## Lunjin Lu

Lunjin Lu, assistant professor of computer science and engineering, had several outstanding achievements last year. His most important was receiving the National Science Foundation's CAREER Award for his proposal "An Integrated Framework for Semantic-Based Analysis of Logic Programs." The Faculty Early Career Development program is the NSF's most prestigious award for a new faculty member.

Lu graduated from the University of Birmingham, England in 1995 with Ph.D. in Computer Science. Before joining Oakland in fall 2000, Lu held post-doctoral and visiting positions at Ecole Polytechnique, France, Ben-Gurion University of the Negev, Israel, the University of Waikato, New Zealand, and Southwest Texas State University. Lu's specialty is in programming languages and his research interests include semantic-based program analysis, constraint and logic programming, program debugging and programming environments.

### SUMMARY

Lunjin Lu, assistant professor of computer science and engineering, had several outstanding achievements last year. His most important was receiving the National Science Foundation's CAREER Award for his proposal "An Integrated Framework for Semantic-Based Analysis of Logic Programs." The Faculty Early Career Development program is the NSF's most prestigious award for a new faculty member.
