Michael Latcha

Michael Latcha, associate professor of mechanical engineering, has consistently stepped forward to fulfill the vital need the School of Engineering and Computer Science (SECS) has had for service.

He led the preparation for the upcoming Accreditation Board for Engineering and Technology (ABET) visit with an overhaul of the school's assessment process, including development of program objectives, program outcomes, student exit interviews and online course evaluations.

When the SECS Web site fell out of date, Latcha participated in the development of a completely modern site. He also served for eight months as acting associate dean when the school needed one and delivered an outstanding performance.

SUMMARY

Michael Latcha, associate professor of mechanical engineering, has consistently stepped forward to fulfill the vital need the School of Engineering and Computer Science (SECS) has had for service.
