Load It for Me Boys, I'm Tired

ON GUARD AGAIN — The statue of a Union veteran has his rifle restored after several years by Pontiac Patrolman Melbourne Griffin, assisted by Sgt. Fred Goines, left, and Officer William Bailey. The rifle was stolen by vandals several years ago and found Friday night—along side a road by two Waterford Township police officers.

Stony-Fisted Vet Armed and On Guard
Rifle Issued to Civil War Hero

By HAROLD S. COHEN

Pontiac's Civil War hero is armed again after several years of facing south and awaiting the enemy with his bare fists thrust forward as his only defense.

The hero is a statue of a Union Veteran erected in 1927 at the corner of Oakland and Saginaw streets by the Daughters of Union Veterans.

This morning a contingent of police officers replaced the ancient rifle stolen from the statue's hands by vandals, and the soldier is once again on guard in the little triangular park in which the memorial stands.

The rifle was found by patrolling Waterford Township officers last Friday night lying on the shoulder of a road, apparently heaved out of a passing car.

Still missing is the bayonet, with only an empty scabbard to show it was ever there.

★ ★ ★

The monument, now the property of the Veterans of Foreign Wars, was the scene of a near renewal of the Civil War two years ago.

Low of 45 Tonight,
Rain or Drizzle

Rain or drizzle is the forecast for the Pontiac area tonight. There will be little change in temperature. A low of 45 is expected. Tomorrow will be cloudy with occasional rain and a mild high of 50.

In its five-day forecast, the U. S. Weather Bureau says temperatures will average around six degrees above normal. The normal high will be 47 and the normal low 33. Rain amounting to one-half inch is expected Thursday, Friday and Sunday. Saturday will be mild and the warmest day of the week.

Forty was the lowest recorded temperature preceding 8 a.m. in downtown Pontiac. At 1 p.m. the reading was 49.

City Asks U.S. to Back Urban Renewal Project

General Motors Offers to Return 9 Million Profits

Corporation Reverses Earlier Stand in Dispute on Air Force Contract

NEW ORLEANS — Rep. F. Edward Hebert (D-La.) announced last night General Motors Corporation has offered to return to the Air Force over half of an alleged \$17 million "excess profit" earned on an airplane construction contract.

Hebert, chairman of a House "watch-dog" subcommittee on government expenditures, said GM's offer was a "complete reversal" of its position that it was not obliged to return any part of the \$17 million the Air Force claimed the company received in excess of the normal profit due under government contracts.

GM's offer to return \$9,700,000 as a compromise to settle the dispute was contained in letters written by GM Vice President John F. Gordon to Maj. Gen. William T. Thurman, Air Force deputy director at Wright-Patterson AFB.

One of the letters dated Oct. 29, 1956, stated that GM agreed to refund \$4,100,000 to the Air Force "as a matter of principle."

In a second letter dated Nov. 1, 1957, the company stated it was willing to return an additional \$5 million.

The latest offer came on the heels of a request by the government's general accounting office that the justice department consider whether the company had committed fraud. The company maintained the charge was "unwarranted."

★ ★ ★

GM's alleged "excess profits" on the contract came to light last year in an investigation by Hebert's committee during which it was charged that GM had realized a profit of 5.4 per cent, after taxes, on a contract to construct 599 F84F fighter planes.

TWICE NORMAL PROFIT

The committee maintained that this was twice the normal profit (Continued on Page 2, Col. 6)

Ike Will Outline Program Tonight

WASHINGTON (AP) — President Eisenhower will outline tonight his program for training more American youths as scientists in the space era struggle against Russia.

Some key scientific advisers to the President reportedly have suggested to him that the federal government grant scholarships to promising students as an incentive. But the White House declined advance discussion of what Eisenhower will recommend.

For tonight's coast-to-coast television-radio address, the second in a "chins up" series, the President travels by plane to Oklahoma City.

The speech will be carried live at 10:30 p. m. EST. by NBC-TV and all four major radio networks. ABC and CBS television will carry the address from film at 11:15 p. m.

Eisenhower will speak at Municipal Auditorium in connection with Oklahoma's "Arrows to Atoms" 50th anniversary of statehood. He plans to start back to Washington by plane immediately after the speech.

Cool and cloudy weather may cut down the crowds greeting President Eisenhower on his six-hour visit in Oklahoma City today.

Local officials planned to meet him at Will Rogers Airport and join the motorcade downtown, led by the President in his White House limousine with the plastic bubble top.

Oakland Traffic Takes 2 Lives

Collision in Southfield Kills Woman; Oxford Pedestrian Dies

Two traffic fatalities were recorded in Oakland County yesterday, one as the result of a collision in Southfield Township and the other a pedestrian accident in Oxford.

Dead are Cathrine Tink, 47, of 8060 Molena Ave., Detroit and William Poss, 83, a resident of the Bliss Convalescent Home, Oxford.

Mrs. Tink died in William Beaumont Hospital from injuries received in a collision at 10-Mile and Southfield Rds., said Southfield Township Police.

Earl Burken, 55, of 21908 Dequindre Rd., Warren Township, was the driver of the other car. He is to appear before Oakland County Assistant Prosecutor William Lang today.

Emil DuRoska, 44, of 18156 Kirkshire Rd., Southfield Township, a passenger in the Tink car, was treated for minor injuries and released.

Poss was reported by Oxford Police to have walked in front of a car driven by Laurence C. Maury, 66, of 58 Oakdale Rd., Pleasant Ridge. He was admitted to Pontiac General Hospital at 5:10 p.m. and pronounced dead of a fractured skull and concussion at 6:45.

PRESIDENT GARCIA

Lead Widens Favoring Garcia

President Holds 40 Pct. of Votes in 5-Man Race; Running Mate Losing

MANILA (AP) — President Carlos P. Garcia widened his lead in Philippine presidential election returns today, but his running mate trailed far behind a popular former congressman and diplomat.

Garcia, 61-year-old Nacionalista party candidate and political heir of the late Ramon Mag-saysay, moved well ahead of Liberal party candidate Jose Yulo, 63-year-old sugar king. Garcia was winning almost 40 per cent of the votes in the five-man race.

