Grizz Facts: A look at student satisfaction

Every two years, OU students participate in the National Survey of Student Engagement and share their opinions on a variety of important topics including student satisfaction. In general, Oakland students report high levels of satisfaction with their overall experience.

The charts below show the differences in ratings for first-year (Chart 1) and senior (Chart 2) students. In general, first-year students, females and students other than underrepresented minority students report higher satisfaction than seniors, males and underrepresented minority students. There are also variations in satisfaction between first-year and senior students by school and college.
