## **OU INC partners with Authen2cate to offer free cyber security seminar**

OU INC is hosting a cyber-security presentation on June 14 targeted to businesses looking to strengthen their cyber knowledge for implementation. Terri Zbyrad, Senior Global Account Executive of Authen2cate, will discuss the future of cyber security, identity and access management, and security breach prevention, and he will demonstrate Authen2cate's Single Sign-On, Multi-Factor Authentication (SSO/MFA) product.

With more businesses relying on computers for recordkeeping and various business functions, it is important to know how to prepare one's company for possible cyberattacks. Attendees will learn how to secure computers and better understand how to maintain the safety of these connected products.

Authen2cate is a global, cloud-based identity-management provider of SSO/MFA and Identity Management Solutions for cloud, web, virtual private network and mobile resources. Born from a team of network-security specialists who saw a need for authenticating cloud applications, Authen2cate offers competitively priced, all-inclusive solutions that allow organizations to authenticate verify individuals accessing cloud resources without adding any extra burden on their information technology resources.

This free seminar, set for 6 to 7:30 p.m. at OU INC, will include a question and answer period. OU INC is located on the campus of Oakland University in the Shotwell Pavilion at 419 Golf View Lane in Rochester.

Those interested in attending the June 14 seminar are asked to register in advance via the official **OU INC registration link**. For more information, contact Alicia Linn at [alinn@oakland.edu](mailto:alinn@oakland.edu) or (248) 648-4828.