In the vice presidential race, Diosdado Macapagal, a Liberal, piled up an overwhelming lead over House Speaker Jose B. Laurel Jr., the Nacionalista nominee and member of one of the Philippines' leading political families.

★ ★ ★

With Garcia and Macapagal victorious, the Philippines for the first time would have a president and vice president of opposing parties. Both favored continued strong cooperation with the United States.

Grant of \$1.7 Million Would Pay Two-Thirds of Clearance Plan

The City of Pontiac will ask the federal government to earmark \$98,000 in order that a detailed survey and plans may be made of the city's first urban renewal project.

The City Commission authorized the filing of an application for a capital grant of \$1,705,346, with the \$98,000 to be an advance so the city's planning consultant David S. Zeer of Birmingham, may proceed with planning.

The area pinpointed for this first project is bounded roughly by Osceola on the south, the Grand Trunk railroad tracks (paralleling Saginaw) on the west, Pike on the north, and Paddock on the east. It is a 155-acre parcel to the south of the City Hall.

Mayor William W. Donaldson told those in the commission chambers last evening that the program would not mean that all structures in this area would be razed. City Manager Walter K. Willman agreed.

"Many of the homes in the area won't be touched," Willman said. He added that actual work on the project will not begin for at least two years.

JUST A STARTER

"This action tonight just gets our program before the federal government," declared District 4 Commissioner Floyd P. Miles.

The City Planning Commission had approved the program at its Nov. 6 meeting.

★ ★ ★

The plans, as formulated by the Birmingham firm, will go before (Continued on Page 2, Col. 1)

Trowel Work Begins New Post Office

BUILDING STARTED — Congressman William S. Broomfield (R-Royal Oak) and Acting Postmaster Leslie H. Dean Sr. (left to right) add several bricks onto the now under construction \$850,000 post office expected to be ready this spring. Retired Congressman George A. Dondero (R-Royal Oak) standing next to Dean and Walter K. Willman, city manager, were also present at the official post office groundbreaking ceremony yesterday afternoon.

Dems, GOP Differ Sharply on Reasons
Why Is Industry Moving From State?

(Second in a series of articles on taxes and industry.)

By ROGER LANE

LANSING (AP) — When people from Maine to California buy automobiles like hotcakes, things hum in Michigan.

To an extent unparalleled in most other states, the Michigan economy is dominated by a single industry—automobiles.

SHOPS SHIVER

When car sales drop off even moderately, the impact on the state is sudden and hard. Shivers run through parts and accessories plants, machine shops and a maze of specialized little enterprises clustered around the automotive giant.

Automotive wage rates, which set the pattern for the entire complex, are high. Accordingly, Michigan manufacturing wages last year were the highest in the nation.

The weekly average of nearly \$35 was more than \$8 ahead of Illinois and Indiana and over 50 per cent higher than in some Southern states.

The United Auto Workers, a union disciplined, aggressive and powerful enough to talk back to the powerful auto makers, has forced wages up.

UNION IS POWERFUL

As unions go, the UAW is tremendously powerful politically. Under the leadership of Walter P. Reuther, it has marshaled its forces—over one half a million strong in Michigan—directly behind Gov. G. Mennen Williams and the Democrats.

Many of the 156,000 industrial jobs which Michigan lost between mid-1953 and mid-1957 were UAW-filled jobs.

About 61,000 of those lost jobs disappeared with the demise of the Kaiser-Frazer, Hudson and Packard Auto companies, and 16,000 more with the shutdown of other plants in the Detroit area.

Kaiser-Frazer went out of the auto business. The other two merged with auto makers in Wisconsin and Indiana.

What of the other jobs that were lost, or the new jobs that went to states other than Michigan?

★ ★ ★

The governor explains it this way:

1. FEDERAL DEFENSE policies. A Michigan Employment Security Commission analysis shows that in the last four years, 123,000 jobs, or about 80 per cent (Continued on Page 2, Col. 4)

Christmas Club Checks to Be Mailed to 13,000 in Pontiac Area

Paying for those many Christmas gifts won't be much of a problem for more than 13,000 persons who participated during the last year in local bank and credit union Christmas Club saving plans.

Officials of Community National Bank, Pontiac State Bank, Pontiac Federal Savings & Loan Assn., and General Motors Truck & Coach Employees Federal Credit Union announced today payments totaling \$1,126,842 to 13,694 persons who took part in the year's program.

There were 8,561 persons in the Community National Bank plan. Checks totaling \$704,757 will be mailed Nov. 16.

On the same day Pontiac State Bank will mail out 4,356 checks amounting to \$337,110.

Checks went out today from Pontiac Federal Savings & Loan Assn., offices to 652 persons. The checks totaled \$39,175.

In its first year of operating a Christmas Club plan, the GMC Truck & Coach credit union will make payments beginning Friday of \$5,800 to 125 employees.

City Asks U.S. Fund for Urban Renewal

(Continued From Page One)

the Housing and Home Finance Administration in Washington, D.C.

It is expected to be at least three months before the city learns of the government's answer.

Overall cost of this initial project is estimated at \$4,030,372. This includes property acquisition, site improvements, relocation and miscellaneous costs.

Taking into account selling the cleared property back to commercial and residential developers, the net project cost would amount to \$2,538,019.

The grant of \$1,705,346 represents the federal government's two-thirds participation in the program. The city's one-third share of \$852,673 is expected to be credited against public improvements planned for the selected area.

By E. H. SIMS

How far from the earth does the "air ocean" extend? The air ocean, as we call it, extends from the surface of the earth no further than two hundred and fifty miles. Many people think that the air ocean extends into outer space only a few miles. Experts say 150 to 250 miles.

This belief has been built up because all life exists from 15,000 feet (approximately) and about 10 feet below the surface of the earth. Much has been written about this and because no form of life survives beyond about 15,000 feet, some assume no air exists much beyond that point, or beyond the limits of weather.

