redirected.

The work is scheduled to start on Monday May 18 and be completed by Friday July 10.

Signage will be installed to redirect traffic to enter and exit through Parking Lot P-1 off Squirrel or at Pioneer Drive.

Call Diane Bruglio at (248) 370-2160 with questions or concerns.

SUMMARY

The roadway at the main entrance at University Drive and the traffic circle (roundabout) is scheduled to be repaved. This will close access to the University at the intersection of University Drive and Squirrel.
