 OAKLAND UNIVERSITY WILLIAM BEAUMONT SCHOOL OF MEDICINE
 PUBLICATION LIST BY DEPARTMENT
 2016

This bibliography was compiled to recognize the school's scholarly activity including journal articles, published meeting abstracts, book chapters, books, and other works written by OUWB faculty, students, and staff. It was created by searching the institutional affiliation fields in PubMed, Scopus, Web of Science, Embase, CINAHL, MedEd Portal, Springer, Google Scholar, and Google Books for all citations published in the 2016 calendar year. It was further supplemented with citations from the Beaumont Research Institute's 2016 Report of Accomplishments. Citations were downloaded into an Endnote database, enhanced, and reformatted for this report. Because of search limitations, the report does not represent an exhaustive list of all published works by OUWB authors. If your publication was inadvertently missed, please email the citation to the Medical Library at medlib@ouland.edu. For any questions please call the Medical Library at (248) 370-3772.

Resource of the Month: Clinical Pharmacology

WHAT IS IT? A comprehensive drug database used by more than 2,000 hospitals nationwide, [Clinical Pharmacology](#) contains up-to-date, detailed information on thousands of drugs. Its advanced features allow you to run reports on interactions, search by indication and contraindication, check IV compatibility, and print patient information materials. Other useful resources include hundreds of calculators, drug class overviews, and a drug identifier utility.

HOW DO I ACCESS IT? The link to the Clinical Pharmacology database can be found on the library's [Databases](#) web page and on the [Drug Information and Pharmacology Resources Guide](#).

WHY BOTHER? Clinical Pharmacology is designed as a point-of-care resource to provide fast answers to clinical drug questions. Information is very current, with updates occurring on a daily basis. Other reasons to use the database are:

- Detailed drug monographs, with pediatric versions where applicable.
- Powerful “Reports” feature allows you to quickly check drug interactions, adverse reactions, and run product comparisons.
- Access to [ToxEd](#), a separate peer-reviewed database of clinically-based toxicology information. (Search 'poinsettia' in ToxEd to check out their info sheet!)
- Integration with [ClinicalKey](#), another Medical Library database. Included under “Resources” is a link to the Harriet Lane Handbook, a popular pediatric reference on ClinicalKey.

IS THERE AN APP FOR THAT? Yes! Download the free Clinical Pharmacology App from the [App Store](#) or [Google Play](#).

- If you already have a Clinical Pharmacology username and password, once you install the app, simply log in and you are ready to go.
- If you do not have a username and password, go to the Clinical Pharmacology database and click “Register” at the upper right side of the home page.
- Complete the registration form using your OU email address.
- Login into the App using your new logon credentials.

Please note that Clinical Pharmacology is just one of several drug resources available from the OUWB Medical Library. [Checkout the other resources on the Drug Information and Pharmacology Resource Guide](#) including [Micromedex](#) and [Natural Medicines](#).