On the contrary, air does exist, and extends outward for many miles. That is why an earth-circling satellite must be pushed so far out into space. It must orbit beyond the thinnest outer reaches of the air ocean to escape friction and the pull of gravity.

COURT OF HONOR — Eight-year-old Sayuri Peck, Miss Torch and Feather reigned over the report luncheon for campaign workers held yesterday by the Pontiac Area United Fund. With her are members of the Land-O-Lakes majorette group which performed between reports. From left, are Kay Scharing, Cathy Berbeck, Sue Amaugher and Shiria Scharing.

Adlai States He May Go With Ike to Paris Meeting

WASHINGTON (AP)—Adlai Stevenson held out the possibility today he may accompany President Eisenhower to a Paris meeting next month designed to increase Allied cooperation.

An error by James C. Hagerty, White House press secretary, brought on the uncertainty which both Hagerty and Stevenson later sought to clarify.

Even in the limited advisory role, officials let it be known that Stevenson could go with Eisenhower and Dulles to Paris if he chose to.

In New York last night, he said whether he would go would depend on the shape of the U. S. proposals.

Grant Postponement in City Hospital Suit

Another postponement was granted today in the show cause hearing in the suit of six Pontiac General Hospital doctors against hospital surgical regulations.

Circuit Judge Clark J. Adams moved the hearing up to 9:30 on Nov. 21 in order that attorneys for the hospital and medical staff might have more time to prepare their cases.

Probers Turn Attention to New Garbage Scandal

WASHINGTON (INS) — The stench of a big garbage collection scandal arising from New York's plush Nassau County captured the attention today of Senate rackets probers.

The rackets committee, which yesterday unfolded a lurid tale of union violence and murder in a struggle by hoodlums to control refuse hauling in wealthy suburban Westchester County, turned today to an equally odorous situation at Mitchell Air Force Base and Manhasset's swank "Miracle Mile."

Stephen Spak, who identified himself as a garbage man in Yonkers, N. Y., was one witness yesterday who refused to answer questions before the investigating committee, on the grounds his answers might incriminate him.

Committee counsel Robert F. Kennedy said testimony today would spotlight attempts by underworld figures to "rig" bids on contracts to cart garbage away from Mitchell Field.

He said witnesses also would reveal intimidation of "Miracle Mile" shop keepers by corrupt union officials.

Slated to testify were John Montezano, former vice president of the inter-county cartmen's association; his brother, Anthony Montezano, and eight or nine other witnesses.

Kennedy said the committee also expected for the first time to get into the actual activities of Vincent J. Squillante, described as the czar of a business empire that wrenched a "stranglehold" on the multi-million dollar New York garbage collection industry.

Squillante, a close associate of murdered gangster Albert Anastasia, was listed by committee chairman John McClellan (D-Ark.) yesterday as an individual who—aided by both labor and management—squeezed all competition out of the refuse pickup field.

Witnesses said trucks were burned, garbage pick-ups were halted at Bronx and Manhattan stores, and threats were made on lives when they refused to go along with demands of Local 813 and the Westchester Carting Company to rule trash hauling in the Yonkers area.

NO COMMENT — Identifying himself as a Yonkers, N. Y., garbage man, Stephen Spak took the stand yesterday in a Senate Rackets Committee hearing in Washington. Spak refused to answer the committee's questions on grounds his answers might tend to incriminate him.

LeMay Seeks Jet Record

By VERN HAUGLAND

ABOARD KC135 — Gen. Curtis E. LeMay lifted his record-setting KC135 jet Stratotanker off Buenos Aires' Ezeiza Field early today in quest of a possible inter-American jet speed record.

The Air Force vice chief of staff and 22 other persons left Buenos Aires about 4:28 a.m., EST.

A Buenos Aires-Washington speed record appeared to be in the making.

Maintenance crews worked nearly through the night preparing the four-jet tanker for the takeoff.

LeMay charted a nearly direct course for the approximately 5,000 miles to Washington on his way home from a quick visit to Argentina's National Aviation Week and a call on Provisional President Pedro Aramburu.

Air Force officials estimated that the trip back would take about 11 hours. LeMay flew south yesterday from Westover Air Force Base, Mass., in 13 hours, 2 minutes, 51 seconds.

On the trip down the Air Force vice chief of staff skirted Brazil, flying over the Atlantic to add about 600 miles to the trip. It set

a distance record of 6,325 miles for an officially recorded nonstop, nonrefueled jet flight.

The trip south at an average speed of 485 miles an hour did not set an official speed record, however, because the International Aeronautical Federation recognizes only speed tests from one national capital to another.

Why Is Industry Leaving State?

(Continued From Page One)

of the net total, were lost because defense contracts were cut. Where Uncle Sam used to pour billions into trucks, autos and tanks, he now has diverted the money to missiles, aircraft and electronic production in other states — especially California, Ohio and New Jersey.

2. DECENTRALIZATION of the auto industry. For national defense, markets, transportation and other reasons, the auto makers — like other big industrialists — have found it wise to spread out as they expand.

3. AUTOMATION. Big technological advances always have eliminated jobs in the beginning. Williams says the effect in highly industrialized Michigan has been considerable. There are no accurate figures.

4. OBSOLETE PLANTS in Detroit, industrial hub of the state. Combined with other factors including high local real property and inventory taxes in the city, this has brought pressure for some industry movement.

The Republicans, of course, have a vastly different version. Early in the controversy they toned down their blasts on state tax policies, perhaps mindful that the Republican Party, with unbroken legislative control for 20 years, would have to share any blame for tax laws.

Instead, GOP orators increasingly flayed Williams for the "tax climate" or "political climate," broader terms taking in the governor's unfulfilled demands and his personal attitudes.

With businessmen, they bitterly denounced his 1957 demand for a corporation profits tax piled on top of the business activities tax and other existing levies.

The "climate" angle points particularly to the Williams-Reuther alliance.

Don E. Ahrens, GOP fund raising chief and a former General Motors vice president, recently referred to Reuther this way: "If they think business is moving out of Michigan now, and it sure as H— is, just wait until we get a graduated income tax which is what the guy wants who is running Michigan from Detroit."

