

Fighting Unfair Foreign Steel Dumping

What is the issue?

*In the past three years alone, steel imports into the United States have totaled 120 million tons and have driven the price of steel so low that at least **19 American steelmakers are currently in bankruptcy**, costing thousands of American union jobs.*

What action did Congressman Rogers take?

*In May of 2001, **Mike wrote a letter to President Bush** asking for an investigation into the continued dumping of foreign steel into the U.S. Since then, President Bush has initiated an investigation by the International Trade Commission, under section 201 of the Trade Act of 1974.*
