Djamel Bouchaffra

Assistant Professor of Computer Science and Engineering, SECS

Djamel Bouchaffra's teaching is exemplary and his humanity is evident in the way he mentors and prepares students. He truly cares about each student's learning experience and demonstrates the utmost knowledge, passion and commitment in the classroom.

In addition to spending hours outside of the office helping students, Bouchaffra utilizes educational techniques that require students to become actively involved in the learning process, making the university experience both exciting and momentous. With courses that focus on challenging and demanding subjects, such as pattern recognition, soft computing, discrete mathematics and artificial intelligence, he creates an environment that helps students succeed in real-world experiences.

Bouchaffra has written several papers in peer-reviewed conferences and premier journals, chaired numerous conference sessions and served as a regular reviewer for esteemed journals.

SUMMARY

Djamel Bouchaffra's teaching is exemplary and his humanity is evident in the way he mentors and prepares students. He truly cares about each student's learning experience and demonstrates the utmost knowledge, passion and commitment in the classroom.