(Next — Reuther and the Daisy troubles)

Missile Talk Slated

DETROIT (AP) — Maj. Gen. John B. Medaris, commander of the Army's ballistic missile agency at Huntsville, Ala., will address the Economic Club of Detroit Monday on "Where Do We Stand Now With Guided Missiles."

3 Bombers Fly Non-Stop 8,000 Miles

Jets to Manila in 17 Hours

MANILA (INS)—Three jet bombers swept 8,000 miles non-stop from California to the Philippines in little more than 17 hours today to show how swiftly the Air Force could reach the scene of any remote "small war."

The supersonic B66 Jets, capable of carrying nuclear bombs for the Tactical Air Command, landed at Clark Air Base at 3:41 P.M. (11:41 P.M. PST, Tuesday), 17 hours and 11 minutes after they left George Air Force Base, Calif. Their average speed was 530 miles an hour.

Police Seeking 2 Jailbreakers

One Youth Formerly From Southfield Area; Hunted at Cheboygan

A former Southfield Township youth and his companion today were the object of a police dragnet spread across the northern portion of the Lower Peninsula following a jailbreak in Cheboygan last night.

Identified as one of three inmates who sawed their way to freedom was Hubert McCurdy, 17, formerly of 20192 W. Hampton Rd., Oakland County officials said McCurdy had a long record of delinquency and was being held in Cheboygan as a fugitive from the Boys Vocational School in Lansing.

Identified as accompanying McCurdy in the jailbreak were Randy Tracy, 17, of Manistique and William Hitchcock, 19, of Lansing.

Cheboygan County Sheriff Harold Werner said Hitchcock was recaptured this morning by state police who spotted the three fleeing southeast of Cheboygan in a stolen car.

The search for McCurdy and Tracy centered in the Black Lake Forest area along Hammond Bay on Lake Huron.

Werner said the trio were not locked in cells in the jail and had freedom of the cellblock. They escaped by gaining access to the jail attic through a trap door in the ceiling and cutting through window bars with a hacksaw.

McCurdy was a "repeater" with a long record mostly for breaking and entering and larceny, said James W. Hunt, director of children's services for the Probate Court Juvenile Division.

After serving a number of times in Oakland County Children's Home, McCurdy was committed in June 1955, to the vocational school, Hunt said.

The home at the Hampton road address has since been replaced by a business establishment.

Carrier, 41 Planes Hunt Lost Airliner

HONOLULU (AP)—The Philippine Sea and its covey of planes today enter the critical area in their search for a Honolulu-bound Pan American airliner which vanished last Friday with 44 persons.

The big carrier, with 29 radar-tracking planes and 12 helicopters, completed the first full day of participation in the widespread search yesterday without a clue.

Its planes are covering a line 200 miles wide along the airliner's route. Four escort destroyers and two submarines range ahead and to the sides.

The airliner, Romance of the Skies, vanished Friday after sending a routine position report 1,028 miles east of Honolulu.

Beck Reports Increase in Teamster Members

WASHINGTON (INS)—President Dave Beck of the Teamsters' Union announced today that the union in October had 12,000 more members than it had a year before.

Beck declared that in August, September and October the union's average membership was 1,473,566 compared with \$1,422,441 for the same months of 1956.

He said the Teamsters have shown since 1952 an increase in membership over the corresponding month of the previous year.

The announcement was intended to show that the bad publicity which the union has received as a result of the Senate Rackets Committee investigation has not adversely affected it so far as membership is concerned.

Laika Never to Return

MOSCOW (INS) — Sputnik II and the lifeless body of the little dog Laika — first creature to travel in space — are "not to return to earth." This was announced by Prof. Vladimir Cherenkovsky, a member of the Academy of Medical Sciences in the U.S.S.R., in today's Moscow News.

State Democrat Dies

EAST LANSING (AP) — Charles E. Hayes, 74, a member of the Democratic State Central Committee here yesterday.

The Day in Birmingham

Eton Park Rink Opening Set for Thanksgiving Day

BIRMINGHAM — With the opening of the artificial rink at Eton Park scheduled for Thanksgiving Day, the Recreation Board is placing the emphasis on skating. This and swimming are the only board controlled winter sports operating independently of weather conditions.

Hockey players desiring to enter this year's competition must register with the Recreation Board not later than 5 p.m. Friday.

Ages of this group are 13 through 14 and 15 through 17. A "Hockey Clinic" will begin Nov. 25, with a special feature awaiting potential players between 9 and 12 years.

Skating instruction will begin at 10 a.m. Monday, at Eton Rink, continuing through Nov. 27.

Special sections listed are: instruction for pre-schoolers and mothers; teenagers; beginners; skate dancing; junior and senior figure skaters and speed skating.

Complete information on rink hours and prices is available at the Recreation Board office in the Municipal Building.

National Education Week at Derby School will include an open house at 8 p.m. tomorrow.

A planned program will permit parents to meet teachers, review the objectives of courses their children are taking, and make a complete tour of the school.

They are asking that prolonged teacher-parent interviews be avoided in order that all may have a chance to talk with the teachers.

Rejecting the lower bid, Birmingham City Commissioners have approved the purchase of a Leach rubbish loadpacer. The machine, mounted on a C-300 Ford chassis, will be purchased from Stark.

GM Offers Return of 9 Million Profits

(Continued From Page One)

due to the corporation under terms of contracts made with other airplane manufacturers.

The company stated it had agreed to build the planes under a fixed contract and "hence there was no contractual obligation to make a refund."

Hebert says an offer by General Motors to repay the Air Force more than half of \$17,459,200 constitutes a plea of guilty to misrepresentation and excess profits.

Hebert said a large part of the \$9,701,458 offer was conditional. It depended on a refusal by the Justice Department to press charges of fraud against the huge automobile firm.

The contract involved the construction of 599 F84F jet fighter planes by the company's Buick-Oldsmobile-Pontiac divisions.

General Motors made a profit of 11.6 per cent before taxes, Hebert said. He termed two million dollars of the profit overpricing by the corporation.

