- Good morning.
- Here at Oakland University, we put a premium on health care, both through the education we provide to our students, and by offering staff a wide array of health care benefit choices.
- We currently have a total of 2,690 undergraduate students enrolled in health-related programs through our School of Nursing and our School of Health Sciences.
- That figure also includes 209 undergrad students who are enrolled in premed programs through either the School of Health Sciences or the College of Arts and Sciences.

*How students*

- I'm certain ~~they~~ <sup>those</sup> were thrilled last week when we announced our partnership with Beaumont Hospital<sup>s</sup> that will create a medical school on our campus!
- We <sup>also</sup> have a total of 648 graduate students enrolled in health-related programs through the SON and the SHS.
- We're very proud to be taking a prominent role in educating the health-care leaders of tomorrow.
- We also take enormous pride in educating our employees on how to live healthier lives.
- Our innovative Shape Up OU program provides those who enroll in it a 10-month program of nutrition, exercise, health mentoring, workshops, and health assessment, all free of charge.
- The participation rate in Shape Up OU has been tremendous.

- We're pleased that our employees are so committed to practicing healthy lifestyle habits.
- Thank you very much for joining us here this morning.
- Please enjoy the breakfast.