At Detroit, General Motors declined comment on Hebert's statement, but also made public the two letters sent by Gordon to Thurman.

Local News Called Most Important

EAST LANSING (AP) — Local news is still the most important item in the modern day newspaper, said Elmer E. White, executive secretary of the Michigan Press Association.

That's why techniques of reporting city government and municipal affairs will headline the sixth annual Community Newspaper Conference Friday and Saturday at Michigan State University, White explained.

"Even in this age of spectacles and mutinies, the first obligation of the newspaper is to cover its local community news," White said.

John H. Huss, director of the Michigan Municipal League, will be one of the speakers on the topic.

A panel of university and government experts will discuss the relationship of the newspaper to local taxation.

PANCAKE SUPPER — Linda Haskins watches as Mrs. George Jones and Mrs. Norman VanWormer practice making pancakes for the annual pancake supper to be held from 5:30 to 7:30 p.m. Thursday at the Drayton Plains School.

The affair is sponsored by the school's P.T.A. An open house will be held from 6 to 8 p.m. for parents of the children from the kindergarten through the 6th grades.

Rayma and Cecilia Werden, all of Lapeer, and Walter LaRoy, at home, and one brother, Earnest.

LEONARD F. CARTER

Leonard F. Carter, 79, of 185 W. Howard St. died suddenly yesterday at his residence.

A stone mason, he was a member of Central Christian Church and a life member of the Masonic Lodge. Surviving are four children, Mrs. Grace Granger, Mrs. Ethel McFee, William and Joe L. Carter, all of Pontiac; and three stepchildren, Mrs. Helen F. Keene and Robert Taylor, both of Fresno, Calif., and Mrs. Rosalie Fitzwater of Indiana. Service will be at 2 p.m. Friday from Central Christian Church with his pastor, the Rev. G. W. Gibson, officiating. Burial will be in Perry Mt. Park Cemetery. His body will be at the Sparks-Griffin Funeral Home until noon Friday, when it will be taken to the church.

The rabbit, hare, beaver, coyote and sheep are used mostly for fur in making men's hats. The coyote is a member of the other family.

Moved Homes Eyed by City

Proposed Ordinance Requires Houses Meet Proper Standards

Homes moved from one site to another in Pontiac must be brought up to proper building standards within six months after the ordinance, under a proposed ordinance introduced before the City Commission last night.

"This will prevent moving a dilapidated building from one place to another," said City Attorney William A. Ewart.

Read by title only Tuesday night, commissioners are expected to take final action on the law next week.

It was drafted by the city's committee on substandard housing. Persons wishing to move a structure must provide a \$1,000 cash deposit, in addition to a permit fee of \$25, which will be forfeited if the owner fails to bring the building up to standards within six months.

Guilty of Embezzling

SANDUSKY (U) — Raymond L. Loeding, treasurer of Buel Township, pleaded guilty Tuesday to embezzling \$3,000 in township funds. Circuit Judge Arthur M. Bach set sentencing for Dec. 18.

Oldest Civil War Vet Marks Birthday

HOUSTON, Tex. (AP)—Music-loving Walter Williams, the oldest living Civil War veteran, celebrates his 115th birthday tomorrow. A Western band will play some of his favorite tunes.

The white-haired, tobacco-chewing Confederate veteran is three years older than John Salling of Slant, Va., the only other living Civil War veteran.

Williams' daughter Mrs. Willie Mae Bowles said a small party with the band, cake and some punch was planned. Friends were expected to drop by all day but no big celebration was planned.

Williams has always loved music. Bed-ridden for the past six months, he keeps a radio near his bed and turns it on loud when listening to music.

He rode in an ambulance during the Veterans Day parade Monday and said he enjoyed listening to the bands and hearing the crowds.

YOU MAY HAVE PIN-WORMS AND NOT KNOW IT!

Fidgeting, nose-picking and a tormenting rectal itch are often tell-tale signs of Pin-Worms... ugly parasites that medical experts say infect one out of every three persons examined. Entire families may be victims and not know it.

To get rid of Pin-Worms, these pests must not only be killed, but killed in the large intestine where they live and multiply. That's exactly what Jayne's P-W tablets do... and here's how they do it:

First—a scientific coating carries the tablets into the bowels before they dissolve. Then—Jayne's modern, medically-approved ingredient goes right to work—killing Pin-Worms quickly and easily.

Don't take chances with this dangerous, highly contagious condition. At the first sign of Pin-Worms, ask your druggist for genuine Jayne's P-W Vermifuge... the small, easy-to-take tablets perfected by famous Dr. D. Jayne & Son, specialists in worm remedies for over 100 years.

Stevenson Shows Extreme Caution on Taking Foreign Policy Advice Post

By JAMES MARLOW
Associated Press News Analyst

WASHINGTON (AP)—Adlai Stevenson sounds as cautious about helping the Eisenhower administration on foreign policy as a man walking barefoot through a field of broken bottles.

Stevenson, a little like Hamlet sometimes in trying to make up his mind to do or not to do, issued a very carefully phrased statement on the help he'd give.

He stated his position only after the White House erroneously said he had turned down a suggestion that he help.

But since Stevenson is a handy man with the English language, his phrasing is hardly an accident. Translated into very simple English, it sounds like: "I don't want to stick my neck out too far."

At the same time President Eisenhower, who wanted Stevenson's help, played just as cautious about asking him. In fact, he didn't ask him. He had Secretary of State Dulles do it.

This is an old story with the Eisenhower administration. The same kind of thing happened with former President Truman, whose relations with Eisenhower have been frigid since 1952.

Early this year Greece and Turkey, planning to celebrate the 10th anniversary of the help Truman started giving them in 1947, wanted him to visit, both countries in March. They told the Eisenhower administration.

Eisenhower talked it over with Dulles. But it was Dulles, not Eisenhower, who sent the invitation.

Economic Dip Slowly Widens

Reflected in Steels, Oil, Cuts in Textile Output, White Collar Jobs

NEW YORK (AP)—Slowly but surely the slight dip in industrial activity which began last spring is widening out today—even as the stock market foretold.

It shows in figures from the steel and oil industries, in textile output cutbacks and weak prices, in factory employment, and even in starting to tinge the white collar worker's outlook.

Consumers continue to spend as much or more for goods and services. But many manufacturers are finding they must produce fewer units if they are to keep their stocks from rising. Higher prices and more use of services color the consumer spending totals.

The economy is still riding high and no great drop is feared. But every month new segments of the economy enter into the current breather.

Steel production this week is lower than at any time since early August 1956, when it was affected by the summer strike.

The oil industry is being warned that a rough year may be ahead. Demand still tops last year but not by the margin expected.

Troubles of the overcrowded textile industry have brought some new price weakness in some lines.

to Truman. Truman rejected it, saying he had other engagements. Then the State Department said both Eisenhower and Dulles regretted Truman's decision.

When Eisenhower goes to Paris next month to try to glue American alliances tighter, he'll be in a ticklish spot. He'll need as much solid American backing as he can get, from Democrats as well as Republicans.

Dulles asked Stevenson for help in working out a policy for Paris. Stevenson, although he lost two presidential campaigns, still is titular head of the Democratic party.

But he can't speak for all Democrats, least of all for the most important Democrats between elections: The Democrats in Congress. If they don't like the policy produced at Paris, they'll be free to criticize.

If Stevenson helps make that policy, and the Democrats don't like it, he's in danger of being blasted along with Eisenhower from inside his own party.

Pleads With Girl on Bar Phone, Kills Himself

PHILADELPHIA (AP)—A young man strode into a west Philadelphia taproom the other night, called for a stiff drink, gulped it, then made for a public telephone at the far end of the bar.

He was on the phone two hours, bartender William Alexander said, pleading with a girl not to break off their romance.

Customers caught snatches of desperate entreaty—"Let's try to patch things up, please... You've got to take me back... I'll kill myself if you don't..."

He signaled for another drink, but did not stop talking, threatening. Shortly before midnight the caller slammed down the receiver and went out a side door into the street.

A few minutes later he threw himself under a tractor-trailer and was killed.

Detective John Keenan said the man was 27-year-old Benjamin F. Major.

Dangerous Gas Leak Closes High School

SAN ANTONIO, Tex. (AP)—The Harlandale High School was closed today while repairmen tried to find a severe gas leak.

Supt. Dillar McCollum ordered the move late yesterday to protect the school's 1,250 student.

McCollum said the leak allowed seven cubic feet of gas to escape each hour. He said the gas meter was sealed for the night and all heating cut off yesterday.

Students were taken to other schools in the area.

The gas leak was discovered by a student who smelled gas while in the school bathroom.

Repairs are being made by a gas company.

The school is expected to be closed for several days.

Man in Space Thinking Cited

But Project's Reality Called Long Way Off by Air Force Scientist

WASHINGTON (AP)—An Air Force general says the United States already is doing some preliminary thinking about a manned space ship — although such a project still is a long way off.

Brig. Gen. H. F. Gregory, commander of the Air Force Office of Scientific Research, said in a speech yesterday: "Although it may be somewhat early to be building manned space ships, it is not too early to be thinking about exploratory research in this area."

"In fact we have been doing it for some time," Gregory described the Air Force project Farside, a recent series of rocket tests, as "one of many efforts that will be required for the successful conquest of space."

The Air Force has said previously that six rockets were fired in the Farside tests in the Pacific and there have been unofficial reports that the sixth shot went more than 4,000 miles into the sky.

Former President Harry Truman, in Washington to attend a luncheon in his honor, told newsmen: "We had a missile program before I left the White House — it was broken up after I left."

But about the same time, Sen. Bennett (R-Utah) issued a statement saying the Truman administration must be blamed "for our lack behind the Russians in the ballistic missile field."

"The record of the Truman administration on missiles reveals a monstrous neglect bordering on the criminal," Bennett said.

"The Truman legacy was so deplorable that the Eisenhower administration had to start virtually from scratch to begin to catch up with the Russians."

Gas Street Lamps to Burn Round Clock in Philly

PHILADELPHIA (AP)—Philadelphia, which still has 7,500 gas street lamps scattered on many of its narrower lanes and alleys, has decided it can save money by letting the lamps burn day and night.

Streets Commissioner David N. Smallwood told city councilmen yesterday the city could save \$100,000 a year by dispensing with a \$29 yearly cost per lamp for an automatic system to turn the gas off each morning and on again at night.

Believes Laika Brought Back to Earth Alive

SPOKANE, Wash. (AP)—The dog aboard Sputnik II probably has been brought back to the earth alive but the Russians aren't talking about it because of military implications, the president of the International Astronautical Federation said last night.

Andrew G. Haley of Washington, D. C., said he based his belief partly in the difference in the radio code pattern of the two Russian satellites.

Sputnik I gave out signals until its battery wore down, he said. The beeping from the larger Sputnik II ended sooner and suddenly, as if connections were broken or instruments destroyed by the ejection of the dog.

Haley, who spoke at Gonzaga University on a lecture tour, did not spell out the military implications.

Paper Snakes in Can of Candy Worth \$25,000

LOS ANGELES (AP)—When Mrs. Bertha Ekman opened the can labeled "peanut brittle" she found it wasn't, and the judgment she got from a jury wasn't peanuts, either.

The jury awarded her \$25,000 yesterday. Mrs. Ekman had testified that when she opened the phony can of peanut brittle, paper snakes sprung out at her.

She sued Wilmington, Calif., cafe owner James Munson for \$117,250, claiming that the shock caused her to fall backward and that she required hospitalization four times as a result.

Munson contended his customers should expect such practical jokes.

Jewelry Worth \$7,000 Recovered for Actress

ANGELES CAMP, Calif. (AP)—Actress Rhonda Fleming got her jewelry back last night after it turned out the small aluminum suitcase wasn't lost but only misplaced.

She said the case held about \$7,000 worth of cameos she was to wear in a picture being made in this gold country area.

Someone had sent the aluminum case with camera equipment in it instead of with the baggage.

Priest Designs 'Dream Car'

Built to Stress Safety, Auto Becomes Menace on New York Streets

NEW YORK (AP)—A "dream car," designed by a Roman Catholic priest to emphasize safety, turned into something of a traffic menace when it arrived here yesterday.

The unusual-looking auto, hand-built by the Rev. Alfred Juliano, taxed the patience of policemen. Inquisitive motorists, anxious to get a better look, crowded perilously close to the car. Photographers, searching for the proper angle for a picture, stepped into lanes of oncoming traffic.

Policemen finally prevailed on Father Juliano, a 37-year-old member of the Holy Ghost Fathers, to park the car in a midtown garage.

The car, named the Aurora, took 9½ hours to make the trip from New Haven, Conn., to New York City — normally a two-hour trip. It broke down 15 times and had to be towed seven times.

Father Juliano designed the car with the consent and assistance of his superiors. His purpose, he said, was "to combine function with safety" because the American people "won't pay for safety but they will pay for style."

The car, he said, would cost \$15,000 and was developed from a plan for a combination automobile and airplane, which he is still designing.

The repeated breakdowns on the road to New York City were caused by a clogged fuel line, Father Juliano said. He attributed the clogging to the engine's not having been run for three years while the body was being built.

The car's design is authentically futuristic. It features a completely transparent roof. Its windshield is a large bubble that juts forward, and the grille is an air scoop that resembles a jet plane.

The priest plans to put the car on tour of 120 major cities. He said he turned down a designing job with General Motors when he was 18 to continue his religious education.

Hal Boyle Says:

Brando Sees Films as Potential for Peace

NEW YORK (AP)—Marlon Brando at 32 a figure of world recognition, is an actor in search of his life role.

He has been phenomenally successful. He says this about the impact of success on him: "I have not been so impressed so much by how I have changed as I have been by other people's attitudes toward me."

Brando is a full-lipped, short-haired, wide-hipped man who in a few short years has become perhaps the most acclaimed actor since John Barrymore, gifted with a talent as recognized among fellow actors as by the public.

In his latest film, he plays a young American jet flier who discovers, for him at least, that it is better to marry the Japanese girl he loves than to leave her behind. He is a Southerner. The theme of the film is how love can rise above race prejudice.

The picture is based on the novel by James Michener. There are rumors around that Brando himself may make a million dollars from the film.

He says, aside from money, that Hollywood has done itself and America a disservice because too often it is potentially the best pos-

sible instrument of communication with foreign people—but has failed to communicate.

"It behooves us to do what we can to improve our relations with other people who, in a short time, we may find our lives interdependent with," he said.

After an overseas stint during which he made two pictures in Japan and toured Southeast Asia, Brando feels that people in those areas judge America by its movies and that the movies, by more realistic dramas about world problems and prejudices, can improve

mutual understanding and fare well also at the box office.

Brando himself has made one kind of adjustment to fame. "I have given up stating the pros and cons about myself," he said. "I'd just as soon let people come to their own conclusions—and let it go at that."

Brando today is a pleasant, wary, self-guarded, unsure, impulsive, multimillion-dollar property still exploring his moat. Asked how success had affected his life, he said:

"It's a dangerous position to be in, from the standpoint of main-

taining a sensible perspective on yourself in relation to other people.

"It grows like coral does. You don't see it until the tide of circumstances goes out and reveals a whole network."

"I think I have learned, as a result of being successful, how frighteningly important it is to most people to be regarded as successful. Not many people care about your growth, or lack of it, as a person."

"People hate you for no other reason than that you are successful, and they like you for no other reason."

Ike Would Like Gruenther Back

To Give General Time for Financial Security Before Serving Again

WASHINGTON (INS)—President Eisenhower, although eager to utilize Gen. Alfred E. Gruenther's brilliant talents in the missile race, does not intend to ask him to return to public duty before next year.

The resignation of "Peace Secretary" Harold Stassen is not yet on the President's desk, but is expected momentarily. Stassen plans to throw his hat into the Pennsylvania gubernatorial ring and, if successful, to campaign for the GOP presidential nomination in 1960.

An unimpeachable source said everyone in the White House would be "thrilled" to enlist the public services of Gruenther, but that Ike feels he has no right to request him to "make the personal sacrifice" at this time.

He said Gruenther has some pressing financial problems which make it imperative for him to remain for the time being as president of the American Red Cross, a job which provides a free residence, a generous expense account and a reported \$35,000 yearly salary.

"It's the old story of government salaries being too low to attract top-flight men, unless they have some private means," the source shrugged.

WON'T IMPOSE BURDEN
Ike, who thinks so highly of his former NATO chief of staff that he has privately listed him as a "superb" presidential possibility, is too fond of Gruenther to impose the financial burden unless he feels it is absolutely necessary to the nation's security.

Several high-ranking Senators have suggested the appointment of Gruenther, a brilliant strategist, as missile czar. Ike is known to share their views, but is disposed to give his old friend a little time to achieve financial security before pressing him into service.

Another top source said Ike is also interested in re-enlisting in government service such outstanding civilians as Chrysler executive K. T. Keller and General Motors scientific genius Charles Kettering.

He added that the President will wait, however, until his new science czar, James R. Killian, has had an opportunity to map his needs and chart the essential new jobs to be created under the expanded missile and satellite programs.

Junior Editors Quiz on BARBER POLES

QUESTION: Why Does the red and white pole stand before your barber shop?

ANSWER: Many years ago in England, barbers also were surgeons, since they were experts with knives.

Before his shop, as a sort of advertisement, each barber set up a red pole with a white strip of cloth wrapped around it. This represented the blood and bandages in surgery.

It's been a long time since a barber practiced surgery. In fact, modern barbers are ashamed if they cut a customer slightly, by accident. But the red and white pole remains as the symbol of the barber shop.

FOR YOU TO DO: Next time you get a haircut, ask your barber if he knows the story behind his barber pole.

(Thomas Ball of Ottawa, Ohio, wins \$10 for this question. Send yours on a postcard to Violet Moore Higgins, AP News-features, in care of this newspaper.)

Deans of 4 Universities Reported as Preparing Sweeping Changes

NEW YORK (AP)—The Wall Street Journal said today that deans of Harvard, Columbia, Duke and Toronto have prepared a report proposing sweeping revisions in university graduate school programs.

Their object, the Journal said, is to enable more students to study for advanced degrees and to improve the quality and prestige of degree holders.

The story also said the project is an attempt to meet America's soaring demand for experts.

The deans will strike hard at the "tortuously slow" Ph. D. program. Some students now stretch their doctorate work over many years. The deans will recommend that the program be reduced to a maximum of three or four years, with rare exceptions for those studying part-time.

This will clear the way for a rejuvenation of the master's degree, which the deans believe often is considered an academic consolation prize.

Signers of the report, submitted to the Assn. of Graduate Schools, are: Jacques Barzun, dean of the graduate faculties at Columbia; J. P. Elder, dean of Harvard's graduate school of arts and sciences; Marcus E. Hobbs, dean of the graduate school of arts and sciences at Duke; and A. R. Gordon, dean of Toronto's graduate school.

Confidential Magazine Charges Dismissed

LOS ANGELES (AP)—A conspiracy charge against 11 individuals and three corporations connected with the publication of Confidential magazine has been dismissed.

The dismissal motion by defense counsel Arthur J. Crowley was granted yesterday by Superior Judge H. Burton Noble. The prosecution raised no objections.

A two-month trial of the case ended last summer with the jury deadlocked 7-5 for conviction. The defendants were accused of conspiring to commit criminal libel.

It takes a **GIANT** to keep America on the go

There are only 41,785 new car dealers in the U.S. to serve more than 49,000,000 car-craving families. Yet these comparatively few dealers perform a giant selling job in moving more than 6,000,000 new cars a year worth well over \$15,000,000,000!

There are only 1,761 daily newspapers in the U.S. Yet every day they roll out more than 58,000,000 copies to do a herculean job of helping to sell America's automobiles.

Car dealers and daily newspapers have much in common. Both are upstanding local citizens vitally interested in local affairs. Back of almost

every civic drive you'll find the local car dealer supporting it with all his weight. And right beside him, backing civic endeavors with equally ardent support, is the daily newspaper.

Car dealers, like others, have learned that the daily newspaper puts plenty of weight behind an advertiser's sales message, too. That's why newspapers, each year, carry the biggest share of automotive advertising. Use this giant to put the weight behind *your* advertising.

All business is local . . . and so are all newspapers.

Wiethorn Tells Plant Changes

Fisher Body Division Is Promoting Crosbie, Burns and Conner

T. F. Wiethorn, plant manager of the local Fisher Body Division plant today, announced the following organization changes.

A. W. Crosbie, formerly superintendent of material control at the Oakland California Fisher Division plant, has been promoted to the position of superintendent of production and material control.

Crosbie is a veteran of 31 years of service with Fisher Body, having served in executive capacities in Oakland, Grand Blanc, Michigan and Detroit General Offices.

S. T. Burns, supervisor of labor relations at the local plant, has been promoted to the position of director - industrial relations at the central engineering activity, located at the Fisher Technical Center.

Burns joined the local plant in 1934 and held various positions in the industrial relations department. In 1943 he was assigned to the labor relations section, and became supervisor over that section in 1946.

A. V. Conner, supervisor - labor relations at the Fisher Body Livonia plant, will replace Burns. Conner joined the Fisher Body Pontiac Plant in 1949 as a member of the labor relations staff. In 1954 he was transferred to the Livonia plant.

Conner attended Pontiac High School and is a graduate of Michigan State College.

NLRB Rules Out 'Hot Cargo' Contract

WASHINGTON (AP)—The National Labor Relations Board has ruled that "hot cargo" contracts between unions and common carriers violate the Taft-Hartley law.

The question of the validity of such agreements has been before the board previously, but yesterday's 3-2 decision marked the first time the NLRB has declared the contracts valid and enforceable in 1949.

A hot cargo clause generally provides that employees may refuse to handle goods which the union brands as "unfair."

The ruling yesterday concerned Teamsters Union Local 728 in Atlanta, Ga. The board found that the local violated Taft-Hartley's ban on secondary boycotts by telling its members they could refuse to handle shipments from the Genuine Parts Co. of Atlanta.

The hot cargo clauses have been included in Teamster contracts with many truck firms.

400 Millionaires Attend Oil Meeting

CHICAGO (INS)—A survey of oilmen attending the 37th annual meeting of the American Petroleum Institute today showed two men in the above \$100 million class and about 400 millionaires.

Also among the 6,500 men at the four-day meeting is George F. Getty of New York, one of the sons of J. Paul Getty whose fortune has been estimated by a national publication to be the largest in the U.S. — \$700 million to \$1 billion.

The "big" oilmen at the API meeting are H. L. Hunt of Dallas, who reportedly is worth \$400 million to \$700 million and John Mecom, Houston, Tex., whose holdings have been estimated at between \$110 million to \$200 million.

When asked if the 400 estimate for millionaires attending the meeting was correct, Sid Siteman of Marine Petroleum, St. Louis, replied:

"Yes, there's at least 400 millionaires at this meeting and most of the others here are making about \$100,000-a-year."

Siteman, one of the millionaires at the meeting, added:

"There's still a big future in oil and if you have the determination and know-how, it's the industry to get into if you want to make a fortune."

Trademark of 'Sputnik' Registered for Vodka

NASHVILLE, Tenn. (AP)—The "Sputnik" trademark was registered with the Tennessee secretary of state yesterday.

"Sputnik" was registered as a brand of vodka ("Made in the U.S.A. from 100 per cent choice American grains") by Double Springs Distillers, Inc., of Bardonia, N.Y. The label carries the slogan: "Fellow traveler—out of this world."

No Action on Dividend

DETROIT (INS)—The board of directors of Briggs Manufacturing Co. of Detroit took no action yesterday on a dividend for the third quarter of 1957.
